Saturday, August 25, 1866.

Stock Exchange and Money Market.

The demand for money, which was comparatively moderate early in the week, has increased materially, within the past two or three days. In the anticipation of the requisitions of the Treasury Department, to meet the claims of the depositors in the National Treasury on the temporary loan account, which must be paid off by Monday next, August 27, when deposits will cease to bear interest, under the recent notice of Secretary McCulloch, the National banks and other public debtors, are calling in their loans, thus lessening the available supply of funds in the open market, and tending to stiffen loan and discount rates. Last week, accommodation was more freely offered than it was needed; this week, borrowers have to exercise some industry in providing for their pecuniary wants. Call loans are now quoted at from 4@6, generally at 5 per cent.; prime discounts at 6@7 per cent. per annum. Thus far, only a small amount of the temporary deposits in the Sub-Treasury in this city have been withdrawn. During the coming week, all such deposits will doubtless be recalled, to be profitably employed elsewhere. Such employment, pending the full revival of general business can only be reached through the form of call loans to Stock Exchange operators, or of investments in National securities. Hence, after a few days of "flurry," shifting of loans and apparent stringency, a restoration of ease in money and buoyancy in stocks is confidently looked for. All the Treasury measures and regulations tend in this direction—as a flexible Money Market is essential to the success of the funding policy of Secretary McCulloch. The views expressed by this gentlemen in responding under date of August 18th, to an invitation to accept the hospitalities of some of the leading business men of Boston, and which are given at length in another part of our present issue, are essentially such as we have urged, through these columns, from time to time as opportunity served.

The revenues of the Government, from customs and excises, continue on a liberal scale. Last week's income from internal revenue, was $8,100,291, and thus far this week, $2,895,777. Since the commencement of the current fiscal year, July 1, the receipts from this source have exceeded $55,000,000, or over a million a day, and equal to about three hundred and eighty millions a year. Last week's customs revenue at all the ports of entry could not have been less than three and a half million dollars, or equal to a yearly aggregate of about one hundred and eighty-two millions in coin, which, with gold at 145, would represent about two hundred and sixty-four millions in currency; and which would make the new fiscal year's revenues from customs and excises equal to the enormous sum of six hundred and forty-four million dollars in lawful money. We, of course, do not anticipate that these sources of revenue will yield as freely all through the year, as at present. We do, however, feel confident that the national income, in the current fiscal year, will reach five hundred and twenty millions, or a weekly average of about ten millions. Government last week disbursed $9,817,359 on account of the three principal executive departments, chiefly in liquidation of claims in arrears, and only recently audited. The cash balance in the vaults of the National Treasury at Washington last Saturday was $139,212,114, including of United States, legal tender, $7,800,000, National bank notes, $2,625,078, fractional currency, $226,922, gold, $323,659, silver, $2,560, nickel coin and cents, $147,000, reserve fund, temporary loan, $42,000,000, and reserve fund, surplus U. S. notes, $86,232,425.

The U. S. Sub-Treasury receipts, week ending with Aug. 18, were $13,639,422, including $2,461,877 from customs duties; payments, $11,262,202; balance at the close of the week, $88,816,665, against $86,439,415 at the close of the preceding week. The business of the Office during the first two days of the current week, was as follows: Monday, receipts, $9,520,299, and payments, $9,581,457, Tuesday, receipts, $3,368,291, and payments, $1,140,382. The balance at the close of business on Tuesday stood at $90,983,416, against $87,549,292 a week ago.

The city banks, last week, increased their loans $3,688,861; circulation, $268,382, and deposits, $78,313; while losing $2,061,762 of the legal tender reserve, and $878,688 of their specie. Their legal tender reserve is now $84,800,071, or about the same as at the close of July; their specie re-

serve is down to $7,545,513, the lightest aggregate since June 30th, when the specie store of the banks was $7,797,218. Their loans are up to 261,951,924, or greater than they have been in five months. Their deposits reach $214,310,576. The Bank Exchanges at the Clearing House, through the past week, averaged $92,442,557 a day, against a daily average of $87,204,469 the preceding week; and $82,468,496 the week ending with Aug. 4th. The current week's exchanges verage over $108,623,064 a day.

Favorable news from Europe, especially for American securities abroad, have operated against the Gold speculation, which has been essentially weak and sluggish through the week. The price receded from 152 on the 16th inst., to 147¼ on the 21st inst., or nearly 5 per cent. On Wednesday there was rather more speculative activity, and a rally in the price from 147¼ at the opening to 149⅛ at the close. The export demand has been very limited. On Saturday, the specie shipments were only $66,280, and Wednesday's only $40,000; making the total, since our last, only $106,280. The total exports of specie, hence since Jan. 1, have been $52,095,136, against $19,217,381 same time last year. The *Northern Light* from Aspinwall, reached this city on Tuesday, with a California specie freight of $3,091,600; an unusually heavy amount. This makes the receipts of California gold at the port of New York since Jan. 1, $27,375,321, against $10,740,851 same time last year. The customs revenue (in coin) of the Government, through this port, last week, reached $2,461,877. The coin certificates issued by the Sub-Treasury amounted to $2,064,000. A failure of a *bull* operator in the Gold Room was announced on Monday. It has been authoritatively stated that, in view of the extraordinary heaviness in the foreign exchange market, orders had been transmitted to Europe for gold, to be used here in the purchase of cotton, etc., for export. This statement had its influence in breaking down the gold speculation.

Government securities have been in active request, opening at very bouyant prices, but closing with some degree of heaviness, in view of the temporary ease, a full restoration of which is anticipated within the coming week. Sixes of 1881, and 5-20s of 1862 are in comparatively light supply. The latter continue in good request for shipment to Europe. 5-20s of 1865, and 7-30s are offered in larger amounts, and are most unfavorably effected by the change in the money market, adverse to borrowers. Conversions of Seven Thirties (of the August issue) into new 5-20s through the U. S. Sub-Treasury at this port, since Aug. 1, have reached nearly ten million dollars.

There has been decidedly more activity in Railway and miscellaneous property, and a notable rally in prices, under liberal speculation and investment purchases; but, toward the close, the market showed less firmness, under extensive realizations, partly from apprehensions of stringency in money. The reports of earnings on the principal railroads continue quite encouraging, and promise well for the future of the stock values.

Foreign Exchanges continue very seriously depressed, with a supply of bills largely in excess of the requirements of purchasers, and the tendency is against an early rally in the market. Prime bankers' sixty day bills on London have been quoted at 107⅛@107⅜, and on Paris at 5.30@5.25; sight bills on London to 108⅛@108⅝; and on Paris to 5.26¼@5.22½. The week's exports of domestic produce and miscellaneous goods have been to the currency value of $2,482,421, against $3,303,616 same week last year. The exports since January 1, have been to the value of $127,501,500, or about twenty-eight million dollars in excess of the exports, same time last year.

In general business, there has been a fair, though not very active, movement. The breadstuff and provision interest opened buoyantly, but closed tamely and heavily. The main export trade is in corn and cheese. Of the latter, the outflow is very extensive at present. In cotton there is increased heaviness, under unfavorable foreign market reports, and good crop news. The week's exports of cotton have been 2,674 bales from this port, and 7,500 bales from all the shipping ports, leaving an available supply of 120,000 bales here, and 260,000 bales at all the shipping ports. The total exports of cotton from the United States, since Sept .1, 1865, have been 1,517,000 bales. Foreign merchandise, exhibits rather more animation, chiefly in the Dry Goods, Grocery, and Metal branches, with increasing firmness in prices. The total imports of foreign dry goods, last week, were $3,867,157, and the total amount marketed $3,179,363. The value of foreign merchandise imported last week, was $3,480,415—making the grand total value of last week's imports of dry goods and merchandise, $7,347,572, and since January 1, $201,077,199, against $115,446,898 same time last year.

The latest quotations at the London Stock Exchange compare as follows with former returns:

	Aug. 17.	Aug. 20.	Aug. 22.
Consols	— @88	— @88¼	88¾

New Fastenings for Railway Rails.

E. Beatty Graff, Esq., of Baltimore has invented a new fastening for railway rails, for which a patent has just been allowed. He claims that his invention will prevent the rails from rising up at the ends or joints, the wheels from striking the ends of rails, the jolting of cars, spreading of rails and the track from creeping; it divides the space usually allowed for expansion, makes a continuous rail, is a great saving of ties, dispenses with all chairs and fastenings now in use, and that in this fastening is combined all the fastenings now in use by railways,

Coal Supply for Buffalo.

The city of Buffalo has voted a loan of $200,000 in aid of the Buffalo and Washington Railroad, extending from Buffalo 102 miles to Emporium on the Philadelphia and Erie road, 150 miles east of Erie, with a view of securing a cheaper and more abundant supply of coal; and as there is every prospect, from the liberal individual subscriptions already made, of the road being speedily undertaken, it is claiming much interest among capitalists having investments in the coal fields in that section of Pennsylvania, and through which the Philadelphia and Erie road runs for a distance of 100 miles. Some are urging Johnsonburg, 40 miles west of Emporium, as the most feasible point of intersection with the Philadelphia and Erie road, thus avoiding the heavy grades encountered both east and west of St. Mary's, and penetrating the richer fields of the Johnsonburg, Shawmut, Dagoscahonda and Tanandale companies, while the people of Warren, 50 miles farther west, are laboring earnestly to divert the new enterprise to that point, claiming for Warren and Forest counties richer and more extensive veins of bituminous coal than can be obtained farther east. The route they propose is that of the Warren and Pine Grove Railroad, running from Warren up the Conowango and Cassadaga valleys to the head of Cassadaga Lake, and thence to Dunkirk and Buffalo, making the route from Warren to Buffalo 87 miles, and with the Allegheny Valley Railroad completed, forming a continuous route from Pittsburgh through the rich mineral region of the Alleghany valley to Buffalo and Rochester. It is alleged against the Emporium route, that to overcome the summit dividing the waters of the Susquehanna and Allegheny, a grade will be encountered averaging 63 feet to the mile for fourteen miles, while on the other route the maximum grade in no case exceeds fifteen feet to the mile.

Railways in Pennsylvania.

There is much activity in railway enterprises in various parts of the State of Pennsylvania. The Lehigh Valley Railroad and the Lehigh Coal and Navigation Companies are pushing their respective roads westward from White Haven to the Susquehanna at Wilkesbarre, both crossing the mountain at Salomon's Gap, from whence the former diverges to the South and the latter to the North. The latter company are also making good progress on their road from Mauch Chunk to Easton, and the entire line, including the bridge over the Delaware, will be completed during the coming year, thus opening their mines to the winter markets. The road of the North Branch Railroad and Canal Company from the Barclay mines near Towanda, to Waverly on the Erie road, is nearly completed. The Pennsylvania Railroad have nearly completed a freight line, 32 miles in length, on the west bank of the Allegheny, connecting the Pittsburgh, Fort Wayne and Chicago Railway with the Blairsville branch of their road at Freeport, and by which the road will be relieved of the pressure of accumulating freights from other roads and the river at Pittsburgh, and also save some 30 miles in transportation. The Warren and Franklin Railroad, from Irvineton on the Philadelphia and Erie road, to Oil City, 51 miles, was opened on the first of August, and affording as it does, the shortest route from New York and Philadelphia to the oil region of Venango, is already crowded with freight. By this road, and the Philadelphia and Erie, and Catawissa roads, the distance from New York to Oil City is reduced to 475 miles, against 524 miles via Salamanca and Titusville, and 554 miles via Meadville and Franklin, and a large portion of the oil product for this market must in consequence take the Pennsylvania route. The road has been constructed in the short period of seven months, ground having been broken upon it on the 23d of December last. It passes directly through all the chief sources of supply, including Tideoute and Oleopolis at the mouth of Pit Hole, and operated, as it will be, in connection with the narrow gauge road of the United Petroleum Farms Association of this city, extending from Oil City to Petroleum Centre, a distance of eight miles, promises to become one of the most remunerative short roads in the country. Ten trains, including passenger trains, are now run over the road daily, and in a few days will be increased to fourteen. The oil product the present year, exhibits a large increase over last, notwithstanding the heavy losses by fire. The quantity sent to market exceeds that of last year to the present time by upwards of 700,000 bbls., and there are now in store in the Venango region at least 150,000 bbls. that has been withheld from market in consequence of the prevalent low prices.

Chicago, Rock Island and Pacific R. R. Co.

The Chicago and Rock Island Railroad Company has been consolidated in accordance with the laws of Illinois and Iowa, and in pursuance of the written consent of a large majority of the stockholders, with the Chicago, Rock Island and Pacific Railroad Company of Iowa. The latter Company is the purchaser and owner of the Mississippi and Missouri Railroad, and of all the equipments, lands and all other property heretofore belonging to the Mississippi and Missouri Railroad Company. The name of the consolidated Company is "The Chicago, Rock Island and Pacific Railroad Company." No more certificates of the Chicago and Rock Island Railroad Company will be issued, but upon the surrender of the outstanding Chicago and Rock Island Certificates of stock, new certificates of stock of like amount of the consolidated Company will be issued and delivered to the parties making such surrender, or to such parties as it may be transferred to upon the books of the Consolidated Company. We understand no delay will take place by reason of the consolidation, as the new Company are ready to issue Certificates at once. The capital stock of the consolidated Company is only $100,000 more than that of the Chicago and Rock Island Company, that being the amount of capital stock required to be issued by the Iowa Company, but the $100,000 belongs to the Chicago and Rock Island Railroad Company, so that there really is no increase of stock.

☞ Work has been resumed at various points on the Buffalo and Oil Creek Railroad. This road shortens the distance between Buffalo and the oil region some thirty-five miles, and places that city in direct communication with Titusville, enabling the same cars to run from Titusville to Buffalo. It is expected the work will be completed this fall.

☞ The building of the Iowa and Minnesota Railroad has been commenced. Ground was broken and a celebration took place on the 14th at Polk City, Minnesota.

Railroad Earnings.--Weekly.

The traffic of the Great Western Railway of Canada, for the week ending Aug. 17th, 1866, were $53,595 93
Corresponding week of 1865 ..... 63,928 07

Decrease $10,332 14

The earnings of the Grand Trunk Railway of Canada for the week ending Aug. 11th, 1866 were $125,088 00
Corresponding week of previous year.. 116,921 00

Increase..... $8,167 00

The earnings of the Marietta and Cincinnati Railroad the 2d week in Aug., 1866... $23,334 00
Corresponding week previous year..... 23,086 00

Increase..... $248 00

The earnings of the Western Union Railroad for the week ending Aug. 14, 1866 .... $10,814 72
Corresponding week previous year..... 13,519 39

Decrease $2,704 67

The earnings of the Chicago and Great Eastern Railway for 2d week in Aug. were..... $23,052 40
Same period last year..... 21,780 29

Increase in 1866..... $1,272 11

The earnings of the Chicago and Northwestern Railway for the second week in Aug., 1866 were..... $152,334 00
Corresponding week of previous year.. 177,994 00

Decrease $25,660 00

The earnings of the Detroit and Milwaukee Railroad for the second week in Aug., 1866, were $30,736 00
Corresponding week of 1865..... 34,612 00

Decrease..... $3,876 00

The earnings of the Michigan Southern and Northern Indiana Road for the 2d week in Aug., 1866, were..... $78,725 00
Corresponding week of 1865..... 81,445 00

Decrease $2,720 00

The earnings of the Chicago and Alton Railroad for the second week in Aug., 1866, were $94,854 00
Corresponding period previous year.. 90,717 00

Increase..... $4,137 00

Agricultural College Scrip for the Southern States.

The commissioner of the general land office has for some time been busily engaged in signing the agricultural college scrip taken up by the State of North Carolina under the congressional grant of July 2, 1862. The labor is now nearly completed, and the scrip will be forwarded in a few days to the Governor of that State. There have been 170,080 acres granted to North Carolina, which are taken up in 1,688 pieces of scrip of 160 acres each. The only Southern States that have thus far signified their intention of accepting the provisions of the grant of Congress, besides North Carolina, are Virginia and Georgia. The scrip of Virginia will shortly be prepared. The law granting to the States the privilege of selecting lands for agricultural and mechanic colleges provides for an amount of public lands equal to 30,000 acres for each Senator and Representative in Congress to which such States are respectively entitled by the apportionment under the census of 1860, the tracts to be selected from the public lands of the United States subject to private entry at $1 25 per acre, or selections may be made from the $2 50 or double minimum; but in the latter case, the lands are to be computed at the maximum price, and the number of acres proportionately diminished. But no mineral lands are to be selected, and no selections allowed of a quantity less than a quarter section.

Railroad Earnings--Monthly.

The earnings of the Cleveland and Pittsburg Railroad for the month of July, 1866, were:

From freight		$123,258 49
" passengers		61,305 15
" miscellaneous		4,700 00
" military		213 75
		$189,477 39
July, 1865:		
Freight, passengers, etc..	$200,436 07	
Military	25,611 35	
		226,047 42
Decrease		$33,670 03
Decrease in regular traffic		11,172 43

The earnings of the Housatonic Railroad for the month of July, 1866, were $47,529 84
ame time in 1865..... 40,954 36

Increase..... $6,575 48

The earnings of the Ohio and Mississippi Railroad line, from Cincinnati to St. Louis, for July, were:

	1866.	1865.
Eastern Division.....	$145,390 21	$205,379 56
Western Division.....	101,872 07	143,905 39
Total.....	$247,262 28	$349,284 95
Decrease		$102,022 67

Comparative earnings from January 1, to July 31, inclusive:

	1866.	1865.
Eastern Division.....	$1,118,157 23	$1,192,739 10
Western Division.....	783,470 78	835,728 88
Total	$1,901,628 01	$2,028,467 98
Decrease		$126,839 97

The National Finances.

The following is an extract from a letter of Hon. Hugh McCullough, Secretary of the United States Treasury, dated Washington, Aug. 18th, and addressed to Messrs. Wm. Gray, N. Thayer, Thos. B. Wales, A. T. Hall, and others, Boston, Mass. The letter was written in response to an invitation, while at the East, to dine with the above gentlemen, but which failed to reach him until after his return to Washington. He says:

Although it was hoped that ere this the currency of the country would have been brought nearer to the specie standard, I am sure the people have cause for congratulation that our finances are in so healthy a condition as they are.

Since March, 1865, the war has been brought to a successful conclusion; immense armies have been disbanded; every soldier has been paid before being mustered out of the service; all maturing obligations of the Government have been satisfactorily provided for, while the National debt is nearly $250,000,000 less than it was estimated it would be at the present time, and the reduction of it has averaged for the past year, more than $10,000,000 per month. If no other nation ever rolled up a debt so rapidly, none certainly ever commenced the reduction of its debt so soon after its creation. If our currency is depreciated, we have so far escaped the financial troubles that usually occur among nations at the close of expensive wars, and which there was reason to apprehend would happen to us at the termination of the great war in which we have been engaged. If the business of the country is conducted upon a changing and uncertain basis, it has been subject to no severe revulsions. If our taxes are heavy, our resources are almost unlimited, while the disposition of the people to bear cheerfully their burdens is a surprise even to those who have the greatest confidence in the honor and good faith of a free people. In my opinion, the people of the United States are to make Republicanism illustrious among the nations by establishing the fact that the securities of a Republican Government are the safest of all securities, and that the people who impose taxes upon themselves are the most jealous of their National credit.

I do not, however, disguise the fact that great financial difficulties are still to be overcome; that our present prosperity is rather apparent than real, that we are measuring values by a false standard, that we are, in fact, exposed to all the dangers which attend an inflated and irredeemable currency, which diminishes labor—the true source of national wealth—and stimulates speculation and extravagance which lead invariably to thriftlessness and demoralization. Before the country becomes again really prosperous, the specie standard must be restored, prices reduced, industry stimulated, the produce of the country increased, the balance of trade between the United States and other nations cease to be against us—all the great interests of the country cared for and protected by wise and impartial legislation, and all sections of the country be brought again into harmonious and practical relations with the General Government.

That the country will be again thus really prosperous is as certain as anything in the future. That it should be so at an early day, and that too without a financial crisis, it is only necessary that there should be proper legislation by Congress, economy in the public expenditures, and fidelity on the part of those who are intrusted with the management of the public revenue.

The Use of Highways by Railroad Companies.

The decisions are contradictory in regard to the right of a railway company to lay its track along a common highway, without making additional compensation to land-owners adjoining such highway, and who, in the country, commonly own to the middle of the highway. In some of the early cases, upon this subject, it seems to have been considered, that, under such circumstances, the land-owners were entitled to additional compensation, when the land was converted from a common carriage-way to a railway (3 Hill (N. Y.) R. 567). A distinction is taken between the property of adjoining land-owners in the highway or streets in cities, and in the country. In the former it has been held that the fee of the streets is under the control of the municipal authorities, and that it is no perversion of the legitimate use of the streets, to allow a railway company to lay their track upon them, (Plant *vs.* Hudson River Railway, 10 Barb. 26; 8 Dana, 289; 15 B. Monr. 404). In Williamson *vs.* New York Central Railway, 18 Barb. 222, 246, the court says: "A railroad is only an improved highway, and the use of a street, by a railway, is one of the modes of enjoying a public easement. But in general the adjoining owner of land to a highway, is entitled to additional compensation, where it is put to a different and more dangerous use. And towns have an interest in highways and bridges, which will enable them to maintain an action upon the case for their obstruction or destruction, and the conversion of the materials, (Troy *vs.* Cheshire Railway, 3 Foster, 83). But the town is not liable to pay damages assessed, by the select men, in laying out a highway, at the request of a railway company, made necessary to supply the place of one taken by the company for their track, (Ellis *vs.* Swanzey, 6 Foster, 266). In general it may be stated as the settled doctrine of most of the States, that the owner of land, bound-

ed upon a highway, owns to the centre of the way, (Buck *vs.* Squires, 22 Vt. R. 484, 495). But the owner of the fee of land, over which a highway passes, cannot maintain a bill in equity, to enforce an order of commissioners, as to the manner of constructing a railway, where it crosses the highway, but the same should be brought by the principal executive officers of the town or city, (Brainerd *vs.* Conn. River Railway 7 Cush. 566). The court say: "It is only when the owner suffers some special damage, differing in kind from that which is common to others, that a personal remedy accrues to him, and certainly no rule of law rests on a wiser or more sound policy." Were it otherwise, suits might be multiplied to an indefinite extent, so as to create a public evil, in many cases, much greater than that which was sought to be redressed. The only plausible ground which can be taken is that which was assumed in the case of The Presbyterian Society in Waterloo *vs.* The Auburn and Rochester Railroad Co., 3 Hill (N. Y.) R. 567, that to convert a highway into a railway track is no material change in, or enlargement of, that to which it was originally dedicated; that the construction of a railway along a highway is simply one of the modes of accomplishing the object of the original dedication, viz: that of creating a thoroughfare and passage-way for the public; in short, that the railway is a species of highway, and that the two uses are substantially identical.

If the rule of estimating damages, according to the money value of the land taken, were adopted, there would be more reason in saying the public would thereby acquire the right to use it for any purpose of a road, which any future improvement might suggest. And this is the view which seems very extensively to prevail in this country. (Redf. on Railways.) It was long since settled that the land-owner was not entitled to any additional damage, by reason of any alteration in the construction of the highway. And the same rule has now pretty extensively been extended to improvements in erecting railways along the streets and highways. These questions depend much upon the terms of the charter of the railway company. And as it is confessedly competent for the legislature to require railways, in laying their track along the highways, to make compensation to the adjoining land-owners, for any increased detriment, or to be liable for any consequential damage, and as it is assuredly just and equitable to do so, it seems desirable it should be done. And in those States and countries where such enterprises have become so far matured as to have assumed the form of a settled system, it more commonly is done. And where it is not, it may be regarded as the result of oversight in the Legislature. It was held that a railway is liable to pay damages for crossing a turnpike company's road, notwithstanding the Legislature gave the right. Injunctions in equity have been denied, when applied for, to restrain railways from occupying the streets of cities and towns with their track, by consent of the municipal authorities. But in the well-considered case of Nicholson *vs.* New York and New Haven Railway, 22 Conn. R. 74, it was held, that where a railway company, in carrying their road through the streets of the city of New Haven, found it necessary to carry one of the streets over the railway, upon a high bridge, with large embankments at each end, the plaintiff owning the land upon both sides of the street, and no compensation being assessed to him, he might recover of the company in an action of trespass, for any appreciable incidental damages occasioned by thus constructing their road, and the consequent alteration of the highway or street. And as the company, in thus constructing their road, acted under the authority of the Legislature, they were prima facie, not to be regarded as trespassers, but that where they caused any appreciable damage to the land-owners along the line of the road, they were liable in this form of action. The court in this case, Hinman, J., assumed the distinct ground, that the railway, by laying their track upon the plaintiff's land, which was before subject to the servitude of the highway, or street, would become liable "for such entry" upon the land. "In such case," says the learned judge, "the subjecting the plaintiff's property to an additional servitude, is an infringement of his right to it, and is, therefore, an injury and damage to him. It would be a taking of the property of the plaintiff, without first making compensation."

In the case of the Commonwealth *vs.* E. & N. R. R. 27 Penn. R. 339, it was held that the Legislature might authorize the construction of a railway on a street, or public highway, and the inconvenience thereby incurred by the citizens, must be borne for the sake of the public good. But where this is claimed by construction and inference, all doubts are to be solved against the company. And where by the act of incorporation of a municipality it was provided, that the "streets, lanes, and alleys thereof," should forever be, and remain highways, it was held that the municipal authorities could not authorize the construction of a railway thereon. But where the State conveys to a city, the title of a common, reserved in the grant of the township for a "common pasture," subject to the easement of the lot holders, of common of pasturage, it was held that the city might lawfully grant a portion of the same to a railway for the purpose of constructing their road.

Defense against Bogus Patent Claims.

Several of the New England railroads have united in employing a competent person to investigate a claim recently made upon them, for the alleged infringement of a patent "for improvement in railroad car trucks," or, more correctly, for the application of springs to the journals of cars, granted in 1849 to John F. Rogers of Troy, and assigned by him to John M. Peck of Albany. The report on this subject is an able and satisfactory document, and is in possession of the Connecticut River Railroad Company. A similar investigation and report was made not long since, upon the motion of the Boston and Lowell Railroad, as to a patent granted in 1858 to David Matthews of Philadelphia, for "improvement in locomotive axle-boxes," usually called the "slotted axle-box." The probability is that no further attempts will be made to extort money for this patent, now ascertained to be invalid.

It is well that the railroad companies are moving in this direction. Too many claims of the kind have been settled heretofore, without investigation, and large sums of money have thus been thrown away. The only excuse for this action, in most instances, is the desire to get rid of the annoyance of the patent agents, and the fear of expensive suits at law. Would it not be well for the companies to unite in supporting an agent to inquire into the validity of all claims made upon them for the use of patented articles?

St. Joseph and Denver Railroad.

On Monday, July 23d, the President and Superintendent of the St. Joseph and Denver Railroad, and surveying party, including Messrs. Cook and Burlinghame, the efficient engineers, arrived at Troy, and pitched their tents at the terminus of the old grade. The surveying party are prepared with a good outfit to make a journey westward. On the 25th the Engineers, President, Superintendent, and some of the Directors, went over the proposed route as far as Wolf river, making observations as to the best and most practicable location. We learn that the engineers will continue the survey to Marysville, Marshall county, and probably further west.

It is very encouraging to see the work thus progressing. Maj. Chew, the President, Mr. Swain, the Superintendent, and Capt. Blackiston, one of the Directors, are evincing energy, perseverance, and industry that will surely crown their labor with success.—*Troy (Kansas) Reporter.*

Railroad Convention in Texas.

A grand railroad convention is to be held at Tyler, Texas, on the 11th of September. The following railroads will be particularly interested in this convention: The Southern Pacific, which, it is hoped, will be built to Tyler in two years, and which will pass on west in the direction of Waco; the East Texas road, which is chartered from Sabine Pass by way of Nacogdoches and Henderson to Tyler, which road is intended to penetrate the great wheat country, in the direction of Dallas, by way of Kaufman; the Houston, Trinity and Tyler road, which has very favorable franchises, and is allowed, by an act of the Legislature of 1863, two years after the termination of the war, to complete the first twenty-five miles; and the extension of this road to Clarksville, to connect with the road from Memphis, which is being built to Clarksville. These various enterprises are all practicable, and should attract the careful attention of people whose interests are to be subserved by their progress.

☞ The line of railroads from Louisville to Memphis, which was opened for passengers and freight, without change of cars, for the first time on the 13th inst., is made up as follows:—The Louisville and Nashville road, from Louisville to Bowling Green; Memphis branch of the Louisville and Nashville road, from Bowling Green to State line; Memphis, Clarksville and Louisville road, from State line to Paris, Tenn.; and the Memphis and Ohio road, from Paris to Memphis.

☞ The first meeting of the grantees of the Portsmouth and Dover Railroad, was held in Portsmouth on the 11th inst. The following Board of Directors was chosen: Albert L. Jones, John H. Bailey, Geo. L. Treadwell, Daniel Marcy, Joshua G. Hall, Amos D. Purlington and Wm. F. Estes. Albert L. Jones was elected President; and J. S. H. Frink, Clerk of the Board. A committee was appointed to procure subscriptions to the capital stock.

☞ W. G. Moorhead, Thos. A. Scott, Edward F. Gay, Chas. B. Wright, Milton Courtright, D. K. Jackman and C. P. B. Jeffery, have been elected Directors of the Warren and Franklin Railroad Company. E. F. Gay was elected President, and H. P. Rutter, Secretary and Treasurer.

Copper Mines of Houghton, Mich.

For the six months ending June 30, 1866, the four mines in operation at Houghton, Michigan, shipped copper in these quantities, to wit:

	1866.		1865.	
	Tons.	lbs.	Tons.	lbs.
Huron	265	424	279	997
Isle Royale	182	1.288	214	594
Grand Portage	161	1,424	144	1,158
Shelden-Columbian	55	302	22	731
Total for six months	664	1,439	660	1,480
Increase	3	1,959		

It will be perceived that the product of the Huron and Isle Royale mines decreased almost as much as the product of the Grand Portage and Shelden-Columbian increased. Moreover, these four mines all shipped copper so long ago as 1854, yet not one of them has ever paid a dividend; the entire proceeds of their joint assessments amounting to almost two millions of dollars, and also the entire proceeds of their joint product shipped to market and sold for about six millions of dollars, making in all about eight millions of dollars, have been disbursed for work done and expenses incurred on these Houghton mines, which have built up and supported the town of Houghton, on the lake, whilst stockholders at tidewater have been impoverished.

According to the circular of Dupee, Beck & Sales, of Boston, the amount of assessments paid for account of three of the four Houghton mines to March 1, 1866, was follows:

Huron	$380,000
Isle Royale	660,000
Shelden-Columbian	420,000
Total assessments on three mines	$1,460,000
Estimate Grand Portage same as Huron	380,000
Assessments paid on four mines	$1,840,000
Astimated value of copper produced and sold (at less than cost)	6,000,000
Tidewater funds planted in four Houghton mines	$7,840,000

Houghton has not and never had a dividend paying mine, the dividend paying mines whose names are used to confuse investers and perpetuate the Houghton deception, being all east of Portage Lake, on Keweenaw Point.—*U. S. R. R. and Mining Register.*

Railways and Telegraphs in South America.

While the United States and European countries are continually executing some new plan for promoting the interests and welfare of the people, the nations of South America, though less favored with means, are not disposed to lag behind the spirit of the age, and are extending, as far as possible, those great instruments of modern civilization—the railroad and telegraph. The Costa Rican Government has contracted for a chain of telegraphs extending from Punta Arenas, on the Pacific, to San Jose, and from thence to a convenient place on the Caribbean Sea. In Chili, internal improvements have been resumed since the departure of the Spanish fleet, and new railroads are being pushed to completion. A Santiago letter in the New York *Herald* says:

"The southern road from Santiago has been extended from San Fernando, thirty miles on the proposed route to the agricultural region and parts of Southern Chili, and the extension of the Tongoy road to the new copper mines is to be commenced on the 1st of August. The telegraph is also going up between Coquimbo and Caldera, and in the South, connecting the several ports. A telegraph from Panama to Santiago, and thence over the Cordilleras to Buenos Ayres, is a subject of considerable correspondence between the Peruvian Government and capitalists here and abroad.

Peru is anxious to commence the work at once, building the line through her own territory from north to south, but lacks the cash. It is proposed that the line will run along the coast from Panama to Coquimbo, and thence to Santiago. Chili will soon have a telegraph to Caldera, and from that point to the northern limits of the republic comparatively little work would be necessary to build the line. Bolivia has but a narrow strip of territory to be crossed, and next comes Peru. Ecuador and New Granada are anxious for the establishment of the line, and will render all the aid in their power. Mr. Meiggs, the railroad king of South America, has received a number of letters from Gen. Prado on this subject, urging him to come to Peru, with the view of taking hold of the enterprise, and also to consider proposals for constructing the great railroad over the Cordilleras, connecting Lima and Callao with the head waters of the Amazon and the exhaustless riches of Eastern Peru. Gen. Prado would commence these works to-morrow, did the finances of Peru admit of it. So long as her Treasury remains in its present embarrassed condition, there does not seem to be much use in agitating the subject of these great enterprises; but the correspondence thus far has shown that the Peruvian Government is in earnest, and with proper assistance, would accomplish the undertaking. The advantages of such improvements would be incalculable."

Canadian Railways.

The following is an official statement of the Traffic Returns of the Canadian railways for the half year ending June 30, 1865 and 1866:

	Passengers.	Mails and sundries.	Freight.	Total 1866.	Total 1865.	Increase.
	$	$	$	$	$	$
Great Western	763,716	63,449	861,041	1,688,206	1,314,480	373,726
Grand Trunk	1,050,221	126,650	1,905,782	3,082,653	3,057,402	25,251
London and Port Stanley†	5,182	748	5,613	11,543	8,808	2,675
Welland	6,341	7,052	25,216	38,609	24,475	14,134
Northern	52,963	10,973	188,754	252,663	249,987	2,676
Port Hope and Beaverton	6,899	749	33,182	40,880	37,721	8,159
Port Hope and Peterborough	6,279	669	11,542	18,490	11,890	6,600
Brockville and Ottawa	18,179	6,612	21,475	46,266	26,753	19,513

St. Lawrence and Industry*	235	....	276	511	372	139
Total	1,938,134	221,683	3,079,208	5,239,025	4,767,710	471,315

* Opened 23d April.—Returns imperfect.
‡ 28th April to 30th June, 1866; 14th May to 30th June, 1865.
† 1st March to 30th June.

☞ About $30,000,000 have been invested in the Lake Superior copper mines. The market value of the stock representing this capital is at the present time less than $2,000,000. The copper product of this region amounted to $8,000,000 in 1862, $15,000,000 in 1863, and $12,000,000 in 1865.

Anthracite Coal Trade.

The anthracite coal tonnage from the Schuylkill Coal Region shows a slight falling off as compared with the previous week, though an increase on the tonnage of the corresponding week of the previous year.

The Reading Railroad brought down for the week 88,278 tons, and the canal 34,374 tons—making a total for the week of 128,052 tons, against 100,632 for corresponding week last year. The tonnage of the week, as reported by the principal carrying companies, is 308,943 tons, against 203,913 tons in corresponding week last year—showing an increase of 105,030 tons. The aggregate tonnage of the season, as far as reported, is 7,631,152 tons, against 5,103,859 tons to same time last year—showing an increase of 2,527,293.

Interest and Dividends.

The New London Northern Railroad Company, has declared a dividend of $4 per share, payable Monday, September 3.

The Naugatuck Railroad Company have declared a semi-annual dividend of five per cent., payable on demand, free of U. S. tax.

Rock River Canal.

Major General J. H. Wilson, of Wilmington, Del., has been detailed by General Grant and the Secretary of War for the survey of the Canal route by the way of Rock River to Green Bay. His instructions contemplate the examination of the Rock River route with a view to the construction of a canal large enough to admit the largest boats used on the lakes and river connected by the proposed work. It is his desire to commence the survey early in September, and if possible have it finished this fall before winter intervenes. He is also charged with the Rock Island and Des Moines Rapids Improvements.

☞ The Hartford and New Haven Railroad Company are putting canvas aprons upon their passenger cars, in compliance with a law passed at the last session of the Legislature. The aprons are placed between the platforms over the coupling, so that passengers can pass without danger of falling through.

☞ The Cheshire Railroad Company are building a large set of repair shops at Keene, N. H. The cost will be in the vicinity of $40,000.

NOTICE TO CONTRACTORS.

NEWARK & NEW YORK RAILROAD CO.,
312 BROAD ST., NEWARK, N. J.
ENGINEER DEPARTMENT, 22d August, 1866.

Proposals for the GRADUATION of the Newark and New York Railroad, and for the PILING between Newark and Bergen on the said line, will be received at this office, until Tuesday, the 11th day of September, at 12 o'clock M.

The Award of Contracts will be made between that date and the Tuesday following.

Contractors wishing copies of specifications or any other information in regard to the work, may obtain them from the undersigned, to whom all bids are to be addressed.

The Company reserves the right to reject bids.

3134 ALFRED F. SEARS, Chief Engineer.

To Railroad Agents and Contractors.

The undersigned are prepared to furnish

SPRUCE,
HEMLOCK,
CEDAR AND
HACKMATACK SLEEPERS.

Also Georgia Pine, White Pine, Oak and Spruce Timber, and Lumber of every description.

BRADFORD & RENICK,
3m23 **71 Broadway, N. Y.**

The Oil Product of 1866.

The recent advance in oil in the Venango region from the extreme depression of a month ago, together with the failure of two or three additional wells on Pit Hole, is inducing many to anticipate a further material enhancement in prices as the season advances, especially as the rates at the point of production are still $3@$3.50 per bbl., below those current at the opening of September in 1865. This apprehension, however, is scarcely well founded, in view of the largely increased product of the present year, which is lost sight of by those not fully conversant with the trade. The total product of 1865, notwithstanding all the excitement and the millions invested in new enterprises during that year, was only about 2,135,000 bbls., or a trifle less than that of the preceding year. The winter of 1865 was one of unusual severity in the Venango region, the depth of snow for over two months precluding the procurement of fuel at any price, so that in many localities production was entirely suspended. The destructive freshet of March followed, causing injury to oil property that it required months to repair. These circumstances reduced the production of the first three months of the year to about 250,000 bbls., or 2,500 bbls. per day. In June it had recovered to 3,700 bbls. per day; in August to 7,000 bbls., and in October and November the average was 8,500 bbls. per day, making the average for the year about 6,500 bbls. per day. The amount of oil paying a Government tax from April 1st to December 31st, was 1,625,710 bbls. The Revenue Commission estimated that 15 per cent. of the total product escaped taxation; perhaps it would be fairer to say 10 per cent. If we add then for this, say 160,000 bbls., and 250,000 bbls. as the product previous to April, an aggregate of 2,135,710 bbls., is attained as the product of the whole country, the various sections outside of Venango yielding 150,000 bbls., of which only 91,100 bbls. paid the Government tax.

The export of 1865 absorbed about half the product, having no considerable stock in any of the principal markets at the close of the year. The winter, however, was favorable to continued production, and the yield of the winter months averaged fully 7,500 bbls. per day, which since April steadily increased, so that July averaged over 11,000 bbls, per day, being the highest production yet attained. The present yield is about 10,000 bbls. per day. These are not mere estimates, but facts drawn from trade returns. The receipts at Pittsburg to August 18th, 1866, were 903,322 bbls., against 396,306 bbls. in 1865, and at New York to the same date 621,676 bbls., against 317,616 bbls. last year, showing an increase in the receipts at these two points of 811,676 bbls. The shipments to Cleveland and Erie, for Western and Canadian consumption have been about 150,000 bbls., and to Philadelphia by the Philadelphia and Erie road 100,000 bbls., making an aggregate of 1,774,998 bbls. sent to market to the 18th of August. Of this total 300,000 bbls. at best, may be counted as refined, and to so much there should be an addition of 30 per cent. for loss in refining, say 90,000 bbls. If we add then 75,000 bbls. for loss by fires at the wells and other casualties, and 130,000 bbls. in tank and in store in the oil region awaiting shipment, (estimates much below the actual figures,) we have a grand total as the product to the 18th of August of 2,069,998 bbls., or an average of over 10,000 bbls. daily, for the 200 working days of the year to that date. The same rate of production for the balance of the year would make the year's product 3,150,000 bbls., or *one million bbls.*, in excess of 1865; and there is little room to doubt that this result will be realized.

The exports the present year to the 25th of August, amount to 35,855,448 galls., crude and refined, representing fully one million bbls. crude oil, and showing an excess of nearly 4,000,000 galls. over the exports for the *whole* of last year. Whether the foreign demand is to continue, and at such rate as to absorb a half of the product of the remaining months of the year is an open question. The home consumption we know to be increasing, but it is extremely questionable if it amounts for the year to so much as 50 per cent. over last. While, therefore, somewhat higher prices are not unlikely, they can hardly be expected, with a continuance of the present large production, to reach so high as 38½, 39¾, and 42 per gallon for crude oil, which were the averages for the closing months of last year. Such an advance would check both the foreign and the home demand, and cause an accumulated stock at the close of the year that would result most injuriously to the trade. The year's product, therefore, large as it is likely to be, will not greatly exceed that of 1865 in commercial value; but the prevalent low prices will tend to its introduction into many new markets, and prove of incalculable advantage in the future.

North Carolina Railroads.

The North Carolina railroads are rapidly reaching a state of efficiency. The editor of the Wilmington *Journal* recently passed over two of them. He says:

The North Carolina Railroad, we should judge, is doing a very fine business. It is well supplied with new engines and cars, and the speed of the mail train must be equal if not superior to that attained previous to the war. The repairs of the road have all been made of the most substantial character, and the facilities offered by the extensive works at "Company Shops" are made most advantageously available to this company, and we were shown most beautiful and substantial work, in engines and cars, turned out at their shops. We found possibly greater improvement still upon the Western North Carolina Railroad, when we take into consideration the damage sustained and

the means at command. Without engines or cars, passengers or freight; without depots or bridges, so thorough had General Stoneman accomplished his work of destruction, and with but a very limited patronage, the road is entirely repaired in every department, and its facilities are in all respects of the first order. At present the trains run but three times a week, leaving Salisbury every Monday, Wednesday and Friday morning, and returning the same day. There remain as yet two miles and a half unfinished between the present terminus of the road and Morganton.

Atlanta and West Point Railroad.

The income of this road for the year ending June 30, 1866, was as follows:

From passengers	$187,655 10
" freight	193,271 60
" mail	5,468 70
" express	17,539 89
" U. S. government	11,183 38
" miscellaneous	292 00
	$415,410 67

And the expenses were:

Conducting transportation	$46,680 15	
Motive power	64,387 58	
Maintenance of way	68,214 90	
" cars	6,463 72	
		185,746 35
Leaving		$229,664 32

From which deduct extraordinary expenses, viz:

Rebuilding and roofing depots	$19,000 00	
New iron, spikes & castings	50,000 00	
Rebuilding and repairing passenger & freight cars	30,000 00	
Rebuilding and repairing bridges	37,500 00	
Cross-ties	16,000 00	
Rent of cars	12,518 05	
United States internal revenue	9,321 69	
Roofing West Point Hotel, and insurance on same	766 30	
		175,016 04
Leaving balance of earnings unappropriated		$54,648 28

The ordinary working expenses were $185,746 35, or about 45 per cent. of the gross receipts. The President in his report says:

It will be seen, that nearly half the amount expended during the year was for objects outside the usual current expenses of operating the road, and are classed "Extraordinary." But as the expenditure was necessary to repair damages to existing property, and the construction account has been long since closed, these expenditures are very properly charged upon income, and absorbed in the improved value of the property of the company.

The business of the year has probably exceeded the anticipations of the Stockholders at their last annual meeting. At that time, the affairs of the company were in a very deplorable condition! Its depots and principal bridges nearly all destroyed; much of its iron lost, or too much damaged for use; timbers badly decayed, and the road barely in a condition to be cautiously used! The rolling stock reduced to a few dilapidated cars, and a single Freight Engine fit for use! By the collapse of the Confederate credit, the company was without funds, and the whole South without a currency! The best encouragement the Directors could then give to the Stockholders was, that, "With all disadvantages, the road is believed to be making current expenses," &c. The Superintendent, also, was rather discouraging to the stockholders in his last year's report. "From present indications, (says he), it is evident, that, for some time to come, our entire income will be absorbed in renovating the permanent way —rebuilding depots and bridges, and the purchase of Stock to equip the road anew," &c. Yet, it will be seen that from the net earnings of a single year's business, the most important damages have been repaired, the most essential wants supplied, and the road again restored to usefulness and profit. True, much remains yet to be done; but it is believed that the finances of the company are now under easy control, and that future expenditures need not interfere with fair dividends to the stockholders. Of future prospects, the directors will venture to say but little. Like most other interests dependent on industry, the future of Southern Railroads must mainly depend on the future prosperity of the country. At present, the prospect is not very encouraging. We cannot expect much effort to restore the wasted resources of the South whilst our present political *status* continues. Industry is the birth of confidence, and no people will labor to accumulate without reasonable expectation that they will enjoy the fruits thereof. It is believed, however, that the material interests of the whole country are too closely connected with the development of Southern industry, to permit the present state of things to continue long. The large shipping interest needs our products to supply its tonnage. The manufacturing interest needs the Southern field of consumption, now impoverished, but once a mine of wealth to it, and almost exclusively its own. The agriculturist of the great North-West needs for the consumption of his surplus provisions the thrifty producers of Southern exports—his nearest, his safest, and once his most profitable customers. The tax-payer, too, everywhere, needs restoration of Southern prosperity, and the joint resources of an united country, to lighten the enormous burthens which everywhere press down upon him. Against such a combination of interests—truly National—everywhere seen, and everywhere felt, the mere politician struggling for power, and the infatuated dogmatist warring for an impracticable idea, will have to yield. Passion and prejudice may prevail for a time, but, in the end, a more truly National policy may reasonably be expected. However this may be, the stockholders may feel assured that the low cost of the road, its very trifling debt, its excellent location, with a prosperous and growing city for its Eastern terminus, must continue to secure for the Stock a favorable comparison with that of the other railroad enterprises of the country.

Some other subjects of general interest to railroads have been much discussed of late, but as they equally concern other roads, we need only refer to some of them, without dwelling upon any. Among them are the subjects of free passes and the express business. The first, when confined within proper limits, may not be objectionable or injurious; but, like most free privileges, the tendency is to abuse, and when grossly abused, it becomes a fraud upon the rights of shareholders; and as such, has been in some of the States made the subject of penal legislation. It is the duty of all railroad managers to combine, and correct, as far as possible, this invasion of the rights of railroad property.

The express business, from small beginnings—confined mostly to small and valuable packages—has grown until it has engrossed the most profitable business; and, in fact, has become a formidable rival of the railroads themselves. The enormous profits have multiplied the companies, who all claim equal privileges and like space and expedition, thereby greatly increasing the risk and burthens, without adding anything to the profits of the railroads. Without dwelling upon the subject, the directors think it worth considering whether it would not be well, after reasonable notice and a compliance with existing engagements, to abolish the system altogether. There is no good reason why the heavy profits of express companies should not be made by the railroad companies themselves, and retained for the benefit of the shareholders. It is believed, that as an independent organization attached to railroads for general transportation, the express business is peculiar to the United States.

Although the profits for the last year might well be employed in improvements and additions to road and outfit, yet, as liberal appropriations have been made for that purpose, and many of the stockholders are needy, the Directors have declared a dividend of four per cent. from the unappropriated profits of the last year.

The directors take great pleasure in stating, that under all the disadvantages alluded to in this report, the business of the road has been conducted with much regularity and freedom from accident, and the officers and employees, so far as the directors have been able to learn, have conducted themselves with fidelity and zeal, and an honest regard to the interests of the company.

The equipment of the road consists of 16 locomotives, 6 passenger, 4 baggage, 55 box, 5 stock and 21 platform cars. The Superintendent in his report, says:

From the 1st July 1865, until the middle of April 1866, and before the restoration of our own motive power, we never had more than one engine for freight service, available at a time, being almost entirely dependent on what assistance we could get from other roads. In this connection, I here make acknowledgement of our obligations to the Georgia Railroad and Banking Company, for use of cars and engines at a rate of rent greatly below what we were charged by others, and without whose assistance, we could not, in our crippled condition, have done much effective work in moving the crop of cotton then waiting on the line of road for transportation to a market.

The depot buildings at Atlanta, Fairburn, Palmetto, LaGrange and West Point, have been rebuilt—the first and last named, so as to admit of enlargement or removal, as will be undoubtedly rendered necessary at some future time, in view of probable changes and increase to take place in our business arrangements at these two important stations.

The bridge over the Chattahoochee river, and those over the Yellow Jacket, Beach and Long Cane creeks have been rebuilt, and are now entirely new. About eighty thousand new cross ties have been put into the track, and five hundred tons of new iron rails. The road bed has been ditched and drained. We have on hand a fair average supply of engine fuel and cross ties.

By reference to the amount paid out for car rent, the expensiveness of having to depend upon other roads to do our transportation for us will be demonstrated. It was in view of this, that I determined to push forward, as rapidly as possible, the repairs of our own stock, rather than continue to pay so heavy a tax for another year. This item of car rent, however, is fairly entitled to a credit of whatever may be due us from the Wilmington and Manchester Railroad Company, for use of our engines and cars while in Carolina. This will be a considerable sum, probably more than equal to the amount paid out by us; but it is not deducted from the expense account, for the reason that a settlement has not yet been had with the above named company. I trust, however, that the amount will be paid before many days, when it should be added to net profits.

We have on hand of old rails and scrap iron, both wrought and cast, about twenty thousand dollars worth, which will soon be ready for sale or exchange, as circumstances may hereafter determine.

Two new passenger engines have been ordered from the New Jersey Locomotive and Machine Works, to be delivered in the fall. With this addition to the motive power, the road will be pretty well prepared for the next winter's business, and with good crops and the ordinary commercial wants of the community, I see no reason to doubt for the road a quick return of its normal condition of prosperity.

The number of passengers carried was 43,703, of which 5,179 were through, and 38,524 were way. The number of bales of cotton transported over the road was 29,584.

CONDENSED BALANCE SHEET.

Road outfit and real estate	$1,200,078 76
Bills receivable	22,779 20
Supply fund	2,500 00
Interest account	480 43
Due by agents, connecting roads, &c	59,158 74
Road expenses, past year	360,762 39
Cash on hand	12,024 39
Profit and loss July 1st 1865	49,047 65
	$1,706,831 56
Capital stock	$1,232,200 00
Bonds of the company	36,500 00
Dividends unpaid	804 00
Road earnings past year	415,410 67
Due to agents and connecting roads	21,916 89
	$1,706,831 56

President.—HON. JOHN P. KING.

Directors.—W. B. Berry, Jesse McLendon, John E. Robinson, Richard Peters, F. Phinizy, and Hon. Orville A. Bull.

Secretary and Treasurer.—WILLIAM P. ORME.

Gen'l Superintendent.—GEORGE G. HULL.

Keokuk and St. Paul Railway.

This company is, as its name indicates, intended, with its connections at no distant day, to place the cities of Keokuk and St. Paul, as well as all the principal towns in Iowa, in close intercommunication by rail. The distance between these two cities *via* the river is 583 miles, while by the line of the projected roads it is only 373 miles, a saving in distance of two hundred and ten miles, besides avoiding the delays caused by the upper and lower rapids of the Mississippi. The line will be made up of the following railroads, the length and amount of road already constructed and in progress of each of which, we give as near as we can at present ascertain, to wit:

1st. KEOKUK AND ST. PAUL RAILWAY.—Keokuk and Mt. Pleasant—50 miles. Built, and in operation, 18 miles, with a branch to Burlington, of which 7 miles, from the Junction to Fort Madison, is completed.

2d. IOWA NORTHERN CENTRAL RAILWAY—Mt. Pleasant to Cedar Rapids, *via* Washington and Iowa City—83 miles. This company was organized May 15th. The surveys are now being made, and large subscriptions to the stock have been secured in Johnson and Washington Counties, and the road will soon be placed under contract.

3d. CEDAR RAPIDS AND CEDAR FALLS—Cedar Rapids to Cedar Falls—56 miles. This road is to run through Vinton, and the means have been raised along the line for grading and bridging, which will be completed between Cedar Rapids and Vinton this season.

4th. CEDAR VALLEY AND MINNESOTA RAILWAY—From Cedar Falls to the Minnesota State Line—76 miles. Of this road, 14 miles, from Cedar Falls to Waverly, are completed and in operation. The remainder is in progress. At the State Line this road connects with:

5th. MINNESOTA CENTRAL RAILWAY—From State Line to St. Paul—104 miles; Minneapolis, 115 miles. This road was completed southward from St. Paul to Faribault, 56 miles, last season; 15 miles additional, to Owatonna, will be completed September 1st, and the entire road to the State Line is nearly graded, ready for the iron.

It will thus be seen that the entire line between Keokuk and St. Paul is in progress, with over 100 miles completed and in operation under the auspices of five companies, which may; and probably will, by consolidation, be eventually reduced to three, and possibly to two corporations.

The roads intersected by this line, and distances from the Mississippi River, are:

1st. At the junction 18 miles from Keokuk, with road to Burlington, *via* Fort Madison.

2d. At Mt. Pleasant, 28 miles from Burlington, with Burlington and Missouri River Railroad.

3d. At Washington, 37 miles from Muscatine, with a branch of Mississippi and Missouri Railroad.

4th. At Iowa City, 54 miles from Davenport, with main line of M. & M. R. R.

5th. At Cedar Rapids, 82 miles from Clinton, with the Iowa branch of N. W. R. R. This road is already finished some 50 miles beyond the Des Moines River, and is to be completed to the Missouri River to connect with the Pacific Railroad, early next season.

6th. At this point the line also connects with the Dubuque Southwestern Railroad, 57 miles from Dubuque, completed, and giving us a fine connection with Dubuque.

7th. At Cedar Falls, 100 miles from Dubuque, with Dubuque and Sioux City Railroad, completed to Iowa Falls, 150 miles west from Dubuque.

8th. At the State Line, something over 100 mile from McGregor, with the McGregor Western Railway, more than 50 miles of which is in operation.

9th. At Owatonna, 85 miles from Winona, with the Winona and St. Peter's Railroad.

10th. At Mendota, opposite St. Paul, with the Minnesota Valley Railroad.

11th. At Minneapolis, with St. Paul and Pacific Railroad, completed north to St. Cloud and Watab, 80 miles, and to be extended to the Red River of the North.

The population in 1865 of the counties in Iowa traversed by this line of road, was as follows:

Lee	28,063
Henry	17,916
Washington	14,739
Johnson	15,778
Linn	20,755
Benton	11,245
Black Hawk	12,306
Bremer	7,224
Chickasaw	5,355
Floyd	4,846
Mitchell	4,176
	146,403

Add population of six counties in Minnesota, to wit:

Hennepin	17,076
Dakota	12,476
Rice	10,977
Stael	4,932
Dodge	5,932
Mower	5,400
Total	56,011

And we have a population of over 200,000, not including Ramsey County, in which St. Paul is situated, directly on the line of, and tributary to this road.

There has as yet been no coal found in Minnesota, and the citizens of that State must, to a great extent, be dependent on this line of road for their supplies of that article, while they will return to us the cars freighted with lumber and wheat.

It will thus be seen that this line of railroad traverses the most fertile valleys, the oldest and most thickly settled portions of Iowa and Minnesota, and who can doubt that, in the language of Col. Mason, the eminent engineer of the Illinois Central Railroad, "this line crossing, as it does, every East and West railroad in the State of Iowa, and connecting, as it will, with the entire railroad system of Minnesota, must become to Iowa what the Illinois Central is to Illinois."

This line of road will also furnish the nearest and most direct route between St. Louis and St. Paul, St. Louis lying 60 miles east of south from Keokuk, and St. Paul 90 miles west, and there being already a railroad connection between Keokuk and St. Louis, *via* Jacksonville, more direct than can ever possibly be had on this side of the river, and the distance being only 182 miles, and time ten hours, must draw to this line of road much the largest portion of the travel between St. Paul and St. Louis and other Southern cities.—*Keokuk Gate City.*

New York and Oswego Midland Railroad.

The following is an extract from a letter written by Hon. D. C. Littlejohn, President of the company, in reply to a communication in the Oswego *Commercial Advertiser*, making inquiries in relation to the proposed route of the road north of Syracuse:

In reply I will say that it is the unanimous intention of the Board of Directors to build a new road running through the villages of Liverpool, Phœnix and Fulton, on the east side of the river, terminating in this city. The localities mentioned are taking the most active measures to issue the necessary bonds, and there is no doubt that they will do all, and more than is required of them, to secure the road.

The following is a section of the Midland Railroad Bill:

§ 22. No portion of the bonds issued by any town or city or the moneys arising therefrom, shall be paid, laid out or expended in other county than that in which such town or city is situated, until at least ten thousand dollars per mile upon an average shall have been paid or expended upon the grading and construction of each mile of said road lying within such county. This shall not apply to any county through which the road does not run.

By this section it will be seen that the Board of Directors have no power to spend money raised upon bonds in the City of Oswego by taking stock in or buying other roads, but it must be used in grading and constructing that portion of the road located in Oswego County.

New York Northern Railroad.

At a meeting of the Directors, pursuant to due notice, under chapter 845 of "an act incorporating the New York Northern Railroad Company," held in the city of Albany August 21, 1866, for the purpose of organization, the following gentlemen were elected officers: Chester W. Chapin, of Springfield, President; Charles R. Westbrook, of Ogdensburgh, Vice President; Thomas L. Green, of Albany, Secretary and Treasurer.

Petrolia and Wyoming R. R.

The Petrolia and Wyoming Branch of the Great Western Railway, which by survey, is five and a-half miles long, is now actually under contract, to be finished and in running order on the 15th October next, by Messrs. McDonald & Brown, of Hamilton, C. W., old contractors on the Great Western Railway.

☞ Mr. H. K. Bradshaw, of Alexandria, Va., has been awarded the contract for constructing the first section of the Alexandria and Fredericksburg railroad, comprising a large amount of excavation, together with upwards of three thousand running feet of crib and pile work.

☞ The Camden and Amboy Railroad Company have purchased the charter of the Camden, Moorestown, Hainesport and Mount Holly Passenger Railroad Company, and design to commence building that road during the present year. Another road will soon be commenced to run from Marlton to Haddonfield.

☞ The experiment of using nitro-glycerine for blasting the rock in the Hoosac tunnel is proving entirely successful. Its explosive force is found to be much greater than that of gunpowder, and as much can be accomplished in three days as was formerly possible in three weeks.

☞ Regular passenger trains on the Boston, Hartford and Erie Railroad have commenced running as far out as Hyde Park station.

Finances of Ohio.

The total funded debt of the State of Ohio, May 15, 1866 was $12,511,197 01, viz., $11,830,158 52 foreign, and $681,038 49 domestic. On the 15th of August, 1866, this sum had been reduced to $11,942,429 01, by the redemption of $568,768 of the foreign debt. The funded debt of the State now consists of: Foreign debt, $11,261,390 52; domestic $681,038 49—total, as above, $11,942,-429 01.

The Special Examiner and Treasurer of the State, appointed to examine the books, papers and vouchers of the Board of Commissioners of the Sinking Fund, have made their report. It embraces the business of the office from the 15th November, 1865, to 15th August, 1866, so far as payments are concerned, and to the 13th, so far as receipts extend.

The following table shows the receipts and disbursements in this department between the periods above mentioned:

RECEIPTS.

Balance in the Treas'y Nov. 15, 1865	$328,611 11
From taxes—Sinking Fund	626,100 31
" War "	69,548 80
From School Lands	46,794 29
From Soldiers' Relief Fund, transferred under authority of the act of March 9, 1866	461,344 00
From Surplus Revenue	7,966 05
" Turnpike Dividends	4,049 00
" Turnpike Stocks	138,326 10
" Railroad Stock	36,656 64
" Canal Lands	450 00
" Lots in Dresden	860 00
" Agricultur'l College Land Scrip	12,566 40
Total receipts	$1,733,273 70

DISBURSEMENTS.

For interest		$942,229 93
For redemption of foreign debt	$1,027,990 31	
For redempt'n of Union Loan	500 00	
		1,028,490 31
For sundry expenses		6,794 00
Total disbursements		$1,977,514 24

Disbursements in excess of receipts, $244,240 54; which will be placed to the credit of the Fund Commissioners when the County Treasurers make their settlements.

FUNDED DEBT OF OHIO.

On the 15th day of November, 1865, the public funded debt of the State of Ohio was		$12,912,014 45
Since that date there has been redeemed:		
Of foreign debt	$969,085 44	
Of domestic debt	500 00	
		969,585 44
Amount outstanding Aug. 15, 1866.		$11,942,429 01
This sum is divided as follows:		
Foreign debt	$11,261,390 52	
Domestic debt	681,038 49	
		11,942,429 01

There is now on deposit in New York the sum of $98,023 73, for the following purposes:

For redemption of foreign debt	$83,904 87
For payment of interest on foreign debt	14,118 86

Twenty-five thousand dollars is for the payment of a bond which became due two years ago, but was not presented until April 17, 1866.

The remainder is for the payment of bonds due, whose holders have been notified that their pay is ready, interest ceasing from the time of such notification.

The difference between the sum stated as disbursement for redemption of debt and bonds actually redeemed, is for interest on bonds not yet presented.

It is gratifying, say the Examiners, to find that over a million of dollars of our public debt has been paid since the 15th of September last. The promptness with which Ohio has always met its obligations has been a matter of just pride to its citizens.

The following is a statement of the funds in the treasury of the State of Ohio on the 8th of August:

Currency	$435,595 10
United States seven-thirty bonds	202,500 00
United States compound interest notes	89,180 00
Comptroller's drafts on County Treasurers	111,400 00
Seneca County Bank notes redeemed.	1,772 50
Exchange on New York	2,679 30
Specie (silver)	2,117 60
National Road bonds	60 37
Total amount on hand	$845,304 87

☞ The Common Council of Louisville, Ky., have voted to furnish $100,000 towards building a new railway from that city to Shelbyville.

Boston and Maine Railroad.

The earnings and expenses of this road for the years ending May 31, 1865 and 1866, have been as follows:

Earnings:	1865.	1866.
From passengers	$824,700 97	$943,222 30
" freight	394,038 53	519,005 70
" rents	20,508 60	18,729 94
" mails	11,991 41	11,104 46
" int. & dividends	14,729 34	19,096 85
" P., S. & P. R.R.	30,000 00	10,000 00
	$1,295,968 85	$1,521,159 25
Expenses, viz:		
Repairs of road	$142,661 43	$136,655 54
" bridges	31,279 09	27,870 52
" stations, etc.	55,729 20	32,941 26
" locomotives	48,370 27	63,745 25
" cars	47,950 24	71,730 85
Coal for locomotives	64,980 62	59,808 22
Wood	68,849 12	75,812 65
Switchmen, gatemen, etc	35,860 21	38,123 43
Passenger expenses	103,201 18	112,023 25
Freight "	90,060 76	92,751 22
Oil and waste	17,877 90	18,184 11
Sawing and pumping	19,410 98	22,591 98
General expenses	15,642 49	20,410 11
Taxes	117,238 08	104,515 68
Danvers Railroad rent.	7,500 00	7,500 00
Insurance	3,551 80	3,560 00
Damages & gratuities.	4,580 53	7,876 71
Removing snow and ice	1,957 88	245 36
Depreciation of locomotives and cars	8,247 00	84,344 03
Renewal of rail	48,852 13	36,529 26
	$928,800 91	$1,017,219 43
Net earnings	$367,167 94	$503,939 82

Deduct estimate of unadjusted liabilities and depreciation of material	$89,454 31	
Deduct tax on dividends and surplus	20,673 03	
		110,127 34
Leaving a surplus of		$393,812 48

Compared with 1865, the gross earnings of 1866, show an increase of $225,190 40; with an increase in expenses of $88,418 52—making an increase in net earnings of $136,771 88. The Report says:

The history of this corporation, for the past year, has not been marked by events of an unusual character. Its operations have been carried on efficiently and successfully. The results, it is believed, are satisfactory to the shareholders. The net receipts, by those residing in Massachusetts and New Hampshire, have been nine dollars per share, free from all National, State, or municipal taxes. While the undivided earnings, including what is placed in suspense account for contingencies, is more than one hundred thousand dollars larger than it was last year.

The gross revenue, from all sources, for the year ending May 31, 1866.	$1,521,159 25
The expenditures of every kind, including taxes, depreciation of cars, engines, &c., is	1,037,892 46
	$483,266 79
Placed to the credit of profit and loss account to meet contingencies	89,454 31
Net proceeds	$393,812 48
Deduct two dividends, 9 per cent.	369,513 00
Balance	$24,299 48
This being added to the sum of former balances	858,659 47
Makes the present amount of undivided earnings	$882,958 95
The construction accounts show that the railway and equipment cost.	$4,412,810 91
Received for the sale of shares	4,076,974 52
This amount of... is a part of the undivided earnings.	$335,836 89
The construction accounts last year amounted to	$4,389,651 28
The car and engine accounts have been reduced	59,923 37
	$4,329,727 91
Add amount paid for the Eben. Smith property in Boston	83,083 00
And we have, as stated above	$4,412,810 91

The engines and cars, although standing on the books at a reduced sum, as compared with the last year, are not by any means to be considered as having decreased in value. On the contrary, the real value of the rolling stock is largely increased. But it was thought advisable, that the accounts, representing the equipment of the road, should be made up substantially as they were several years ago, and that they should not be allowed to increase.

The past year has witnessed the close of the old suits growing out of our location in Boston. After a contest of about twenty years duration, in various actions brought against this corporation by the late Eben. Smith, in all of which, that were decided by the Court, he was defeated, the matter was finally settled by his executors and heirs. Although this litigation was vexatious and expensive, yet this corporation lost nothing in the end by it.

By the arrangement and purchase made, we have come into full possession and ownership of all the property from Haymarket Square to Charles River—being bounded on one side by Haverhill street and the Fitchburg Railroad, and on the other side by Canal street and land of the Eastern Railroad Company.

We have a large tract of land, between Haymarket Square and Causeway street, upon which improvements of a permanent character can now be made. The land is valuable and should be occupied, so far as needed, in such a manner as to afford additional facilities for railroad purposes. In addition to this, permanent structures might be erected which could be made to yield a remunerative income. At a proper time a large sum of money could be thus expended with great advantage to the corporation.

It is now thirty years since the first portion of this road was put into operation—the branch between Andover and Wilmington. Twenty years have elapsed, since the road was fully completed from South Berwick Junction to Haymarket

Square in Boston—a distance of about seventy-five miles.

It is more than fifteen years since any new shares of stock have been issued by the corporation. The number of shares actually sold and upon which dividends have been made since 1850 is 41,557. These were sold for $4,076,974 52—a discount from their par value of $78,725 48. This is the actual capital derived from stock. Since that time the road has been kept in good running order. Its road has been greatly improved. The engines have been increased very considerably in number and efficiency. We have more cars of every description and of superior workmanship. Until after 1850, the gross revenue never amounted to the sum of $600,000 per annum. It has gradually and steadily increased from that time to the present, except in times of great depression in business—as in 1857-'58, and in 1861-'62.

The amount received, as surplus, from the Portland, Saco and Portsmouth road is less by $20,000 than in the previous year. This does not arise from any diminution of the net income of that road.

During the last financial year its improvement account, in which this corporation is equally interested with the Eastern road, has been increased from $81,839 20 to $87,229 95; and the sum placed to the credit of this corporation has been increased from $71,778 76 to $108,784 56. Large additions have also been made to its equipment. Several improvements and additions are contemplated. A new engine house and machine shop are to be erected. New passenger and freight buildings are much needed.

These circumstances will have a tendency to lessen the surplus which we might otherwise reasonably expect to receive from that source.

The whole amount of earnings on our road, from business to and from that road for the past year, was for passengers $145,240 31, and for freight $94,444 91. This latter item will be subject to some variation upon a full settlement of the principle upon which the division of the freight earnings, jointly participated in by both corporations, shall be made.

It should be understood, however, that the Boston and Maine and the Eastern furnish the cars for the passenger business on the Portland, Saco and Portsmouth road, for which no charge is made.

There has been no change, during the past year, in our relation with connecting roads.

Upon a full review of the operations of this corporation for the past year, your directors have no hesitation in expressing their undiminished confidence in the value of your investment. The experience of every year tends to increase this confidence.

The number of miles run by passenger trains was 479,996; freight trains, 239,654; gravel trains, 10,146; extra trains, 17,476—total miles run, 747,272. Number of passengers carried, 2,899,432; do., carried one mile, 41,021,907—an increase of 2,101,095. Tons of merchandise carried 310,396; do., carried one mile, 9,689,911—increase, 642,952.

Treasurer.—A. BLANCHARD, JR.

Superintendent.—WILLIAM MERRITT.

St. Andrews (N. B.) Railway.

A writer in the Montreal *Gazette*, having been lately upon the St. Andrews Railway, asks why this road is never thought of among the schemes for getting in the winter, to the seaboard through British territory; and then adds:

St. Andrews has an excellent harbor, of easy access, that never freezes; and where there is water enough for everything.

The road, about sixty miles in length, of the same gauge as our Grand Trunk, has been running for several years. It connects the harbor of St. Andrews with the St. John River at Woodstock, a point about one hundred and twenty miles from its mouth at the city of St. John, and 154 miles from the present terminus of the Grand Trunk at Riviere du Loup, to which the route is a cheap one for railroad construction, offering no engineering embarrassments; and the New Brunswick portion is through a flourishing agricultural country.

We have been for fifteen years talking and negotiating about an intercolonial road, upon a plan that, when commenced, will not be soon finished, while the work of one season, in the completion of this 154 miles of railway, would give us all we actually require, by the shortest route that can possibly be laid down.

It may be said the road runs too near the American frontier. In time of peace all we require is independence of American laws and Custom House Legislation, which are as well secured by a road one foot within our territory as though it were one hundred miles.

In time of war, if it ever should come, there is no argument against the Woodstock and St. Andrews route, that does not apply to the Grand Trunk elsewhere. Between Quebec and Riviere du Loup it must run within thirty miles of the American frontier. From Cornwall to Kingston it runs directly along the line, and our waters are as much exposed to shot from the American shore as the harbor of St. Andrews.

If a road be really required through British territory for commercial purposes, the route I have indicated is unquestionably the best one, and it may be had at once, at small cost. Its completion need not interfere with the construction of the military road.

☞ The lower portion of the Dorchester and Delaware Railroad, extending from Cambridge to Salem, has been located. Beginning at the foot of Mill street, in Cambridge, it runs a straight course to a point near the Church Creek road, thence crossing the Blackwater road, by a straight course to a point near Transquakin bridge, thence to Salem.

Railways in Spain.

The Madrid *Gazette* has published a royal decree which authorizes the Minister of Finance to submit to the deliberation of the Chambers a project of law for the protection of railway companies. The first article of this project of law authorizes the Government to advance to such railway companies as have two-thirds or more of their lines completed, such sums as may be considered necessary to defray the expense of completing the lines and fulfilling the contracts arising out of their concessions. These advances are to be made in State obligations, but are not in any case to exceed 50 per cent. of the nominal value of the company's obligations remaining unsold or unissued. This act of the Spanish Government must have a most beneficial effect upon railway enterprise in Spain.

Troy and Greenfield Railroad.

The Greenfield *Gazette*, which lately complained of tardiness or hostility in regard to the construction of the Troy and Greenfield Railroad on the part of the State officials, is now satisfied that Governor Bullock and a majority of the Council are in favor of putting the road under contract as soon as possible. The delay heretofore has been occasioned by the illness of Mr. Brooks, one of the Commissioners, and the Governor's consulting engineer. Another engineer has been appointed, who will go over and examine the road in a few days; and another Commissioner will also be appointed.

Interest and Dividends.

The Pacific Mail Steamship Company has declared a dividend of 5 per cent. out of the net earnings of the quarter ending July 31, payable September 1.

☞ The final sale of the U. S. Military Railroads took place at Alexandria, Va., on the 23d ult. Two second-class locomotives, in good order, 100 pair of second-hand wheels, and a large lot of second-hand rails, &c., were sold. The Baltimore and Ohio R. R. Co., was the heaviest purchaser, to whom the engines were knocked down at $5,000, and most of the iron at from $60 to $75 per ton. The proceeds of this sale will be over $50,000.

☞ The reconstruction of the Richmond and York River Railroad, destroyed during the war, is progressing, and the first train went down below Fair Oaks on the 24th ult. The road will be finished to West Point by the middle of November.

☞ We learn from Santa Fe that the contract for the building and equipment of the first 100 miles of the Kansas City and Fort Scott railroad has been awarded to Waterman & Co., who will commence work immediately.

☞ The survey of the Newark and New York Railroad, has been completed, and the right of way through Hudson county having been obtained, the company will proceed at once with the construction of the road.

☞ The City Council of Georgetown, D. C., have accepted the plans of Messrs. Wm. Duvall & Co. for the bridges to be erected over the canal, and the work of construction has been commenced.

☞ The Des Moines Valley railroad has been completed to Des Moines City, Iowa.

American Railroad Journal.

Saturday, September 1, 1866.

Stock Exchange and Money Market.

The money market has worked in favor of borrowers, during the greater part of the week. The flurry referred to in our last was only of momentary duration. The Government disbursements, chiefly in liquidation of the temporary loan, have been very heavy. Through the U. S. Sub-Treasury in this city, they have exceeded twenty-three million dollars, since Friday last. This outflow of funds from the Treasury vaults, has added largely to the supply of capital, awaiting opportunities of profitable employment. Call loans have been made to the Government houses at 3@4, generally at 4 per cent; to other leading Stock firms at 4@5, generally at 5 per cent; and prime discounts at 5½@7, mainly 6@6½ per cent. per annum, to the full extent of the unexceptionable applications. In this way, however, only a small proportion of the idle means have been temporarily used. A much larger proportion has been put into national stocks at higher and rising prices, on a competition of home and foreign buyers, stimulated, in part, by the recent favorable telegraphic accounts from London and Paris. The city banks, last week, added to their loans, $3,949,141; deposits, $3,808,874; legal tender reserve, $1,483,412; and circulation, $161,560; while losing, $161,560 of their specie reserve, the aggregate of which is now only $6,884,077; the lightest average of the year, thus far. Their deposits are now up to $218,159,450, or the highest sum reported for many months. Their legal tender reserve reaches $86,283,483; making the weekly average, in this item, through the month of August the highest of the year. Their circulation now stands at $27,938,464, and their loans are up to $265,901,065, an unusual expansion. The Bank Exchanges at the Clearing House, through the past week, averaged $102,991,220 a day, against a daily average of $92,442,557 the preceding week; and $87,204,469 the week ending with Aug. 11th. The current week's exchanges average over $113,078,331 a day.

The U. S. Sub-Treasury receipts, week ending with Aug. 25, were $23,900,448, including $3,069,893 from customs duties; payments, $16,709,783; balance at the close of the week, $96,007,229, against $88,816,665 at the close of the preceding week. The business of the Office during the first two days of the current week, was as follows: Monday, receipts, $8,589,237, and payments, $15,790,757, Tuesday, receipts, $2,124,089, and payments, $6,060,827. The balance at the close of business on Tuesday stood at $84,868,972, against $90,983,416 a week ago.

Government revenues, last week, were unusually liberal. The excises yielded $7,846,577; customs at the port of New York, $3,069,893, and at the outports, at least, a million more, making the grand total income for the week equal to about thirteen and a half millions in currency, against disbursements of only $1,577,034 on account of the three leading executive departments. The actual cash balance in the Treasury vaults, in Washington, at the close of last week, exclusive of the reserved fund, was $12,953,183. The average of the daily revenues the current week is a rising one.

National bank note currency to the amount of $617,310 was issued from the Treasury Department, last week, making the total issue, thus far, $289,021,085. The sureties held by the Treasurer of the United States in trust for National Banks for the week ending August 25, 1866, amounted to $379,969,000 as follows: United States Bonds held, $339,321,500; United States sureties, $38,647,500.

The number of National Banks August 25th, was 1,656, with a circulation of $289,021,085.

Frequent ups and downs have been noticed in the Gold Market, during the week, the result, far less of legitimate influences, than of varying fortunes of the *bulls* and *bears* of the Gold Exchange, in their desperate efforts to corner each other. The opening rate last Thursday was 150½, and the highest on that day and during the week, 150⅝. The lowest rate was 146½ on Monday morning, whence there was a rally to 149⅛ on Tuesday, followed by a reaction to 148¾. On Wednesday, the opening rate was 148⅞, and the closing rate at 1 o'clock p. m. (when the Gold Exchange suspended business, in honor of the visit of President Johnson) was 148⅛. The speculation derives its main strength from the customs demand, which last week absorbed coin to the amount of $512,000 a day, and thus far this week, to the amount of $566,500 a day, or equal to a

weekly aggregate of $3,399,000. There have been no receipts from California, this week. By telegraph from England, however, we are advised of the shipment from the other side of £100,000 in specie by the *Allemannia* from Southampton, and £110,000 by the *Scotia*, from Liverpool, both for this port. On the other hand, the exports of specie from this port, last week, were $782,312, chiefly in the form of silver bars, received by the last California arrival. The gold-interest disbursements from the United States Sub-Treasury, last week, were only $69,987. On Saturday, Sept. 1 the semi-annual interest on the Ten-Forty loan falls due, and will be promptly paid off. The coin certificates issued by the Sub-Treasury amounted to $2,188,000. The total exports of specie, hence since Jan. 1, have been $52,882,448, against $19,960,545 same time last year. The receipts of California gold at the port of New York since Jan. 1, have been $27,375,321, against $11,701,023 same time last year.

Extreme depression has characterized the foreign exchange market, during the week. The very extensive purchasers of Government securities for shipment to Europe have added largely to the available supply of prime light bills, on a dull and irregular market, which afforded unusually limited facilities for the negotiation of bills. Tuesday was the worst day of the week. Prime bankers' sixty day bills on London were on that day down to 106⅜@106⅝, and on Paris to 5.40@5.32½; sight bills on London to 106¾@107½; and on Paris to 5.28¾@5.27½. As these rates offer a clear profit of 2⅛@3 per cent. on the importation of Gold, we look to see the announcement of further shipments from the other side, should the demand and orders for 5 20s continue on the basis at 71½@72¼ per cent. Even as we write, we learn by telegraph from Southampton to noon on Wednesday that the steamship *Hermann* left that port on Wednesday, with £62,000 in specie for New York. This makes equal to $1,360,000 in coin of the shipment of which from Europe for this port, we have been advised within a week. The week's exports of domestic produce and miscellaneous goods have been to the currency value of $2,728,713, against $3,395,622 same week last year. The exports since January 1, have been to the value of $130,230,213, or about twenty-eight million dollars in excess of the exports, same time last year.

An extraordinarily active business has been transacted in the National securities, and a further material rise in prices established, the market closing very strong and buoyant for all issues. The 6s of 1881, and the 5-20s of 1862 have been very sparingly offered, and foreign orders for the latter have been executed with such extreme difficulty, as to stimulate a foreign demand for the later issues of the 5-20s. The 5-20s of 1864 were introduced at the London Stock Exchange advantageously. Those of 1865 are about to be introduced in London and Paris. In anticipation of this, a number of the foreign houses have been buying the new bonds in liberal amounts at rising prices. The purchases of the 5-20s of 1865 on foreign account, within the past four days, we are authoritatively assured, exceed three million dollars. The demand for them, from both home and foreign buyers, is rapidly increasing, promising to result in an equalization of the price of this issue with that of issue of 1862, which latter is now very nearly all out of the reach of purchasers, and in the hands of parties who hold the bonds as a permanent investment, for the sake of the liberal income which they yield. It is contended that a further material rise in the market value of the public funds is inevitable, in view of the unprecedented ease in money, which cannot be temporarily employed at higher rates than 3@5, generally at 3@4 per cent. per annum. It is urged that if Five-twenty bonds advanced to 120, they would pay 6 per cent. interest in greenbacks; and ten-forty bonds, with gold at 150, and seven-thirty notes, besides a profit on interest account and the prospective benefit of conversion into five-twenty bonds if they advanced to 115, would pay over 6 per cent. interest in greenbacks. As the loan market is overloaded with loanable funds which cannot be used better than at the rates named above 3@5 per cent. on prime collaterals like Governments, it requires no argument to prove that Government bonds at 115 to 120 are the best and cheapest securities in the market. The Ten-forties have advanced to 103¼@103½, the highest rates ever realized on them. The lowest rates touched by them was 89, over a year ago, in the panic of March, 1865. The Seven-thirties are up 106½@107¼ and interest, on a brisk investment trade. Compound interest notes sell at from 107½ for the issue of May, 1865, to 115¼ for the issue of June, 1864. The six per cent. gold bearing bonds closed on Wednesday at 113@113¼; 5-20s of 1862, at 113¼@114; 5-20s of 1864, at 112½@113½; and 5-20s of 1865, at 109⅝@109¾.

A reflection on the financial policy of the Government found its way into a trade circular, issued last week, chiefly for circulation in England, by a respectable foreign house in the produce commission business in this city. Referring to the original five-twenties, the writer of the circular assumed that they fall due next May, and inferred—how or why we know not—that they will then be paid off by the Treasury Department, *not in coin, but in depreciated currency*. In answer to this unwarrantable reflection—we feel bound to state that the five-twenties of 1862 do not fall due next May, nor absolutely before May 1, 1882; that it is only the privilege of the Government to redeem them that will mature in May, 1867; and that this privilege most assuredly will not be made use of by the Treasury Department, until means shall have been honorably provided to liquidate this National obligation *in coin*, according to the invariable custom and purpose of the department. The creating acts of the later issues of the five-twenties—those of 1864 and 1865, as also of the Ten-forty Loan—expressly provide for the payment of principal and interest in coin. Government has none even of the new five-twenties to dispose of, save in exchange for and in redemption of the short date obligations of the Treasury, such as the seven-thirties, to the first or August issue of which the privilege of immediate conversion is confined. Conversion on maturity alone is the absolute privilege of every holder of the seven-thirty notes. The rule of the Treasury Department, in redeeming permanent loans, was clearly set forth at the time of marketing the five-twenties of 1862 by Secretary McCulloch's predecessor, who now holds the elevated position of Chief Justice of the United States. To settle the question, then widely discussed, of the form in which the bonds of 1862 would be redeemed, Messrs. Fisk & Hatch, bankers of this city, and sub-agents in the distribution of the loan, as well as other bankers, wrote to Mr. Chase, the then head of the Treasury Department, who responded as follows, under date of Washington, May 18, 1864:

SIR:—Your letter of the 13th, making inquiries in regard to the kind of currency with which the five-twenty years' six per cent. and the three years' seven-thirty per cent. notes are to be redeemed, has been received. It has been the constant usage of the department to redeem all coupon and registered bonds forming part of the funded or permanent debt of the United States in coin, and this usage has not been departed from during my administration of its affairs. All Treasury notes and other obligations forming part of the temporary loan are payable and will be redeemed in lawful money—that is to say, in United States notes—until after the resumption of specie payments, when they also will doubtless be redeemed in coin, or equivalent notes. The five-twenty sixes being payable twenty years from date, though redeemable after five years, are considered as belonging to the funded or permanent debt, and so also are the twehty years' sixes, into which the three years' seven-thirty notes are convertible. These bonds, therefore, according to the usage of the Government, are payable in coin. The three years' seven-thirty Treasury notes are part of the temporary loan, and will be paid in United States notes, unless holders prefer conversion to payment. Very respectfully,

S. P. CHASE,
Secretary of the Treasury.

Secretary McCulloch, we have the very best authority for asserting, fully concurs in this formal expression of opinion on the subject. The letter of Secretary Chase was regarded as a final answer to the question of the form of redemption. The question is not now regarded in financial circles as an open one. As far as relates to the later issues of the 5-20s (those of 1864 and 1865,) there is no room for doubt as to the form in which they will be redeemed. The authorizing act of each issue distinctly states that both principal and interest *shall* be paid in coin. Hence there is "foundation in fact" for the assumption of the writer of the circular which we have felt bound to notice. In a later issue of the circular referred to, the writer practically retracts all that he said adverse to the five-twenties. This is well. He might have gone further, however, without damage to his own reputation, and recalled his insinuations against the legality and wisdom of the conservative financial measures of Secretary McCulloch. As these insinuations, however, were utterly unfounded in fact or circumstance, they do not call for formal contradiction from us. The integrity of our chief financial agents has never been questioned, by any one familiar with the workings of our financial system, and having any right whatever to canvass them. Foreigners, who live and trade and prosper here, and yet shirk all the burdens and obligations of citizenship, have no such right of criticism.

In railway and miscellaneous stocks, business has been quite active through the week, and the market, on the whole, strong and buoyant. The dealings of Tuesday and Wednesday were moderate, on a firm range of prices.

In general business, there is healthy progress noticeable. Produce and merchandise are gradually finding more eager purchasers, though with-

out resulting in higher prices. On the contrary, the tendency in most instances has been favorable to buyers. The week's exports of cotton have been 4,816 bales from this port, and 7,000 bales from all the shipping ports, leaving an available supply of 110,000 bales here, and 255,000 bales at all the shipping ports. The total exports of cotton from the United States, since Sept. 1, 1865, have been 1,524,000 bales. The total imports of foreign dry goods, last week, were $2,071,161, and the total amount marketed $2,632,704. The value of foreign merchandise imported last week, was $2,193,303—making the grand total value of last week's imports of dry goods and merchandise, $4,264,464, and since January 1, $208,574,837, against $112,056,359 same time last year.

The latest quotations at the London Stock Exchange compare as follows with former returns:

	Aug. 20.	Aug. 22.	Aug. 29.
Consols	—@88¼	—88¾	89¼
U. S. 5-20's	—@68¼	—70¼	72¼
Erie	—@42¾	—45	45¾
Ill. Central	—@75¾	—77	78¾

The New York exports, exclusive of specie, for the week ending Aug. 28, and since the beginning of the year, compare as follows:

	1865.	1866.
For the week	$3,395,622	$2,728,713
Prev. reported	99,532,431	127,501,500
Since January 1	$102,928,053	$130,230,213

The New York imports for the week compare as follows:

	1865.	1866.
Dry goods	$2,632,704	$2,071,161
Gen. merchandise	2,443,876	2,193,303
Total for the week	$5,076,580	$4,264,464
Prev. reported	106,979,779	204,310,373
Since January 1	$112,056,359	$208,574,837

Labor Saving.

We invite the attention of parties engaged in the construction of Railroads and other earth works to the card of the *American Labor Saving Co.* of N. Y., to be found in our advertising columns this week.

As these machines supply a want long felt for some more efficient means of moving earth, and as without any drawbacks or disadvantages, it is claimed that they effect a saving of 30 to 50 per cent., according to the nature of the soil in which they are worked, they will doubtless meet the favorable consideration of contractors.

☞ We invite attention to the Advertisement of Messrs. Hosford & Co., in another column. Mr. Humphrey, late Cashier of the Weedsport Bank, Weedsport, N. Y., has been for a long time connected with banks in the interior of this State, understands the wants of individuals and bankers; and being connected with those who thoroughly understand the business in this city, feel that with ample capital at their command, they can fill any orders that they may have with dispatch and satisfaction.

☞ Proposals will be received until the 11th inst., at the office of the Newark and New York Railroad Co., Newark, N. J., for the graduation of the entire road, and for the piling between Newark and Bergen on the same line.

☞ The Allegheny Valley Railroad Company will receive proposals until the 25th inst., for the graduation, masonry, ballasting and ties for about 45 miles of their road, extending from Brady's Bend to Oil City. Address F. Wright, Chief Engineer, Pittsburg, Pa.

Railroad Earnings.—Weekly.

The traffic of the Great Western Railway of Canada, for the week ending Aug. 24th, 1866, were $56,655 88
Corresponding week of 1865 ..... 64,851 60

Decrease $8,195 72

The earnings of the Grand Trunk Railway of Canada for the week ending Aug. 18th, 1866 were $118,938 00
Corresponding week of previous year.. 116,785 00

Increase..... $2,153 00

Same week in 1865 ..... 87,338 44

Increase..... $7,275 79

A new Route to the Pacific.

We learn from a gentlemen who has been spending the spring and summer North that plans are now on foot for the prosecution of a new railroad route to the Pacific, which, as it takes more practical and availing ground, is shorter and every way more eligible, will be more likely to go through than any other, especially since Gen. John C. Fremont, at the head of a large number of capitalists, is at the head also of the enterprise. The plan is to connect the line of railroads running through the southern part of Texas, thence to Monterey, with Guayamas, now in Mexico, but which is soon expected to be in the United States.

The cultivable and inhabitable region is to be traversed, and not the arid plains, and a mining country is to be pierced through by it during its whole extension through what is now Mexico. This is part and parcel of the scheme of a "liberal loan," which is to be repaid with concessions of territory. This or a permitted protectorate over American interests in Mexico is to make this railway enterprise safe at first and very profitabe afterward. With Fremont at the head of it, it will be sure to have congressional sanction and assistance. Will New Orleans see that its connection with the line of railroad is speedily made.—*New Orleans Picayune.*

Journal of Railroad Law.

INJURIES TO SERVANTS OF COMPANY BY NEGLIGENCE OF SWITCHMEN.

The case of Gilman *vs.* Eastern Railroad Company decides that a railroad corporation is not responsible to a person employed by it to repair its cars, for a personal injury arising from the negligence of a switchman, in failing properly to adjust a switch upon the track over which he is carried by the corporation, free of charge, between his home and the place of his work, *provided* the corporation has used due care in the selection of the switchman; but if the switchman was an habitual drunkard, and this fact was known or ought to have been known to the corporation, and the injury resulted from his intoxication, the corporation is responsible.

At the trial, the plaintiff in his opening stated that he expected to prove the following facts:

The plaintiff lived in East Boston, and was employed there by the defendants as a carpenter in their repair shop. They afterwards made a bargain with him by which he was to work for them in North Chelsea, which is about four miles from East Boston, in repairing gravel cars, for a certain sum by the day, and to be carried between East Boston and North Chelsea in the morning, at noon, and after his work was ended at night free of expense. Nothing was said as to how he should be carried, and he did not know. The plaintiff had no control whatever over the trains, on the day of the injury, which was several months after the parties had entered upon the *execution* of the contract, the plaintiff was carried from his work at noon to East Boston, upon a flat platform car, having no seats, sides or railing, pushed by an engine, the tender of the engine being between the engine and the car; and when this train reached East Boston, the platform car was detached from the tender, while the train was in motion, for the purpose of allowing the tender and engine to follow on a different track to the engine house. To do this, it was necessary for the switchman to shift the track before the car arrived at the switch, and after this car had passed upon the side track to change the track back again so as to permit the tender and engine to pass upon the main track. The switchman employed by the defendants, when the car was in the proper place, failed to change the switch, but in attempting to do so left the switch about half way between the two tracks, so that if the car had proceeded its whole length it would have run off the track and exposed the plaintiff to great injury. The brakeman seeing this immediately attempted to stop the car, to prevent its running off the track, and greatly and suddenly checked its speed, whereby the tender and engine came upon it, and the plaintiff who was sitting upon the floor of the car, in the use of due care, was thrown therefrom upon the track, and the tender passed over his right leg, crushing it and rendering amputation necessary. The switchman had been employed at this switch by the defendants for two years immediately prior to said injury, and was of grossly intemperate habits and a habitual drunkard, and was grossly intoxicated at the time of the accident, which was the reason why he could not change the switch, and so placed it that the car would have run off the track if it had not been stopped; and when first employed by the defendants, he had the reputation in the community of East Boston where he lived of being a man of grossly intemperate habits and an habitual drunkard, and while in their employment was drunk every night.

The plaintiff, however, had no knowledge of the switchman or his habits until after the accident.

Upon this opening, the judge stated that he was in doubt whether, if these facts were proved, the plaintiff would be entitled to recover; and by consent of parties the case was reserved for the determination of the whole Court.

Gray, J.—The case presented by this report is to be determined by the application of rules now too well established to require an elaborate statement of the reasons upon which they are founded, or an extended examination of the authorities by which they are supported.

A servant, by entering into his master's service, assumes all the risks of that service which the master cannot control, including those arising from the negligence of his fellow servants. In case of an injury to one servant by the negligence of another, it is immaterial whether he who causes and he who sustains the injury are, or are not engaged in the same or similar labor, or in positions of equal grade or authority. If they are acting together under one master in carrying out a common object, they are fellow servants. The master indeed is bound to use ordinary care in providing suitable structures, engines, tools and apparatus, and in selecting proper servants, and is liable to other servants in the same employment if they are injured by his own neglect of duty. But it makes no difference whether the master is an individual or a corporation; in either case, he is responsible to his servants for his own negligence, but not for that of their fellow servants.

The first attempt to hold a master reponsible to one servant for the negligence of another was made in England less than thirty years ago, and was defeated by the judgment of the Court of Exchequer. Priestly *vs.* Fowler, 3 M. & W., 1. Not long afterwards a similar attempt was made in this Court with the like result, as announced in an elaborate opinion of the late Chief Justice. Farwell *vs.* Boston and Worcester Railroad, 4 Mt., 49. Many other cases followed in Great Britain, in which the English Courts uniformly maintained the same doctrine, but the Scotch judges were less consistent. At last two cases were brought by appeal from the Courts of Scotland to the House of Lords, there argued by the ablest counsel, and after deliberate advisement and careful examination of all the English and Scotch cases, and the opinion of Chief Justice Shaw, decided according to the unanimous opinion of Lord Cranworth, Chelmford, Brougham and Wensleydale, in favor of the master, upon principles of general jurisprudence, applicable alike to England and Scotland. Bartonshill Coal Company *vs.* Reid and McGuire, 3 Macqueen, 266, 300. In the quaint phrase of the reporter "Reid and McGuire were both victims of the same accident, which though melancholy, has settled the law." Ib., 301, N.

In this Court the rule has been upheld under a great variety of circumstances. A railroad cor-

poration has been held not to be liable to an engineer on a train for an accident from the negligence of a switchman; Farwell *vs.* Boston and Worcester Railroad, above cited; nor to one brakeman for the negligence of another on a different train; Hayes *vs.* Western Railroad, 3 Cush., 270. So a woman working in a manufactory cannot maintain an action against the corporation owning it for an injury occasioned by the negligence of the Superintendent. Albro *vs.* Agawam Canal Company, 6 Cush., 75. A railroad corporation has been held not to be responsible in damages for an injury to an apprentice in its machine shop, while acting as foreman on a train for a defect in a switch where no want of ordinary care on the part of the corporation was shown; King *vs.* Boston and Worcester Railroad, 9 Cush., 112; nor to a laborer, employed to repair the road bed, while being carried to his place of work, by the negligence of those in charge of the train; Gilshannon *vs.* Stonybrook Railroad, 10 Cush., 228; nor a carpenter, carried over the railroad to repair its fences, bridges and switch frames, by negligence of the engineer, or of servants whose duty it was to inspect the axles of the cars; Seaver *vs.* Boston and Maine Railroad, 14 Gray, 466.

These cases, especially of Gilshannon and Seaver, cannot be distinguished as principle from the present. In each of those two, as in this, the plaintiff's work did not begin until his arrival at his destination; and in this as in those, the work was upon the structures means or instruments with which the defendants were to carry on their business of common carriers, the workman paid nothing for his passage, and the object of the defendants in carrying him was to get him to his place of work. Risks from the negligence of a switchman, like those from the negligence of an engineer and other servants in charge of the train, must or should have been contemplated by the plaintiff as incident to the employment which he had undertaken.

The case of Russell *vs.* Hudson River Railroad, 17 N. Y., 134, is to the same effect. And the cases in the House of Lords, above cited, were actions against a mining company for injuries occasioned to miners, who worked in the mine all day, by the negligence of the man who let them down in the morning and drew up at night.

The plaintiff was therefore a fellow servant of the switchman, and not entitled to recover of their common master for any injury occasioned by the negligence of the switchman or other servant in the same employment.

But it is quite well settled both in England and America that a master is bound to use ordinary care in providing his structures and engines, and in selecting his servants, and is liable to any of their fellow servants for his negligence in this regard. Tarrant *vs.* Webb, 18 C. B., 797. Bartonshill Coal Company *vs.* Reid, 3 Macqueen, 272, 287, 288. Ormond *vs.* Holland, El., Bl. & El., 102. Weems *vs.* Mathieson, 4 Macqueen, 215. Clarke *vs.* Holmes, 7 Hurlst and Norm., 937, affirming S. C., 6 Hurlst and Norm., 349. Keegan *vs.* Western Railroad, 4 Selden, 175. Cayzer *vs.* Taylor, 10 Gray, 274. Snow *vs.* Housatonic Railroad, 8 Allen, 441. The duty of selecting fit servants belongs to the master, whether the master is an individual or a corporation. The same tests of the liability of masters have been applied to corporations as to individuals in the English decisions above cited, and in our own cases, from Farwell's in the 4th, of Metcalf to Snow's in the 8th of Allen. To vary the rule in the case of corporations, upon the ground that they must always act by servants or agents, would be to exempt them from liability altogether.

The evidence offered by the plaintiff at the trial was competent to show that the defendants knowingly, or in ignorance caused by their own negligence, employed an habitual drunkard as a switchman, and thereby occasioned the accident. Of the sufficiency of this evidence a jury must judge. If the plaintiff can satisfy them that such misconduct or negligence in the defendants caused the injury, and that he himself used due care, he may maintain his action.

Case to stand for trial.

Canadian Railways.

The following is an official statement of the Traffic Returns of the Canadian railways for the month ending July 31, 1866:

	Passengers.	Mails and sundries.	Freight.	Total. 1866.	Total. 1865.	Increase.
	$	$	$	$	$	$
Great Western	116,411	10,782	90,130	217,273	211,376	5,997
Grand Trunk	210,677	19,600	270,031	500,308	466,731	33,577
London and Port Stanley	1,975	112	1,559	3,646	3,110	536
Welland	1,065	1,694	13,812	16,571	9,797	6,774
Northern	7,031	992	33,758	41,781	40,097	1,684
Port Hope, Lindsay and Beaverton	1,643	134	10,316	12,093	8,680	3,413
Port Hope and Peterborough	2,334	128	6,137	8,599	7,720	879
Cobourg & Peterboro' (no returns)	.....	.....	.....	.....	.....	.....
Brockville and Ottawa	4,178	951	3,496	8,625	6,431	2,194
Prescott and Ottawa	5,706	710	1,714	8,130	6,242	1,888
Carillon and Grenville	2,093	71	89	2,253	644	1,509
Stanstead, Shefford & Chambly	.....	.....	.....	.....	.....	.....
St. Lawrence and Industry	255	.....	590	845	1,045 dec.	200
Total	353,368	35,124	431,692	820,124	761,873	58,251

☞ The St. Paul City Council have had under consideration the subject of granting aid to the Lake Superior Railroad Company, with a view to pushing the work on that road as fast as possible. The matter was referred to a Committee of the Council, which reported in favor of the issuing of city bonds to the company to the amount of $200,000. The Committee also reported in favor of issuing bonds to the amount of $50,000 to the St. Paul and Winona Railroad Company, to be delivered on the completion of ten miles of that road, with the cars running thereon.

Camden and Amboy Railroad.

The Camden and Amboy Railroad Company, at its last semi-annual dividend period, made a distribution of new stock of the company at par, to holders of stock at the time, at the rate of one share of new stock for every four shares of old stock held. For the instalment paid on each fractional part of four shares the company will give to the holder a special receipt for such fractional amount, redeemable when presented in sums of $25. The stock of the Camden and Amboy Company is worth in the market $28 above par, consequently the privilege of subscribing and paying the par price of the new stock distributed the reader naturally supposes to be worth (less the trouble and commissions of conversion) $7 for each special receipt representing one-quarter share of stock; $14 for each half share; $21 for three-quarters of a share, and $28 for all the fractions to complete a full share. But as the subscription to the new stock cannot be paid for in full, nor faster than $25 per share half yearly, the market price of the privilege of subscribing to it is not equal to the present premium of $28 per share, at which the old stock is now selling. We give the following quotations, which, it will be seen, implies that the holder has paid the first instalment of 25 per cent. due and payable before the 1st of September:

For	$6 25	paid, they pay	$8 75;	sell at	$9 38.	
"	12 50	"	17 50	"	18 75.	
"	18 75	"	26 25	"	28 13.	
"	25 00	"	35 00	"	37 50.	

The premium here given on each quarter share of new stock, it will be seen, is $2 50. According to the circular issued by the company, a delay of thirty days in paying any instalment will forfeit all previous payments. As receipts representing instalments paid on fractional parts of a share are not entitled to the proportion of dividends paid on scrip representing a full share, those holding fractions will naturally desire to consolidate them by purchase or sale.

Railroad from Middletown to Elkton.

A railroad is projected from Middletown to Elkton. It is intended by this road to go direct from that portion of the State of Delaware and Eastern Shore of Maryland below Middletown to the city of Baltimore. The present route by railroad from Middletown to Baltimore is by this city. This new route will be about eighteen miles in length, saving about twenty-two miles of travel. The Delaware railroad bids fair to have more branches and feeders than most other railroads in the country.—*Wilmington (Del.) Rep.*

☞ The first section of eight miles of the Stockton and Copperopolis (Cal.) Railroad will be in running order by the first of September. A road from Stockton to "deep water" at "Venice," a distance of 15 miles, has been surveyed; and the road will be built between the points and in running order within a year.

☞ The New York, Philadelphia and Norfolk Air Line Railroad Company have purchased and leased extensive wharf property in Norfolk. The first steamer on this route will take her place on the 15th inst. The time between Norfolk and Philadelphia will be reduced about twelve hours, and to New York sixteen hours.

☞ A gentleman who recently passed over a portion of the European and North American railway gives it as his opinion that at least 30,000 sleepers will be needed ere long to make the road as substantial as it should be, and as it was prior to the advent of the "economy" experimentalists.

Statistics of Canada.

The first part of "The Miscellaneous Statistics of Canada, for the year 1865" has been issued from the Auditors' Department of the Government, and treats of banks, railways, electric telegraphs, etc.

The first of the tables in the pamphlet is a compilation of statements as to the area, population, debt, revenue, expenditure, imports and exports of the Province.

Under the first of these heads we learn that Upper Canada has an area of 121,260 square miles; that up to the 31st December in 1863, 24,231,197 acres of that superficies had been surveyed; the total amount surveyed up to the same period in 1864 amounting to 24,629,714, and last year to 24,756,159. Up to 1863, 20,853,971 acres had been disposed of by sale and free grant—the total under the same head amounting to 21,026,204 in 1864, and to 21,488,342 in 1865.

Lower Canada by the same table is credited with an area of 210,020 square miles; and in 1863 had 24,853,390 acres surveyed; in 1864, 25,197,267, and last year 25,565,678. In the first of those years 18,477,820 acres had been disposed of by sale and free grant; in 1864, 18,897,269; and in 1865, 19,089,355. It would therefore appear, compared with the amount of land surveyed and taken up in the Western Province, that a far larger extent—at least three million more acres—had been bought or granted in Upper Canada.

A tabular statement of the aggregate in both Provinces gives the following result:

Area square miles.	Acres surveyed to Dec. 31st.		
	1863.	1864.	1865.
331,280*	40,084,587	49,826,981	50,321,837

* As the Northern and Western boundaries have not yet been surveyed the area is only approximate.

The aggregate number of acres taken up for settlement or disposed of by free grant in both provinces up to the same periods is as follows:

	1863.	1864.	1865.
Acres	39,331,791	39,923,473	40,577,697

The auditor next gives a statement of the population and its annual ratio of increase. We thus find that the population of Upper Canada, in January, 1852, came to a total of 952,094 souls, and that in the decennial ending January, 1861, it had increased to 1,396,091—the ratio of annual increase amounting to 4.34 per cent.

The census tables show that Lower Canada during the first of these periods had a population of 890,261, and that by the next census in 1861 it had augmented to 1,111,566, the annual ratio of increase being under that of Upper Canada and only amounting to 2.50 per cent.

Assuming that the population of both Provinces increased at the same ratio during the three past years, the tables next give the following statement as to the amount of population in

	1864.	1865.	1866.
Upper Canada...	1,586,130	1,655,022	1,726,980
Lower Canada...	1,196,949	1,226,840	1,257,480
	2,783,079	2,881,862	2,984,460

At the same rate of increase, the population of the whole Province will amount to about 5,000,000 in 1876, and 8,500,000 in 1886.

We next have statistics of the revenue of the Province during the past three years, its expenditure and funded debt, less sinking fund; loans and redemption of debt being respectively excluded from the two former heads. These three items compare as follow:

	Revenue.	Expenditure.	Debt.
1863	$9,760,316	$10,742,807	$60,355,472
1864	10,918,337	10,587,142	60,287,575
1865	10,470,608	11,656,368	60,019,181

The imports, customs' duty and exports of the whole Province during the same period were as follow:

	Imports.		Exports.
	Total Value.	Total Duty.	Total Value.
1863	$45,964,493	$5,169,173	$41,831,532
1864	52,498,066	6,637,503	38,665,446
1865	44,227,822	5,617,811	54,219,759

In 1863 the population to the square mile of the country was 8.40; in 1864 8.69; in 1865 9.01.

The revenue in 1863 amounted to $3.50 per head of the population; in 1864 it had risen to $3.79, and last year had again fallen to $3.17.

The expenditure per head of the population during the same period was $3.86 in 1863; $3.67 in 1864; and $3.90 in 1865.

In 1863 the debt per head of the population came to $21.69; by 1864 it had fallen to $20.93, and by last year to $20.11. The imports *per capita* in the same period were $16.51 in 1863; $18.23 in 1864, and $14.82 in 1865. Each person—assuming the same scale—paid $1.85 in Customs duties in 1863; $2.30 in 1864, and $1.88 in 1865. The exports in 1863 came to $15.03 per head of the population, fell to $13.42 in 1864 and rose to $18.17 in 1865.

The statistics respecting the banks and railways are equally interesting. Collectively, referring to the business and position of the latter, the Auditor says "the table in spite of the financial difficulties which almost all these undertakings have experienced, exhibits the satisfactory result, that the gross receipts of all the Railways have been nearly $11,000,000, whilst the working expenses, including the renewals of rails, bridges, &c., have barely exceeded $7,000,000, leaving a net profit of $3,782,576 on a total capital expended of $121,543,189."

☞ The New York and New Haven Railroad Company announce the 1st September as the day fixed for the allotment of the ten thousand new shares, which are to be divided in the proportion of one new share to every five old shares. An instalment of $10 per share is to be paid on the 1st of October, and $90 on the 5th of November.

☞ The Winona and St. Peter Railroad, (from Winona to Owatona), and the Minnesota Central, (from Owatona to St. Paul) have just been completed. Communication between St. Paul and Winona is thus established. Distance, about 160 miles.

☞ Bids for the construction of the Tunnel under the Chicago River were opened on the 23d ult. Nineteen bids were offered, ranging from $245,000 to $430,000. The Lake Tunnel will be completed by the first of November. Nine thousand feet are already completed, and only fifteen hundred more are required to finish the work.

☞ A meeting of the friends of the Philadelphia and Baltimore Central Railroad will be held in Belair on the 8th of September, for the purpose of ascertaining whether the citizens of Baltimore and Hartford counties will give such aid and support to the construction of said road as will ensure its speedy completion to the city of Baltimore.

☞ The Toledo, Ann Arbor and Saginaw Railroad company has been organized by the election of the following officers:—D. L. Latourette, of Fenton, President; Chas. M. Richmond, of Ann Harbor, Secretary and Treasurer; D. L. Latourette, M. T. Thurber, J. J. Littlefield, J. B. Galt, O. H. Richmond, Directors.

☞ The extension of the Morris and Essex railroad, of New Jersey, to Easton, Pennsylvania has been completed, and trains are now passing over it. Through trains to and from New York will not commence their trips until the Fall arrangements go into effect, which will be in a few days.

☞ The Union Pacific Railroad has been completed to Fort Kearney, 200 miles west from Omaha. Another 100 miles, reaching the fork of the Platte, are promised by the 1st of January next. The road will probably reach the Black Hills nearly half way from the Missouri to Salt Lake, during the year 1867.

☞ The directors of the Kansas Branch of the Pacific Railroad have decided to put two hundred and forty miles more under immediate contract, to be constructed by two years from September 1. This will be one-half the distance from Fort Riley to Denver. Passenger cars will run to Fort Riley in about two weeks.

American Railroad Journal.

New York, Saturday, September 8, 1866.

The Central Pacific Railroad—As It is.

In a ride over this road a few days since, we were forcibly impressed with the gigantic nature of the enterprise, and how much California has to be proud of, in the manner in which her portion of the great link which is destined to bind the American Continent together, is being constructed. From the starting point in Sacramento, to the present terminus of the road, Alta Station, seventy miles distant, the immensity of the affair is apparent. Over level country, through hills, up steep mountains, through and around them, has the way been prepared for the journey of the iron horse. The cuttings on the route are in a number of instances the most difficult, and at times the most remarkable of any that any railroad enterprise in the country has had to contend with; but they have been met with perseverance, ardor and a desire to overcome them, which has been successful to a wonderful degree. The road is now completed to Alta, and graded twenty-three miles beyond to Cisco, to which point the iron will be laid and the trains running by the 1st of October. This point would have been reached earlier, but the loss of iron on the clipper ship Hornet, which was destroyed by fire at sea, delayed its completion some time. When the road is open to Cisco, passengers leaving Virginia City at 4 o'clock A. M., will reach San Francisco late the same night, as it is the intention of the California Steam Navigation Company to change the hour of departure of their steamers from Sacramento from 2 o'clock P. M., to 4:30 P. M., thus carrying passengers from Virginia City to San Francisco in 21 hours. From Cisco to the summit the distance is twelve miles, but that point will not, in all probability, be reached the present year, although every effort will be made to accomplish it, the entire distance then by rail being 105 miles.

In starting out from Sacramento, our train, consisting of ten cars, was drawn by the fine locomotive A. A. Sargent, constructed by Messrs. H. J. Booth & Co. of San Francisco. At Rocklyn, however, we left it, taking in its stead the immense engine the Humboldt, built at Paterson, N. J., by Messrs. Danforth, Cooke & Co. After leaving the point just named, the grade commences to rise with some rapidity, and our train being equal to one hundred and thirty tons of freight, required an engine of great power to climb the hills. From the moment of leaving Rocklyn, until Alta is reached, there is not the slightest diminution in the interest which the surrounding scenery and the vastness of the work inspires. The road itself is constructed in the very best manner, and appears to be as solid as a stone wall. All the irregularities which the severity of the last winter season produced, have been remedied, and unless the places were pointed out, no one would be the wiser that a pound of dirt had caved or slid by the action of the elements. That the work in every department has been well done, a glance at it is sufficient proof, and we speak of the road precisely as it is. The grading on the entire line of the road has been artistically done, the culverts, all of the best description of granite, and the filling in, are all of the most substantial character. The grade for about twenty-five miles is not over 60 feet, it then rises very rapidly, and when the centre of Bloomer Gap is reached, the grade is 105 feet, and then again falls to 60 feet. The difference is very perceptible, the engine laboring with all its great capacity to perform its portion of the work. This Bloomer Gap, or cut, is a curiosity in its way. The material through which the road passes here is a sort of concrete cobble stone strata, very difficult to cut through; and though in its deepest points it is 63 feet, it is cut out as smooth as if done with a knife, and not an iota has caved in by any action whatever. This cut was completed when the resources of the company were somewhat limited, and therefore the officers thereof point with considerable satisfaction to this early obstacle in their path. However grand the construction of the road has been to Colfax, the work done beyond that point excels anything of the kind we ever saw. It is true that the curving of the road from Rocklyn to Colfax is very attractive in its kaleidescopic changes. The view from the trestle work at Newcastle is also very fine, but the *chef d'oeuvre* is, as we have said before, in that portion of the road after leaving Colfax.

People all talk of Cape Horn, speak of its grandeur and beauty, its romantic danger, its sublimity and magnificence, but to be appreciated it must be realized by ocular demonstration. We leave Colfax, and after a short run, come into the open country. We are in doubt as to the way we get out of the wilderness. We catch a glimpse of a bridge to the left, but it seems to lie across, not parallel with us. Across a tremendous ravine we see a cutting along the mountain side of a grade one hundred and five feet to the mile. A graceful curve in the road brings us to a magnificent bridge (now in the process of being covered) one hundred and fifteen feet high in the centre, to the left of it Bear River, and in less time than it takes us to write this we are on the other side. Another curve and we commence the ascent of the mountain side. That portion of the road from Colfax is now parallel with us. Higher and higher we go. We look forward and see the locomotive pulling up hill, like the leaders in a stage team; we look back to the rear of our train and the last car seems twenty or thirty feet below us. Up we go, all excitement. The sublime view commences to open up to our right and before us. The engine puffs and drags. But a short distance more and we will be nearly 1,280 feet above the level of the ocean—the point is reached. We are lost in wonderment that it has been attained

by the railroad. We look at the cutting on the mountain side, the road bed, the rails, the cars; it is clear, but how wonderful. Away across a gorge, which in its depth and vastness almost took our breath away, was nestled on a ridge, corresponding in hight with the one upon which were standing the pretty little town of Iowa Hill, one lone tree standing sentinel-like about one thousand feet in advance of a cluster. In an air line Iowa Hill might have been two miles distant, to reach it by road nearly fifteen. One thousand two hundred and thirty feet below us flowed the American River, looking about thirty feet wide, its width being nearly eight times that. Across it at Mineral Bar, Daddy Rice's Bridge looked, as was facetiously remarked, like a cigar box, the trees like toys in a child's farm yard. From the bridge, up the mountain side, wound the road to Iowa Hill, seven miles in length, seeming as long and as wide as a daub of yellow paint in a schoolboy's book. And here was our train like Mahomet's coffin hanging in mid air. We examined the masonry at this point of the road. It is a work of itself, solidity and care being the ruling features. Startling as this point is to travelers, it is, with prudence, watchfulness and attention, as safe as the most level road. It is a remarkable and wonderful undertaking, and has been left to California to carry through successfully.

Leaving Cape Horn we moved along on our way to Dutch Flat. We have a fine view of the surrounding country, taking in at a glance some of the richest mining ground of Nevada County, including You Bet and Little York. From Cape Horn there has been some work done upon the road of great magnitude. We pass over a trestle bridge built like iron, and ninety feet high. It is the intention of the company to fill up the gaps over which all the trestle work of the road is constructed. The bridge to which we now allude is 1,000 feet long, and just beyond it a cutting at least 500 feet through, and one of the most difficult yet met with. It was designed originally for a tunnel, but the nature of the earth was such that it caved in as fast as excavations were made, and it was resolved to cut it out entirely; 450,000 cubic yards of earth were removed. To prevent slides, the sides of the opening are cut into benches sloping back. Gold Ruu, famous for its water privileges, is met with on our way, and we pass through cuttings of pay dirt on either side. We obtained but a glimpse of Dutch Flat, as the road does not run through its sacred precincts, but goes outside and beyond it; prognostications, wagon road, and everything of that kind to the contrary notwithstanding, $640,000 has already been expended on the road by the company beyond that point; from Dutch Flat to Alta Station, 3,625 feet above the level of the sea, the distance is a little over a mile. Alta was reached at one o'clock precisely, and at half past two o'clock the signal was given for returning.

As we have said before in the course of this sketch, the work done upon this road is of a character never before attempted or excelled, and will stand for ages at the head of railroad architecture in the world. It has cost already, and will cost, an immense amount of money, furnished by the Government, and provided from a revenue paid into the National Treasury by the people of the entire Union. There is not a man in the United States paying taxes for the support of the Government, that does not contribute, indirectly it is true, to the construction of the Central Pacific Railroad. The Directors of the institution must therefore see the necessity of popularizing the undertaking. We know full well that the road has progressed to such an extent, and the means at their disposal so ample to continue on the work, that they feel a sort of independence about the matter; but the idea of railroad communication is rapidity and economy. The tariffs of fare and freight on the Central Pacific Railroad are too high, and while we do not desire to intrude upon the business system the Directors have seen fit to adopt, yet, in the rates of passenger traffic, we think they could make a sensible reduction without loss. Give the people the idea, however slight it may be, that they are not entirely lost sight of in the magnitude of the undertaking, which calls forth this, and the Central Pacific Railroad will be looked upon in the light that it should, as a benefit and help to all classes and conditions.

The company are achieving a great triumph, in building a railroad to the clouds. When the summit is reached, and the iron horse greets the sun at an altitude of 7,042 feet, then indeed may it be said that human ingenuity has eclipsed itself.

From Sacramento to Dutch Flat, about 68½ miles, the highest ascending grade to the mile is 105 feet, and the average 70. From Dutch Flat to Blue Canon, ten miles, the highest grade allowed by Government is reached, 116 feet. This grade runs along at one point over three miles. This is the grade as far as we went.

The company are now expending about $400,000 per month, very nearly $5,000,000 per annum, in the construction and working of the road. This, of course, must increase instead of diminish. Of one article alone, Santa Cruz powder, they use 300 kegs per day, which at $4 per keg, is $1,200 per day for powder. It is there intention to construct, within a year or so, immense work and construction shops in Sacramento, which will give employment to a large number of hands, and will put in circulation from $750,000 to $1,000,000 *per annum*. There are now some 8,000 men employed upon the road, and unless the signs fail, the road will be completed to the Truckee Meadows, to the junction of the railroad from Virginia, in two years from the present writing. B.

San Francisco, Cal., July 28, 1866.

Internal Revenue Tax on Wire.

The Commissioner of Internal Revenue has decided that the tax on wire, whether made of iron, steel, brass or copper, is five per cent. *ad valorem*, as a manufacture not otherwise provided for. There is, however, in the tenth section of the new law a provision exempting wire made from wire less than No. 20, upon which a tax has been assessed and paid as wire, and also a provision that no manufactured wire shall pay a greater tax than that imposed on No. 20 wire gauge. When wire less than No. 20, on which a tax of five per cent. *ad valorem* has been paid, is afterwards drawn to a greater degree of fineness, no additional tax is imposed thereon. Wire, however, on which no tax has been previously paid as wire, is liable to a tax of five per cent. upon the price at which it is sold, whether that price is sixty cents, one dollar, or two dollars per pound.

Old Colony and Newport Railroad.

The earnings of this road for the years ending May 31, 1865 and 1866, have been as follows:

	1865.	1866.
From passengers	$698,188 99	$870,560 88
" merchandise	336,637 87	400,364 71
" U. S. mails	10,750 00	10,750 00
" rents	20,944 27	13,967 57
	$1,061,521 13	$1,295,643 16
General expenses	629,842 32	699,608 71
Earnings less exp.	$431,678 81	$596,034 45
From which deduct—		
Interest	$48,345 83	$92,321 39
U. S. taxes	31,313 79	28,408 62
State tax	34,393 03	41,177 76
	$114,052 65	$161,907 77
Net earnings	$317,626 16	$434,126 68
Balance of income by last report	127,082 45	124,950 75
	$444,708 61	$559,077 43
Dividends, Jan. & July.	303,809 61	354,538 95
	$140,899 00	$204,538 48
U. S. tax on extra div..	15,948 25	.....
Balance, May 1	$124,950 75	$204,538 48

In 1864 the general expenses were $396,996 90 interest, $39,684 70, U. S. taxes, $14,570 94—total, $451,052 54; leaving a balance of $360,362 99. There was no State tax in 1864. The balance to credit of income account, May 1, 1864, was $127,082 45.

The Old Colony and Fall River Railroad Company united with the Newport Railroad Company in July, 1863. The extension was partially opened in February, 1864, and regularly operated in December of that year.

The debt of the company May 31, 1865 and 1866 was as follows:

	1865.	1866.
Bonded debt	$575,500	$551,500
Floating debt	430,323	874,028
Land notes	280,000	280,000
	$1,285,823	$1,805,528
Add capital stock	3,609,620	4,819,760
Total	$4,895,443	$6,625,288

—increase of indebtedness, $1,729,845.

The Dighton and Somerset Railroad was put under contract in the spring of 1865; and the bridge over Taunton river, at Somerset, was contracted for at the same time—the whole to be completed in the fall of that year. It was proposed from the commencement of the enterprise that at or near its completion, it should be united with the Old Colony and Newport Railroad, as contemplated by the charter. Upon this subject the directors say:

The Dighton and Somerset Railroad Company has been united with this company, as was contemplated at the commencement. The union took place in December last, by the votes of the two companies, in accordance with the provisions of the charter of that company; and the subscribers to stock in that company have received one share of the capital stock of Old Colony and Newport Railway Company, for each share owned by them in the Dighton and Somerset Railroad Company.

Early in the year 1864, movements were made in respect to building this branch; the pressure being so great, that it was impossible to defer it longer. The entire capital stock was subscribed, contracts were entered into, and active measures were taken, to hasten its building, so far as it could be done consistently with proper economy.

The road has been built at a time when all materials and labor commanded unusually high prices. It was, in the inception of the undertaking, anticipated that the cost would be much less than its Directors were forced to pay to insure its completion. As the work progressed, it was found much more difficult to execute than it was originally supposed. During the past year, much delay and expense have been incurred in consequence of the ledges, masses of rock, and indurated earth, which were unexpectedly met with. Some of the contractors failed to keep their contracts, and additional sums of money had to be paid them to secure the completion of the work. In several instances, we believe, no profit has been realized by contractors, notwithstanding the large sums we have paid them. We shall have, however, the satisfaction of possessing a railroad of thirty-three miles in length, built in the best manner in every particular, running in a straight line for twenty-seven miles, of an easy grade, shortening the distance between Fall River and Boston about five miles, and enabling us to reduce our running time between these two cities fifteen minutes, a circumstance of great importance to our express-trains. The road passes through important places, among which is the city of Taunton, distinguished among the cities of Massachusetts for the enterprise of its citizens, and its rapid and steady growth in population and wealth. From the local business on the line of this road, as well as from the greater facility we shall have in doing our through business, we anticipate, with confidence, a large and constantly increasing source of profit to this company. Further outlays on account of this road have been made since June 30th last; and other items of expenditure must occur, although we may now deem the road as substantially built and paid for.

The following is a statement of receipts and expenditures of the Dighton and Somerset Railroad Company, from the organization of the company, to June 30, 1866.

RECEIPTS.

Capital Stock:		
Amount paid in		$850,000 00
Less amount paid off by the issue of stock of the Old Colony and Newport Railway Co		847,500 00
Capital stock remaining unpaid June 30, 1866		$2,500 00
Dividend of interest on payments for capital stock	$36,792 70	
Less dividends paid to June 30, 1866	36,651 36	
Amount of dividends unpaid		141 34
Old Colony and Newport Railway Company.		
Capital stock	$850,000 00	
Cash and notes	403,736 96	
		1,253,736 76
		$1,256,378 10

EXPENDITURES.

Construction		$1,221,520 78
Dividend of interest to stockholders	$36,792 70	
Sundry payments	1,841 52	
	$38,634 22	
Less interest received on loans	7,988 18	
		30,646 04
Total expenditures		$1,252,166 82
On hand:		
Stock of the Old Colony and Newport Railway Co	$2,500 00	
Cash	1,711 28	
		4,211 28
		$1,256,378 10

In establishing the line of the Dighton and Somerset Railroad, it was found desirable to use a portion of the Easton Branch Railroad; and, after deliberation, it was deemed advisable to purchase this branch, that we might use two and one-half miles of it as a part of the Dighton and Somerset Railroad, and control the remaining portion, that it might be a source of profit, and not of trouble, to the new company. Accordingly the road was purchased; and as it appears in our accounts on May 31, 1866, the sum of $54,800 had been paid for it; and all the shares of that company are now held by five of your Directors in trust for your company. It has been deemed advisable to preserve the organization of the Easton Branch Railroad for the present as an independent company. This road, of four miles in length, running between Easton and Stoughton, and connecting with the Stoughton Branch Railroad, has always been of itself more than self-supporting; has made regular dividends of six to eight per cent. per annum to its stockholders, and has lately declared a semi-annual dividend of seven per cent., which has been paid into your Treasury.

The following is a schedule of the increase of principal items of indebtedness during the past year:—

Lands purchased in South Boston	$27,099 70
Change of location	30,121 25
On account of Newport Extension	128,854 50
New locomotives and cars	111,672 71
Freight house in Boston	143,703 71
New engine house in South Boston	39,284 51
Dighton and Somerset Railroad beyond amount of capital, viz., $850,000, all paid in	403,736 76
Easton Branch Railroad	54,800 00
Station buildings	4,000 00
Increase of stock on hand, fuel, machine shop, stock, &c	71,903 06
Taxes and insurance	5,000 00
	$1,020,176 20
Deduct amount received from sale of land at Fall River during past year	7,800 00
Increase of principal items during past year	$1,012,376 20

To complete the Dighton and Somerset Railroad, and to equip it, and to carry out other partially completed works, we think will carry our debt to $2,200,000, after applying to its payment the proceeds of stock undisposed of which we are authorized to issue under the votes of our stockholders.

We had authority to issue, under the votes of the stockholders, passed at the annual meeting in 1864, bonds to an amount of $500,000 of which $102,500 have been issued.

The Directors deem it important to improve the present state of the money market, and fund a large portion of our present debt upon the best terms which they can obtain. They, therefore, invite the attention of the stockholders to the importance of passing votes authorizing the Directors to issue an additional amount of bonds for the purpose of funding its present floating debt, and to provide means for works in progress.

Including the debt and capital stock, it may be said the property of the company is represented by about seven millions of dollars. For this we show—

72	miles of road	from Boston to Newport.	
27	"	" Braintree to Plymouth.	
8	"	" Bridgewater Branch.	
3½	"	" Dorchester and Milton Branch.	
33	"	" Dighton and Somerset Railroad.	
1¼	"	" Easton Br. R. R. not embraced in D. and S. R. R.	
145	"	" Total.	

Besides this, we have about thirteen miles laid on the lines of the above roads as a double track.

All these roads will be, during this month, in perfect running order, laid with superior rails, a portion of which, where the track is liable to be much worn, is of steel.

We are confident in stating that no road in this country is in better running order, nor better equipped, than our own. We believe also, that there is no better line of railroad in New England than our main line between Boston and Newport.

The following statement shows the items of the general expenses of the company for the year ending May 31, 1866:

Repairs of road	$126,654 98
" bridges	22,568 00
" fences	2,068 46
" locomotives	50,525 23
" cars	49,571 97
" buildings, etc	17,178 09
Renewals of iron	25,569 65
Switch, gate, signal and watchmen	20,526 49
Wood	10,541 16
Coal	101,269 54
Oil and waste	21,579 41
Salaries, wages, etc	184,807 02
Gratuities and damages	12,912 03
Taxes and insurance	24,282 48
Salaries of officers, law and office expenses, etc.	27,269 29
U. S. mails	1,784 91
Rent (to B. & W. R. R. Co.)	500 00
Total, as above	$699,608 71

The following is a comparative statement of the earnings, operating expenses, etc., exclusive of interest, from May 1, 1862 to April 30, 1866:

	Gross earnings.	Expenses and taxes.	Net earnings.
1862	$506,169 46	$276,913 13	$229,256 33
1863	636,720 31	363,721 00	272,999 31
1864	811,415 53	411,367 84	400,047 69
1865	1,061,521 13	697,549 14	363,971 99
1866	1,295,643 16	769,195 09	526,448 07

The equipment of the road consists of 32 locomotives, 56 passenger, 18 baggage, 300 merchandise and 61 gravel cars.

TRIAL BALANCE, May 31, 1866.

Construction	$4,321,644 87
Cash	10,244 59
Stock on hand	207,810 06
New locomotives and cars	111,672 71
Taxes and insurance	5,000 00
Dorchester and Milton Br. R.R. Co.	36,937 88
Purchases and sales of real estate	192,409 92
Sundry accounts	582 37
Boston freight house	143,703 71
Real estate at Newport	114,000 00
Station buildings	4,000 00
New engine house, So. Boston	39,284 51
Easton Branch R. R. Co	54,800 00
Post office department	3,323 77
Gravel account	8,546 14
South Cove purchase	330,000 00
Sinking fund	21,140 00
Unsettled freight bills	41,433 85

Journal of Railroad Law.

ORGANIZATION OF NEW COMPANY.—SURRENDER OF BONDS UNDER AGREEMENT.

The case of Carpenter *vs.* Catlin, lately decided in the Supreme Court of this State, is interesting as deciding a somewhat novel question arising out of an agreement between the bondholders of a railway company to surrender their bonds. The facts of the case sufficiently appear in the opinion of

INGRAHAM F., J.—Two questions are presented to us in the disposition of this case. One is as to the proper construction of the agreement between the parties, and the second as to the sufficiency of the demand made on the plaintiff for delivery of the bonds to the trustees. By the contract the bondholders agreed to surrender to the trustees or attorneys appointed under the agreement, "the bonds with all the coupons thereon set opposite to their signatures, whenever they should be required so to do, and to receive in lieu thereof the mortgage bonds of the new company," &c. In order rightly to construe this contract we must look at the whole scope and object of the agreement. The Milwaukee and Mississippi Railroad Company had become unable to pay its debts, and suits of foreclosure had been commenced on the mortgage given to secure classes of bondholders, and the object of the agreement was to provide for purchasing the road and organizing a new company under the name of the Milwaukee and Prairie du Chien Railway Company. It also was intended to choose the trustees and attorneys to act for the parties to the agreement in purchasing the road, and when purchased they were to organize a new company, and such new company was to issue bonds to the amount of the first mortgage bonds of the old company, which the signers to the agreement agreed to receive from the new company in exchange for the bonds they held, whenever the new company should be prepared to issue them.

I think it is apparent from these provisions, that the trustees were the mere agents of the signers of the contract. They had no interest of their own. The only means that was provided for the purchase of the road was the bonds held by the signers of the contract, and these were to be surrendered to the trustees whenever demanded by them. It is idle to suppose that the trustees were required to buy a road and advance the money therefor to the amount of $2,300,000, and to give the benefit of such purchase to the bondholders. On the contrary, I think it was the duty of the parties to the contract to furnish the means for such purchase, and that such was the intent of the provision requiring a surrender to the trustees of the bonds held by the respective parties. The other provisions of the contract show that it was contemplated that these bonds should go into the hands of the trustees, and be held by them for the purposes of the agreement. The time of delivery was to be fixed by the trustees. The trustees were to make the purchase, and were prohibited from doing anything whereby any party should become liable to pay any money without his written assent, and were prohibited from selling, hypothecating, or incumbering the bonds which might come into their possession. These views are also strengthened by the provision in the decree of foreclosure, authorizing payment to be made for the railroad when sold, in the first mortgage bonds of the old company.

It was contended by the plaintiff, that he was entitled to receive the bonds of the new company when he surrendered the old ones. This view cannot be sustained. He was bound to surrender the old bonds when demanded, but the new bonds were not to be issued until after the purchase of the road and the organization of a new company. Even after that, the trustees under the agreement had nothing to do with the issue of such bonds, but they were to be issued by the new company, and the parties agreed to receive from such new company the bonds at par for the old bonds. The bondholders had, therefore, no right to insist on an issue to them of the new bonds, before they were required by the contract to surrender the old ones.

Upon this branch of the case, I think the plaintiff was bound to surrender his bonds to the company when required, and that he had no right to insist at that time on a delivery of the new ones. The conduct of the plaintiff in reference to some bonds held by him, shows that such was his understanding of his obligations. On receipt of the notice from the trustees, he delivered to them three bonds of the five for which he signed the contract, and took the certificate of the trustees that he was entitled to receive new bonds therefor. His acts show that he understood and assented to this construction of the agreement.

The second question is, whether the trustees gave to the plaintiff the requisite notice. In September, 1860 notice was given by the trustees to the bondholders, among whom was the plaintiff, that it was necessary that they should have the immediate control and possession of the bonds, and requesting the holders to deposit their bonds with the trustees before the 31st October, 1860. The plaintiff received this notice, and complied with it by a deposit of three bonds. The contract does not require a personal demand. This may be made in writing, and I am at a loss to see why the notice so served upon the plaintiff was not in all respects a sufficient demand, and one which rendered compliance with it necessary by those who wished to avail themselves of the benefits of the contract. The demand was in writing. It specified the articles demanded, and stated the time of performance. It was in all respects full and sufficient, and the personal service of it upon the plaintiff rendered the demand complete.

There is another fact found by the referee, which shows that the plaintiff is not now entitled to the relief he asks. Upon the sale of the road, the amount of the purchase money yielded sixty per cent. on the bonds held by the plaintiff. This amount the trustees were required to pay into court for the use of the plaintiff, before they could obtain the title to the road. This money still remains in court, to the credit of the plaintiff. He has paid in this way the amount to which he was entitled as a creditor of the old company, on the foreclosure. Not having complied with the terms of the contract, he has no right to claim any benefits under it.

Something was said upon the argument in the plaintiff's favor, upon the ground that inasmuch as these bonds were in the hands of the trustees, and they could make the exchange, that equity would not work a forfeiture of the plaintiff's property, by holding him to a strict performance of his contract. While this is a rule sometimes sanctioned, it is never adopted where a greater injustice would be inflicted on the other party. And where in consequence of the non-performance of the party seeking the aid of a court of equity to relieve him from the loss sustained by him thereby, other persons have been compelled to raise large sums of money to pay off the claims held by him, it can hardly be equitable to say that the mere interest on the money while lying unemployed in court, would be a sufficient compensation. If all the bondholders had refused to deposit their bonds, as the plaintiff did, and the trustees had been compelled to raise the whole of the purchase money to pay for the road, it would hardly be urged that they all could come in, after the purchase had been completed, and been found to be a profitable investment, and elect to become interested therein. If they all could not, I see no reason why any one of them should have the right to such an election.

The judgment should be reversed, the report of the referee set aside and a new trial ordered, costs to abide event.

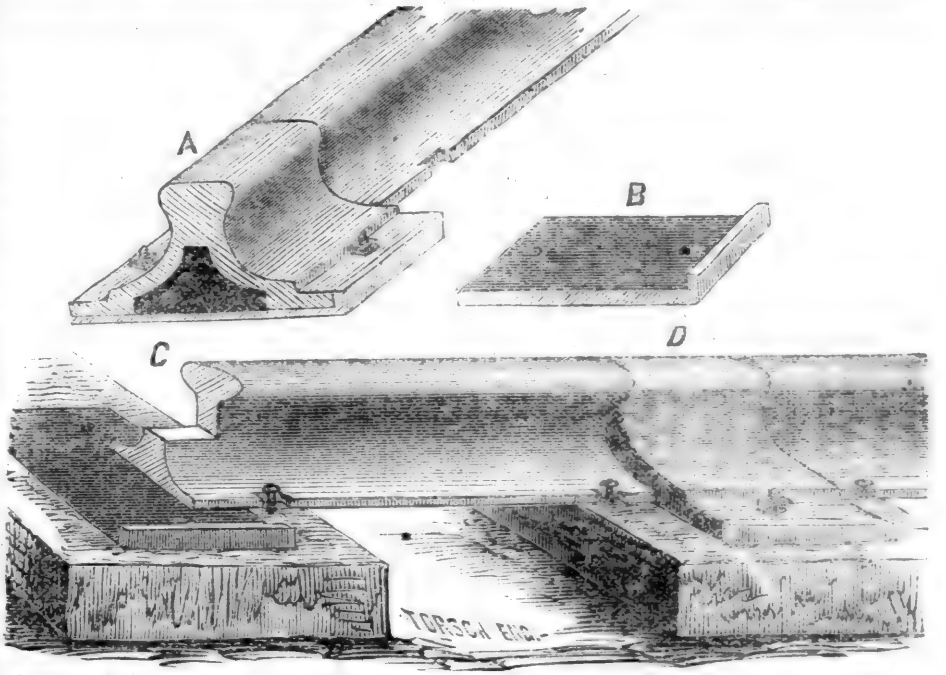
The Grain Trade.

The Atlantic Telegraph reports fine weather in England, and improved harvest prospects, which has had a depressing effect on the English markets for cereal products. With peace and average crops in Europe, the prospect for an improved export demand for American Flour and Grain, except Indian Corn, the coming season is not encouraging, especially as Western Grain speculators seem determined to repeat their operations of last year, carrying prices up, and maintaining them far above the shipping point. Thus we read in our Western exchanges that recently Chicago Wheat dealers sold short to a large amount at $1 65@$1 80, in Milwaukee, for future delivery. Milwaukee operators at once brought up all the cash Wheat, and "put on the screws," sending cash Wheat up to $2 25. Some of the "cornered" have, therefore, been obliged to ship Wheat from Chicago to Milwaukee to meet their obligations. As a result of these "cornering" operations, it is stated that No. 1 Wheat, which was quoted $1 59@$1 59½, dull, in Milwaukee on the 2d of August, had arisen to $2 20@2 25 two weeks later—an advance of $61@65½ cents, in spite of the fact that the crop is equal to any previous year. The system of warehousing in Chicago and Milwaukee affords brokers and others the same opportunities to speculate in Grain as gold does here; and though the former may not, perhaps, be so subjectively demoralizing as the latter, it is quite as great a curse to the country. By running up prices so inordinately, not only are the mass of consumers great sufferers, but the country loses the benefit of a vast export trade. The British Board of Trade returns show the extent to which Russia and France have supplanted the United States in the matter of supplying Flour and Grain to Great Britain. The imports of Wheat into that country for the first six months of 1866 amounted to 11 508,676 cwts., and this was 55 per cent. more than in the same period of 1865, and 15 per cent. more than 1864. In the last named year the United States sent 40 per cent. of the whole foreign supply. In 1866 she provided less than 3 per cent., a net decrease of 37 per cent. France and Russia furnished the bulk of the Grain supply, Russia 32 per cent. of the whole, and Prussia 15 per cent. The importations of Flour, too, were equally increased. They were 3,134,484 cwts. in the six months of 1866, which is more than twice the amount of 1865, and 11 per cent. over those of 1864; France sends 87 per cent. of the whole. The import of Indian Corn is threefold that of 1865, and six times greater than in 1864, the United States furnishing considerably more than

their accustomed proportion of this cereal. These figures are not inviting, though it is hardly probable that this condition will be permanent. With our broad acres and fertile soil, coupled with a multitude of labor-saving machinery unknown to other lands, we can undoubtedly raise Grain in greater abundance, and at lower prices, than any other country. The superior facilities which we enjoy, too, are made stronger by the desire which England has for exchanging her manufactures for our Grain. This she can do only to a limited extent with any European country. The falling off in our exports of Breadstuffs to Great Britain during the last two or three years was owing to short crops, consequent upon the withdrawal of a vast amount of labor for war purposes; to the increased consumption at home, and to the disturbed state of the exchanges and the perturbations of the money market, through the rebellion. We are inclined to believe that the improvement of our finances and the rapid development of our agricultural resources will again give us the advantage we once enjoyed in the foreign Grain trade. Since the foregoing was written, telegraph accounts from Europe represent the damage to the English crops by the heavy storms early in August as very trifling, and all accounts agree that there will be a full average yield. From France, on the other hand, the crop accounts are bad, and the prediction is ventured, that she will have to import instead of export, Breadstuffs the coming season. If this prediction shall be verified, there will surely be a more extensive demand in Europe for our Breadstuffs than has existed for years, which cannot fail to have an important bearing on the balance of trade.—*Shipping List, Aug.* 29.

Railroad Whistles.

Is it necessary that they should be so loud and shrill? We have noticed that those used on the locomotives of the New York and Albany Railroad are pitched upon a lower key. They produce a heavy and deep sound, which gives sufficient warning, and is a relief from the ear-piercing shriek.



This is a graver annoyance and a more serious matter than most persons imagine. All who live near the railroad stations must know what the annoyance is; but to the sick, in some cases, it may be almost a matter of life and death. To a patient lying low with a nervous fever, and laid to sleep by careful hands, this horrid shriek may be a death-knell.

Of course, we do not object to anything that is required by the public convenience and safety. The law allows railroads to be run near our houses and through our grounds, and we submit. But the railroad managers need not inflict unnecessary annoyance upon the public.

If a low deep roar is found on trial to give as good a warning as a shrill shriek, railroad managers would greatly oblige the public by having the form or tone of the locomotive whistles changed. It is a little thing for them, but a great thing for the aged, the sick, and the nurses of infants who live along their lines.—*Evening Post.*

New York Northern Railroad Company.

This road is now surveyed, and we understand that the indications thus far are in every way favorable. It is calculated to unite our business and markets with those of Canada, by the shortest route, connecting at Ogdensburgh, one of the most important points on the St. Lawrence, with the Grand Trunk railroad. Beyond this, however, the road will open up one of the best sections of timbered country in the world, and iron beds of vast value, hitherto worthless because of the difficulty of the transportation of the ore. The extreme northern part of the country through which the road is to pass is of nearly as mild a temperature as this region, and its soil is said, contrary to general supposition, to be very fertile. The directors, we are glad to notice, have selected very competent men for the important positions in their gift.—*Troy Press.*

Description of GRAFF'S Patent Railway Fastening.

PATENTED, AUGUST 28TH, 1866.

A. the "Saddle" made to fit the rails after they have been cut; **B.** the Plate set in the tie upon which the rails and saddle rest; **C.** the rail cut to fit in the saddle; **D.** the rails laid in the track, and held in place, down and together, by the fastening.

The attention of all Railway Companies, Railroad Iron, and Rail Fastening Manufacturers, is directed to this valuable invention, which, for simplicity, safety, economy and durability, cannot be excelled or equalled.

In this fastening, is combined all the various fastenings now and heretofore in use by Railways. It prevents the rails from rising or jumping up at the ends or joints; the wheels from striking and spliting ends of rails; the track from creeping and spreading; it divides the space usually allowed for expansion of rails; it dispenses with all chairs, side plates and fastenings now used; it makes a continuous rail, and a track as smooth as a floor and free from all jolting and jarring; it is a great saving of ties; it enables the rails to be taken up and put down without injury to the tie, rail or fastening, in less than half the time, and with less labor than is now required to do so; it enables old rails with battered ends, now considered only as old iron, again to be used in the track; it is especially intended for steel rails, and tracks laid with new rails; it costs less to keep the track and rolling stock in repair; and makes accidents less liable to happen. The right to use and manufacture this fastening or "Saddle," is now for sale. Circulars with drawings of fastenings will be furnished on application to the patentee. Consent will be given (on application) for one road in each State, to lay a limited number of miles with my fastening.

E. BEATTY GRAFF,
Attorney at Law, &c.,
BALTIMORE, MD.

Railway between Rangoon and Western China.

At a recent interview, in London, of a deputation from the Liverpool Chamber of Commerce and the Liverpool East India Association with the Indian Secretary, memorials on the importance of establishing railway and telegraphic communication between Rangoon and Western China were read. Government was urged to employ skilful engineers to make a complete survey of the country through which the proposed line would pass, and to send an envoy of sufficient rank to the King of Ava to secure his permission and co-operation to the proposed line, which is intended to pass through territory either belonging to or dependant on him. Sir James Fergusson, who acted for Lord Cranborne, assured the deputation that both Lord Cranborne and himself felt a very great interest in the matter, and promised that the whole question should have the careful, and, as far as possible, favorable consideration of her Majesty's Government.

Brandywine Railroad.

The Wilmington (Del.) *Republican* says that a movement has been made in that city to obtain subscriptions for the construction of the Wilmington and Birdsborough railroad. Messrs. Harlan, Hollingsworth & Co. head the list with a subscription of $20,000; several other gentlemen follow with subscriptions of $5,000 others with $3,000, $2,000, $1,500, $1,000, $500, &c.

☞ The work of constructing the Railroad Bridge over the Ohio River at Louisville has been commenced. The bridge will be without a draw, and so elevated that boats of any class can easily pass under it when the river is at its highest stage. The enterprise is undertaken by the Louisville, Nashville and Jeffersonville railroad companies. Cost $1,500,000.

☞ George W. Bently, Esq., late Superintendent of the Worcester and Nashua Railroad, has accepted the appointment of Superintendent of the New London Northern Railroad.

American Railroad Journal.

Saturday, September 8, 1866.

Stock Exchange and Money Market.

There has been an invariably easy Money Market for all really first class borrowers, this week. The Treasury disbursements have been quite liberal, exceeding the drain of currency for employment in the interior, and the deposits in the city bank vaults have increased enormously, especially in the legal tender line. Call loan rates have been stationary at 3@4 per cent. to the Government houses, and 4@5 per cent. to other leading stock firms; whose wants, however, have been less urgent, in view of the noticable falling off in the volume of stock operations. There has been rather more activity in general business, resulting in an increase of the applications for discounts, which on prime short-date paper have been promptly responded to at 5@6 per cent. per annum, and on good to fair names at 6½@8 per cent. per annum. The city banks, last week, gained $7,071,832 in the deposit line, and $6,339,-325 in the legal tender reserve; while reducing their loans, $501,458, and their circulation, $150,-630. They lost $502,477 in specie. Their deposits are now up to $225,191,282, the highest sum reported this year. Their legal tender reserve reaches the unprecedented amount of $92,622,808. Their circulation now stands at $27,807,834, and their loans add up $265,399,607. The Bank Exchanges at the Clearing House, through the past week, averaged $97,644,608 a day, against a daily average of $102,991,220 the preceding week; and $92,442,557 the week ending with Aug. 18th. The current week's exchanges average over $105,867,-249 a day.

The U. S. Sub-Treasury receipts, week ending with Sept. 1, were $34,094,679, including $3,199,-169 from customs duties; payments, $47,807,365; balance at the close of the week, $82,294,513, against $96,007,229 at the close of the preceding week. The business of the Office during the first two days of the current week, was as follows: Monday, receipts, $2,265,647, and payments, $5,038,073, Tuesday, receipts, $2,675,388, and payments, $944,441. The balance at the close of business on Tuesday stood at $81,253,064, against $84,868,972 a week ago.

Government revenues are increasing rapidly. The excises, last week, yielded the enormous sum of $10,285,831; customs at the port of New York, $3,199,167, and at the outports, at least, $1,300,-000 more, making the grand total income for the week equal to about $16,800,000 in currency, against disbursements of rather less than three millions on account of the three leading executive departments. The national revenue from excises in all August, was $38,043 340, being the largest return for any single month thus far recorded. The total receipts from this source since July 1, 1866, have been about $70,000,000; and from Customs, about $34,740,100. The receipts from Customs at this port during the month of August, were $12,700,095, as against $11,617,979 in July, making the total thus far in the current calendar year, commencing January 1, $92,218,-561.

Government disbursed $17,365,881 on account of the War, Navy, and Interior Departments in August, as follows: War Department, $7,014,788; Interior, $6,260,019; Navy, $4,091,074; total, $17,365,881. The following is a semi-official estimate of the National revenues in July and August of each of the last two fiscal years:

United States Revenues—Two Months.

	1865. July 1, to Aug. 31.	1866. July 1, to Aug. 31.
Customs	$30,098,590	$34,740,100
Internal taxes	55,780,909	67,822,449
Total, two mos.	$85,879,499	$102,562,549

National Bank notes to the amount of $894,735, were issued last week, making the total issue to 1,656 banks thus far $289,915,820. The United States bonds held by Treasurer Spinner in trust for National Banks as security for circulating notes amount to $330,729,700, and as security for public deposits, $38,777,500, making a total of $369,507,200. A semi-official statement of the amount and kind of United States bonds deposited with the Treasurer of the United States in trust for National Banks to secure the redemption of circulating notes and the public deposits on the 27th day of August, 1866, has been published. It shows that out of a total deposit of $330,596,-500, only $139,312,350 were of the five-twenty bonds. Of this sum $138,308,650 were registered, and $1,003,700 were coupon bonds. The five per cent. bonds, under act of March 3, 1864, are

known as the ten-forties. The following is the summary:

Under act of	Rate of Interest.	Amount.
Jan. 28, 1847, registered	6 per cent.	$105,000
March 31, 1848, registered.	6 per cent.	28,000
Feb. 8, 1861, registered	6 per cent.	3,543,000
Feb. 8, 1861, coupon	6 per cent.	1,000
March 2, 1861, coupon	6 per cent.	43,250
July 17, Aug. 5, 1861, reg.	6 per cent.	60,642,800
July 17, Aug. 5, '61, coup.	6 per cent.	9,000
Feb. 25, 1862, registered	6 per cent.	72,694,600
Feb. 25, 1862, coupon	6 per cent.	1,003,700
March 3, 1863, registered.	6 per cent.	36,541,550
June 30, 1864, registered.	6 per cent.	37,941,650
July 1, '62, July 2, '64, reg.	6 per cent.	3,538,000
March 3, 1865, registered.	6 per cent.	24,798,900
March 3, 1864, registered.	6 per cent.	3,563,500
June 14, 1858, registered.	5 per cent.	1,175,008
June 22, 1860, registered.	5 per cent.	242,000
March 3, 1865, registered.	5 per cent.	85,155,550
March 3, 1865, coupon	5 per cent.	260,000
Grand total		$330,596,500

Gold has receded materially under more favorable foreign financial advices, and the influence of the growing revenues and diminishing expenditures of the Government. The highest rate of the week was the opening figure, 148¼ on Thursday, and the lowest, 144¾ on Monday. On Tuesday, the range was upward from 145¾ to 146⅜, under reduced telegraphic quotations for U. S. 5-20s in London. On Wednesday, the extremes were 147 to 146⅛, the market closing heavily, influenced by telegraphic advices from London to noon of that day, reporting a rally in 5-20s to 73, which rate, with gold at 146½, and sight exchange at 107, is equal to 114⅝ here, as against 111¾@112 the ruling figures during most of the day. The customs demand for coin continues very active. Last week, it averaged $533,195 a day; thus far, this week, it has been equal to $609,000 a day. California gold to the amount of $1,342,833 was received at this port on Friday last, making the total receipts, from this source, since Jan. 1, $28,718,154, against only $11,701,023 same time last year, showing an increase, in 1866, of $17,017,131. The exports of specie from this port, last week, were only $303,912, and thus far this week, only $25,000, making the total outflow of specie from the port, since Jan. 1, $53,495,552 against $20,403,554 same time last year. Government disbursed through the U. S. Sub-Treasury here, on account of the September coin interest, on the public debt, chiefly on the Ten Forty Loan, $609,000 on Saturday last, $1,276,000 on Monday, and $237,000 on Tuesday. Further considerable shipments of specie from England for this port have been reported by telegraph since our last.

The foreign exchange market is glutted with bills for which there is little or no demand, and rates are depressed and irregular beyond all precedent. Bankers' sixty day bills on London are quoted nominally down to 105⅝@106⅜, and on Paris to 5.41¼@5.32½; sight bills on London to 106⅝@107¼; and on Paris to 5.32½@5.30. The exports of bonds and produce continue on a large scale, adding materially to the already enormous supply of bills. The week's exports of domestic produce and miscellaneous goods have been to the currency value of $3,895,593, against $2,919,607 same week last year. The exports since January 1, have been to the value of $134,125,806, or about twenty-eight million and a half dollars in excess of the exports, same time last year.

Government securities have been less freely dealt in this week by home and foreign buyers, the depression in gold and exchange, much more than any other influence, having operated as a check on the investment and export business. Holders, however, have not been eager to realize, and the offerings of bonds and notes have been moderate. U. S. Sixes of 1881 closed 111¾@112; U. S. Five-twenties of 1882 at 111¾@112; U. S. Five-twenties of 1865 at 108¾@108⅞, U. S. Ten-forties at 99@99⅛, ex-Sept. coupon, and U. S. Seven-thirties at 106@107. The brokers are buying the compound-interest notes at the following rates, and selling at an advance of ¼@½ of 1 per cent. on these figures:

June, 1864	115	May, 1865	110
July, 1864	114½	August, 1865	108½
August, 1864	114	September, 1865	108
October, 1864	113	October, 1865	107½
December, 1864	112		

Railway and miscellaneous property has been in less active request, either for investment or on speculative account; and, and, under pretty free realizations by weak speculative holders, prices have receded, the market closing very dull and heavy. the business of the week has been the lightest thus far, for nearly two months.

Produce and merchandise exhibit more animation. Breadstuffs and Provisions are moving rather more freely but at irregular prices. Hog products are advancing. There is much heaviness in cotton, under the unfavorable foreign advices. Middlings close tamely at 32@35 cents per pound. The week's exports of cotton have been 9,159 bales from this port, and 11,250 bales from all the shipping ports, leaving an available supply of 112,000 bales here, and 245,000 bales at all the shipping ports. The total exports of cotton from the United States, since Sept. 1, 1865, have been 1,539,000 bales. The main feature in foreign merchandise is the steady increase of transactions in Dry Goods, Groceries, and a few other leading articles, with a pretty firm market for seasonable commodities. The total imports of foreign dry goods, last week, were $3,528,193, and the total amount marketed $3,719,066. The value of foreign merchandise imported last week, was $2,228,975—making the grand total value of last week's imports of dry goods and merchandise, $5,757,168, and since January 1, $210,656,044, against $125,250,992 same time last year. The freight market is very dull, with 500 vessels of all classes in port.

The latest quotations at the London Stock Exchange compare as follows with former returns:

	Aug. 22.	Aug. 29.	Sept. 5.
Consols	—@88¾	89¼	89¼
U. S. 5-20's	—@70¼	72¼	73
Erie	—@45	45¾	46¾
Ill. Central	—@—77	78¾	79

The New York exports, exclusive of specie, for the week ending Sept. 4, and since the beginning of the year, compare as follows:

	1865.	1866.
For the week	$2,919,607	$3,895,593
Prov. reported	102,928,053	130,230,213
Since January 1	$105,847,660	$134,125,806

The balance in the Sub-Treasury on Wednesday was $83,224,145 13.

The following quotations of sales of Railway and other securities are in addition to those given elsewhere in our columns:—

New York.—Brooklyn 6s, Water Loan, 97; New York 7s, Bounty Loan, 105¼; do., 6s, 1872, 100; Connecticut 6s, 99; N. J. Central R. R., 127; Rome and Watertown, 90; Chicago and Great Eastern, 45¼; Joliet and Chicago, 95; New York and New Haven, 115; Gt. Gas Coal, 0.20@0.40; Maryland, 0.15@0.15; North State, 0.10@0.15; Springfield, 0.05@0.11; George's Creek, 100@108; Santa Clara, 8@8; Balt. Chrome, 0.75@0.80; Bare Hill, 0.55@0.65; Atlantic Coal, 1.00@1.10; Mineral Hill, 0.60@0.75; Baltimore Coal, 100@200.

☞ Forty-five miles more of the Union Pacific railroad have been accepted by the Commissioners. This finishes the road 13 miles west of Fort Kearney.

The National Debt.

The following is a comparative statement of the Public Debt of the United States:

	Aug. 1, 1866.	Sept. 1, 1866.
Debt bearing int. in coin	$1,242,628,441 80	$1,288,322,541 80
Debt bearing interest in currency	1,079,668,959 96	978,771,040 00
Matured debt not presented	4,670,160 32	19,653,443 82
Debt bearing no interest.	443,449,046 91	441,567,810 33
Total	$2,770,416,608 99	$2,728,314,835 95
Coin in Treasury	$61,322,126 57	$76,333,918 27
Currency	75,995,206 04	56,297,749 46
	$137,317,332 61	$132,631,667 73
Debt less cash in the Treasury	$2,633,099,276 38	$2,595,683,168 22

The total debt shows a decrease since the 1st of August of $42,101,773 04. The balance in the Treasury shows a decrease, as compared with August 1st, of $4,685,664 88. Deducting the amount on hand from the aggregate debt, both on the 1st of August and the 1st of September, the decrease of debt would be $37,416,108 16. The total debt on the 31st of August, 1865, stood at $2,845,907,626 56. The balance in the Treasury at that date amounted to $88,218,055 13. Deducting the cash in the Treasury from the aggregate debt both on the 31st of August, 1865, and 1st of September, 1866, and the actual decrease in the Public Debt since that period has been $162,006,403 21.

The Central Pacific Railroad Co's First Mortgage Bonds.

The first mortgage bonds of the Central Pacific Railroad Company of California are now, for the first time, offered for sale. The mortgage is for $7,336,000. It covers the whole property of the company, within the limits of the State of California, including the whole of the road now in complete and successful working order from Sacramento City to Alta, a distance of 73 miles, on which, not only the liberal aid received from the National Government (equal to the whole of the first mortgage) but also nearly seven million dollars, derived from stock subscriptions and other sources, have been economically and judiciously expended, for construction and equipment purposes. The First Mortgage therefore amounts to but about 35 per cent. of the actual cost and value of the property which it covers. The amount of the First Mortgage Bonds to be issued per mile is limited by law to the amount of United States Bonds allowed and issued to aid the construction of the Road, and the Mortgage by which they are secured is declared by Act of Congress to constitute a lien prior and superior to that of the United States Government, and all others whatsoever. The working portion of the road earned in May of this year $65,116; in June, $67,430; in July, $85,000 all paid in coin. The construction of the road is going vigorously forward,—24 miles additional being nearly ready for the cars,—and it will probably be in full operation to the California State Line—156 miles from Sacramento City—during the summer of 1867, when its earnings must be very large, as the entire trade of Nevada, and a large proportion of that of Utah, Idaho and Montana must pass over its line. It has been shown by reliable statistics that in 1863 over $13,000,000 in Gold was paid for freighting goods from California to Nevada alone.

Over $1,000,000 have already been expended in grading beyond the point to which the road is now running, and the iron is bought and paid for sufficient to lay the track the entire distance to the State Line. This part of the Great Pacific Railroad route is destined to be one of the most profitable lines of railroad in the world, and its First Mortgage Bonds are among the best accrued and most desirable investments ever offered. The bonds are issued in coupon form, are of the denomination of $1,000 each, and have thirty years to run from date of issue, July 1, 1865; interest and principal are made payable *in coin*, in the City of New York. The bonds bear interest at the rate of six per cent. per annum in coin; payable semi-annually on the first days of January and July of each year, at the banking house of Messrs. Fisk & Hatch, No. 5 Nassau street, who are the sole agents for the sale of the bonds. The bonds are offered at 95 per cent., and accrued interest from July 1st, in currency.

Graff's Patent Railway Fastening.

We give in another part of this week's issue a description of Graff's Patent Railway Fastening. We are told that many railroad and practical men have examined this fastening, and all pronounce it "the perfection of railroad fastenings," and that it will accomplish all that is claimed for it. It is the only railroad fastening that will allow old rails with battered ends (now valued only as old iron, and of which there are thousands of tons laid aside as such) again being used in the track without shortening the rail. This is done by cutting out on top the battered part at the ends. A model of this fastening may be seen at the office of Messrs. Fowle & Co., 70 Broadway, N. Y.

Tennessee and Pacific Railroad.

We invite attention to the advertisement of this company for Proposals for a preliminary instrumental survey of that portion of the road lying between the cities of Nashville and Knoxville, Tenn. The work contemplated is very nearly an air line trunk road through the State of Tennessee, from Knoxville to Memphis, thus constituting a link in the great chain of railroad on the shortest possible route from New York *via* Richmond, Lynchburg, etc., to Texas and the Southern Pacific. We understand that a lively spirit is being manifested for the work in all parts of Tennessee, and that liberal State, City and County aid will be given to the work. It will develope the immense coal and iron interests of East Tennessee.

Pacific Mail Steamship Company.

The first ship of the China line, the Colorado, will leave San Francisco on the 1st of January, 1867. Three other magnificent ships are being prepared for the new route, and negotiations are in progress by a company to bring monthly from China to California 1,500 laborers by these ships.

New Military Road.

The contract for building the new military road called the Green Bay, Shawano and Fort Williams has been let to Hon. Jackson Hadley of Milwaukee, who will at once commence work upon. The road is said to pass through a delig farming country.

Railroad Earnings.—Weekly.

The traffic of the Great Western Railway of Canada, for the week ending Aug. 31st, 1866, were $62,795 16
Corresponding week of 1865 ..... 74,693 60

Decrease $11,898 44

The earnings of the Grand Trunk Railway of Canada for the week ending Aug. 25th, 1866 were $130,357 00
Corresponding week of previous year.. 121,768 00

Increase $8,589 00

The earnings of the Chicago and Great Eastern Railway for 4th week in Aug. were ... $33,992 12
Same period last year 30,717 68

Increase in 1866. ..... $3,274 44

The earnings of the Chicago and Northwestern Railway for the fourth week in Aug., 1866 were $304,409 00
Corresponding week of previous year.. 338,362 00

Decrease $33,953 00

The earnings of the Detroit and Milwaukee Railroad for the fourth week in Aug., 1866, were $37,540 00
Corresponding week of 1865. ..... 37,117 00

Increase $423 00

The earnings of the Chicago and Rock Island Railroad for the 4th week in Aug., 1866, were $108,451 00
Corresponding week of previous year.. 98,579 00

Increase $9,872 00

The earnings of the Virginia and Tennessee Railroad for the fourth week of August were $57,537, an increase of $10,056 on the same week last year.

Richmond and Newport News R. R.

The ceremony of breaking ground for this road took place at Newport News on the 25th ult. A large force of laborers are now at work breaking gravel, and the grading is being pushed forward vigorously. It is computed that the road will cost about $10,000 per mile.

Williamsburg will be benefited by the road, as it will pass through that place. The terminus at Richmond will strike somewhere in the neighborhood of the Rockets, but that end of the line has not yet been surveyed. It is not intended to connect with the York River Railroad, but the track will cross it. The grading required will be very slight, and there will be sixteen miles of air-line.

The advantages of this new railroad to the country bordering upon the James river will be very great. Newport News, the eastern terminus of the road, embraces a level plateau of land of many miles in extent, furnishing a most eligible site for the erection of a large town or city, which, with its great water advantages and convenience to the coast, would probably in a few years outrival any other city in Virginia, and probably become its chief seaport. The attention of Northern capitalists is already being attracted toward this new road, and large investments in land at Newport News are being made at a great increase [illegible] the rates obtained a year ago. The officers [illegible]e road are: President E. S. Hamlin; Chief [illegible]eer, A. C. Dunn; Treasurer and Secretary, [illegible]herry. Board of Directors: Thomas H. [illegible] Robert Saunders, E. R. Mason, H. G. [illegible] C. Hawley and James Lyons.

Memphis and Little Rock Railroad.

We learn from Col. Robertson, president of this road, that a contract was signed on the 23d ult., by which Col. D. H. Feger engages to complete the railroad from Hopefield, on the Mississippi, to the St. Francis River, forty-two miles, by the first of January next. The road from White River to Little Rock, thirty-five miles, is now in operation. The intervening space, between White and St. Francis Rivers, thirty-five miles is partially graded. The Little Rock Railroad will be one of the principal feeders to the commerce and the business of Memphis, and its importance to the prosperity of that city cannot be over-estimated. The work is to be commenced in a few days, and prosecuted with the utmost vigor.

☞ A railway is now in course of construction for the private use of the Sultan between Unkiar-Skelessi and the Sultan's summer residence at Tokat, on the Asiatic coast of the Bosphorus.

Commerce of New York.

The foreign imports at New York for the month of July are officially stated as follows:

	1865.	1866.
Entered for consumption.	$10,175,820	$14,204,403
Entered for warehous'ng	7,845,974	11,301,274
Free goods	886,431	899,549
Specie and bullion	253,640	345,961
Total entered at port ...	$19,161,838	$26,851,187
Withdrawn fr. warehouse	8,612,411	9,084,242

The foreign imports at New York for the seven months from January 1st, were:

	1865.	1866.
Entered for consumption.	$48,301,218	$103,064,165
Do. for warehousing ...	45,657,066	77,727,741
Free goods	5,910,143	7,936,165
Specie and bullion	1,305,463	1,526,147
Total entered at port..	$101,173,890	$190,254,218
Withdrawn fr. wareh'se	50,239,232	59,078,096

The relative imports of dry goods, specie and general merchandise at New York for the first seven months of the last sixteen years, have been as follows:

	Imports of			
	Dry Goods.	Gen'l Mdse.	Specie.	Total Imports.
1851.....	$42,240,217	$43,174,714	$1,480,476	$86,895,407
1852.....	34,994,294	37,215,342	2,028,248	74,237,884
1853.....	57,421,619	59,398,895	1,099,516	117,915,020
1854.....	55,308,993	53,126,642	1,609,090	115,041,725
1855.....	34,724,393	49,008,832	523,151	84,256,376
1856.....	60,296,946	72,757,795	963,500	134,081,241
1857.....	66,716,293	84,156,080	5,857,310	156,729,683
1858.....	30,169,358	48,305,767	1,815,258	80,290,381
1859.....	71,782,984	83,366,928	1,301,082	156,450,994
1860.....	63,862,687	78,485,850	751,188	142,599,725
1861.....	31,515,606	54,875,955	32,906,166	118,797,727
1862.....	30,183,764	74,488,315	781,556	105,403,635
1863.....	35,112,935	70,860,800	1,036,013	107,009,748
1864.....	53,122,729	106,064,043	1,555,066	160,741,888
1865.....	31,850,399	68,018,028	1,305,463	101,173,890
1866.....	80,442,325	108,285,747	1,526,147	190,254,218

The revenue from customs at New York for seven months has been as follows:

	1865.	1866.
In July	$9,778,276 65	$11,507,186 60
Previous 6 months.	36,695,577 07	67,548,189 78
Total	$46,473,853 72	$79,055,376 38

The exports from New York to foreign ports in the month of July, were:

	1865.	1866.
Domestic produce	$12,521,246	$13,057,476
Foreign merch'ndise free	28,236	27,269
Do. dutiable.	262,593	401,724
Specie and bullion	723,986	5,821,459
Total exports.	$13,536,061	$19,307,928
Do. exclusive of specie.	12,812,075	13,486,469

The exports from New York to foreign ports for seven months from January 1st, have been:

	1865.	1866.
Domestic produce	$80,670,013	$117,311,612
Foreign free goods	663,132	486,063
Do. dutiable.	2,405,615	3,427,711
Specie and bullion	18,639,745	51,603,889
Total exports	$102,378,505	$172,829,275
Do. exclusive of specie	83,738,760	121,225,386

Union Pacific Railroad.

The Union Pacific Railroad has been opened for business to Fort Kearney, a distance of two hundred miles from its initial point—Omaha, in Nebraska, on the Missouri River. This length of track has been laid since last October, and Fort Kearney has been reached about a month ahead of the time promised by the President, General Dix, last June. By the 1st of January the forks of the Platte River will, it is said, be reached, a distance of one hundred miles beyond Fort Kearney. The rapid prosecution of this work, which is the main stem of the great Continental Railroad, is due to the disposition manifested by Congress during the late session, to exact a rigorous compliance with the law, and to the rivalry of the States of Illinois, Iowa, Missouri and Kansas, for the control of the rapidly developing trade of the Territories—a rivalry that has caused the recent completion of the Missouri Pacific Railroad, from St. Louis to Achison, and that is now pushing the Kansas Branch rapidly forward from Leavenworth. When the Pacific Railroad Act was passed, there was but little anticipation of any immediate profit to the road from way traffic; but the recent discovery of new gold and silver fields, along the route, and the rapid settlement of the Territories by emigrants, open fresh resources to the builders of the road, and offer new inducements for its early construction. Sir Morton Peto, in his recently published *Resources and Prospects of America*, speaking of the importance of the road, says that "the mining interest of the United States alone can maintain such a railway." And this opinion of the eminent English railway capitalist is amply justified by facts. The trade of Colorado, Montana, Utah, Nevada and Idaho, not to speak of the more distant regions now filling up with treasure seekers and agriculturists, is a prize worth contending for. Added to that of California and Oregon, it will soon reach an aggregate that will task to the utmost, if it does not exceed, the capacity of a single track railway across the country. What is said of the Eastern end of the Pacific Railroad in this connection, applies with at least equal force to the California end of the work, which finds in the enormous traffic between California and Nevada alone—a traffic said to amount to $5,000,000 per annum—a sufficient motive for hurrying forward an enterprise that was begun as a National necessity almost exclusively. Under the impetus thus derived and encouraged and sustained

by liberal public aid, the Central Pacific Railroad Company (the California Branch of the Union Pacific) has pursued its end of the work, 73 miles in the Sierra Nevada, and will in a few months have overcome the most serious difficulty on the entire route from Sacramento to the junction with the Eastern branch. This lofty range once surmounted, the company can, under the recent remedial Act of Congress, push their track on towards Salt Lake, and will have nearly as easy grading as falls to the lot of the Eastern constructors. Experienced railroad men have expressed a confident opinion that the completion of the Pacific Railroad within five years is thoroughly practicable. With the private capital at their command, with Government Bonds for every complete section of 20 miles at the rate of $15,000 to $48,000 per mile, with enormous grants of public land, and with the extra inducement and assistance of a considerable local traffic falling to them as fast as they progress, there is no good reason why the two principal companies having the work in charge should not be able to meet on the plains and join their tracks at the end of the period named: especially as the single State of Illinois, during the ten years ending in 1860 built about 4,000 miles of railroad with no aid from Government except a grant of lands which was not pecuniarily available till the roads were under way. But even should the companies fail to accomplish quite so much as anticipated, they will at least have made so much progress that even in three years there will remain but a few hundred miles of stage travel between the termini of their advancing roads, so that long before the entire completion of the railway, the journey across the continent will lose most of its terrors, the way of the immigrant will be comparatively cheap, safe and easy, the overland mail service will be greatly quickened, and the people of the Atlantic and Pacific slopes will taste the benefits that have for many years formed the burden of their prayer—an Overland Railroad.

Debt of Tennessee.

The State of Tennessee, in giving aid to its railroads, instead of subscribing stock, made loans to them of $10,000 per mile in its bonds, secured by first mortgages upon the respective roads; requiring them to pay their interest promptly, and to pay annually to the State Treasurer *two per cent.* upon their loans as a *sinking fund* for the redemption of their debt.

At the close of the war the railroads were in such crippled condition as to require further aid from the State, which was granted by the last Legislature in the shape of a loan of $3,000 per mile to each road, in addition to the former loan of $10,000, secured by similar liens—making $13,000 per mile due the State; whereas the average value of these roads is $25,000 to $30,000 per mile.

The railroads are generally now in good condition, and are doing a steadily increasing business. Nearly all of them paid their July interest to the State, and in future will be able to do so, without inconvenience; and the officers of the companies are directly interested in doing so, as the law provides that in case any railroad shall fail to pay its interest promptly, "the road so defaulting shall be taken possession of by the State and placed in the hands of a receiver until the interest which has accrued on its bonds shall have been paid from the net earnings of the road."

The State funded, to 1st January last, all the unpaid bonds and coupons which matured during the war into new bonds, and paid its interest in full upon old and new bonds 1st July, and will pay her interest 1st January, and regularly thereafter.

The following figures, obtained directly from the Comptroller's office of the State of Tennessee, will show the entire debt of the State at the present time:

Old debt, for which the State has to levy taxes to pay interest:

Old 6 per cent. bonds	$1,706,000 00
Old 5 per cent. bonds	1,949,440 00
Old 5½ per cent. bonds	239,166 66
	$3,894,606 66
Am't new debt created by funding back interest	873,813 00
Total amount State debt proper	$4,768,419 66
Total amount debt for loans to railroads (including old, funded and new) all secured by 1st mortgages on railroads, and interest on which is paid by the railroads	24,382,832 00
Total amount State bonds issued	$29,151,251 66

The interest upon the State debt proper $4,768,419 66 at 5, 5¼ and 6 per cent., is only $264,817 05, being the total amount of taxes to be levied yearly by the State to meet its interest regularly.

☞ Proposals are now being received, in New Orleans for deepening and maintaining the channel across the bar of the "Southwest Pass" at the mouth of the Mississippi River. The plan is to dredge out a channel of the uniform depth of 18 feet at low water, and 200 feet in width across the bar, and this, by occasional dredging, it is thought can be maintained. Congress has appropriated $75,000 for this purpose.

☞ The line over Mont Cenis is stated to be making good progress. The works on the Italian side will, it is stated, be completed in October, while in November uninterrupted communication will be established between Italy and France. Although the gradients are as heavy as 1 in 12, a speed of 11¼ miles per hour has been attained on them in a recent trial. Some of the curves are very sharp, being only 50ft. radius.

☞ A company was organized in Wilmington, N. C., on the 25th ult., called the Wilmington Railway Bridge Company. The object of its formation is to construct a railroad bridge across the Cape Fear river, to be used conjointly by the three railroads that centre there.

☞ We learn from San Francisco that the wires of the Russian-American telegraph have been stretched a distance of 715 miles above New Westminster, British Columbia.

☞ A street railroad is to be constructed in Atlanta, Ga. It is proposed to have it run North and South, East and West, and to be three miles in length.

☞ The introduction of street railroads in Memphis, Tenn., has been a decided success. Cars are now running on Main, Poplar, Jefferson and Beal streets.

☞ The Milwaukee and St. Paul railway company have just completed a new and substantial bridge across Rock River, about two miles east of the Watertown depot.

☞ John R. Kenrick, Esq., has been appointed Superintendent of the Concord Railroad, vice Jos. R. Gilmore, resigned.

A New Railroad Freight Line.

The several "narrow guage" roads between Boston and New York, and Cincinnati, Louisville and St. Louis, have entered into a new freight arrangement to be called the "White Line." These cars are to be pushed through promptly, and will be a great advantage to local as well as through shippers. It goes into effect on the third of September. Geo. Darling, of Rochester, a very competent man, is to be General Superintendent.

☞ A dispatch from Junction City, Kansas, dated Sept. 5th says: General Pope to-day erected the initial stone of the Union Pacific Road South Branch, with appropriate ceremonies, and the grading of the road commenced. Gens. Pope, Davidson and others made appropriate addresses. A party of surveyors are now locating the road to the southern line of Kansas *via* Neosho and Grand Rivers.

☞ The Huron and Ontario (Canada) Ship Canal Company are, it is said, making considerable progress, and the work will soon be put under contract. Hon. Donald McDonald and Adam Crooks, Esq., have joined the direction. Hon. Wm. Cayley accepts the position of Secretary.

☞ The Ohioville Railroad Companies of Ohio and Pennsylvania have been consolidated under the name of "Island Run Railroad Company," and organized by electing J. W. Blanchard, President; C. O. Rourke, T. W. Williams, A. L. Crawford, H. Lee, A. H. Dohrman, and C. K. Chamberlin, Directors; W. G. Darley, Chief Engineer, and W. Newell, Secretary and Treasurer.

☞ The Supreme Court of Massachusetts decided on the 3d inst., that the act of 1863 which imposed a tax on the stock of corporations held by persons whose residence is out of the Commonwealth, and which imposed a tax on the dividends of non-resident stockholders, is illegal.

☞ The opening of a section of the steam railway from the base of Mount Washington to the summit was informally celebrated 29th ult. The engine with ease drew a load of forty passengers up an inclination of fifteen degrees.

☞ It is said that the Austrian Government propose to compensate the Austrian lines for damages which may have been occasioned to them by its troops during recent hostilities.

☞ Subscriptions are being raised to survey a line of railroad from Bay City to Port Hudson, Mich.

☞ Efforts are being made to get the Toledo, Ann Arbor and Saginaw Railroad to make Bay City its terminus on the Saginaw River.

☞ The New Haven Peat Co. has been organized with E. H. Scranton as President, and will operate on the peat beds of the great Dismal Swamp, on the southern border of Virginia.

☞ A company has been organized in St. Paul, Minnesota, for the preparation of peat to be used as a substitute for wood and coal.

☞ The Chicago Board of Trade has appropriated $500 toward defraying expenses of the survey of the ship canal from Lasalle to the Mississippi River.

Valley (Va.) Railroad.

Richard Randolph, Esq., Chief Engineer, with his corps of assistants, is now in Rockbridge Co., Va., engaged upon the work of locating the line. It is supposed the survey will be completed to Salem by the 1st of November next. The following gentlemen are associated with Mr. Randolph: C. T. Mason, W. M. Bolling, P. P. Dandridge, Charles Goldsborough, Wm. L. Done, J. M. Lee, C. Taylor, B. S. Randolph and T. Carson. They are now encamped near the town of Lexington.

☞ We learn from Macon, Ga., that the Railroad Convention which met in that city on the 5th inst., adjourned in the afternoon of that day. The Macon delegation declined to recommend the city to subscribe to stock, as it might embarrass it in meeting the subscriptions already made for other roads. The work is highly approved, and aid is promised when practicable.

☞ Jacob Snively, Esq., has been elected President of the Chesapeake and Ohio Canal Company. The directors are: F. Dorsey Herbert, A. Kershner Stake, L. J. Brengle, Horace Resley, Charles Abert and H. Addison.

☞ The Orange and Alexandria Railroad is said to be doing a very large freight business, and that there is a prospect of its increasing. The railroad between Alexandria and Washington is also said to be doing well.

OFFICE TENN. & PACIFIC R. R COMPANY,
No. 25 UNION STREET,
NASHVILLE, August 28, 1866

PROPOSALS WILL BE RECEIVED FOR A Preliminary Survey, with instruments, of that portion of the Road, which is between the Cities of Nashville and Knoxville, Tennessee. The Road must be surveyed on lines, and the report must embrace all necessary information in regard to the character of the country, its resources, the distances intervening, grades and obstructions, the cost of construction, and be accompanied by plans and profile views of the several routes, necessary to letting out the work.

Engineers must state the sum for which the work will be completed, and Proposals must be filed at this Office by the 1st of October.

J. D. B. DEBOW, President.
JOHN KIRKMAN, Chairman Executive Committee.

The next Annual Session begins SEPT. 12th. For the new ANNUAL REGISTER, containing full information, apply to
8131 Prof. CHARLES DROWNE, Director, Troy, N. Y.

FIRST MORTGAEG BONDS
OF THE
Central Pacific Railroad Company,
OF CALIFORNIA.

Interest at the rate of Six per Cent. per Annum, payable Semi-Annually.

Principal and Interest payable in U. S. Gold Coin in the City of New York.

Amount of Issue, $7,336,000.

The Bonds have Thirty Years to run, and are secured by a First Mortgage, constituting an absolute prior lien on that portion of the Road, Equipments, Franchises, and Entire Property of the Central Pacific Railroad Company, located in the State of California, and extending from Sacramento City to the California State Line, forming a part of the GREAT PACIFIC RAILROAD ROUTE, adopted and aided by the UNITED STATES GOVERNMENT.

The amount of these First Mortgage Bonds to be issued per mile is limited by law to the amount of United States Bonds allowed and issued to aid the construction of the Road, and the Mortgage by which they are secured is *declared by Act of Congress to constitute a lien prior and superior to that of the United States Government, and all others whatsoever.*

The aid received from the Government (in amount equal to this First Mortgage) is economically and judiciously applied to the construction and equipment of the Road, together with nearly $7,000,000, received from Stock Subscriptions and other sources. The First Mortgage therefore amounts to but about 35 per cent. of the actual cost and value of the Property which it covers.

The road is now completed, equipped and running from Sacramento City to Alta, a distance of 78 miles, and the earnings for the three months ending August 1st were as follows, viz.:

May, 1866		$65,115 83
June	"	67,429 78
July	"	85,000 00

IN GOLD.

The earnings are steadily increasing, and are estimated at over $100,000 in Gold for the month of August—the official report for that month not having been received at this date.

The construction of the road is going vigorously forward, and it will probably be in full operation to the California State Line—156 miles from Sacramento City—during the summer of 1867, when its earnings must be very large, as the entire trade of Nevada, and a large proportion of that of Utah, Idaho and Montana must pass over its line. It has been shown by reliable statistics that in 1863 over $13,000,000 in Gold was paid for freighting goods from California to Nevada alone.

This part of the Great Pacific Railroad Route is destined to be one of the most profitable lines of railroad in the world, and its First Mortgage Bonds are among the best secured and most desirable investments ever offered.

Over $1,000,000 has already been expended in grading beyond the point to which the road is now running, and the iron is bought and paid for sufficient to lay the track the entire distance to the State Line.

The Road has been completed and equipped thus far without the sale of a single dollar of its First Mortgage Bonds, and they are now offered to the public for the first time, after the earnings of the Road have reached the sum of $100,000 per month in Gold, only about 25 per cent. of which is required for operating expenses.

The interest is payable on the first days of January and July, at our office in the city of New York.

The Bonds are offered at 95, and accrued interest from July 1st, in Currency. Orders may be forwarded to us direct, or through the principal Banks or Bankers in all parts of the country.

Remittances may be made in drafts on New York, or in Legal Tender Notes, National Bank Notes, or other funds current in this city, and the Bonds will be forwarded to any address by Express, free of charge. Inquiries for further particulars, by mail or otherwise, will receive punctual attention.

FISK & HATCH, Bankers,

The Industry of Massachusetts.

A document of much value has just been issued from the office of Hon. Oliver Warner, Secretary of the Commonwealth, entitled "Statistical Information relating to certain branches of Industry in Massachusetts, for the year ending May 1, 1865." The record which it presents of the industrial prosperity of the State is very gratifying. The first report of the kind, published in 1838, exhibited an annual amount of industrial products of eighty-six millions of dollars. In 1845 it had increased to one hundred and twenty-five millions. In 1855 it had reached the sum of two hundred and ninety-five millions, and is now augmented to five hundred and seventeen millions of dollars. Thus the last decade exhibits an increase of seventy-two per cent., while the population during the same period increased only three per cent. This result has been arrived at during a period when the country has been subjected to the strain of a distressing war, with a large proportion of our industrial classes changed from producers to consumers.

A comparison of some of the leading products, as exhibited in the extracts of 1855 and 1865, is presented below, which shows largely increased results, with the single exception of the whale fishery:

	1865.		1855.	
	Value.	Capital.	Value.	Capital.
Cotton	$54,436,881	$33,293,936	$26,140,538	$31,961,000
Calico and Delaine	25,258,703	4,222,000	5,218,000	1,900,000
Woolen	48,430,671	14,735,830	12,105,574	7,305,500
Paper	9,000,521	3,785,300	4,141,817	2,564,500
Rolled and sheet iron and nails	8,836,502	2,827,300	5,512,816	2,342,825
Printing and newspapers	5,888,148	1,119,400	1,351,318	749,550
Clothing	17,743,894	4,634,440	9,001,896	2,770,800
Tanning & currying	15,821,712	4,994,933	10,934,416	4,152,426
Boots and shoes	52,915,243	10,067,474	37,499,923	.....
Whale fishery	6,618,670	5,879,862	7,666,996	14,546,543
Mackerel and cod fishery	4,832,218	3,757,761	2,829,640	8,696,496
Horses, oxen & cows	19,154,790	....	15,423,521	....
Hay	13,195,279	....	8,702,317	....

There has been quite a marked reduction in the number of hands employed in the cotton and the boot and shoe manufactories. The number employed in cotton in 1855 was 34,787; in 1865, 23,678; the number employed in boots and shoes in 1855, was 74,826; in 1865, 55,160. This decrease is doubtless owing to the introduction of labor-saving machinery. On the figures given, Secretary Warner remarks:

"The aggregate amount of industrial products for the year ending May 1, 1865, surprising as it is, and exhibiting as it does a grand total of $517,240,613, being over a million and a half dollars for each working day in the year, with a capital of $174,499,950, and giving employment to 271,421 persons engaged in manufacturing, and 68,636 in agricultural pursuits, well illustrates the indomitable perseverance of a people whose national productions have been said to be only 'ice and granite,' and whose industry, united with intelligence, has not failed to win substantial triumphs over the disadvantages of soil and climate."

Bristol County leads in the manufacture of cotton. In the manufacture of calicoes and delaines Essex returns the largest amount. In woolen goods, Worcester stands at the head. Worcester leads, too, in shoddy. Middlesex makes the most carpeting, and the most hollow ware and castings; Suffolk the most locomotives, steam engines and boilers; Bristol the most shovels, spades, forks and hoes; Worcester the most plows and agricultural implements; Suffolk the most hoop skirts, and the most paper collars; Berkshire manufactures the largest amount of paper. Suffolk produces most of the organs, melodeons and piano fortes made in the State; Middlesex the most watches and jewelry; Essex is ahead on hats and caps; and Suffolk on clothing, being the principal seat of its manufacture; Suffolk and Hampden are the chief manufacturers of fire-arms; Middlesex is the principal seat of India rubber manufacture; Essex is the leading boot and shoe county. In the mackerel and cod fishery Barnstable stands first, with a value of $2,224,403, against $1,684,052 in Essex. In the whale fishery Bristol leads. Middlesex and Norfolk are the great brewery counties. Middlesex produces the largest value of fruit, and Worcester of hay. The latter county is also the foremost in horses, oxen, cows, &c. In beef, pork, mutton, veal and swine Middlesex stands highest; also in milk. Worcester and Middlesex are two of the greatest agricultural as well as manufacturing counties in the State. The aggregate manufacturing values of the counties are as follows:

Barnstable	$6,090,022
Berkshire	24,951,499
Bristol	55,088,314
Dukes	545,810
Essex	81,107,926
Franklin	7,938,522
Hampden	28,016,816
Hampshire	13,143,957
Middlesex	88,102,442
Nantucket	281,265
Norfolk	36,771,897
Plymouth	17,682,246
Suffolk	86,849,174
Worcester	76,271,724

Mineral Statistics of Great Britain.

Mr. Robert Hunt, of the Museum of Practical Geology, London, has prepared his usual annual statement of the Mineral Productions of the United Kingdom. From this we learn that the total number of tons of coal produced in 1865, in England, Scotland and Ireland amounted to 98 150,587—being an increase, as compared with the production of the previous year, of 5,862,709 tons. The following table will show the sources from which this enormous supply of coal was derived:

	Tons produced.
Durham and Northumberland	25,032,694
Cumberland	1,431,547
Yorkshire	9,355,100
Derbyshire	4,595,750
Nottinghamshire	1,095,500
Leicestershire	965,500
Warwickshire	859,000
Staffordshire and Worcestershire	12 200,989
Lancashire	11,962,000
Cheshire	850 000
Shropshire	1,185,000
Gloucestershire and Somersetshire	1,875,000
Monmouthshire	4,125,000
South Wales	7,911,507
North Wales	1,983,000
Scotland	12,650,000
Ireland	123,000
Total produce of the United Kingdom	98,150,587

—of which there have been retained for home consumption, and exported in the five years ending with 1865, as follows:

Exported. Tons.	Retained. Tons.	Consumption per head of the population. Tons.	Cwts.	qrs.	lbs.
1861.7,855,115	77,657,029	3	7	2	6
1862.8,301,852	75,202,986	3	4	1	2
1863.8,275,212	79,890,253	3	8	1	20
1864.8,809,908	83,852,265	3	1	0	21
1865.9,170,477	88,980,110	3	13	2	24

Of the amount retained for home consumption, the quantity consumed in making iron, and for all other purposes, is shown in the annexed statement:

Coal consumed in making iron. Tons.	Leaving for all other purposes. Tons.	Or per head of the population. Tons.	Cwts.	qrs.	lbs.
1861.22,273,762	55,388,267	2	7	3	2
1862.23,652,107	51,650,879	2	3	0	13
1863.27,018,082	52,877,171	2	5	2	23
1864.28,715,639	55,137,526	2	6	0	3
1865.29,783,052	59,197,058	2	9	0	8

For the purpose of rendering this history of the coal trade as complete as possible, returns of all the coal brought into London since 1834 are given, a detailed statement of all the collieries sending coal to the metropolitan district since 1854, and the prices of Newcastle and Sunderland coal in the London market during each month since the year 1832. From these we find that in 1834 by sea and canal London received 2,080,547 tons, and in 1844, 2,563,166 tons. In 1845 the railways began to bring coal to London, the quantity in that year being 3,461,199 tons. In 1854 there was an advance to 4,378,732 tons, and in 1864 to 5,476,426. The quantity brought within the metropolitan district last year was 5,909,940 tons.

An interesting portion of the returns is that which gives the statistics of the production of coal in the various European States and on the continent of America—the total quantity raised in every part of the world being considerably less than that produced in the United Kingdom. The annual coal production of the whole world is 186,000,000 of tons; but of this quantity the United Kingdom produces 98,000,000, or considerably more than one-half.

	Tons.
France, 1865	11,300,000
Belgium, 1862	9,758,223
Prussia, 1863	10,074 815
Prussia, 1863, (brown coal)	4,003,044
Saxony, 1863	1,902,175
Saxony, 1863, (brown coal)	428,615
Grand Duchy of Baden, 1864	12,338
Hanover, 1863	287,415
Hesse and Nassau	79,296
Electoral Hesse, 1865	308 150
Electoral Hesse, 1865, (brown coal)	170,600
Bavaria, 1862, (coal)	221,220
Bavaria, 1862, (lignite)	45,570
Zollverein, 1863, (coal)	16,906 707
Zollverein, 1863, (lignite)	5,459,494
Austria, 1862, (coal)	2,265,228
Austria, 1862, (lignite)	1,786,679
Russia, 1863	6,350 000
Denmark, 1864	2,755
Sweden, annually	30,000
Holland, annually, (inferior)	18,000
Portugal, annually	14,500
Switzerland, annually	15,100
United States of America, 1864	4,598,659

The quantity of iron produced was 9,910,045 tons, valued at the place of production at £3,324,804. This was used to feed 656 blast furnaces, from which flowed forth 4,819,254 tons of pig iron. Of this 543,018 tons were exported; and 6,407 puddling furnaces and 730 rolling mills were employed in converting the remainder into finished iron.

The quantity of tin ore produced was larger than that obtained from the Cornwall and Devonshire mines in any previous year, amounting to 15,686 tons, of the value of £867,435, from which 10,039 tons of metallic tin were obtained. The quantities produced, and the price per ton of ore, during the past six years have been as follows:

	Ore raised. Tons.	Av. price per ton of ore.
1860	10,462	£71 11
1861	11,640	62 7
1862	14,127	59 14
1863	15,157	63 12
1864	15,211	60 17
1865	15,686	55 6

As large quantities of tin are steadily arriving in England from Banca and Billiton, and as the Dutch merchants hold 7,690 tons of tin, available for the coming twelvemonths, there is no hope of any increase of price, until necessity, by closing many of the productive tin mines, reduces the supply.

The copper mines of Great Britain and Ireland produced 198,298 tons of copper ore, of the value of £927,938. From this 11,888 tons of copper were smelted, valued at £1,134,664. The production of British copper ores has been for some time steadily declining—the ores, as shown by a table given, are becoming poorer, and the price, which was for Cornish copper ores in 1856, £6 2s. 6d., has fallen to £4 15s. in 1865. The imports of foreign and colonial copper have been very large, that of copper ore amounting to 82,562 tons, and of regulus to 39,686 tons, while cake and manufactured copper have also been largely imported.

The total quantity of lead ore raised in the United Kingdom in 1865, was 90,452 tons, from which 67,181 tons of metallic lead, and 724,856 ounces of silver were obtained.

The zinc mines produced last year 17,842 tons of zinc ores, against 15,047 tons obtained in 1864.

The gold bearing quartz of the Welsh hills in the neighborhood of Dolgelly produced 1,663 ounces of gold; in the previous year the quantity was 2,336 ounces; and in 1863, it was 5,299 ounces.

Iron pyrites have been raised during the year to the extent of 114,195 tons, the value of which is estimated at £71,174. Of this quantity 81,990 tons have been raised in County Wicklow, Ireland.

Barytes, a mineral which is largely used to mix with white lead, are returned at 6,768 tons.

Of the white oxide of arsenic, a return was made of 826 tons, separated from other ores, and sold in Cornwall.

The following is a general summary of the minerals raised and metals produced in the United Kingdom in 1865:

	Quantity of Minerals raised.	Value of Minerals raised.	Quantity of Metals produced.	Value of Metals produced.
Tin, tons	15,686	£867,435	10,039	971,273
Copper, tons	198,298	927,938	11,888	1,134,664
Lead, tons	90,451	1,153,134	67,181	1,438,161
Silver, oz.	.....	.....	724,856	199,335
Zinc, tons	17,842	62,478	4,460	104,810
Pyrites, tons	114,195	71,174	.....	.....
Gold, (quartz)	4,280	.....	oz. 1,164	5,824
Iron, tons	9,910,045	8,924,804	4,819,254	11,774,220
Coal tons	98,150,587	24,537,621	.....	.....
Earthy minerals and others, returned	.....	774,466	.....	.....
Earthy minerals not returned, estimated	.....	650,000	.....	.....
Metalliferous ores and metals other than above estimated	.....	.....	150,000	15,773,287
Total value	.....	82,359,080	.....	15,773,287

The following therefore represents the total value of the productions of the mines and collieries in Great Britain in 1865:

Metals obtained	£15,773,287
Coal	24,537,621
Earthy minerals (not including ordinary clays and building stones)	1,434,496
Total	£41,745,404

Delaware and Raritan Canal—Necessity of its Enlargement.

The business on this canal has increased so rapidly and has attained such prodigious totals, and, besides, increase of business upon it is so distinctly foreshadowed, that additional enlargement of the capacity of its locks will very soon have to be made, to satisfy the necessities and the interests of commerce.

Except on 43 miles of Delaware and Raritan Canal between Bordentown and New Brunswick, and on 14 miles of canal between Delaware City and Chesapeake City, there is open, deep and free river and bay navigation between the tidewaters of the Chesapeake, the Delaware and the Hudson, and the great cities and busy towns thereon. The movement of freight on this short, cheap and convenient inside water line, in contrast with the outside or coast route, is positively stupendous; and to accommodate its inevitable increase, either the

present lock will have to be widened to admit two boats into its chamber at the same time, or duplicate locks will have to be built alongside those in operation. Locks widened to pass two boats together would be a remedy for a time; and when still another enlargement of lockage capacity is required, the locks might be doubled in length, and made to pass four boats at a time in one chamber.

The Saut St. Mary's Canal has lock chambers 70 by 350 feet; and we have seen four brigs and schooners, bound from below for Lake Superior iron ore at Marquette, in the lock chamber at the same time.

The summit level of the Delaware and Raritan Canal is but 58 feet elevation above mean tide, so that the ascending and descending lockage between its termini is only 116 feet. The number of locks is but ten. The summit level is supplied by a feeder 28 miles long, which is filled by inflow from the Delaware river at Bull's island, and which has an incline of two inches in the mile to Trenton. Reservoir room for water storage may be provided to any extent, on the long summit level of the main canal; and nothing is needed but bold hydraulic engineering and the expenditure of money, to make the Delaware and Raritan Canal of capacity equal to its prospective trade, whatever be the limit its aggregate may reach.—*U. S. R. R. and Mining Register.*

Ogdensburg and Lake Champlain R. R.

On the 1st of August, 1865, this road, with its equipments, was, by an order from the Supreme Court, and by agreement of parties, transferred from the Trustees of the Second Mortgage Bonds of the Northern Railroad Company to the Ogdensburg, and Lake Champlain Railroad Company, an organization created by a law of the State, passed April 8, 1864. The road is 118 miles in length, extending from Rouse's Point to Ogdensburg. At the former it connects with the Montreal and Champlain, and the Vermont Central and Vermont and Canada Railroads. At Moore's Junction, with the Montreal and New York Railroad. At Potsdam Junction, with the Rome, Watertown and Ogdensburg Railroad. And at Ogdensburg by ferry, with the Grand Trunk and Ottawa and Prescott Railroads of Canada. The equipment of the road consists of 26 locomotives, 17 passenger, 8 baggage, mail and express, and 353 freight cars. It has 18 miles of second track and sidings, and 4 miles of branch roads, viz: 1¼ mile from Summit to Gravel Beds; 1¾ mile from Champlain to River Landing, and 1 mile from Potsdam to Lumber Mill. The weight of rail per yard is 56 lbs.

The following is a comparative statement of the receipts and expenditures for the fiscal years ending September 30, 1864 and 1865:

Receipts:	1864.	1865.
From passengers and freight	$741,765 42	$612.970 86
From interest	16,866 52	4,829 47
From insurance	9,427 50	17.000 00
From Crawford bonds	.....	10,500 00
From bills payable	.....	165,150 00
From bills receivable	.....	59,500 00
Totals	$768,059 44	$869,950 33
Payments, other than for construction:		
For transportation expenses	$549,703 86	$662,711 74
For interest	108,484 50	189,102 07
For discount, interest and exchange	428 91	.....
For payments to Champlain extension	.....	20,000 00
For expenses attending new organization	.....	65,671 59
Totals	$658,617 27	$937,485 40

The earnings of the road in the years named were as follows:

	1864.	1865.
From passengers	$159,564 66	$178.115 67
" freight	547.443 67	508.297 88

Second "	3,077,000 00	.....
Totals	$4,571,900 00	$4,571,900 00

The number of miles run by passenger trains in 1865, was 124,872; by freight trains, 275,048—total, 399.920, against 458,311 in 1864, a decrease of 58,391. Number of passengers carried in 1865, 147,500; do., carried one mile, 5,498,317. In 1864, the number carried was 141,680, and the mileage of do., 5,846,234—an increase in passengers carried of 5,820, with a decrease in mileage of 347,917. Tons of freight carried in 1865, 203,781; mileage of do., 18,834,478. In 1864 the tonnage was 230,201, and the mileage of do., 21,154,384—a decrease in tonnage of 26,320, and in mileage of freight, of 2,319,906.

☞ The Second and Third and Sixth and Ninth street cars, Philadelphia, are running every day in the week.

New Orleans Cotton Trade.

The New Orleans *Price Current*, in its annual review, dated September 1, gives the following table, showing the total product of cotton, with the receipts at New Orleans, and the total crop of each year:

	Crop. Bales.	Received at New Orleans.	Average price per lb.	Total Value.
1856–'57.	2.939.519	1,513,247	12½	$86,205 099
1857–'58.	3.113,962	1.678 616	11⅜	88 127.340
1858–'59.	3.851,481	1,774,298	11½	92,037.794
1859–'60.	4,675.770	2,255 448	10⅝	109.389 228
1860–'61.	3,699,926	1,849.312	11	92,465.600
1861–'62	3,900,000	38,880	10	1,769.040
1862–'63		22.078	55⅞	5,107 082
1863–'64		131,014	85	46,677,872
1864–'65.	500.000	271,015	69¼	73,326.398
1865–'66.	800,000	787,386	39¼	140,312,185

By the above figures it will be seen how much more valuable the cotton crop of 1865–'66, was than that of any previous year, though the production was only about 16½ per cent. of that of 1859, which was the heaviest in the last ten years, the crop of that year reaching 4,675,770 bales, of the value, at the then prices, of about $109,250,000. In the year 1866, 800,000 bales were produced, and were worth $140,250,000. The product of the present year is estimated at more than double, probably treble, that of last year, and the prices this year range from 24 to 35 cents per pound for the various grades, against 39¼ cents as the average price last year. From this comparison of figures the cotton crop of this year promises to be much more valuable than it was last year.

Bridge Across the Mississippi.

Quincy, Ill., September 6.—A bill for building a bridge across the Mississippi passed Congress a few days before its adjournment. The three railroads terminating at this point, desirous of building the same, have made a contract to that effect with the corporators, have received the charter, and the contract was signed and delivered yesterday, so that the Mississippi river bridge is now a fixed fact, on the great highway of travel to Salt Lake and California.

The Greenland Telegraph Route.

A Copenhagen letter states that the project of uniting the Western Continent with Europe by a telegraph cable, *viz* the Faroe Isles and Greenland, is still under consideration. One of the directors of the company is in the Danish capital to settle the final details with that Government.

☞ The Commissioners of the Troy and Greenfield Railroad invite proposals for the completion of the road from Greenfield to the Hoosac Tunnel. Proposals should be addressed to Alfred R. Field, Chief Engineer, at Greenfield, Mass.

☞ The work on the Alexandria and Fredericksburg railroad is being rapidly pushed forward. The iron bridge over the Occoquan has been contracted for with Messrs. Smith & Latrobe, of Baltimore, and will be ready in time.

☞ The Georgian Bay Canal Company has advertised for tenders for the construction of the canal.

☞ The machine shops of the Burlington and Missouri River Railroad, at Burlington, Iowa, were burned on the 8th inst.

Railroads of Massachusetts.

A tabular statement of the railroads of the State, their capital and cost, length, earnings and expenses, dividends, &c., for the year ending 30th November, 1865.

(Prepared by OLIVER WARNER, Secretary of the Commonwealth.)

Railroads.	Capital Account. Share Capital.	Funded Debt.	Floating Debt.	Total Capital.	Cost of road and Equipm't.	Length of Road.	Gross Earnings. Passenger.	Freight.	Miscel.	Total.	Operating and Repairs.	Earnings less Expenses.	Dividends. Amount.	Rate.

Great Western Railway of Canada.

REPORT OF THE DIRECTORS FOR THE HALF YEAR ENDING JANUARY 31, 1866.

The receipts on capital account during the half year amounted to £9,381 12s. 1d., and the total receipts to 31st January, 1866, were £5 155,731 8s. 2d. The aggregate expenditure to the same date amounted to £1,151,893 6s. 6d.; leaving a balance to the credit of capital account of £3,838 1s. 8d. The outlay on capital account during the half year amounted to £3[illegible],526 8s. 9d., and consists of proportion of expenditure chargeable to capital on rebuilding timber bridges in stone and iron; cost of fish jointing six miles of rails; outlay on new car ferry boat for the Detroit River; new station at Toronto, and extension of the line along the Toronto esplanade; cost of 2¼ miles of line to be used by the Erie and Niagara Railway, &c. The receipts and expenditure on revenue account for the past half year are as follows:

Gross receipts		£387,039
Working expenses, including maintenance of way, taxes, insurance, and rent of suspension bridge		146,938
		£240,101
From which there has to be deducted—		
Interest on Government loan	£17,498	
Interest on bonds, &c	32,800	
Loss on conversion of American money	73,317	
Renewal of rails, sleepers, bridges, &c.	23,665	
		146,680
Balance from half year's working		93,421
Add surplus from last half year		3,205
Leaving		£96,626

From this the Directors recommend a dividend at the rate of 5 per cent. per annum, free of income tax, which will absorb £85,626 6s., leaving a balance of £11,000 6s. to be carried to the credit of the current half year. The loss incurred on the conversion of American funds during the half year, amounts to the sum of £73,316 17s. 11d.; this includes the conversion of $242,158 44c. of American money brought over from the previous half year, and there remained on January 31st, 1866, a balance of $114,557 72c. in American funds unconverted, or a reduction of $127,600. During the past half year the aggregate American funds converted exceeded by $442,045 25c. the amount converted during the previous half year, and by $357,293 75c. that in the corresponding half year. The price of gold has ranged from 148¾ to 137¾. The average cost of the gold purchased has been 144⅛. The following table shows the receipts and expenses of the last five half years:—

Half year.	Receipts. Passen. mails, and sundries.	Freight and live stock.	Rents.	Total.	Expenses including taxes, insurance, & suspension bridge rent.
	£	£	£	£	£
Jan., 1864	129,684	171,329	621	301,634	135,879*
July, 1864	125,282	189,081	577	314,940	140 189†
Jan., 1865	154 125	157,874	730	312,730	139,437‡
July, 1865	139,821	144,028	716	284,565	132,487‖
Jan., 1866	205,131	181,071	837	387,039	146,938◊

Percentage of gross receipts—* 45.05; † 44.51; ‡ 43.95; ‖ 46.56; ◊ 37.97.

The gross receipts for the six months ending January 31st, 1866, were £387,039 6s. 1d., against £312,729 10s. 10d. for the corresponding half year of 1865, being an increase of 22¾ per cent. In the aggregate, the passenger receipts for the half year just ended show an increase of £51,005 13s., the freight and live stock receipts an increase of £23,197 6s., and rents an increase of £106 16s. 8d.; being a total increase of £74,309 15s. 3d., as compared with the corresponding half year ending January 31st, 1865. The working expenses are 37.97 per cent. as compared with 43.95 per cent. for the corresponding half year, showing a reduction of about 6 per cent. Thus the additional gross traffic of £74,309 15s. 3d. has been earned at an increased cost for working expenses of only £9,500 12s. 6d. The new station at Toronto has been opened for public use. The traffic to and from Bothwell on the main line has greatly increased, consequent upon the progressive development of the numerous petroleum oil wells in that and in the Enniskillen oil districts. The Directors are strongly urged to construct the projected branch line, for which legislative powers were granted in May, 1863. In the matter of the Commercial Bank notice of new trial in Canada has been given by the bank; but there is a prospect of an equitable adjustment being arrived at without further litigation. The accounts show that during the last half year the cost of re-rolling rails at the company's rolling mill has been reduced to $22¼ per ton. The production since the opening of the mill on the 1st August, 1864, has been 5,689 tons, at an average cost of $24 per ton. The price formerly paid by the company at Toronto was 26½ per ton, exclusive of the cost of haulage from Hamilton to Toronto, which averaged $1½ per ton, making the total cost $18 per ton. The company had thus saved $4 per ton on 5,689 tons re-rolled since the erection of their own mill, being a total saving of $22,756 in the last eighteen months. The Directors are glad to report that the railway bridge over the Hudson River at Albany, connecting the New York Central with the Hudson River and Western of Massachusetts Railroads has been completed. The opening for traffic of this bridge, it is hoped, will obviate in future the impediments which have periodically arisen in the transportation of through traffic to the seaboard, in consequence of the ferry boats being unable to ply through the ice during the winter. The narrow gauge track about to be laid down on the Great Western main line will thus have an increased value as a through route. The gross earnings of the Detroit and Milwaukee Railroad for the year ending December 31, 1865, were £347,616 17s., and the working expenses amounted to £205,633 14s. 1d., leaving a net revenue of £141,983 2s. 11d.; of this surplus, the sum of £83,741 4s. 6d. was absorbed in the payment of interest on all description of mortgage bonds of the company. The gross earnings for the previous year ending December 31, 1864, were £271,932 1s. 4d., the working expenses, £181,799 14s., and the net revenue, £90 132 7s. 4d.

Signed on behalf of the Board of Directors,

THOMAS DAKIN, President.

London, March 26th, 1866.

Memphis and Charleston Railroad.

At a recent meeting of the stockholders of the Memphis and Charleston Railroad, in Memphis, Tenn., the following resolution was adopted:

Resolved, That the President and Directors of the Memphis and Charleston Railroad be requested to inquire into the feasibility of building a direct line from a point in North Alabama, connecting with the Memphis and Charleston Railroad to Atlanta, if a charter can be obtained and means raised to accomplish said object.

☞ The condition of the Montgomery and Eutaula (Ala.) Railroad is said to be very encouraging. A large force is at work on the grading of the road at Union Springs, only twelve miles of which remains to be completed. It is intended to commence the track laying some time next month.

☞ The new New York Northern Railroad Company has chosen Chester W. Chapin, of Springfield, President; Chas. R. Westbrook, of Ogdensburg, N. Y., Vice President Thos. L. Green, of Albany, Secretary and Treasurer.

American Railroad Journal.

Saturday, September 15, 1866.

Stock Exchange and Money Market.

There is undiminished ease in Money. Lenders have unusually heavy balances available to all first class borrowers, whether for speculative use, or mercantile purposes, and rates are steady on call loans 3@4 per cent. to the Government houses, and 4@5 per cent. to other leading stock firms, while strictly prime discounts are quoted at from 5@6 per cent., and good to fair names, at 6½@8 per cent. per annum. There is an increase in the discount applications, resulting from the revival in general business, which, though late in opening, promises well for the season. The activity is most apparent in dry goods, groceries, breadstuffs, provisions, cotton, wool, and a few other leading commodities. Currency has been passing hence to the interior, chiefly to move the crops, but not in sums sufficient to materially affect the supply or price of money here, especially in view of the liberal disbursements from the Treasury Department. Rumors are current to the effect that Secretary McCulloch contemplates an early liquidation of the Clearing House certificates of deposit, and the extension of the privilege of immediate conversion of the Seven Thirty notes into the Five Twenties of 1865, so as to embrace all three issues of the former, now amounting to $769,518,900, as against an original grand total issue of $830,000,000, mainly marketed by the Government Loan Agent, but these rumors lack confirmation. We have made diligent inquiry at the U. S. Sub-Treasury, at the Government Loan Agency, and at other heavy dealers in the public funds, and we find nothing to warrant them, beyond the recognition of the fact that the Treasury Department is in a position to act as indicated, that the condition of the market for money and national stocks is favorable to the adoption of such a course, and that Secretary McCulloch is free to fund and liquidate, when he shall have decided that it is for the interest of Government for him to do so. The last exhibit of the public debt, Sep. 1, as given in our last, is regarded as an unprecedentedly strong one. It adds greatly to the confidence of the public in the present management of the national finances. It indicated that the liquidation of the public debt has been progressing at the rate of $24,868,399 a month, since June 1, 1866, and at the rate of $12,428,469 a month, since August 1, 1865. The rate of liquidation through the past year, which, it is not at all improbable, will be realized for some years to come, would free us wholly of indebtedness in about sixteen years. Of the interest bearing portion (about $2,221,500,000 of the present debt, Five-Twenties (of all issues) form $770,422,800, including of the earlier issue, $514,780,500; issue of 1864, $100,000,000; and issue of 1865, $161,642,300. The six per cents of 1881 now amount to $283,734,800, the Ten-Forties to $171,069,350, and the Seven-Thirties (all three series) to $769,518,900, or nearly sixty-one millions less than the original total issue. The legal-tender circulation is now $555,115,732, against $556,373,868 on the 1st ult., and $564,140,458 on the 1st of June. The reduction since June has been mainly in the compound-interest notes, which, three months ago, stood at $162,012,110, and are now down to $155,512,110. The plain greenback circulation on June 1 was $402,128,318; August 1, $400,361,728; and Sept. 1, $399,603,592. Nearly a sixth of the entire legal tender circulation lies in the vaults of the banks of this city, which held a treserve of over ninety millions of United States notes at the close of last week. At the beginning of September, 1865, the legal tender circulation stood as high as $684,138,959. It has since been reduced nearly $130,000,000, as against an increase of about $113,700,000 in the national bank note circulation, during the same period, showing conclusively that the legal-tender circulation has been diminished more rapidly that the volume of National Bank notes has been augmented. A very considerable portion of the issue of National Bank currency through the year has superseded the circulation of State banks, converted into National banks or wound up altogether, so that it is safe to assume that the volume of paper money of all kinds in circulation has been materially lessened since Sept. 1, 1865. The payment of seventy-three millions of the temporary loan in August is another important gain for the Treasury. Nearly thirty millions of the first series of Seven-thirties maturing in August of next year, were converted within the month into Five-twenties of the latest issue. The currency interest-bearing portion

the debt was reduced nearly ninety-one millions, and the coin interest-bearing debt increased about thirty-four millions during the past month. The liquidation of the temporary loan, which ceased to bear interest on the 26th ult., continues; yet the cash reserve in the Treasury, to-day, is heavier than on the 1st inst., and the tendency is to further accumulation, from the liberal excise and customs revenues of the Government. Confidence is freely expressed that the Secretary will bring the net indebtedness of the country within the limits of $2,400,000,000 by the close of the current year, to be represented by $2,000,000,000 of an interest-bearing debt, and $400,000,000 of a legal tender circulation.

The city banks, last week, added $3,542,061 to their loans, $1,074,310 to their specie reserve, and $698,454 to their circulation, while losing $2,428,554 of the legal tender reserve, and $83,291 of their deposits. Their deposits are now $225,107,991. Their legal tender reserve amounts to $90,194,254. Their circulation now stands at $28,506,288, and their loans are up to the enormous sum of $268,941,668, or nearly fifty-five millions higher than at this time last year. The Bank Exchanges at the Clearing House, through the past week, averaged $98,567,189 a day, against a daily average of $97,644,608 the preceding week; and $102,991,220 the week ending with Aug. 25th. The current week's exchanges average near $100,000,000 a day.

The U. S. Sub-Treasury receipts, week ending with Sept. 8, were $19,089,718, including $3,222,266 from customs duties; payments, $16,820,266; balance at the close of the week, $84,563,995, against $82,294,543 at the close of the preceding week. The business of the Office during the first two days of the current week, was as follows: Monday, receipts, $10,382,485, and payments, $9,296,287, Tuesday, receipts, $2,762,511, and payments, $1,001,330. The balance at the close of business on Tuesday stood at $87,411,321, against $81,253,064 a week ago.

Government revenues were very heavy, last week. The excises, yielded the enormous sum of $10,302,029; customs at the port of New York, $3,222,266, and at the outports, at least, $1,250,000 more, making the grand total income for the week equal to about $16,788,000 in currency, against disbursements of only $3,145,069 on account of the three leading executive departments. The total receipts of the National Treasury, from excises, since July 1, 1866, have been $81,305,815. Thus far, in the current fiscal year, the receipts from this source have averaged about $8,000,000 a week, or equal to a yearly aggregate of $416,000,000.

National Bank notes to the amount of $1,266,025, were issued last week, making the total issue to 1,658 banks thus far $291,179,845. The United States bonds held by Treasurer Spinner in trust for National Banks as security for circulating notes amount to $331,910,700, and as security for public deposits, $38,565,000, making a total of $370,475,700.

There have been no very noteworthy fluctuations in gold, since our last. The extremes have been 147⅞ on Saturday under some heavy purchases for speculative account, and 145⅛ on Tuesday, under liberal arrivals of specie from California and Europe. The California steamer *Henry Chauncey* delivered on Sunday $1,679,030 in treasure at this port. The *City of Boston* from Liverpool also arrived here on Sunday with $250,000, the *Hermann* on Monday with $310,000. Another arrival at Boston by the *China* amounted to $765,000. The *Pereire* from Havre reached this port on Wednesday, with a treasure freight of 5,626,000 francs, or equal to about $1,125,200; making the imports of specie from Europe, for the week, here and at Boston, $2,450,200. The shipment of gold from Liverpool by the *Java* on Saturday last is now telegraphed as $1,450,000, in place of $1,000,000, as reported that day. On Wednesday, gold opened at 145⅛, advanced to 146⅛, fell to 145⅛, and closed tamely, but steady at 146. Loans of gold were made on that day at from 1-16th per cent. a day to "flat." The speculation for a rise lacks vigor, and is only kept up by the enormous customs demand, which materially lessens the supply of "cash gold," and helps the *bull* interest. The customs demand last week, averaged $537,044 a day; thus far, this week, it has been equal to $410,000 a day. The total receipts of California gold at this port since Jan. 1, were $30,397,184, against $12,639,270 same time last year, showing an increase, in 1866, of $17,757,914. The exports of specie from this port, last week, were only $157,062, making the total outflow of specie from the port, since Jan. 1, $53,652,614, against $20,825,756 same time last year. Government disbursed last week through the U. S. Sub-Treasury here, on account of the September coin interest, on the public debt, chiefly on the Ten-Forty Loan, $1,935,108, making the total coin interest disbursements through the Government office, since Jan. 1, 1866, $31,352,165, against $25,088,844 same time last year.

Government securities have been in less urgent demand for home investment and export purposes, since our last, and there has been a temporary yielding in prices; the market closing, however, with more firmness, as the offerings are light at the going rates, despite the unfavorable reports from London. U. S. Sixes of 1881 closed 111¼; U. S. Five-twenties of 1882 at 110¾; U. S. Five-twenties of 1865 at 108⅛. U. S. Ten-forties at 98, ex-Sept. coupon, and U. S. Seven-thirties at 105¾@106. The brokers are buying the compound-interest notes at the following rates, and selling at an advance of ¼@½ of 1 per cent. on these figures:

June, 1864	115½	May, 1865	110½
July, 1864	115	August, 1865	109
August, 1864	114½	September, 1865	108½
October, 1864	113½	October, 1865	108
December, 1864	112½		

There has been a slight improvement in foreign exchange, since our last, resulting from an increased demand for prime bills, which have been rather less freely offered. Bankers' sixty day bills on London are now quoted 106@106½, and on Paris to 5.35@5.30; sight bills on London to 107@107½; and on Paris to 5.30@5.27½. The depression in gold helped the market somewhat. Government has been a purchaser of exchange, for the diplomatic service. The exports of current produce are liberal and adding to the supply of bills. The week's exports of domestic produce and miscellaneous goods have been to the currency value of $3,042,586, against $2,323,660 same week last year. The exports since January 1, have been to the value of $137,168,392 or nearly twenty-nine million dollars in excess of the exports, same time last year.

Railway and miscellaneous property has been more freely dealt in. Prices were depressed early in the week by the *bear* influence on the market; but there has been a decided rally within a day or two, and the indications are of an early and vigorous upward movement, as much of the really desirable share interests are passing rapidly into the hands of strong *bull* cliques, and will doubtless be energetically manipulated by them.

The latest quotations at the London Stock Exchange compare as follows with former returns:

	Aug. 29.	Sept. 5.	Sept. 11.
Consols	—@89¼	89¼	89¼
U. S. 5-20's	—@72¼	73	71¾
E ie	—@45¾	46¾	44½
Ill. Central	—@78¾	79	78½

Telegraphic advices from California report the earnings of the Central Pacific Railroad Company for the month of August as high as $111,770, (in gold,) which shows a marked increase in the business of the road, of which there are now 73 miles in working order. The working portion of the road earned in May of this year, $65,116; in June, $67,430; in July, $85,000; and in August, as above, $111,770, all paid in coin. The demand for the First Mortgage Bonds of the road (interest and principal payable in New York, in coin,) advertised by Messrs. Fisk & Hatch, elsewhere in this paper, has been quite active, during the past week. The bonds are evidently destined to become a favorite security. They have thirty years to run from date of issue, July 1, 1865. The bonds bear interest at the rate of six per cent. per annum in coin; payable semi-annually on the first days of January and July of each year, at the banking house of Messrs. Fisk & Hatch, No. 5 Nassau street, who are the sole agents for the sale of the bonds, and who offer them at 95 per cent., and accrued interest from July 1st, in currency.

In general business, there has been a decided improvement since our last, with increased sales reported at generally firmer prices, in all the leading branches of trade, especially in breadstuffs, groceries, dry goods, boots and shoes, provisions, and cotton. Middlings close firmly at 33@36 cents per pound. The week's exports of cotton have been 6,987 bales from this port, and 9,850 bales from all the shipping ports, leaving an available supply of 80,000 bales here, and 210,000 bales at all the shipping ports. The total exports of cotton from the United States, year ending Sept. 1, 1866, were 1,583,000 bales. The total imports of foreign dry goods, last week, were $3,136,719, and the total amount marketed $3,719,066. The value of foreign merchandise imported last week, was $2,754,152—making the grand total value of last week's imports of dry goods and merchandise, $5,890,871, and since January 1, $220,222,876, against $121,860,443 same time last year. The freight market is very quiet, but steady, with 522 vessels of all classes in port.

The actual stock of cotton in this port, Sept. 1, was 68,408 bales, against 74,862 bales same time last year. Spinners took 379,720 bales from this port during the year ending 31st ult., against 275,636 bales last year, and 264,972 year before; or, say 7,302 bales per week this year, against 5,301 last year.

The New York exports, exclusive of specie, for the week ending Sept. 11, and since the beginning of the year, compare as follows:

	1865.	1866.
For the week	$2,323,660	$3,042,586
Prev. reported	105,847,660	134,125,806
Since January 1	$108,171,320	$137,168,392

The New York imports for the week compare as follows:

	1865.	1866.
Dry goods	$2,833,411	$3,136,719
Gen. merchandise	1,875,558	2,754,152
Total for the week	$4,708,969	$5,890,871
Prev. reported	117,151,474	214,332,005
Since January 1	$121,860,443	$220,222,876

The balance in the Sub-Treasury on Wednesday was $88,529,789 33.

The following quotations of sales of Railway and other securities are in addition to those given elsewhere in our columns:—

New York.—New York State 6s, 1873, 98; do., 7s, Bounty Loan, 105½; Ohio 6s, 1870@1875, 98; Louisiana 6s, 100; Minnesota 8s, 101; Michigan 6s, 1878, 96; Norwich and Worcester, 107; Hannibal and St. Joseph R. R., 36¾; Ind. and Cin., 75; N. J. Central, 128; Chicago and Great Eastern, 46¼; New York and New Haven, 114; Stonington, 112; Gt. Western R. Erie and Niagara Railway.

An agreement was signed on the 18th of July last, by which the Great Western of Canada Railway Company agrees to work the Erie and Niagara Railway for five years. The former company is to find all necessary rolling stock, and pay the Erie and Niagara a minimum rate of twenty per cent. of gross receipts, and also any surplus profits that may accrue beyond this. The agreement is terminable by either party on giving six months' notice after the expiration of the five years. The road is to be kept in repair at the cost of the Great Western Railway, who are to be allowed £2,400 per annum for expenses of management.

Hartford and New Haven Railroad.

The annual meeting of the stockholders of this company is to be held in Hartford on the 19th inst., "for the choice of Directors for the ensuing year, and to consider and act upon the subject of merging the stock of the New Britain and Middletown Railroad Company with that of this company, and the transaction of such other business as may then be brought before the meeting."

Baltimore and Potomac Railroad.

The location of this road was commenced by a party of engineers last week. General Trimble, who originally surveyed the road, is assisting the engineers, who commenced operations on the line of the Annapolis Railroad, and are working on towards the Patuxent River.

☞ Messrs. FOWLE & Co., 70 Broadway, have for sale Krupp's Steel Tyres, Owen's Steel Tyres, Lowmoor Steel Tyres, and Bowling Steel Tyres. They are agents for the celebrated Earl of Dudley's English Bar Iron, Boiler, Tank and other Rivets, Nuts, etc. Address Messrs. FOWLE & Co., No. 70 Broadway, New York.

☞ Hon. Alva Crocker, of Fitchburg, Mass., has been appointed Commissioner of the Troy and Greenfield Railroad and Hoosac Tunnel, in place of Mr. Holmes, resigned. Mr. B. H. Latrobe, of Baltimore, has been appointed Consulting Engineer.

Railroad Earnings.--Weekly.

The traffic of the Great Western Railway of Canada, for the week ending Sept. 7th, 1866, were $66,406 13
Corresponding week of 1865 ..... 80,534 74

Decrease $14,128 61

The earnings of the Grand Trunk Railway of Canada for the week ending Sept. 1st, 1866 were $135,141 00
Corresponding week of previous year.. 133,673 00

Increase $1,468 00

The earnings of the Marietta and Cincinnati Railroad the 4th week in Aug., 1866..$35,724 00
Corresponding week previous year.... 41,472 10

Decrease $5,748 10

The earnings of the Western Union Railroad for the week ending Sept. 7, 1866 .. ..$19,371 09
Corresponding week previous year.... 15,344 41

Increase $4,026 68

The earnings of the Detroit and Milwaukee Railroad for the first week in Sept., 1866, were $43,014 00
Corresponding week of 1865..... 41,747 00

Increase $1,267 00

The earnings of the Michigan Southern and Northern Indiana Road for the 1st week in Sept., 1866, were $97,292 00
Corresponding week of 1865 ..... 110,236 00

Decrease $12,944 00

The earnings of the Chicago and Northwestern Railway for the first week in Sept., 1866 were $218,050 00
Corresponding week of previous year.. 236,432 00

Decrease $18,382 00

Tide-Water Receipts.

The quantity of flour, wheat, corn and barley, left at tide water from the commencement of navigation to the 31st Aug., inclusive, during the years 1865 and 1866, was as follows:

	Flour, bbls.	Wheat, bu.	Corn, bu.	Barley, bu.
1865..	391,600	4,686,600	7,054,000	174,800
1866..	136,200	1,763,200	13,939,900	142,300
Dec.	255,400	2,923,400	*6,885,900	32,500

* Increase.

By reducing the wheat to flour, the quantity of the latter left at tide-water this year, compared with the corresponding period last year, shows a deficiency of 840,080 bbls. flour.

The following comparative table shows the quantity of some of the principal articles of produce left at tide-water from the commencement of navigation to and including the 31st of Aug., in the years indicated:

	1864.	1865.	1866.
Canal opened—	April 30.	May 1.	May 1
Flour, bbls	556,200	391,600	136,200
Wheat, bush	9,933,300	4,686,600	1,763,200
Corn, bush	5,537,200	7,054,600	13,939,900
Barley, bush	166,100	174,800	142,300
Oats, bush	4,979,200	5,341,400	5,686,500
Rye, bush	80,900	282,600	616,500
Malt, bush	.....	355,300	224,800
Beef, bbls	5,400	7,190	100
Pork, bbls	54,700	14,350	11
Bacon, lbs	559,300	1,258,100	.....
Butter, lbs	26,100	52,400	42,100
Lard, lbs	1,451,600	1,750,400	58,100
Cheese, lbs	49,100	2,482,800	465,400
Wool	233,600	341,900	191,300

Illinois Central Railroad.

The statement of this Company for the month ending Aug. 31, 1866, is as follows:

LAND DEPARTMENT.

Acres Construction Lands Sold	9,385.97 for	$159,729 60
Acres Int. Fund Lands sold	400.00 for	5,288 60
Acres Free Lands sold	726.90 for	9,314 06
Total sales during month of Aug., 1866	10,512.87 for	$120,332 26
To which add Town Lot Sales		640 00
Total of all		$120,972 26
Cash collected in Aug.		$193,848 36

TRAFFIC DEPARTMENT.

Receipts from	Passengers	$153,288 74
do.	Freight	327,427 00
do.	Mails	6,358 33
do.	Rent of Road	4,000 00
do.	Other Sources	50,000 00
Total Receipts in Aug., 1866		$586,074 07
Total Receipts in Aug., 1865		$661,190 07

Journal of Railroad Law.

LIABILITY OF COMMON CARRIER.—WHEN LIABILITY CEASES.

The case of Marshall *vs.* N. Y. Central Railroad Company, lately decided in the Supreme Court, Rochester, is an important exposition of the law of common carriers. The facts are sufficiently stated in the opinion of the court, which was written by

E. Darwin Smith, J.—The questions presented for our decision in this case arise upon exceptions taken during the progress of the trial, and to the charge of the Circuit Judge in submitting the course to the jury.

The first exception taken was to the decision of the Circuit Judge in overruling the question put to the witness Garvin, one of the defendant's agents, asking him if he had any authority from the company to make a contract to ship freight at any particular time or specific time. I do not think this exception well taken. If the plaintiff's right of recovery rested upon an express contract, that contract was not made by this witness, but with Wemple, the general freight agent of the defendants. The plaintiff's agent Norton showed to the witness a letter from Wemple, directed to said agent, saying that he was at liberty to ship apples from any station on the line of the defendants' railroad subject to changes, if consigned to the Swiftsure line, Albany. Norton showed this letter to Garvin, who was a mere subordinate agent of the defendants', and he said he would ship the apples as requested. This was no bargain by Garvin and could not have been so understood or considered. It was merely a recognition of the authority of Wemple to direct on the subject, and an assent on his part to comply with the instructions thus given by Wemple. It was of no kind of consequence what authority Garvin had in fact. He made no bargain. He merely undertook to fulfill the instructions of his superiors.

Another exception is to the exclusion of evidence offered to show large accumulation of freight at Batavia and Lockport in the month of November 1860. This evidence was merely cumulative. I can see no objection to it otherwise. A large amount of evidence to the same effect was given, and the fact sought to be established by such proof was abundantly established by the defendants, so that I can not see that they were, or could not be, in any way injured by the exclusion of this testimony.

The exceptions to the refusal of the judge to non-suit the plaintiff are, I think, not well taken. The case, when the plaintiff rested, was clearly one for the jury. The same points then made were subsequently raised upon exceptions to the charge, and will be considered in that connection.

The first exception to the charge presented on the argument was that the judge erred in charging the jury that preference was to be given to perishable property. The proposition in the charge excepted to is as follows: "Where two kinds of property are delivered at the same time by different owners, one of which kind is perishable and the other not, preference is to be given to that which is perishable in transportation, and if either must wait, it must be that which is not perishable."

I do not see in the evidence any particular occasion for the statement of such a proposition. It seems to me that was a mere abstract remark not essential to the case, and one which could not have done any injury if erroneous. But I am not prepared to say that it was erroneous. It merely affirms as most reasonable, what the defendants proved to have been the practice of the agents of the company. A witness for the defendants (Gates,) the clerk of the superintendent of the western division of the defendants' railroad, testified that there was a greater demand for cars during the month of November, 1860, than there ever had been at any previous month, and that "Mr. Collamer (the superintendent,) made it a rule to give perishable property a preference if possible."

This, it seems to me, was a very rational rule, and as the duty of the defendants rested upon the ground of reasonable diligence in the transportation of property, and their liability for loss and injury resulting from delay in the transmission of property, could only be practiced upon proof and a finding that they neglected to transport such property within a reasonable time after its receipt.

The question how the carrier was employed, and how he used and employed his means of transportation, during any given period when property was delayed, would always be a proper subject of inquiry, and that on this inquiry proof that his means of transportation were employed in transporting perishable property in preference to other property received at the same time, would always be held a sufficient excuse for delay. The judge so states the rule. The preference as he states it, is between property received at the *same time*. If the carrier in such case cannot carry all the property received, it seems to me that he may give preference to the perishable property over that not perishable, and that the giving of such preference cannot be a matter of complaint, but rather would be a matter of duty on his part, in such a case. I therefore do not think that this exception should be allowed.

The remaining exception urged upon us on the argument, relates to the rule of damages adopted at the circuit. The plaintiff was allowed, under objection and exceptions, to show what the value of the apples in question was when they were received in New York, frozen, &c., and what it

would have been if they had not been injured by frost at the time of their receipt by the plaintiff in that city. I have had some difficulty with these exceptions. The defendants were carriers from Buffalo to Albany. Their railroad ends at Albany, and they do not seem to have made any contract, or to have incurred any duty that is established in the case, other than to transport these apples to Albany and there deliver them to the Swiftsure line, the consignee named and designated by the plaintiffs. Their duty ended when they had duly delivered the property to the plaintiff's consignee at Albany, and such delivery was equivalent to a delivery to the plaintiff at that place. When a carrier has received property for transportation, if he is liable for any loss or injury resulting from delay in its transportation or otherwise, while in his possession, such damages are to be appraised or fixed at the place of destination of such property. And the place of destination, in this sense, must, I think, in the absence of any express contract to deliver at a particular place, be where the route of the carrier ends. But this property was purchased for the New York market, and this was known to the defendants. It was delivered by them to the Swiftsure line at Albany to be forwarded to New York, and was immediately forwarded to that city, and within a few days was received there by the plaintiff, they paying the freight from Albany. The barrels were then opened and examined, and the condition of the apples and the injury to them from frost fully ascertained. Such injury could not fully have been determined at an earlier period. These facts all appeared at the trial. The question then is, assuming that the damages should have been assessed at the value, or depreciation of the apples at Albany, whether proof of such value or depreciation in the New York Market was inadmissible and error. I think it was not, and that it was an element or species of evidence on the question of damages, and probably the best the case afforded. It furnished a pretty clear and satisfactory basis upon which the jury could estimate the damages of the plaintiff at Albany. If there was any difference of value between the two places, or the property was injured or depreciated after it left Albany, the defendants might have proved it. There is not in the case any proof of the kind, nor any suggestion to that effect; and for ought I can see in the case, I think it would have been entirely proper for the Circuit Judge to have instructed the jury that they might find the value of these apples to be their value, as proved in New York, deducting the freight on them from Albany to New York, and make any other allowance which they thought proper for the difference in value between the two places. This would be a fair method of estimating their value, and I can not see why it would not be a proper mode or rule for estimating damage in all such cases, (Vide Wemple *vs.* Stewart, 22 Barb. 154; 5 Denio, 56; 8 Wend, 435.) I think no exception could have lain to such a direction; and as it does not appear what was the precise direction of the Circuit Judge on this question of damages, and no error is alleged in respect to such instruction, I think we must assume that it was entirely satisfactory to both parties, on this subject. And in this view, and upon this ground, also, I think these exceptions may be and should be overruled.

If my brothers concur in these views, the judgment should be affirmed.

Imports of Dry Goods.

The imports of foreign dry goods at New York for the month of August, were:

ENTERED FOR CONSUMPTION.

	1865.	1866.
Manufactures of wool ...	$5,233,946	$3,983,436

☞ The New Orleans *Picayune* says city railroads are found to be of great advantage, in view of the fact that they increase the value of city property. The augmented demand for residences in all portions of the city convenient to the established railroad lines, proves this fact beyond all cavil.

The China Mail Line.

We understand that the Pacific Mail Steamship Company, to whom Government awarded the contract for carrying the mails between San Francisco and Hong Kong *via* Kanagawa, have lately added to their line the fine new steamship *Rising Star*, and that they have on the stocks, in this City, two more steamers of greater tonnage than any vessels belonging to the company. The first steamer (the *Colorado*) will be dispatched from San Francisco in January next, and be followed by the *Montana*, now on the way from this port to California. The establishment of this line, in connection with the British line recently established between New Zealand and Panama, it is expected will create a new era in the commerce of the Pacific. The Australasian trade will be controlled by the British line, but as an offset to this, we shall have the vastly greater and richer traffic of China and Japan. The inhabitants of the Colonies, including Australia, are few in number compared with those who will be brought into direct commercial intercourse with us by means of our steamship line across that ocean. Many of the most valuable commodities which the world affords are produced by the people who dwell upon the borders of the China sea. The silk, tea, and cotton which seek a market from that densely populated region, make it certain that this country will come into possession of a great trade from beyond the Pacific, as soon as the mail steamship line commences its work. Steam to China will cause our country to realize more forcibly than ever the necessity of a Pacific railroad. That the construction of this great thoroughfare will be hastened by the increase of trade which will be offered by means of a steamship line from the Pacific coast to China, at once appears evident.

Not only is the commerce between China and Japan and our Pacific possessions expected to be greatly enlarged, but a large passenger traffic is confidently looked for. A few years ago, China furnished no passengers. Now large numbers travel to and fro by sail, and it is estimated that at least 5,000 Chinese will travel each way by the steamers. Restrictions upon travel have already been removed by the Japanese authorities, and the time may not be far distant when that curious and inquisitive people, availing themselves of their newly granted privileges, will travel extensively, and their patronage in this way may become of great importance to California.

An extract from an official copy of the convention completed June 20, between the United States, France, Holland, and Japan, gives the duties on certain articles of import as follows:—Candles, two boos, twenty-five cents; hides, one boo, eighty-cents per one hundred cattles; quicksilver, six boos per one hundred cattles; salt fish, seventy five cents per one hundred cattles; grain, flour, and meal, duty free. The export of flour and wheat is prohibited. Tea pays an export duty of three boos, fifty cents per one hundred cattles; rags, twelve cents; cotton two boos, twenty-five cents. Duty on the sale of steamers to the Japanese, three boos per ton, and on sailing vessels, one boo per ton. The bonded warehouse regulations are on a liberal scale, and the charges are moderate.—*Shipping List*

☞ The sale of the St. Louis and Iron Mountain railroad by Commissioners will take place on the 27th of September, inst., and that of the Cairo and Fulton railroad on the 1st of October prox. The Commissioners now invite proposals in writing for the purchase of said railroads, lands, rolling stock and appurtenances, in case they should buy in the same at the sale thereof as advertised by the Governor of Missouri to take place on the days above mentioned.

☞ The double track of the Western (Mass.) Railroad has been completed to Westfield, and next season it will be built to Washington. This will give a double track from Albany to Worcester

Grain Trade of Buffalo and Oswego.

The following is a comparative statement of the shipments of flour, wheat, corn and oats by canal from Buffalo and Oswego, from May 1, to August 31, 1865 and 1866:

1865.	Flour.	Wheat.	Corn.	Oats.
Buffalo ..	85,018	4,952,088	8,714,323	4,845,112
Oswego...	109,288	1,208,332	917,655	151,939
Total	194,306	6,160,420	9,631,978	4,997,051
1866.				
Buffalo ..	15,671	2,132,314	15,941,185	6,055,227
Oswego...	40,945	884,907	2,116,343	283,342
Total	56,616	3,017,221	18,057,528	6,338,569
Loss.....	137,690	3,143,199		
Gain.....			8,425,550	1,341,518

Delhi Railway.

The sum of £207,000 has been paid up to this date to the credit of the Secretary of State for India on account of the call of £3 per share recently made including payments in anticipation.

☞ At an auction sale in Richmond, last week, James River and Kanawha stock sold at $6@$7 per share; Virginia and Tennessee Railroad 6 per cent. coupon bonds at $60; and Virginia 6 per cent. registered stock, old and new, at $42.30; Richmond, Fredericksburg and Potomac Railroad 6 per cent. registered bonds, $82 50; do., 7 per cent. bonds, $87 50; Richmond City bonds, $81 50; Virginia Central Railroad 6 per cent. coupon bonds, $62 50; Richmond and Danville Railroad 6 per cent. registered bonds, $71; do., coupon bonds, $72 50@$73.

☞ The proposition to turn over all the stock held by the corporation of Pensacola in the Alabama and Florida Railroad to a Boston house, as a bonus for an advance of money to complete the railroad in the course of three months, was ratified by the freeholders of that city on the 23d ult., by a vote of 67 to 15.

☞ The St. Paul and Pacific Railroad has been completed to St. Cloud, the utmost northerly limit of railroad trade in the United States thus far. There is now direct railroad communication between St. Cloud and Winona.

CARS FOR SALE,

TWO Superior full 60 Passenger Saloon Coaches, framed with 6 longitudinal sills. Also,

Three ¾ or 40 Passenger Coaches, of light and strong construction, all with Dome Roofs, and of first class finish, ready for delivery at short notice.

GRICE & LONG'S

37tf **Car Works, Trenton, N. J.**

OFFICE TENN. & PACIFIC R. R. COMPANY, No. 25 UNION STREET, NASHVILLE, August 28, 1866

PROPOSALS WILL BE RECEIVED FOR A Preliminary Survey, with instruments, of that portion of the Road, which is between the Cities of Nashville and Knoxville, Tennessee. The Road must be surveyed on lines, and the report must embrace all necessary information in regard to the character of the country, its resources, the distances intervening, grades and obstructions, the cost of construction, and be accompanied by plans and profile views of the several routes, necessary to letting out the work.

Engineers must state the sum for which the work will be completed, and Proposals must be filed at this Office by the 1st of October.

J. D. B. DEBOW, President.
JOHN KIRKMAN, Chairman Executive Committee.

CIVIL AND MINING ENGINEERING,

AT THE RENSSELAER POLYTECHNIC INSTITUTE, Troy, N.Y.

The next Annual Session begins SEPT. 12th. For the new ANNUAL REGISTER, containing full information, apply to

3131 Prof. CHARLES DROWNE, Director, Troy, N. Y.

FIRST MORTGAGE BONDS

OF THE

Central Pacific Railroad Company,

OF CALIFORNIA.

Interest at the rate of Six per Cent. per Annum, payable Semi-Annually.

Principal and Interest payable in U. S. Gold Coin in the City of New York.

Amount of Issue, $7,336,000.

IN COUPON BONDS OF $1,000 EACH.

The Bonds have Thirty Years to run, and are secured by a First Mortgage, constituting an absolute prior lien on that portion of the Road, Equipments, Franchises, and Entire Property of the Central Pacific Railroad Company, located in the State of California, and extending from Sacramento City to the California State Line, forming a part of the GREAT PACIFIC RAILROAD ROUTE, adopted and aided by the UNITED STATES GOVERNMENT.

The amount of these First Mortgage Bonds to be issued per mile is limited by law to the amount of United States Bonds allowed and issued to aid the construction of the Road, and the Mortgage by which they are secured is *declared by Act of Congress to constitute a lien prior and superior to that of the United States Government.*

The aid received from the Government (in amount equal to this First Mortgage) is economically and judiciously applied to the construction and equipment of the Road, together with nearly $7,000,000, received from Stock Subscriptions and other sources. The First Mortgage therefore amounts to but about 35 per cent. of the actual cost and value of the Property which it covers.

The road is now completed, equipped and running from Sacramento City to Alta, a distance of 73 miles, and the earnings for the three months ending August 1st were as follows, viz.:

May, 1866	$65,115 83
June "	67,429 78
July "	85,000 00

IN GOLD.

The earnings are steadily increasing, and are estimated at over $100,000 in Gold for the month of August—the official report for that month not having been received at this date.

The construction of the road is going vigorously forward, and it will probably be in full operation to the California State Line—156 miles from Sacramento City—during the summer of 1867, when its earnings must be very large, as the entire trade of Nevada, and a large proportion of that of Utah, Idaho and Montana must pass over its line. It has been shown by reliable statistics that in 1863 over $13,000,000 in Gold was paid for freighting goods from California to Nevada alone.

This part of the Great Pacific Railroad Route is destined to be one of the most profitable lines of railroad in the world, and its First Mortgage Bonds are among the best secured and most desirable investments ever offered.

Over $1,000,000 has already been expended in grading beyond the point to which the road is now running, and the iron is bought and paid for sufficient to lay the track the entire distance to the State Line.

The Road has been completed and equipped thus far without the sale of a single dollar of its First Mortgage Bonds, and they are now offered to the public for the first time, after the earnings of the Road have reached the sum of $100,000 per month in Gold, only about 25 per cent. of which is required for operating expenses.

The interest is payable on the first days of January and July, at our office in the city of New York.

The Bonds are offered at 95, and accrued interest from July 1st, in Currency. Orders may be forwarded to us direct, or through the principal Banks or Bankers in all parts of the country.

Remittances may be made in drafts on New York, or in Legal Tender Notes, National Bank Notes, or other funds current in this city, and the Bonds will be forwarded to any address by Express, free of charge. Inquiries for further particulars, by mail or otherwise, will receive punctual attention.

FISK & HATCH, Bankers,

No. 5 Nassau St., New York.

N. B.—All kinds of Government Securities received at the full market price in exchange for the above Bonds.

American Railroad Journal.

New York, Saturday, September 22, 1866.

Boston and Maine Railroad.

The annual meeting of the stockholders of this company was held at Andover, Mass., on the 12th inst. Three tickets were presented, one the "Regular ticket," bearing the names of Francis Cogswell of Andover, Peter T. Homer of Boston, Nathaniel G. White of Lawrence, E. J. M. Hale of Haverhill, Geo. C. Lord of Boston, Amos Paul of South Newmarket, N. H., and John E. Bickford of Dover, N. H., (the first four gentlemen named being present Directors). Another ticket, known as the "Stockholders' ticket," comprised the names of Daniel M. Christie of Dover, N. H., George W. Kittredge of Newmarket, N. H., Samuel Wells of Boston, Benjamin F. Stevens of Boston, Joseph F. Greenough of Boston, John L. Taylor of Andover, and Moses T. Stevens of North Andover (the first three named being members of the present board). The third ticket was headed "No officers of other roads for Directors," and was precisely like the "Stockholders' ticket," with the exception of T. C. Cogswell's name for that of Samuel Wells.

The Annual Report of the directors, for the fiscal year ending May 31, 1866, an abstract of which has already been published in the JOURNAL, was presented and accepted without debate and without reading.

A committee of seven was then appointed to collect and count ballots for a board of directors, which resulted in the choice of the following gentlemen: Francis Cogswell, of Andover; Peter T. Homer, of Boston; Nathaniel G. White, of Lawrence; E. J. M. Hale, of Haverhill; Amos Paul, of South Newmarket, N. H.; George C. Lord, of Boston; John E. Bickford, of Dover, N. H.

The meeting, which was harmonious throughout, was then dissolved.

Important to the Iron Interests of the United States.

The United States consul at Sheffield, England, under date of August 27, in a communication to the Secretary of the Treasury, states that he was present at Nottingham on the reading of a paper before the British Association on the conversion of melted cast iron into steel by the pneumatic process. A discussion followed, which was participated in by Mr. Bessemer and other gentlemen. Consul Abbot further says that he called the attention of Mr. Bessemer to what has been stated by his opponent to be a defect in his mode of converting iron into steel, namely, that when large masses of melted iron, amounting to from three to twelve tons, are converted into steel, it does not become homogeneous.

Mr. Bessemer partly admitted the force of the objection, but stated that in the works near London an improvement has recently been made by which, after the introduction of the Spiegel Eisen, the whole is stirred up by arms fitted to a revolving cylinder. He also stated that the iron of the United States which he has seen was peculiarly adapted to the manufacture of steel by his process. In England only the very best iron can be used for this purpose, and that which is most free from foreign substances, especially sulphur and phosphorus. The iron which is chiefly used in the Bessemer Works are varieties of red hematite, the best of which is found on Morecambe Bay, near Furness Abbey. Consul Abbot closes by saying: "Valuable as is the invention of Mr. Bessemer, I cannot recommend it to American manufacturers unless they make use, in the process, of the very best pig iron, and that which is comparatively free from sulphur, phosphorus and other impurities."

The following is an abstract of the remarks of Mr. Bessemer, alluded to in the communication of Consul Abbot: Before the introduction of his process the entire production of steel in Great Britain was one thousand tons per week, and now there was machinery for the production, on his process alone, of five thousand tons in the same period. One of the most valuable purposes to which his steel was applied was the construction of locomotive engines and rails. Where iron had been worn out in a few months, steel rails had been in constant use for four years, at the end of which time the first side was still in use. At Camden town there was a portion of railway over which an immense amount of traffic passed. An iron rail and a Bessemer steel rail were placed opposite each other, and when the iron rail had been changed seventeen times the steel rail was still not worn.

The Bessemer steel was also valuable for the manufacture of tires, the construction of ordnance, shafts for marine engines, cranks and notably for the cranks of locomotives; indeed there was scarcely any purpose for which malleable iron was formerly used that steel could not now be employed. A yard of the Camden town rail, to which he had referred, was sent to Sheffield to be made into round bars, and came out of the rolling mill in beautiful black bars, three-eighths, five-eighths, and three-quarter inches in diameter, and were not worth less than £18 per ton, the cost of conversion being less than £2 per ton. In regard to the price of steel, Mr. Bessemer said that firms that had expended immense sums in plans and machinery desired at first as large a return as possible for their outlay, but when manufacturers had been remunerated for their first large outlay they would be more reasonable in their demands.

The price of cast steel in Sheffield for the lowest purposes, such as making shovels, Mr. Bessemer said was £36 to £40 per ton, and the better kinds cost from £50 to £80, according to the reputation of the maker; but at this time thousands of tons were being sold at £13 per ton.

Ohio and Mississippi Railroad.

The trustees of the Ohio and Mississippi Railway company closed their books on the 25th inst., preparatory to a sale of the road (Eastern division) on the 29th, in conformity with a decree of the Circuit Court of the United States for the districts of Ohio and Indiana. The sale in question will be merely a formal transfer of the line and its equipments to the stockholders, and there-

upon the present preferred and common certificates will be converted into shares.

Louisville and Frankfort and Lexington and Frankfort Railroads.

The receipts from the joint operations of these roads during the fiscal years ending June 30, 1865 and 1866, have been as follows:

	1864–'65.	1865–'66.
From passengers	$287,091 54	$354,422 21
" Governm't troops.	87,894 05	20,069 95
" freights	150,919 28	151,191 41
" Governm'nt stores	53,826 84	14,116 26
" mail	9,400 00	9,400 00
" express	10,383 15	11,338 88
" telegraph	1,832 92	1,036 45
" miscellaneous	8,177 55	1,226 53
	$609,525 33	$562,801 69
Expenses, viz:		
Conducting transportation.	$66,349 38	
Motive power	104,618 38	
Maintenance of way	157,169 47	
" cars	52,584 76	
General expenses	22,974 15	
	$403,696 14	
Less decrease of materials	10,109 24	
	393,586 90	
Net operating receipts	$169,214 79	
Improvement account	$38,745 90	
Louisville & Cin. Br. R. R.	13,326 49	
	52,072 39	
Balance paid to individual companies.	$117,142 40	

Compared with the previous year, the gross receipts of 1865–'66 show a decrease of $46,723 64, with a decrease in expense of $17,599 66.

The gross and net earnings and expenses of the joint roads for the past seven years, have been as follows:

	Gross Earnings.	Operating Expenses.	Net Earnings.
1859–'60	$390,377	$211,234	$179,148
1860–'61	354,855	212,907	141,948
1861–'62	258,237	169,022	89,215
1862–'63	322,229	188,272	133,957
1863–'64	439,340	234,609	204,731
1864–'65	609,525	411,186	198,339
1865–'66	562,802	393,587	169,215

Lexington and Frankfort Railroad.

The proportion of gross and net earnings and expenses applicable to this road is as follows:

	1864–'65.	1865–'66.
Gross earnings	$188,468 22	$174,048 66
Operating expenses.	124,689 52	127,341 52
Net earnings.	$63,778 70	$46,707 14

The receipts from all sources during the year, including $30,385 62 from previous year, were $204,475; and the expenditures were:

Transportation expenses, as above	$127,341 52
Improvement account	11,953 52
Louisville and Cincinnati Branch R.R.	4,111 87
Interest account	4,640 07
Cash dividends on Lexington City scrip	45 41
Dividends, 7 per cent.	37,915 90
Sinking fund	10,000 00
Credit of profit and loss account.	8,467 21
	$204,475 00

This company's proportion of the joint expenditures, was $148,091 89; which, deducted from the gross earnings, leaves a balance of only $25,956 77. The report says:

This sum has been insufficient to pay the dividends declared during the year; and the deficiency was also further increased by the annual appropriation to the sinking fund. For these purposes there was required the sum of $47,915 90.

The balance to the credit of profit and loss on the first of July, 1865, was $30,385 62; to which add the surplus cash on settlement of the former Treasurer's account, $40 72, making $30,426 34. On the first of present month the balance to the credit of same account was $8,467 21, and the difference, amounting to $21,959 31, when added to the profits of the past year, as shown above, will be found to represent exactly the amount declared in dividends and appropriated to the sinking fund.

It should be observed, however, that no additions have been made to the construction account during the year.

The purchase of additional depot grounds at Louisville involved an expenditure on your account of $9,255 30; for your share of the survey of the Cincinnati Branch, $4,111 87; your share of the improvement account, $11,953 52, making total expenditure of $25,320 19 for extraordinary purposes, or nearly five per cent. on your capital, increasing the present value of your property, but yet paid entirely from the current receipts. When, in addition, we remember that your debt is diminished by the amount appropriated to sinking fund, it will be at once seen that, notwithstanding the large diminution in the balance to the credit of profit and loss, the actual value of your assets is still greater than at the date of our last report.

I invite the particular attention of the stockholders to the reports of the chairman of the Executive Committee, Superintendent and Chief Engineer, for full information on the subject of the Cincinnati Branch.

The importance of that enterprise cannot be overestimated. The fact should always be borne in mind that the undertaking will be a joint one, and that its profits will inure to the benefit of the individual companies in the same proportion in which they now divide the profits of the present roads. In other words, the Lexington and Frankfort Railroad Company will be entitled to receive 30.45 per cent. and the Louisville and Frankfort Railroad Company 69.15 per cent. of the net profits of all the lines, including the branch. If the estimates of these officers are reasonably correct, the construction of the branch road will double the value of your stock.

The following statement will show the cost, earnings, expenses and net earnings of this road for the seven years ending June 30:

	Cost.	Earnings.	Expenses.	Net.
1860	$642,702	$120,824	$66,051	$54,273
1861	643,421	108,944	65,677	43,267
1862	649,089	78,985	52,191	26,974
1863	650,250	99,320	45,965	53,355
1864	652,275	135,987	73,505	62,482
1865	657,598	188,463	124,689	63,774
1866	657,598	174,049	127,342	46,707

Balance Sheet, July 1.

Operating expenses	279,730 78	280,268 18
Net earnings	$139,816 84	$108,903 18

The receipts from all sources during the year, including $49,141 96 from previous year, were $461,046 57; and the disbursements were:

Transportation expenses, as above	$280,268 18
Interest account	1,202 31
" on railroad bonds	8,070 00
" on city of Louisville b'ds	6,210 00
Tax account—National	3,309 59
" State and Municipal	4,646 96
Dividends, 5 per cent.	56,665 35
Redemption of railroad bonds	31,000 00
Real estate purchased	21,187 70
Bank of America	2,909 00
Improvement account	26,792 38
Louisville and Cincinnati Branch R.R.	9,215 12
Cash on hand	9,619 98
	$461,046 57

Two dividends, one of three and one of two per cent., have been declared; $26,792 38 have been expended in ballasting, and in erecting substantial and commodious brick station buildings at Midway, to replace one destroyed by guerrillas, and at Christiansburg and Hobbs', demanded by the increasing business of the companies, and where none had previously been erected; $9,215 12 have also been paid toward surveys of the Cincinnati Branch.

The real estate on Jefferson Street, east of Floyd, has been sold for $25,472 96, part in cash and the balance in notes, which are represented in bills receivable on your general balance sheet. We have expended also $20,745 in the purchase of grounds at the head of Jefferson Street, where, at some future time, it may become necessary to remove the shops, and possibly the depot. Should the Cincinnati Branch be completed, these grounds will come into immediate use for those purposes. $31,000 of your debt, maturing July 1, 1866, and January 1, 1867, have been retired.

The following statement will show the cost, earnings, expenses and net earnings of this road for the years ending June 30—

	Cost.	Earnings.	Expenses.	Net.
1860	$1,502,095	$270,053	$145,183	$124,870
1861	1,510,261	245,911	147,231	98,680
1862	1,522,964	179,252	116,839	62,421
1863	1,525,567	222,909	102,887	120,064
1864	1,530,223	303,353	161,104	142,249
1865	1,532,645	419,548	279,731	139,817
1866	1,532,645	389,171	280,268	108,903

The equipment of the entire line consists of: 14

locomotives, 18 passenger, 5 baggage, and 220 freight, stock, platform, etc., cars. Total mileage of engines, 239,626. Tons of freight carried 50,626; do., carried one mile 2,590,909. Passengers carried 342,515. Total mileage of passengers, 8,799,872.

☞ The sum of $2,500,000 has been subscribed in Pittsburgh and vicinity for the completion of the Allegheny Valley Railroad to Oil City. It is expected the road will be completed, and the cars running by July, 1867.

Long Island Railroad.

This road is 94 miles in length, extending from Hunter's Point to Greenport, L. I. It has about 10 miles of second track and sidings, and 18 miles of branch roads.

The equipment of the road consists of 17 locomotives, 37 passenger, 6 baggage, mail and express, and 146 freight cars. The weight of rail per yard on main track is 50 to 56 lbs.

The following is comparative statement of the receipts and expenditures of this company for the fiscal years ending September 30, 1864, and 1865:

Receipts:	1864.	1865.
From passengers	$317,191 50	$375,616 60
" freight	164,593 94	200,150 80

The number of miles run by passenger trains in 1865, was 226,625; by freight trains 139,694—total 366,319, against 290,474 in 1864, an increase of 75,845. Number of passengers carried in 1865, 760,020; do., carried one mile, 18,820,362. In 1864, the number carried was 505,758, and the mileage of do., 12,129,923—an increase in passengers carried of 255,162, and in mileage of 6,690,439. Tons of freight carried in 1865, 154,072; mileage of do., 4,647,615. In 1864, the tonnage was 128,395, and the mileage, 3,718,092 an increase in tonnage of 25,677, and in mileage of 929,523.

Cleveland, Painesville and Ashtabula R.R.

This road is 95½ miles in length, extending from Cleveland, Ohio, to Erie, Penn., where it connects with the Erie and North East and Buffalo and State Line Railroads. It has 15¼ miles of double track, and 18¼ miles of sidings; also 1 mile of branch road partly graded. The gauge of the road is 4 ft. 10 in. Weight of rail per yard 57 lbs. The equipment consists of 36 locomotives, 26 passenger, 12 baggage, mail and express, 871 freight and stock, and 110 coal cars.

The receipts from operations of this road for the fiscal years ending October 31, 1864 and 1865, have been as follows:

	1864.	1865.
From passengers	$834,254 85	$1,069,323 88
" freight	1,283,994 14	1,125,502 72

Albany and Susquehanna Railroad.

The following gentlemen have been elected directors of this road for the ensuing year. Joseph H. Ramsay, Albany; Peter Cagger, Albany Charles Courter, Cobbleskill; Charles Goodyear, Schoharie C. H.; John Westover, Richmondville John Cook, Worcester; Jared Goodyear, Colliersville; Eliakim R. Ford, Oneonta; Samuel R. Follett, Otego; Arnold B. Watson, Unadilla; Lewis Northup, Central Village; Alonzo Everts, Binghamton; Daniel Drew, New York. At a subsequent meeting of the directors, Joseph H. Ramsey, Esq., was re-elected President and Charles Courter, Vice President.

☞ The great iron ferry boat, constructed to ply between Detroit, Mich., and Windsor, Canada, to connect the trains of the Gt. Western Railway of Canada with those of the Michigan Central Railroad, has just been launched. She is 1,800 tons burthen, and is the largest vessel now plying upon the lakes or rivers of the Northwest. Upon the two tracks running the length of the vessel 14 cars can be placed. A slip is being built for her use at the depot dock of the Michigan Central railroad, Detroit, and a similar one will be completed at the terminus of the Great Western railway, on the Canada side.

Journal of Railroad Law.

NEGLIGENCE OF COMMON CARRIER.—MEASURE OF DAMAGES.

The case of Black *vs.* The Camden and Amboy Railroad Company, lately decided by the Supreme Court of this State, lays down the doctrine that in an action against a common carrier for injuries sustained by a lot of cattle received for transportation, through the negligence of the carrier, the rule of damages is the difference in value between the cattle when placed in the carrier's charge and their condition when delivered, so far as caused by injuries by the way.

The action was to recover damages on a lot of cattle, 84 in number, delivered to the defendants to be carried from Philadelphia to New York, which it is alleged were injured by the negligence of the employees of the defendants. The jury found a verdict in favor of the plaintiff, for $906 22. A new trial was asked for by the defendants, on various exceptions taken during the trial, and to the Judge's charge and on an appeal from an order of the Judge denying a motion for a new trial on the facts.

The following opinion was delivered by

INGRAHAM, P. J.—The first exception taken was to the admission of evidence of the weight of a lot of cattle weighed for the plaintiff, which numbered 99, at Union Drove Yards. Although at the time the deposition was read there was no evidence to show that it was the same lot of cattle delivered by the plaintiff, there was afterwards evidence in the case sufficient to warrant submitting the evidence to the jury. It is no error to admit testimony irrelevant at the time, if it is afterwards made pertinent by other testimony. But even if it was irrelevant it could not have affected the defendants' interests. The question was not one in which the weight of the cattle was material, and if error was committed it was one which could do no harm to the defendants.

2. An objection was made to the fourth interrogatory, and the answer there, as admitting a copy and not the original. The answer is a very simple one, viz: that the original was in a book kept at the scale where the cattle were weighed, which was out of the jurisdiction of the Courts and over which the Court had no power. The original could not have been annexed to the commission, and the Court could not compel its production. In such a case a copy proved to be such is admissible.

3. The next objection is to a question put to a witness, and the fourth objection is to the admission of a part of the answer, on the ground that the question is leading. Whether or not a leading question may be put to a witness is a matter of discretion with the Judge at the trial, and the allowance of a leading question has ceased to be considered a matter to be reviewed on appeal.

5. The next objection is to the admission of remonstrances to the men who had charge of the cattle that they were improperly stowed. These were made to the employees of the defendants. They were admissible to show that the attention of those in charge was called to the difficulty. What weight was to be attached to it belonged to the jury.

The seventh objection was of the same nature as the third, and not to be reviewed on appeal.

From the seventh to the twelfth objections inclusive, the exception is to showing when the market day was, because the defendants did not contract to deliver for any market day. Irrespective of that objection the evidence was admissible to show that the defendants were compelled by the injuries to the cattle to keep them on hand. It might have been said that by a few days delay they could recover from the injury, and they could not have been sold before. This proof would have been admissible on the question of damages. The exceptions from the twelfth to the seventeenth, inclusive, relate to applications to employees for more room for the cattle, and complaints as to the mode of carriage. I have already noticed the objection. There was no error in the admission of these questions. Where a corporation is a party, it can only act by agents and employees; and persons appointed on behalf of the company, to do any particular part of the work, are the proper persons to whom such communications should be made.

The question as to damages were not objectionable. The rule was the difference in value between the cattle when placed in the charge of the defendants and their condition when delivered, so far as caused by injuries on the way. The evidence was admissible. It was for the Judge in his charge to tell the jury how far it could be used for that purpose.

In regard to the motion to dismiss the complaint, and the Judge's charge, there is no ground for objection as to the submission to the jury of the questions involving the plaintiff's right to recover. The evidence was ample for that purpose. The charge was not objected to, excepting on one point, to be noticed hereafter. The facts were fairly left to the jury where the decision belonged.

An objection was made to the instruction of the Judge as to the allowance of interest. The charge was, "If you come to the conclusion that the defendants were liable for some damage, you will add to the amount of damage for which you think them liable, and add for the purpose of indemnifying the plaintiff, interest, from April, 1860, to the present time. That will be the amount of your verdict, if you find for the plaintiff at all."

It has for a long time been a controverted question whether in actions of tort interest could be given as a matter of right, in addition to the damages. In Dana *vs.* Fiedler, (2 Kern., 42,) it was held that in an action for damages on a breach of a contract the plaintiff was entitled to interest on the damages awarded for the breach from that time until the trial. So in actions of trespass for taking the plaintiff's property. (1 John, 136; 1 Baldwin, 138.) And in trover (4 Cowen, 585, 7 Wend., 354,) the plaintiff has been considered as entitled to interest on the value of the property taken or converted from the time of conversion, but this rule has not, as far as I am aware of, been applied to other classes of torts, where there was no property taken or converted, and where the question was one of damages purely, unliquidated and to be assessed by a jury. The rule in such cases has been to leave the question to the jury not only as to the amount of damages, but as to the question of interest. This rule was recognized in Walrath *vs.* Redfield, (18 N. Y., Rep., 462.) SELDEN, J., says: "The jury were not instructed to allow interest, but its allowance was submitted to their discretion. There was no error in this. In general, in actions *ex delicto*, it is in the discretion of the jury whether to allow interest by way of damages or not." This was so held in an action against a carrier. (Richmond *vs.* Bronson, 5 Denio, 55, Lakeman *vs.* Grinnell, 5 Bosw., 625.)

I think this is a true rule, and where a jury are instructed in a case of negligence to award the damages the plaintiff has sustained, the Court may leave to them to say whether on such damages the plaintiff is entitled to interest; but it is erroneous to instruct them, as matter of law, that the plaintiff is entitled to recover interest on the damages.

For this reason I think a new trial should be awarded.

New trial granted.

Western and Atlantic Railroad.

The railroad from Atlanta, Georgia, to Chattanooga, Tennessee—with the exception of a few miles below Marietta—has been put in thorough running order; several miles of new track have been laid; new depots, new machine shops, round house; many new and substantial bridges have been built; engines and cars have been renovated, and everything along the road put in perfect order.

☞ At a meeting of the stockholders of the Union Pacific Railroad, (Eastern Division,) at Pittsburgh on the 7th inst., contracts were entered into for the construction and equipment of the road from Fort Riley to a point 250 miles west of that place, to be completed by Dec. 1, 1867. Six thousand tons of iron were purchased, being enough to iron a distance of 72 miles. The grading and ties are now in readiness for a section of 30 miles west of Fort Riley.

Rome, Watertown and Ogdensburg R. R.

This road is 141.11 miles in length extending from Rome to Ogdensburgh. On the main line there are 16 miles of double track, including sidings. The company also own 48.52 miles of branch roads, viz: from Watertown to Cape Vincent, and from DeKalb Junction to Potsdam Junction, on which there are 3.48 miles of double track. The whole length of road operated at the date of the last report was 189.63 miles. The equipment of the road consists of 26 engines, 23 passenger, 12 baggage, mail and express, and 398 freight cars. The weight of rail per yard is 56 lbs. At Potsdam Junction, a connection is made with the Ogdensburg and Lake Champlain railroad; at Richland, with trains for Oswego; at Rome with trains of the New York Central Railroad, and at Ogdensburgh by ferry with the Grand Trunk and Ottawa and Prescott Railways of Canada.

The following is a comparative statement of the receipts and expenditures for the fiscal years ending September 30, 1864 and 1865:

Receipts:	1864.	1865.
From passengers.....	$414,785 88	$499,100 42

The number of miles run by passenger trains in 1865, was 217,250; by freight trains, 222,002—total 439,252, against 432,370, in 1864 an increase of 6,882. Number of passengers carried in 1865, 410,776; do., carried one mile, 15,713,794. In 1864 the number carried was 343,742, and the mileage of do., 12,298,426—an increase in passengers of 67,034, and in mileage of 3,415,368. Tons of freight carried in 1865, 210,760; mileage of do., 10,841,749. In 1864 the tonnage was 197,865, and the mileage of do., 11,766,254—an increase in tonnage of 12,895 with a decrease in mileage of freight 934,505.

☞ The New Canaan (Conn.) Railroad Company was organized on the 15th. Stamford has already subscribed $40,000 of the $60,000 assigned as the share of that town.

☞ Judge Underwood has granted an injunction against the Orange and Alexandria Railroad Company, prohibiting the carriage of freight on better terms than those contracted with the Adams Express Company. The case was argued before Judge Underwood's Court some months ago.

☞ The entire estimated cost of the Richmond and Newport News Railroad—to be put in running order—is said to be $1,073,610.

Buffalo and Erie Railroad.

This road, forming a part of the "Lake Shore Line" is composed of the *Buffalo and State Line Railroad*, running from Buffalo to the Pennsylvania State Line, a distance of 69.5 miles, and the *Erie and North East Railroad*, thence to Erie, Penn., 18.5 miles—making a total length of 88 miles. The length of double track, including sidings, is 18.5 miles. The weight of rail per yard is from 57 to 60 lbs. The equipment consists of 34 locomotives, 22 1st class, and 7 2d class passenger cars, 8 baggage, mail and express, 697 freight, and 50 dumper cars.

The following is a comparative statement of the receipts and expenditures for the fiscal years ending September 30, 1864 and 1865:

Receipts:	1864.	1865.
From passengers	$790,073 75	$1,208,378 96
" freight	1,140,431 21	1,042,770 85
" mails	13,800 00	13,800 00
" sale of property and rent	1,161 14	1,134 28
Totals	$1,945,466 10	$2,266,084 04
Payments, other than for construction:		
For transportation expenses	$1,176,337 32	$1,578,856 84
For interest	77,526 74	81,140 81
For divid'ds on stock	220,000 00	220,000 00
Construction Erie & Pittsburg R. R.	660,000 00	317,977 50
Internal revenue tax.	56,395 35	88,724 00
Totals	$2,190,259 41	$2,236,699 15

The earnings of the road in the years named were as follows:

	1864.	1865.
From passengers	$790,073 75	$1,208,378 96
" freight	1,140,431 21	1,042,770 85

	1864.	1865.
Capital stock	$2,200,000 00	$2,000,000 00
Funded debt	1,200,000 00	1,200,000 00
Totals	$3,400,000 00	$3,400,000 00

The number of miles run by passenger trains in 1865, was 221,540; by freight trains, 277,948—total, 499,488, against 645,234 in 1864, a decrease of 145,746. Number of passengers carried in 1865, 648,646; do., carried one mile, 41,399,829. In 1864, the number carried was 486,615, and the mileage of do., 30,634,245—an increase in passengers carried, of 162,031, and in mileage of 9,765,584. Tons of freight carried in 1865, 620,329; mileage of do., 31,688,398. In 1864 the tonnage was 685,732, and the mileage of do., 34,620,339—a decrease in tonnage of 65,403, and in mileage of freight, of 2,951,941.

Dighton and Somerset Railroad.

The Dighton and Somerset Branch of the Old Colony and Newport Railroad will be opened for traffic on the 24th inst., when the steamboat trains, to and from Boston and New York *via* Newport, will commence running over it, and the trains upon the Easton Branch be discontinued. It is rumored that a route is to be surveyed for a railroad between Bridgewater and Taunton, with a view to a direct route to New York for the inhabitants of that part of Plymouth County. The movement grows out of the dissatisfaction caused by the transfer of the steamboat train to the Dighton and Somerset Railroad.

Paterson and Newark Railroad.

The Paterson (N. J.) *Guardian* states that the Paterson and Newark Railroad is nearing completion. A meeting of the directors was held in that city a few days since and favorable report of progress was made. Their negotiations with other companies for a connection have met with success. The grading of the road from Newark to Franklin is being prosecuted with vigor, and we are assured that the road can be opened for business between these points by the 1st of January next.

☞ The surveys are completed for the proposed railroad from Baltimore to Aquia Creek thence to connect with the road to Richmond. The shortest time between Baltimore and Richmond by the way of Washington is eleven hours which will be reduced to five hours by the new line.

American Railroad Journal.

Saturday, September 22, 1866.

Stock Exchange and Money Market.

The Money Market is remarkably stable. The supply keeps ahead of the requirements of borrowers, and rates rule steady. Call loans are quoted at 3@4 per cent. to the Government houses, and 4@5 per cent. to other leading stock firms, while strictly prime discounts range at from 5@6 per cent., and good to fair names, at 6½@8 per cent. per annum. Secretary McCulloch has formally announced his intention of liquidating the Clearing House Certificates of deposit, now bearing interest at the rate of four per cent. per annum. The announcement reads thus:

TREASURY DEPARTMENT, Sept. 14, 1866.

Notice is hereby given that the Treasury Department is prepared to redeem Certificates of Temporary Loan, known as "Clearing House Certificates," at the offices from which they were respectively issued; and that on and after the 25th of September, 1866, interest will cease upon fifty per cent. of each certificate, and on and after the 25th of October next, interest will cease on the remainder.

H. MCCULLOCH, Secretary of the Treasury.

Under this notice, disbursements from the Treasury Department will commence next Tuesday, the 25th inst., and will be completed by or about the 25th of October. It is not deemed probable that much of the money thus disbursed will pass into active circulation, as it must continue to be used, as it has hitherto been used, in one form or another, in the exchanges of the banks at the Clearing House. Yet, it is not apprehended that the prevailing ease in money will be disturbed for some time to come. The West is comparatively well provided with the means necessary for the prosecution of the fall trade, and the moving of the crops. Hence, it is not likely to draw heavily on the supply here, which is fully adequate to all the anticipated wants of financial and mercantile borrowers. The reduction of the outstanding volume of legal tender notes progresses on a safe and reliable scale. This cannot adversely influence the market, the smooth working of which is of such vital importance to the Treasury Department, in its efforts to fund and lessen the national burthens, with all practicable energy. The legal tender circulation on the 1st inst., stood at $555,115,732, including $155,512,140 in compound interest notes, and $399,603,592 in plain greenbacks. Nearly a fourth of the entire legal tender circulation is in the vaults of the Banks of New York, Philadelphia and Boston. The city banks, in their last weekly statement, show an increase, of $1,864,836 in loans, $854,083 in circulation, and $578,978 in legal tender reserve, with a decrease of $263,344 in the deposits, and $98,541 in the specie reserve. Their deposits are now $224,844,647. Their legal tender reserve amounts to $90,773,232. Their circulation now stands at $29,360,371. The loans now reach the extraordinary sum of $270,806,504. The Bank Exchanges at the Clearing House, through the past week, averaged $94,549,868 a day, against a daily average of $98,567,189 the preceding week; and $97,644,608 the week ending with Sept. 1. The current week's exchanges average about $97,000,000 a day.

National Bank notes to the amount of $641,470, were issued last week, making the total issue to 1,660 banks thus far $291,851,315. The United States bonds held by Treasurer Spinner in trust for National Banks as security for circulating notes amount to $351,578,500.

The U. S. Sub-Treasury receipts, week ending with Sept. 15, were $21,568,121, including $3,105,457 from customs duties; payments, $19,047,273; balance at the close of the week, $87,048,843. against $84,563,995 at the close of the preceding week. The business of the Office during the first two days of the current week, was as follows: Monday, receipts, $3,213,414, and payments, $2,526,377, Tuesday, receipts, $1,590,426, and payments, $460,607. The balance at the close of business on Tuesday stood at $88,901,700, against $87,411,321 a week ago.

Government revenues continue quite heavy. Last week, the excises, yielded the sum of $8,092,994; customs at the port of New York, $3,105,457, and at the outports, at least $1,300,000 more, making the grand total income for the week equal to about $14,480,917 in currency, against disbursements of only $1,273,642 on account of the three leading executive departments. The total receipts of the National Treasury, from excises, since July 1, 1866, have been about $88,000,000.

An important exhibit of the aggregate income

and expenditures of the Government, during the last quarter of the fiscal year ending with the 30th of June, last past, has just been given to the public, by Mr. J. A Graham, Acting Register, of the Treasury Department. It is as follows; as officially set forth. The copy given by the local journals was grossly erroneous:

RECEIPTS.

Customs	$46,175,151 39
Sales of public lands	176,719 63
Direct tax	488,636 07
Internal revenue	63,857,838 92
Incidental and miscellaneous	18,342,516 66
Total receipts exclusive of loans	$129,040,762 67
Receipts from loans, &c., postage and other stamps, act of July 17, 1866	$12,600 00
Fractional currency, act March 3, 1863	4,278,297 00
Certificates of gold deposits	43,546,880 00
Six per cent. 20 year bonds, act of July 17, 1861	13,156 00
Temporary loans, acts Feb. 25, and March 17, 1862	106,146,819 25
Certificates of indebtedness, acts of March 1 and 17, 1862	412,183 75
Five-twenty year bonds, act of March 3, 1864	182,000 00
Do. do. act of March 3, 1865	192,392,330 00
Total receipts	$321,433,092 67

EXPENDITURES.

Civil foreign intercourse and miscellaneous	$11,853,339 55
Interior, Pensions and Indian	2,983,302 02
War	12,744,022 69
Navy	9,318,474 44
Interest on public debt, including Treasury notes	36,155,280 89
Total expenditures, exclusive of principal of public debt	$72,954,419 59
Redemption of Texan indemnity stock, per act Sept. 9th, 1850	$53,000 00
Payment of Treasury notes per act March 2d, 1861	400 00
Redemption of Treasury notes per act July 17th, 1861	111,452 50
Redemption of 7 3-10 three year coupon bonds per act July 17th, 1861	548,900 00
Reimbursement of temporary loan per acts Feb. 25th and March 17th, 1862	100,613,448 34
Redemption of certificates of indebtedness per acts of March 1st and 17th, 1862	34,933,000 00
Redemption of Treasury notes per act February 25th, 1862	21,630,391 65
Redemption of postage and other stamps per act July 17, 1862	857,542 31
Redemption of fractional currency, act March 3, 1863	4,574,300 52
Redemption of gold certificates, act March 3, 1862	51,454,920 00
Redemption of two years' five per cent. interest bearing Treasury notes, per act of March 3, 1863	5,500,000 00
Redemption of three years' six per cent. compound interest notes, per act of March 3, 1863	13,000,000 00
Redemption of three years 7 3-10 Treasury notes, per act of June 30, 1864, and March 3, 1865	16,152,450 60
Premium in the purchase of the same	58,476 51
Total expenditures	$322,442,701 42

Gold has experienced only slight changes, since our last. The extremes of the week have been 146⅛ on the 13th, and 144¼ on the 15th. These rates are 1¼@1¾ per cent. lower than the extremes of the preceding week. On Tuesday of the current week, the range was from 144⅝ to 145⅛. On Wednesday, the opening figures were 145⅜; the lowest quotation was 145. The speculative demand has been moderate. The customs inquiry has been active. We have had further considerable arrivals of specie (last week, equal to $1,653,900) from Europe, but no receipts from California, since our last. There have been no exports of moment. The customs demand last week, averaged $517,576 a day; thus far, this week, it has been equal to $400,000 a day. The total receipts of California gold at this port since Jan. 1, were $30,397,184, against $12,639,270 same time last year, showing an increase, in 1866, of $17,757,914. The exports of specie from this port, last week, were only $197,336, making the total outflow of specie from the port, since Jan. 1, $53,849,950, against $21,184,112 same time last year. Government disbursed last week through the U. S. Sub-Treasury here, on account of the September coin interest, on the public debt, chiefly on the Ten-Forty Loan, $262,000, making the total coin interest disbursements through the Government office, since Jan. 1, 1866, $31,614,165, against $25,355,134 same time last year.

The total customs revenue of the Government, in coin, at this port, since Jan. 1, has been $99,262,560, against $67,483,542 same time last year. The coin balances in the Treasury Vaults are rapidly augmenting. Secretary McCulloch, it is stated, confidently predicts that they will amount to $75,000,000 by the 1st of October, exclusive of the sum represented by coin certificates of deposit, and of course not the property of the Government. It is anticipated that customs alone will yield full fifty million dollars in coin to the National Treasury, for the quarter ending Sept. 30, the first quarter of the new fiscal year. About $24,000,000 gold interest on the public debt will be payable, Nov. 1st.

Government securities have improved in prices, and decidedly increased in demand, especially for some investment purposes, though there has been rather more of an export inquiry for the original Five-Twenties. The home orders now run largely on registered sixes of 1881, and registered Five-Twenties of 1865. Home buyers manifest less partiality for the Seven-Thirties, and more for the compound interest notes, which have also been in active request for banking purposes, in view of the impending redemption of the Clearing House certificates of deposit. The Ten-Forties have risen in favor, and in price, closing very firmly, as indeed, is true of all the interest-bearing national obligations, which yield so liberal a profit on investments in them. U. S. Sixes of 1881 closed 111¾; U. S. Five-twenties of 1882 at 114¼@111½; U. S. Five-twenties of 1865 at 108½, U. S. Ten-forties at 98⅞@99, and U. S. Seven-thirties at 106@106¼. The brokers are buying the compound-interest notes at the following rates, and selling at an advance of ¼@½ of 1 per cent. on these figures:

June, 1864	116½	May, 1865	111½
July, 1864	116	August, 1865	110
August, 1864	115½	September, 1865	109½
October, 1864	114½	October, 1865	109
December, 1864	113½		

There has been a further slight improvement in the foreign exchange market, under a livelier inquiry, and the pressure of a less extensive supply of prime bills. Bankers' sixty day bills on London are now quoted 106¾@107¼, and on Paris to 5.30@5.25; sight bills on London to 107¾@108¼; and on Paris to 5.25@5.22½. There have been few produce bills offering, consequent upon a reduced volume of exports. The week's exports of domestic produce and miscellaneous goods have been to the currency value of $2,782,215, against $3,033,039 same week last year. The exports since January 1, have been to the value of $139,950,607, against $111,204,359 same time last year.

An improved demand, largely for investment, prevails for all really desirable railway and miscellaneous property, prices of which are gradually advancing and are expected to rise much more. There has been a severe struggle between rival interests to obtain control of Erie common stock, with a view to the October election, which struggle has been fruitful of angry remarks in the street, and sharp comments in the newspapers.

In general business, there has been a good, healthy fall movement, affecting domestic produce as well as foreign goods, and prices have favored sellers, in most instances. The foreign advices have been favorable to increased shipments of Cotton, Breadstuffs, and Provisions. The week's exports of cotton have been 4,206 bales from this port, and 8,500 bales from all the shipping ports, leaving an available supply of 105,000 bales here. There has been a further increase of orders from distant markets for really desirable goods, prices of which has been quite firm and buoyant. Domestic Cottons have been specially active. Domestic Woolens have not been as urgently sought after. Foreign Dress Goods have been in fair request and held with firmness. The total imports of foreign dry goods, last week, were $2,914,072, and the total amount marketed $3,178,998. The value of foreign merchandise imported last week, was $3,256,437—making the grand total value of last week's imports of dry goods and merchandise, $6,170,509, and since January 1, $222,717,424, against $137,227,378 same time last year. The freight market is more active and firm with 529 vessels of all classes in port.

The latest quotations at the London Stock Exchange compare as follows with former returns:

	Sept. 5.	Sept. 11.	Sept. 17.
Consols	—@89¼	89¼	89¾
U. S. 5-20's	—@73	71¾	72½
Erie	—@46¾	44½	46½
Ill. Central	—@79	78½	78¾

The New York exports, exclusive of specie, for the week ending Sept. 18, and since the beginning of the year, compare as follows:

	1865.	1866.
For the week	$3,033,039	$2,782,215
Prev. reported	108,171,320	137,168,392
Since January 1	$111,204,359	$139,950,607

The New York imports for the week compare as follows:

	1865.	1866.
Dry goods	$2,154,004	$2,914,072
Gen. merchandise	1,984,002	3,256,437
Total for the week	$4,138,006	$6,170,509
Prev. reported	121,860,443	220,222,876
Since January 1	$125,998,449	$226,393,385

The balance in the Sub-Treasury on Wednesday was $89,971,866 94.

A. B. Burton & Co.

We invite attention to the Advertisement of this firm in another column. Having been for eleven years members of the late firm of Stone, Quigley & Burton, to which they are successors, they place themselves before the public as experienced in the construction of Bridges of all kinds, and are prepared to execute any work at the shortest notice, and to the satisfaction of all parties. Address Messrs. A. B. Burton & Co., 424 Walnut street, Philadelphia, Penn.

Charleston and Savannah Railroad.

This road, with all the property and appurtenances thereunto belonging, consisting of rights of way, lands, with tracks thereon, rails, superstructures, bridges, viaducts, culverts, fences, depot grounds and buildings, station houses and grounds, engines, tenders, cars, tools, materials and machinery, and all other property, together with all rights, franchises, &c., &c., is to be sold by auction, under the direction of Trustees, at Charleston, S. C., on the 20th of November, 1866.

Panama Railroad.

The *Alta California*, of 17th ult., says that President Mosquera has disposed of the Panama Railroad to an English company, and the Congress of Colombia has approved the act, the sale to take effect upon the expiration of the present contract nine years hence. Gen. Mosquera first obtained a loan in England for $7,500,000, giving a mortgage of the railroad as security. The money is to be used for revolutionary purposes. The *Alta* says: "We have no doubt that the subject will receive the immediate attention of our Government, in order that Colombia may be given to understand that a sale so prejudicial to the interests of the United States, and made in such violation of good faith with the present railroad company, will not be allowed. If we can afford to say to France that her troops cannot remain in Mexico, we can tell Mosquera that he must not dispose of the Isthmus transit to an English Company."

☞ The Commissioners of the Troy and Greenfield Railroad and Hoosac Tunnel will receive proposals until the 26th inst., for the completion of the railroad from Greenfield to the Hoosac Tunnel—a distance of 30 miles. Address Alfred R. Field, Chief Engineer, at Greenfield, Mass.

☞ The aqueduct over the Potomac at Georgetown, D. C., has been turned over, by order of the War Department, to the lessees of the Alexandria Canal. This will enable the lessees to resume the work of repair upon the canal immediately, and put the structure in order in time, it is hoped, to secure a portion of the fall trade of the Chesapeake and Ohio Canal.

☞ The Smyrna (Del.) *Times* says: "A railroad is projected from Middletown to Elkton. It is intended by this road to go direct from any part of Delaware and Eastern Shore of Maryland below Middletown. The present route is by Wilmington. The new road would be about eighteen miles, saving about twenty-five miles."

☞ The railroad bridge over the Chattahoochie at Columbus, Ga., is finished, completing the railway connection between Georgia and Alabama.

Railroad Earnings.--Weekly.

The traffic of the Great Western Railway of Canada, for the week ending Sept. 14th, 1866, were $62,367 47
Corresponding week of 1865 ..... 79,299 46

Decrease $16,931 99

The earnings of the Grand Trunk Railway of Canada for the week ending Sept. 8th, 1866 were $127,475 00
Corresponding week of previous year.. 139,604 00

Decrease $11,129 00

The earnings of the Marietta and Cincinnati Railroad the 1st week in Sept., 1866 .. $24,336 00
Corresponding week previous year.... 30,494 75

Decrease $6,158 75

The earnings of the Western Union Railroad for the week ending Sept. 14, 1866 . .. $19,154 35
Corresponding week previous year.... 18,139 87

Increase. $1,014 48

The earnings of the Michigan Southern and Northern Indiana Road for the 2d week in Sept., 1866, were $100,650 00
Corresponding week of 1865 ..... 98,518 00

Increase. $2,032 00

The earnings of the Detroit and Milwaukee Railroad for the second week in Sept., 1866, were $41,591 00
Corresponding week of 1865..... 42,339 00

Decrease $478 00

The earnings of the Chicago and Great Eastern Railway for 1st week in Sept. were ... $28,499 13
Same period last year 26,947 01

Increase in 1866. ..... $1,552 12

The earnings of the Chicago and Rock Island Railroad for the 1st week in Sept., 1866, were $110,811 00
Corresponding week of previous year.. 105,959 00

Increase $4,853 00

The earnings of the Michigan Central Railroad for the 1st week in Sept., 1866, were .. $99,524 21
Corresponding week of previous year.. 103,416 95

Decrease $3,892 74

Erie Railway.

The earnings of the Erie Railway and Buffalo Division for the month of Aug., 1866, were:

Erie Railway.....	$1,212,295 68	
Buffalo Division....	78,034 33	$1,290,330 01
Aug., 1865—		
Erie Railway.....	$1,331,046 00	
Buffalo Division....	87,696 52	1,418,742 52
Decrease on Erie Railway and Buffalo Division....		$128,412 51

The earnings of the Erie Railway (including the Buffalo Division) for the first eight months of the fiscal years 1865 and 1866, have been as follows:

	1865.	1866.		
January...	$1,070,890	$1,187,188	Inc.	$116,298
February..	1,011,735	983,855	Dec.	27,880

July.....	1,274,558	1,203,462	Dec.	71,095
August ...	1,418,742	1,290,330	Dec.	128,412
Total decrease				$1,089,476

Development of the Northwest.

The rapid progress which the Northwestern States of the Union are making, as regards population, the development of resources, and all the concomitants that go to constitute material prosperity, is among the marvels of the time. The States which are attracting the attention of capitalists and immigrants, more than others, perhaps, are Minnesota and Iowa, where the same judicious system of railroads and other internal improvements that has done so much for the States further East, has been adopted and is now being prosecuted with good results. The onward progress of Minnesota, in particular, challenges universal admiration. Sixteen years ago the population of that, then, territory was only 5,330. Six years ago its inhabitants numbered 172,022, and the population has since rapidly increased—how rapidly, we regret we have no data to tell precisely; but it is safe to say that the population reaches 300,000, or about half as many as Iowa which, as a State, is many years her senior. It is estimated that Minnesota has received no less than 200,000 immigrants, native and foreign, since 1860. These settlers, according to the estimate of some of our political economists, (valued at $1,000 each), are worth to the State $200,000,000. What the result of the industrial efforts of all this bone and sinew is likely to be within the next few years, we can form a tolerably correct idea by the material progress made and making by the new and adjoining States bordering on the Mississippi, States whose industrial development has been brought about by similar agencies. The wheat crop of Minnesota the current year, is estimated at 16,000,000 bushels. As an indication of the rapid strides making by this young and enterprising commonwealth in point of agriculture, we may state that, while she imported bread stuffs in 1858, it is estimated, by competent authorities, that she will have a surplus of 15,000,000 bushels in 1868!

Already we observe an active rivalry between Chicago and St. Louis for the control of the growing commerce of Northern Iowa and Minnesota, and to this end several important additions are projected to the railroad facilities of both cities. St. Louis, through the North Missouri and Iron Mountain roads, is endeavoring to connect with the Iowa roads, leading to Minnesota, in order to receive a share of the trade that now goes to Chicago; while the latter city is deeply interested in the early completion of the St. Croix and Lake Superior road, which, when completed, will afford an important outlet for the products of Northwestern Wisconsin, Minnesota and Northern Iowa. This company comprises some of the leading men in this city, who, we understand, are about negotiating a loan here to carry the enterprise promptly forward to completion.

New York and, in fact, the whole country is deeply interested in these enterprises. The great food, wool, and other crops of the West are the chief reliance of our Eastern commerce and hence it should be the aim and policy of New York, and the seaboard States generally, to co-operate with every enterprise calculated to increase their volume and facilitate their passage into the channels of trade. Capitalists should bear in mind that whatever will benefit the agricultural interests of the West, by rendering them more remunerative and enlarging their sphere, will co-equally benefit the commerce and industry of the East. The foundations of the prosperity of New York and the other leading seaboard marts, are laid, not only in the commercial enterprise of their citizens, but in the virgin soil of the great Western prairies. If we would erect our fabric securely, we must build on both of these foundations. Every fresh acre of soil which is put under cultivation, and every additional mile of railroad opening up that fertile region to trade, and bringing it so much nearer the great commercial centres of the East, adds to the profits of our commerce and enlarges the market for Eastern manufactures.

Hence, all efforts to open up commerce and industry in the far West, whether originating in St. Louis or Chicago, should be warmly seconded by our capitalists. Both those cities are already the centre of a vast system of railroads which radiate in almost every direction. But their commercial ambition is not yet satisfied, and will not be so long as there is a source of trade undeveloped. They are no longer mere outposts upon the borders of civilization, but great central luminaries, about which the lesser lights revolve. They are the way stations which mark the track of Anglo-Saxon enterprise across the Continent; and while holding fast to the East, are now stretching out their iron attenae towards the great West beyond the Mississippi. It is the mission of these enterprising cities to stand as the connecting links between that portion of the West, so recently to all intents and purposes a *terra incognita*, and the Atlantic seaboard.—*Commercial List.*

New Coal Route from the Wyoming Valley to South Amboy.

The Plymouth Coal Company, whose location is at the base of the Shawnee Mountain, on the north side of the Susquehanna river, in the Wyoming valley, are building a railroad bridge across the river about 1½ mile below the toll wagon bridge at Wilksbarre, and on its completion will lay down a locomotive track upon it, to a point where the Lehigh Valley Railroad and the Lehigh Canal Company's Railroad will both be connected with it, in a way to form, at the same time, a connection with the two Lehigh outlets and also with the Lackawanna and Bloomsburg Railroad.

The Plymouth Coal Company now have outlet to market down the Susquehanna valley by the Wyoming Canal, and up the Lackawanna and down the Susquehanna over the Lackawanna and Bloomsburg Railroad; and in addition to these they will soon have communication with tidewater *via* the two lines down the Lehigh.

But notwithstanding the alternative routes open from the colleries of the Plymouth Coal Company to market, the line of main future reliance will be we are told, by rail *via* the Lehigh Valley, Belvidere Delaware, and Camden and Amboy Railroads to South Amboy, on Raritan bay, distant about 197 miles from the Plymouth mines and 30 miles from New York City.

A link of road has been built from Dean's Pond on the Trenton and New Brunswick road, 17 miles from Trenton, to Jamesburg on the Bordentown and Amboy Railroad, 14 miles from South Amboy. Coal shipping piers are to be erected at South Amboy and soon also, it is predicted, coal shipping facilities will be provided at tidewater on the Raritan river at New Brunswick, to which latter place the distance is 9 miles from Dean's Pond, or 17 miles less than from Dean's Pond to Amboy. In other words, the distance by rail from the Plymouth mines *via* White Haven, Easton and Trenton is 180 miles to New Brunswick and 197 miles to South Amboy.

The Belvidere Delaware Railroad has always had ardent friends among Lehigh coal operators as an eligible coal route, a use to which its owners seem at last determined to put it on larger scale than heretofore, by providing shipping piers on Raritan Bay, at Amboy, in addition to the chutes and pockets at the canal basin in Trenton.—*U. S. R. R. and Mining Register.*

☞ The exports from the port of Savannah for the fiscal year ending June 30, 1866, amount to $17,925,500, and the imports in the same time to $350,745—leaving a balance in favor of exports over imports of $17,574,755. The tonnage employed in this business has been near 4,000,000 in the foreign trade, and over 35,500,000 in the coastwise trade.

☞ The construction of a railroad leading from Wilkesbarre to connect with the Delaware and Hudson Railroad at Scranton, for the purpose of sending coal from that portion of the Wyoming region directly to Rondout above New York, is soon to be commenced.

Union Pacific Railroad.

The Secretary of the Interior has received from the commissioners appointed to examine and report upon the condition of the Union Pacific Railroad a report of an inspection of the sixth section of forty-five miles of that road, commencing at the one hundred and sixtieth and terminating at the two hundred and fifth mile post. In this section there have been constructed nineteen bridges, the largest being one of a single span of 100 feet, of the Howe truss construction. A passenger and freight house has also been erected at Kearney Station. The rolling stock of the road at present comprises 15 engines, 127 flat cars, 46 box cars, 5 passenger cars, 2 baggage cars, and 30 hand cars. A telegraph line has been constructed along the entire length of the road, connecting with the lines east of the Missouri river. The commission reports the alignments, curves, grades, embankments, cuts, and ditches, unexceptionable; the ties 8 feet long, 8 inches thick, and if sawed 6 inches face, if hewn, 8 inches; the bridge structures substantial, and the whole road in good running condition, enabling trains to run at a speed of 38 miles per hour with perfect safety and ease.

The commissioners report the whole road and telegraph lines as ready for immediate service, and supplied with all the necessary drains, culverts, viaducts, crossings, sidings, bridges, turnouts, watering-places, depots, equipments, furniture, and all other appurtenances, of a first-class railroad; the rails and all other iron used being of American manufacture of the best quality, and they, therefore, have recommended the acceptance of the section and the issue of bonds and lands as contemplated by law.

At the date of the report (September 1) 205 miles were completed, but as the rate of laying averages about 1½ miles per day, the railroad is probably now completed to a distance of 238 miles west of Omaha, the eastern terminus of the road.

Interest and Dividends.

The Chicago, Rock Island and Pacific Railroad Company has declared a semi-annual dividend of five per cent., free of government tax, payable on the tenth day of October next.

The Chemung Railroad Company will pay, on demand, a dividend of two per cent., at their office, No. 9 Broad street.

The Philadelphia, Germantown and Norristown Railroad Company announces a semi-annual dividend of 5 per cent., free of tax, payable on the 1st proximo.

The Wyoming Valley Canal announces its second 4 per cent. dividend since the opening this season, payable, free of tax, on the 25th instant.

The Indianapolis and Cincinnati Railroad Company has declared a semi-annual dividend of four per cent.

The Coupon Bonds issued by the Baltimore and Susquehanna Railroad Company for $150,000 and due October 1st, 1866, will be paid on that date at the Banking-House of John S. Gittings & Co. All interest on the Bonds will cease from that day.

☞ The case of the City of Cincinnati against the street railroad companies has been decided by the Superior Court in favor of the former. It is held that the contract between the companies and the city is binding, that the companies are bound to sell twenty-five tickets for one dollar and three cents, and that tickets must be kept for sale on the cars.

Rules to Prevent Smuggling.

The Secretary of the Treasury has issued the following letter of instructions to customs officials in reference to the examination of passengers and their baggage, upon their entrance into the United States from the British North American Provinces:

1. With a view to prevent the smuggling of dutiable goods into the United States by means of concealment about the persons or in the baggage of persons arriving from a foreign contiguous country, all such persons and their baggage shall be examined on arrival in the United States by a proper officer of officers or customs. At Buffalo, Detroit, Port Huron, Ogdensburg, and other points in the United States, where connections are made between American and Provincial railways by means of ferry boats, passengers and their baggage arriving from a foreign contiguous territory shall be inspected and examined upon the boat; and passengers shall not be permitted to land, nor their baggage to be landed, until such inspection or examination shall have been concluded to the satisfaction of the officer making the same.

2. At such ports as Suspension Bridge, Rouse's Point, St. Albans and Island Pond, where railway connections are made by land, cars containing baggage shall be kept closed, and no passengers shall be permitted to leave the passenger cars, nor any baggage to be taken out of any car, until a full and satisfactory examination of said persons and baggage shall have been made.

3. Women shall be employed at all ports where a necessity for their employment shall exist, whose duty it shall be, under the direction of the collector or other proper officer of the customs, to make all proper examination, to prevent females arriving from foreign countries from smuggling dutiable goods or merchandise into the United States.

Newark and New York Railroad.

The Chief Engineer of the Newark and New York Railroad has submitted his report to the Board of Directors. The route adopted is a direct line between the termini, and the distance is claimed to be ten per cent. shorter than this portion of the Morris and Essex Railroad, seventeen per cent. less than the New Jersey, and twelve per cent. less than the plank road, the distance by the Newark and New York Railroad line, from their ferry at Communipaw, to Broad street, Newark, being seven miles and a half. The cost of constructing the road is estimated at $906,950. It is stated that proposals for grading the track were closed on Wednesday last.

Columbia and Port Deposit R. R.

This company have commenced operations at Port Deposit, Md. Ground was broken about three week's since. When completed, says the Cecil *Whig*, "this road will be one of the greatest coal roads in the country. In addition to the advantages to this county, flowing directly from the trade of the road, the old Maryland canal, which, as a canal, has been entirely useless for several years, will be converted into one of the most important water powers in the State."

☞ The great lake tunnel at Chicago, will, in all probability, be completed next month, and preparations are now making for its formal opening. Ceremonies appropriate to the completion of so stupendous a work will be gotten up on a scale of great magnificence.

☞ A railroad project has been started at Toledo, Ohio, to connect that city by railroad with Galion, Michigan. The distance is only about seventy-five miles.

Buffalo and Warren Railroad.

A company has been formed at Warren, Penn., under the name of the Buffalo and Warren Railroad Company, for the purpose of constructing a railroad between those two places—a distance of eighty miles. A proposition has been made by a reliable railroad contracting company, to build and equip the road for one-third cash, one-third stock, and one-third bonds, running twenty years at six per cent. interest. The construction of this road will make Warren the junction of two most important thoroughfares, and establish an intimate connection with the Baltimore and Ohio Railroad on the South. The importance of such a road to Buffalo cannot be overestimated. In the vicinity of Warren there is abundance of coal, oil, iron and timber, which would find a ready sale in the Chicago markets. The directors of the company are W. D. Brown, O. C. Allen, Jno. H. King, M. W. Hull, J. D. James, J. F. Davis and Thos. Chase; and the officers are: President, J. D. James; Secretary, O. C. Allen; Treasurer, M. Beecher, Jr., all of Warren.

Virginia and Tennessee Railroad.

The receipts of the Virginia and Tennessee Railroad since the 1st of July have been $125,402 87 against $44,239 07 for same period of last year, an increase of $81,163 80. For the first week in September the earnings were $16,673 78, against $8,547 92 in the corresponding period of the previous year, an increase of $8,125 86.

Manassas Gap Railroad.

The work on this important road is progressing slowly but surely, and it is confidently expected by the officers of the company that the rails will be laid and the cars again running as far as Piedmont by November or December next.

☞ The Chicago and Northwestern Railroad Company have nearly completed a negotiation that will give them about two millions of dollars of additional rolling stock, to be paid for gradually in cash. The friends of the road claim that this addition to their facilities will run the earnings of the fall to a million and a quarter per month.

☞ Work has been commenced upon the Huron and Lake Ontario Canal, a small contract having been given to Messrs. Beachell & Ellis. The object, however, was to prevent the charter expiring, which it would have done some time this month had the work not been commenced.

☞ At a meeting of the directors of the Western Union Telegraph Company, it was resolved to give the stockholders in the Russian Extension the option of exchanging their stock in that line, at any time within six months, for bonds of the Western Union Company, at 90 per cent.

☞ The track of the Iowa line of the Chicago and North Western Railway Company is laid to within 85 miles of Omaha. The grading is well ahead of the track-layers, and will be finished in November, as it is being laid at the rate of about a mile a day.

☞ Phillips County, Arkansas, has voted to subscribe $500,000 in bonds for building the "Iron Mountain and Helena Railroad" through Phillips County. Only ten or a dozen votes were cast against the proposal.

☞ R. N. Brown, has been appointed Superintendent of the Buffalo and Erie Railway Vice J. Lewis Grant resigned.

☞ The latest accounts of the Russo-American telegraph state that the Collins Russian telegraph line has been completed to Fraser Lake, and that the work was being pushed vigorously. Starting from the Salt Lake, it passes through British Columbia and Russian America to Behring's Straits, which it crosses by a submarine cable of 40 miles in length. Having reached the opposite side, the line proceeds towards the River Armor, through Siberia to St. Petersburg, the whole line being about 6,000 miles in length.

FIRST MORTGAGE BONDS

OF THE

Central Pacific Railroad Company,

OF CALIFORNIA.

Interest at the rate of Six per Cent. per Annum, payable Semi-Annually.

Principal and Interest payable in U. S. Gold Coin in the City of New York.

Amount of Issue, $7,336,000.

IN COUPON BONDS OF $1,000 EACH.

The Bonds have Thirty Years to run, and are secured by a First Mortgage, constituting an absolute prior lien on that portion of the Road, Equipments, Franchises, and Entire Property of the Central Pacific Railroad Company, located in the State of California, and extending from Sacramento City to the California State Line, forming a part of the GREAT PACIFIC RAILROAD ROUTE, adopted and aided by the UNITED STATES GOVERNMENT.

The amount of these First Mortgage Bonds to be issued per mile is limited by law to the amount of United States Bonds allowed and issued to aid the construction of the Road, and the Mortgage by which they are secured is *declared by Act of Congress to constitute a lien prior and superior to that of the United States Government.*

The aid received from the Government (in amount equal to this First Mortgage) is economically and judiciously applied to the construction and equipment of the Road, together with nearly $7,000,000, received from Stock Subscriptions and other sources. The First Mortgage therefore amounts to but about 35 per cent. of the actual cost and value of the Property which it covers.

The road is now completed, equipped and running from Sacramento City to Alta, a distance of 73 miles, and the earnings for the three months ending August 1st were as follows, viz.:

May, 1866	$65,115 83
June "	67,429 78
July "	85,000 00

IN GOLD.

The earnings are steadily increasing, and are estimated at over $100,000 in Gold for the month of August—the official report for that month not having been received at this date.

The construction of the road is going vigorously forward, and it will probably be in full operation to the California State Line—156 miles from Sacramento City—during the summer of 1867, when its earnings must be very large, as the entire trade of Nevada, and a large proportion of that of Utah, Idaho and Montana must pass over its line. It has been shown by reliable statistics that in 1863 over $13,000,000 in Gold was paid for freighting goods from California to Nevada alone.

This part of the Great Pacific Railroad Route is destined to be one of the most profitable lines of railroad in the world, and its First Mortgage Bonds are among the best secured and most desirable investments ever offered.

Over $1,000,000 has already been expended in grading beyond the point to which the road is now running, and the iron is bought and paid for sufficient to lay the track the entire distance to the State Line.

The Road has been completed and equipped thus far without the sale of a single dollar of its First Mortgage Bonds, and they are now offered to the public for the first time, after the earnings of the Road have reached the sum of $100,000 per month in Gold, only about 25 per cent. of which is required for operating expenses.

The interest is payable on the first days of January and July, at our office in the city of New York.

The Bonds are offered at 95, and accrued interest from July 1st, in Currency. Orders may be forwarded to us direct, or through the principal Banks or Bankers in all parts of the country.

Remittances may be made in drafts on New York, or in Legal Tender Notes, National Bank Notes, or other funds current in this city, and the Bonds will be forwarded to any address by Express, free of charge. Inquiries for further particulars, by mail or otherwise, will receive punctual attention.

American Railroad Journal.

New York, Saturday, September 29, 1866.

Southern (Miss.) Railroad.

In the present number, will be found copious extracts from the last Annual Report of M. Emanuel, President of the Southern Railroad Co.

This, like many other unfortunate railroads in the South, was a serious sufferer from the scourge of war, and it will require the use of money and handiwork, combined with good management, to bring it up to that high rank among paying roads which its location and connections clearly entitle it to.

It is a plain proposition, that the bondholders and creditors of all these war crushed roads, will have to rely on the business success of the roads for the payment of their interest instalments, and the ultimate payment of the debt, therefore it will be wise and politic in the creditor to extend to these disabled roads not only a patient indulgence, but they should stretch out a helping hand in the way of judicious pecuniary aid, to put them fairly in a condition to secure all the business they can do—and do all the business they can secure—all the money aid now given to railroads is in a depreciated currency. Railroad bonds having 15 and 20 years to run, will in the end no doubt be paid in gold. In regard to the future importance and value of the Southern Railroad, there can be no doubt; a glance at the map shows its position as one of the links in a great trunk line that is destined, before the lapse of many years, to connect the Atlantic seaports with San Diego on the Pacific by the great Southern route through Texas *via* El Passo on the 32d parallel of latitude.

The Vicksburg, Shreveport and Texas Railroad, starting from the west bank of the Mississippi opposite Vicksburg, was built 75 miles to Monroe and in operation before the war; and in a few months the trains will be again running between those points. The remainder of the road to Shreveport must, from its great importance to the owners, be also soon built. The road from Shreveport to Marshall in Texas *is built*, and now in full operation. When the gap between Monroe and Shreveport is closed, there will be an immense travel over this line between the Atlantic States and Texas.

In regard to the Eastern and other connections of the Southern Railroad: at Jackson 45 miles from Vicksburg, it crosses the New Orleans, Jackson and Great Northern Railroad, at Meridian the terminus of the road, 140 miles from Vicksburg, it connects with the Mobile and Ohio Railroad running north and south, it also connects these with the Selma and Meridian Railroad, running east and west, 105 miles to Selma. There is an unfinished gap of 44 miles between Selma and Montgomery, and parties who are interested in its completion, say it will be built during the ensuing year. With the completion of that short line, the Southern Railroad will have an unbroken connection with the main lines in every Southern State east of the Mississippi River, and with every Atlantic seaport.

From Selma, the Alabama and Tennessee Railroad runs northeast about 140 miles in the direction of Dalton, Georgia, to which point that road is now being built, and is to be completed in about two years from the present time. When Dalton is reached, the friends of that road say, that the distance between New York and New Orleans will be upwards of forty miles shorter by that route than by any other existing line, leaving the Virginia and Tennessee line at Cleveland, thence *via* Dalton, Selma, Meridian, and Jackson, Miss., to New Orleans. If this line is the shortest and quickest it will certainly be the preferred line, and in that event the Southern Railroad as well as all the other roads on that line will be greatly benefitted.

There being now a continuous railway between Vicksburg and Selma, 245 miles, it is reasonably expected that the western freight from St. Louis and Louisville destined for Alabama and Southwestern Georgia, will stop at Vicksburg to be forwarded by rail to Selma, instead of making the long voyage to New Orleans, Mobile and up the Alabama River. The time being so much shorter by rail *that* will be the preferred route if the condition of the road and rolling stock will enable the company to receive and convey all that will be offered. This is a newly developed trade for this road, and will become permanent and of increasing magnitude, if the facilities of transportation are adequate to the demand.

We have before us a published letter to the President of the company, written by General J. D. Webster, Special Agent of the War Department, and E. G. Barney, Esq., Special Agent of the Post Office Department, charged with the examination of all the Southern Railroads to report on their adaptation and condition for military and postal service, and their statements are accordingly entitled to the fullest credit.

Washington, D. C., September 8th, 1865.

MORRIS EMANUEL, ESQ.,
President Southern R. R. Co.

SIR:—In passing over the Southern Railroad and its connecting lines, we have been much satisfied in witnessing the prompt alacrity with which your company have addressed themselves to the task of restoring the road to its former condition.

Your line is too important to the country at large to be allowed to pass out of existence, even had the local energies of your people been wholly paralyzed.

Great as the local value of your road may be, its National value is immeasurably greater.

The entire population of the Atlantic Seaboard from Maine to Florida, will with the completion of two short lines, find the *Southern Railroad the shortest and best route to the South and Southwest.*

With returning prosperity in your section, but a short time will be required to complete the lines unfinished, and restore the old ones to their former usefulness.

The nearest parallel road north of yours is 200

miles distant, and from the nature of the country it is not probable any competing line will ever be projected.

On the south the same reasons exist for saying your line can have no competitor from Vicksburg to the Gulf.

At right angles to your route, are two trunk lines and a mighty river as tributaries from the North, Northwest and South.

Eastward, nearly every line pointing toward the West, sends its promise of future contributions.

Westward, Southern Arkansas, Louisiana and Texas, with their rich products and future teeming population, will find in the Southern Railroad an *indispensable means of communication with the Atlantic Cities.*

An intimate knowledge of the rich agricultural resources of the South, the recuperative energies of her people, the inexhaustible beds of Minerals yet undeveloped, justifies us in predicting a higher degree of prosperity for all the interests of your section than the most sanguine mind has yet conceived.

We believe any road, situated as yours is, *will pay liberal dividends on a cost of forty thousand dollars per mile.*

J. D. WEBSTER,
Brev't Maj. Gen'l U. S. V.
E. G. BARNEY,
Special Agent, P. O. Dep't.

The change of policy by the United States authorities in Mississippi, in regard to the rebuilding of the destroyed track between Jackson and Big Black River, 32 miles, and the rebuilding of the bridge and trestle, was a very injurious and unfortunate disappointment to the company. The commanding General regarded a railroad connection between Jackson and Vicksburg as a military necessity, and ordered the work done. Two regiments of colored troops were set to work at it, and the engineer in charge of the work wrote the President a letter, dated Aug. 2, 1865, "that the road would be in running order to Big Black River, and the bridge and trestle completed so as to make connection with Vicksburg by the 1st of October, 1865." After working a short time on the Jackson end of the road, a change of Generals was made, and the orders to repair the road and build the bridge were countermanded, and as stated in the report, the labor and enormous expense of rebuilding the road and bridges so as to open communication with Vicksburg was cast upon the company in its darkest hour of financial embarrassment. Instead of having the work completed for them by the 1st of October, 1865, it had to be done by the company, and it took them until August, 1866, before through trains passed over the road. By this delay, the company lost the freight on many thousand bales of cotton that would have gone to Vicksburg. The loss of the use of the road for so many months when there was so much cotton to be shipped in one direction, and freight in another, was a serious financial disaster. Losing the earnings of the whole business season, and having to expend all its receipts, besides going heavily in debt to rebuild the road, bridge, &c., has placed the company in an attitude which compels it to ask favors of its bondholders and other creditors, and as there can be no fault imputed to the company, or to the management of its affairs, we trust that those who are interested in the future welfare of the road, will aid in putting it in good working condition so that if a heavy business offers it may have the ability to do it.

We have received from N. G. Bryson, Secretary of the company, the following statement of the receipts of the road from May 10th, 1865, to September 1, 1866:

Passenger earnings		$284,541
Government passenger transportation		90,766
		$375,307
Freight receipts	$291,055	
Government freight	80,781	
		371,836
		$747,143

Giving for 15 months and ⅔ nearly $50,000 monthly receipts. All this money and more besides was expended in the repairs, equipment and expenses of operating the road. We understand that only a small portion of the Government dues has been paid. In the broken down condition of the road while under repair the tariff must have been very high to have yielded such receipts. But it speaks very favorably for the money making capacity of a road of only 140 miles in length, with the loss of the use of so much of its main track for several of the heaviest business months in the year. We hope to see not only the *Southern Railroad*, but *all the Southern Railroads* fairly launched again on the full tide of prosperity and usefulness, and such as have real merit, as we think the road which heads this article has, will we trust receive generous treatment from their creditors. The restoration of Southern Railroads will have an important bearing upon the unity and prosperity of the whole country.

Hudson River Railroad.

This road is 144 miles in length, extending from New York to Albany. It has 128¼ miles of double track, including sidings. The weight of rail per yard on main track is 70 lbs. The equipment consists of 75 locomotives, 121 first class, 13 2d class and emigrant, 28 baggage, mail and express, and 711 freight cars. The company have also 3 dummies and 30 city cars; and 4 locomotives and 3 first class passenger cars on the Troy and Greenbush railroad. Number of accidents reported, from October 2, 1864, to September 27, 1865, 40. The total number killed, 30; injured, 26. Of the former 1 was a passenger, 7 employees and 22 others; of the latter 10 were passengers, 8 employees and 8 others.

The following is a comparative statement of the receipts and expenditures for the fiscal years ending September 30, 1864 and 1865:

Receipts:	1864.	1865.
From passengers	$1,921,277 45	$2,009,030 14
" freight	2,134,669 31	2,189,371 88
" rents	12,473 82	16,292 94
" telegraph	1,500 98	1,254 77
" mail service	32,400 00	32,400 00
" interest	20,535 17	289 93
Bounty taxes refund'd	.....	1,711 75
Miscellaneous	1,424 90	76,448 97
Totals	$4,124,281 63	$4,326,800 38
Payments, other than for construction:		
Transportation exp.	$2,545,306 88	$3,176,612 45
Interest	594,487 92	587,613 16
Roadway, grading, bridging, etc	.....	281,100 00
For dividends on st'k, 8 per cent	499,286 80	329,405 25
Payments to surplus fund	43,270 03	.....

STOCK AND DEBTS.

	1864.	1865.
Capital stock	$6,218,041 89	$6,563,250 38
Funded debt	7,737,680 00	7,762,840 00
Floating debt	1,167 00	1,167 00
Totals	$13,956,888 89	$14,327,257 38

The number of miles run by passenger trains in 1865, was 698,226; by freight trains, 588,315; by gravel trains, 59,538; by city cars, 256,200—total, 1,602,279, against 1,396,293 in 1864, a increase of 205,986. Number of passengers carried in 1865, 2,068,245; do., carried one mile, 85,778,513. In 1864, the number carried was 2,017,840, and the mileage of do., 98,853,821—an increase in passengers of 50,402, and a decrease in mileage of 13,075,308. The number of passengers carried in the city cars in 1865, was 1,137,558, and the

mileage of do., 2,275,116. Tons of freight carried in 1865, 491,850; mileage of do., 53,738,444. In 1864 the tonnage was 601,824, and the mileage 72,720,351—showing a decrease in tonnage of 109,974, and in mileage of 18,981,907.

Sandusky and Cincinnati Railroad.

We have received a copy of the report of this company, embracing the operations of the road for the fiscal year ending June 30, 1866. The reorganization of the Sandusky, Dayton and Cincinnati Railroad Company, under the plan of capitalization agreed upon by the different interests, having been finally consummated, the new company has assumed the corporate name of the "Sandusky and Cincinnati Railroad Company."

The earnings and expenses of this road for the fiscal years ending June 30, 1865 and 1866, have been as follows:

Earnings:	1865.	1866.
From passengers	$242,274 87	$228,442 23
" freight	435,801 54	423,613 66
" mail	16,080 00	16,080 00
" express	16,128 07	.....
" storage	1,966 03	18,742 42
" car mileage	7,673 64	7,642 19
	$719,924 15	$694,520 50
Expenses, viz:		
Machine shop	$35,574 22	$15,196 34
Maintenance of way	167,613 23	141,361 15
Locomotive power	163,903 94	165,701 58
Train expenses	84,213 07	100,438 42
Station "	75,156 87	62,760 13
Office establishment	38,468 34	24,539 18
General expenses	7,269 69	10,429 03
Loss and damage	1,824 84	1,926 72
Totals	$574,024 20	$522,352 55
Net earnings	$145,899 95	$172,167 95
Interest and taxes	141,326 45	157,520 59
Balance	$4,573 50	$14,647 36

The earnings of 1865-'66, show a decrease as compared with those of the previous year, of $25,403 65; with a decrease in operating expenses, and taxes, of $49,154 20—showing an improvement of $13,750 55. The balance of earnings applicable to the payment of interest and dividends, is $134,080 60. The interest on the funded debt as capitalized, and dividends on preferred stock, amount to $119,433 24—leaving a balance, as above, of $14,647 36. The report says:

With the failure of the grain crop last year, and the change in the current of business incident to the close of the war, the result shown by the foregoing statement is entirely satisfactory, and is much better than the business of the first months of the fiscal year led us to expect. The falling off in gross receipts, to wit, $25,403, is more than accounted for in the single item of wheat delivered at the lake in ordinary seasons. We may therefore congratulate ourselves on the evident increase of business naturally coming within our lines and falling under our control.

Since the date of our last annual report, the plan of capitalization set forth in the agreement of Nov. 13, 1863, and the supplemental agreement of March 1, 1865, has been duly carried out according to the provisions of the law passed April 11, 1861. By the terms of these agreements, the bonds due Feb. 1, 1866, for one million dollars, bearing seven per cent. interest, were extended to the year 1900, with new coupons, at six per cent.; and a sinking fund of ten thousand dollars per annum, providing for the gradual redemption of these bonds, was established. The second mortgage, due Feb. 1875, for one million dollars, was converted into six per cent. preferred stock, at forty cents of the par—of which preferred stock an amount not exceeding $475,000 was created, into which, in addition to the bonds due in 1875, all the unsecured obligations of the company might be converted, at ten per cent. of their par value. This portion of the programme has been in operation since Feb. 1, 1864, and all its conditions have been fulfilled.

By the terms of the supplement agreement of March 1, 1865, John P. Yelverton, Jacob W. Pierce and Israel M. Spelman, were constituted Trustees to carry out the agreement of Nov. 13, 1863.

A suit of foreclosure for non-payment of interest having been commenced by the surviving Trustee, under the mortgage falling due in 1866, a decree was entered up at the October Term, 1865, in Erie County, and an order for the sale of the road and property was made. A receiver was appointed to take charge of the property, at the same term of Court. Under this order, a sale took place on the 5th day of January last, and the Trustees before named became the purchasers. Subsequently, having fully complied with the provisions of law of 1861, to wit, on the third day of May, 1866, the "Sandusky and Cincinnati Railroad Company" was duly organized, and put in possession of the franchises, roadway, and property of every kind, of the old corporation.

This detail is made necessary in answer to numerous inquiries made by stockholders and other parties interested, and that all may be enabled, by reference to the law of 1861, to understand their position in the new corporation.

No material change has taken place in our relations with other roads. Our facilities for shipment by lake, both east and west, are materially better than last year. No opportunity should be allowed to pass for still farther improving our water communications.

The operations of the road have been carried on with great regularity, for which we are indebted to the care and attention, in their different departments, of the servants of the company.

The receipts and disbursements during the year ending June 30, 1866, were as follows:

RECEIPTS.

Balance on hand, June 30, 1865	$48,186 49
Receipts for transportation	687,067 08
	$735,253 57

DISBURSEMENTS.

Operating expenses	$432,103 80
" S. & C. R. R	10,371 13

Profit and loss	596 46
Forfeiture on contract—one half	2,500 00
Cash on hand to balance	38,103 52
	$735,253 57

The company have 12 locomotives in first class order; 9 in second class, requiring an estimated outlay of $27,000 to put them in first class order. One new locomotive in process of building, which was commenced in May, 1865, estimated cost, when completed, $14,000; and 3 are being rebuilt at an estimated expense of $4,500 each. The rolling stock consists of 17 passenger, 9 baggage, mail and express, and 414 freight, etc., cars. Mileage of engines 346,671. Tonnage of through freight, 39,735; do., way freight, 106,047—total, 145,782.

President.—O. FOLLETT.

Directors.—Jacob W. Pierce, Israel M. Spelman, Theodore A. Neal, John P. Yelverton, Elisha C. Litchfield, F. P. James, Oran Follett, Rush R. Sloane, William Wilshire, Abraham Cahil, William Warder, Isaac S. Gardner, R. W. Shawhan.

Secretary and Treasurer.—L. H. LATHAM.

Superintendent.—JAN'A H. POTTER.

Philadelphia and Baltimore Central R. R.

At a meeting of the citizens of Harford and Baltimore Counties at Belair on the 8th inst., the following resolutions were adopted:

Resolved, That the subscriptions to the Philadelphia and Baltimore Central Railroad Company, by the citizens of Baltimore and Harford Counties, be subject to the condition that at least five miles of road between Stemmer's Run and the Susquehanna River shall be completed in each year, and that the said subscriptions shall be paid in the following manner: one-seventh of the amount subscribed shall be paid on the completion of each five miles of the road, as aforesaid.

Resolved, That the road, as surveyed, shall be divided into eight sections, and that three persons for each section shall be appointed, to canvass the people resident within its limits, to procure subscriptions, as aforesaid, and releases of the right of way; and that the persons so appointed shall report the result of their efforts to a meeting to be held at Belair, on the 6th day of October next.

The meeting then proceeded to divide the line of the road into sections, and to the appointment of a committee for each section.

☞ United States Commissioner Rollins has just decided that no internal revenue stamp is required upon documents, certificates or transfers of stocks made by city, county, State or other municipal officers. As the reverse of this is understood and practiced by some persons, this official notification is important.

☞ The grading of the track of the Wabash, Western and Vincennes Railroad, of Indiana, is nearly completed to Laurel, and the track is laid as far as Matamoros. Work, however, has stopped at present for the want of iron.

☞ The construction of the track for the extension of the Sussex (N. J.) Railroad to Branchville has been commenced.

Southern (Miss.) Railroad.

The earnings of this road from May 10, 1865—the date from which the receipts of the road were paid in Federal currency—to the 28th of February, 1866, the close of the last fiscal year, embracing 9 months and 20 days, have been as follows:

From passengers	$187,758 40
" freight	170,888 42
" U. S. Government transportation	84,900 04
	$443,546 86

And the expenses was:

Cost of transportation	$52,799 74	
Maintenance of way	155,119 86	
Motive power	102,041 32	
Maintenance of cars	26,932 68	
General expenses	16,460 00	
		353,353 60
Leaving		$90,193 26

It will be seen that the expenses for repairs of road and machinery, and conducting transportation, have been $336,893 60; of which there are properly chargeable to construction the following amounts:

For labor on track	$19.067 97
" tools and machinery	17,226 09
" re-building bridges	18,294 00
" cross-ties and construction trains	10,000 00
" spikes	1,500 00
" depot buildings, etc	2,000 00
" re-building locomotives	12,060 00
" construction of cars	7,000 00
Making	$87,148 06

—which deducted from the total expenses, shows the operating expenses to have been $249,745 54, or about 56 per cent. of the gross earnings. From this it appears that a large portion of the expenditures was for permanent work and extraordinary repairs required to make the road available for immediate use, as soon as it was placed in possession of the company, at the close of the war, by the military authorities.

Of the amount shown in the annexed statement as due by express companies, the sum of $6,797 66 is against the Pioneer and Commercial Express Companies, both of which have ceased to exist.

The receipts and disbursements of the company during the period covered by the Report have been as follows:

Receipts:

From earnings of the road		$443,546 53
Less due by agents	$10,557 63	
" U. States	84,900 04	
" Express Co	7,121 51	
		102,579 18
		$340,967 35
Incidental receipts		$5,486 74
Cotton sold		32,312 82
Earnings of G. P. Theobald		36,848 92
Overpaid by conductors		92 46
State of Mississippi		79 05
Interest account		12 00
Bills payable issued		7,827 00
		$423,626 34

Disbursements:

For operating road	$249,745 60
Re-constructing road	87,148 06
	$336,893 66
Less due on pay-rolls, etc	6,132 84
	$330,760 82
G. P. Theobald	32,986 30
Mobile and Ohio Railroad Co	20 00
Expenses on cotton sold	742 05
Advances on cotton purchased	1,479 30
Contingent expenses	4,425 64
Interest account	1,109 33
Bills payable	4,627 00
" receivable, etc	142 00
General salaries	3,333 33
U. S. tax	8,701 03
Construction—old account	952 23
Notes issued to circulate as money, (cancelled)	3,291 25
Cash on hand	31,056 06
	$423,626 34

The total amount of losses and injuries which the company sustained by the war is stated at $1,584,946. In addition to which, the destruction of the books and papers of the company by the burning of Vicksburg, Jackson and Morton depots, have been very embarrassing, and in a great measure will be irreparable. The President in his report says:

During the war it was impossible for us to pay any portion of either the principal or interest of our European or Northern debt; and but very few of our Southern creditors were willing to receive Confederate currency in payment of their claims. This state of things rendered our financial condition at the close of the war extremely perilous. The arrearages of interest, when added to our stated debt, calculated up to the 1st of July, 1865, made the aggregate amount of $2,922,197 70, of which $1,975,054, was part due, and the remainder maturing within three years.

The company was placed in possession of that portion of the road held by the Federal authorities, between Vicksburg and Big Black, on the 1st of June, 1865, and also all the balance of the road east of the Big Black river. The latter portion, as far as Jackson, required heavy and immediate expenditures for the re-building of Big Black bridge and the expensive trestle connected with it, besides the extensive and thorough repairs needed for the whole distance from the river to Jackson. The destroying hand of both armies had fallen heavily upon that section of our road, and no trains had been run over it for upwards of two years. All the bridges, trestles and cross ties had either been burned or were rotten, and much of the iron had been heated, bent and twisted; we therefore in great part had only a road-bed left in a very rough state, upon which to build a new track of 33 miles.

The company was entirely without the money necessary for these costly repairs, and knew not where to raise it. They had an enormous debt standing against them, secured by a mortgage on the road and the lands belonging to the company, with a large portion of the debt endorsed and guaranteed by the principal holders of the original stock.

It was thought by some a very hazardous enterprise to attempt to repair and operate the road, under the existing difficulties and the gloomy prospects ahead. A board of managers was convened on the 1st of July, 1865, and after mature diliberation, clothed me with full power and authority with instructions to see in person, all our principal creditors residing both in the United States and Europe, with a view to negotiate, if possible, for the postponement of the obligations of the company, to a reasonably distant period. In pursuance of those instructions, the President of the company had interviews with the leading creditors living in the Southern States, and then with those in the Northern cities. At Philadelphia he published a circular informing the creditors of the prostrate condition of the road, and asking them to postpone to a reasonable time, the payment of the bonds and other obligations of the company. The result was a general meeting of the creditors at the Girard National Bank on the 26 Sept., 1865, at which the following resolutions were unanimously adopted:

"*Resolved*, That it is the sense of this meeting, representing a large number of the bondholders and other creditors of the Southern Railroad Company, that the proposition made by the President of the company to fund the arrears of interest now due, and to become due until the 1st of January, 1867, to extend the time at which the bonds are to be payable till 1890, and, if practicable, preserving existing liens and their priorities—to consolidate the indebtedness of the company into a seven per cent. mortgage and bonds, payable in 1890 is approved.

Resolved, That a copy of this resolution be furnished to the President of the company, to be submitted by him to the European creditors, as an evidence of the wishes and views of the American creditors.

Resolved, That a committee of five, representing each class of creditors, to act together with the Agent of the Southern Railroad Company, be appointed to draft the form of a mortgage contemplated by the first of the foregoing resolutions."

The committee consisted of James Magee, Charles Macalister, Samuel Harlan, Jr., and John Clayton, to which, on motion, the chairman was added. The committee appointed to prepare the mortgage, proceeded to their work without delay. The committee, at a subsequent meeting, October 2d, 1865, made the following report:

The committee appointed at a general meeting of the creditors of the Southern Railroad Company, held at the Girard National Bank, in the city of Philadelphia, September 26th, 1865, to prepare a mortgage in conformity with the resolution then adopted, report:

That they have examined the draft of a mortgage prepared by counsel, and submitted by Dr. Emanuel, President of said road, and do approve of the same, and recommend it to the favorable consideration of the creditors.

Encouraged by the liberal action of the American creditors the President proceeded to Europe, and fully succeeded in obtaining from all the European creditors their sanction to the postponement asked for by the company.

The liabilities of the company, with all arrearages of interest funded up to 1st January 1867, will be about $3,000,000. Under the re-organization of our debt the classification of the mortgage debt will be as follows:

1st Mortgage debt	$800,000
2d " "	850,000
3d " "	85,000
4th embracing the interest funded; and debts having no mortgage security	1,265,000
	$3,000,000

The whole bearing seven per cent. interest, and payable on the 1st January, 1890.

The assets of the company, consist of

140 miles completed railroad, with rolling stock and machinery	$4,500,000
Lands belonging to the company	700,000
	$5,200,000

The new mortgage is so drafted, as not to modify or lessen in the slightest degree, the character of the existing securities, or the priority of lien contained in the previous mortgages.

The bonds and coupons are to be payable at the Girard National Bank of Philadelphia. The coupons belonging to the bonds having prior liens, (and so endorsed) are to be paid on the 1st of July and January, of each year, commencing 1st July 1867, and those belonging to bonds having no endorsement, will be paid on the 1st October, and 1st of April, commencing 1st October, 1867.

The President saw Gen. Canby after the surrender, who ordered the restoration of the road to the company.

This conciliatory course of Gen. Canby, and the prompt restoration to the company of its property, operated as a stimulus to our efforts, and was a great public benefit in opening the way of travel and business along the line of our road, into the interior of the State, and to a partial resumption of our long suspended personal and commercial intercourse.

The track between Jackson and Big Black (32 miles) had been so often and so seriously damaged during the war by the contending armies, in the burning of bridges and the destruction of track and depot buildings, that very extensive and costly repairs were required to put it in running order.

As soon as Maj. Gen. Osterhous was assigned to the command of this Department, I applied to him for Government aid in the re-building of Big Black Bridge and repairs of track between Big Black and Jackson, upon the ground that Jackson was the seat of the State Government and also the military headquarters of the Department commander, and as Vicksburg was then the only available source of supplies for the several military posts of the interior of the State, I thought he would admit there was a military necessity for the speedy restoration of railway facilities between two such important points; and I further informed him that the Railroad Company having no money in hand, was utterly unable to do the work. He admitted the military importance of the road, and said that if the company was not able to repair it and build the bridge at Big Black, the military authorities would have to do it.

When I left Mississippi, on my trip to the North and Europe, on important company business, I thought it would be serviceable to have with me a written assurance from the Government authorities of the early completion of Big Black bridge, and through Gen. Osterhaus I obtained the following letter from the engineer in charge of that work:

"Head Q'rs. Dept. of Mississippi,
Office of the Chief Engineer,
Jackson, August 2, 1865.

Dr. M. Emanuel, Pres't Southern R. R. Co.—

Sir:—In reply to your enquiries relative to the completion of the road from Jackson to Big Black river, I would say, that in three weeks we will have the road in running order to Big Black river, and the bridge and trestle completed so as to make connection with Vicksburg by the first of October next. I think this may be relied on if nothing at present unlooked for, should occur to prevent.

Very Respectfully Yours &c,
Adin Mann,
Maj. 124 "Ill. Vols. & Engineer in charge."

The exhibition of this letter to parties interested, strengthened their confidence in the speedy opening of the road, with increased earnings, and facilitated my arrangements, but unfortunately for the company and the public—the successor of General Osterhaus, (General Slocum) acting under the influence of a change of circumstances, did not consider that the building of the bridge was then a military necessity, and threw the burthen and enormous expense of the undertaking entirely upon the company, in its darkest hour of financial embarrassment.

The company had no alternative left and undertook the rebuilding of the road, and the construction of an iron bridge over Big Black with 3,100 feet of connecting trestle work.

When the company was put in possession of the road, we had to re-build and repair many bridges, the road bed required a great deal of work; and a hundred thousand cross ties were needed to make it safe—station houses and platforms had to be built—rolling stock had to be supplied—important and costly machinery, both for the machine and car shop, had to be purchased, and we were without money to accomplish these important ends.

Until the latter part of November, 1865, we only worked the trains between Jackson and Meridian, and between Vicksburg and Big Black, there being no railroad connection up to that period between Jackson and Big Black. On the 20th November the track was laid, and the cars ran to the east side of Big Black river. A contract was then made with Maj. Theobald for transfering freight and passengers between the trains, on the opposite sides of the river.

The company having to rely solely on its monthly earnings to carry on the extensive repairs, and meet the heavy outlays of money for the purposes already spoken of, and as a matter of necessity and policy, a high tariff was a positive necessity. Both the company and the public, were deeply interested in the speedy building of Big Black bridge, and putting the road in safe working order between Vicksburg and Meridian.

We have about fifty miles of light iron on the western end of the road, some of it very much worn, the safety of the track, and the business success of the road would be much improved by laying some portions of it with a heavier rail, and other portions of it by using a stringer track. Efforts are being made to barter the old iron for new, paying in money the difference of value.

With the three new Engines bought from Messrs. M. W. Baldwin & Co., which are to be finished and delivered some time in June or July in anticipation of the completion of the bridge, we shall have 18 engines in good running order, ready for a heavy business. As soon as it was practicable, after the surrender we commenced operating a car shop for the repairs of old cars, and the building of new ones, and have since added to it valuable tools and various pieces of machinery and now we have the assurance of the master of the car shop that by the 1st of August we will have fifteen new box cars ready for use, and will turn out, ten a month after that time.

The Southern Railroad starting from the banks of the Mississippi, at Vicksburg, and running due East one hundred and forty miles to Meridian, is to that extent a link in the shortest and therefore the most important trunk line between the Mississippi river and any of the Southern Atlantic seaports. It is 670 miles by Rail from Vicksburg to Savannah, all of which is now in full operation except a gap of 44 miles between Selma and Montgomery—the distances are as follows:

	Miles.
Vicksburg to Meridian	140
Meridian to Selma	105
Selma to Montgomery	44
Montgomery to Opelika	64
Opelika to Columbus	28
Columbus to Macon	99
Macon to Savannah	190–670

I had the pleasure of hearing from Col. C. T. Pollard President of the Montgomery and West Point Railroad Co., that he confidently expected that the short line of railway between Montgomery and Selma would be completed and in operation before the end of 1867.

The Geographical position of Vicksburg, and also the Southern Railroad, starting as the railroad does from the east bank of the Mississippi river running east to Meridian, 140 miles—there connecting with the Selma and Meridian Railroad, also running east 105 miles, to Selma, thence by the Western Railroad due east 44 miles to Montgomery (when that short gap is finished,) marks that line as the natural and cheapest channel for the transportation of freight from the western cities, bound for east Mississippi, middle and south Alabama and south western Georgia. Vicksburg is 850 miles from St. Louis, by the river, and will be but 289 miles by railroad from Montgomery. No other route can successfully compete with it for that trade.

The value of our connection with Shreveport and Texas, by the early completion of the Vicksburg, Shreveport and Texas Railroad, cannot be over estimated. When that important road is built then our road will inevitably be the chosen railroad route for all Texas travel from and to the Atlantic States.

By the extension of the Alabama and Tennessee Railroad, to Dalton Georgia, by the construction of one hundred miles of new road, now being vigorously pushed forward, with a prospect of completing it in two years—it will shorten the line between New York and New Orleans to such an extent as to make it the shortest and fastest and therefore the preferred route—and our line from Meridian to Jackson of 95 miles will constitute a portion of the main line between New Orleans and New York.

From Charlotte North Carolina, there are also new roads being built westward which will shorten the distance considerably between Richmond and Montgomery and will draw eastern and western travel to our road.

When the bridges on this road, and the Selma and Meridian Railroad are completed and both roads put in good running order so that the trains will run through between Vicksburg and that city without interruption, which I trust will be the case by August or September next, I then anticipate a heavy business, in western freights for Selma and Montgomery, and perhaps Columbus, Ga., over our road, which will materially increase our earnings derived from hitherto undeveloped sources. There is also a good prospect for return freights from Selma. Coal and iron abound on the A. and T. R. R., and can be delivered at Selma, at rates that will justify transportation over our road. And I anticipate large shipments of merchandise from New York to Vicksburg, and other places on the line of our road, *via* Savannah and Montgomery. In addition to these new sources of business, which I confidently expect our road to enjoy, there will be a heavy lumber trade carried on from the numerous saw mills that will be erected on the line of the road.

It is the real interest of our company to hold out incentives to draw to the line of our road, an industrious and enterprising population, their productions will add to our freights, and their business will compel them to travel on our cars. I recommend a liberal policy in the disposition of the railroad lands. The prosperity of our railroad, depends upon the population, wealth and enterprise of the country through which it runs—every encouragement should therefore be held out to induce the right kind of people to settle on our lands. Manufactories of various kinds are now the hope of our country. There cannot be too many cotton manufactories started, for the good of the State; the rapid increase of its population and wealth, in this way is the only means by which our people can be made to forget their misfortunes and re-achieve their independence.

It affords me pleasure to speak in terms of sincere commendation of the officers of the company, their devotion and zeal, their integrity and sobriety entitle them to the approbation and thanks of the company.

Balance Sheet, February 28th, 1866.

Cost of road	$3,049,267	88
Cotton purchased	177,299	64
Bills receivable	9,436	34
N. E. and S. W. Alabama R. R. Co.	3,291	15
Railroad expenditures since 10th May, 1865	364,509	17
Cash	31,056	06
	$3,634,860	24
Capital stock	$357,407	69
Bonds of all classes outstanding	1,987,864	52
Notes issued to circulate as money	128,240	05
Robert McDowell	12,144	09
Bills payable	176,937	11
Railroad receipts since May 10, 1865	415,987	34
Profit and loss account	556,479	44
	$3,634,860	24

Stock Exchange and Money Market.

There is undiminished ease in Money. The supply is accumulating, and the anxiety of capitalists is to find prompt, controllable employment for their balances. More favor is shown to operators as the Stock Boards, to whom ample accommodation is granted at 4@5 per cent call. The large dealers in Government securities are offered more means than they can profitably use, at 3@4 per cent. An improved inquiry prevails for prime short date commercial paper at 5@6 per cent., and for good to fair do., at 6@7½ per cent. per annum. Lenders are opposed to the perilous system of long credits, and consequently six to twelve months' paper, of even houses in respectable standing, is very cautiously discounted. The West and Southwest are making comparatively limited requisitions for currency. All advices thence report universal monetary ease at the principal business centres, despite the increased activity in the produce markets, and the vigorous progress making in the work of marketing the crops. The Treasury Department is gradually reducing the volume of outstanding legal tender notes, and other immediately redeemable obligations of the Government. On Tuesday of this week, it paid to the local banks interest at the rate of 4 per cent. per annum, on the Clearing House certificates of deposit to the amount of $12,500,000, which, under the notice from Secretary McCulloch, given in our last, have been called in. The certificates, presented at the U. S. Sub-Treasury in this city, were stamped as "interest paid in full to date," but the greenback currency equivalent of the certificates was not drawn out of the Treasury, as it will doubtless suit the convenience of the Bank Clearing House better to make the daily settlements in $5,000 and $10,000. certificates payable to order, than in legal tender notes payable to bearer, and many of them of small denomination. The Treasury Certificates are made payable on instant demand, free of interest and of notice, in plain greenbacks. The total amount of these Clearing House certificates of deposit, outstanding prior to the call of the Treasury Department on the 25th inst., was $45,538,000, of which the city banks controlled about $25,000,000. Half of this amount has ceased to bear interest. Should the banks see fit to withdraw the non-interest bearing portion from the Treasury, as they are in a position so to do, they must find lucrative employment for it elsewhere; and such an effort can have no other tendency than to perpetuate the prevailing ease in money. Of the legal tender circulation, which on the 1st inst., stood at $555,115,732, including $155,512,140 in compound interest notes, and $399,603,592 in plain greenbacks, the banks of this city now hold $90,428,129; Philadelphia, $24,906,925, and Boston, $20,303,446, making a total of $135,688,590, and showing nearly a fourth of the entire legal tender circulation as lying in the vaults of the Banks of the three leading cities of the Union.

The city banks, in their last weekly statement, show an increase of $1,970,662 in loans, and $305,242 in specie, with a decrease of $589,990 in circulation, $449,984 in deposits, and $345,043 in the legal tender reserve. Their deposits are now $224,394,663. Their legal tender reserve as stated above, amounts to $90,428,129. Their circulation now stands at $28,770,381. The loans now reach the unprecedented sum of $272,777,166. The Bank Exchanges at the Clearing House, through the past week, averaged $100,881,220 a day, against a daily average of $94,549,868 the preceding week; and $98,567,189 the week ending with Sept. 8. The current week's exchanges average about $99,600,000 a day.

National Bank notes to the amount of $363,410, were issued last week, making the total issue to 1,660 banks thus far $292,214,725. The United States bonds held by Treasurer Spinner in trust for National Banks as security for circulating notes amount to $362,065,800; and for the public deposits, $38,709,500—making a total of $370,778,800.

The U. S. Sub-Treasury receipts, week ending with Sept. 22, were $12,453,160, including $2,399,270 from customs duties; payments, $5,680,904; balance at the close of the week, $93,857,100. against $87,684,843 at the close of the preceding week. The business of the Office during the first two days of the current week, was as follows: Monday, receipts, $4,337,837, and payments, $2,586,086. Tuesday, receipts, $1,661,011, and payments, $957,249. The balance at the close of

business on Tuesday stood at $96,312,613, against $88,901,700 a week ago.

Government revenues yielded liberally last week, again though less notably so, than during the two or three weeks immediately preceding. The income from excises was $6,785,574; from customs at the port of New York, $2,399,270, and at the outports, at least $1,210,000 more, making the grand total income for the week equal to about $12,018,995 in currency, against disbursements of only $3,693,203 on account of the three leading executive departments. The total receipts of the National Treasury, from excises, since Sept. 1, 1866, have been about $29,886,625, and since July 1, 1866, $95,009,073, equal to a weekly average of over seven and a half millions, which would give a yearly aggregate of three hundred and ninety millions. Secretary McCulloch is making judicious use of his ample revenues, in redcuing as rapidly as practicable the national obligations. It is believed that the next debt statement will show a further liquidation of more than thirty million dollars.

The gold market has been unusually tame, yet remarkably steady, all through the week. The extreme rates were 145⅛ on Thursday, and 143½ on Monday last. These rates are 1¾@1 per cent. lower than the extremes of the preceding week, and 2@2¾ per cent. lower than those of the week ending with the 12th inst. On Wednesday, the opening rate was 144⅜, and the closing figures 145⅛, or precisely the same as the opening quotations of the week. The speculative demand has been comparatively limited, but the customs inquiry has been more active. The customs demand last week, averaged $399,878 a day; thus far, this week, it has been equal to $466,995 a day, or equal to a weekly aggregate of $2,801,970. We have had further considerable arrivals of specie (last week, equal to $1,523,477) from Europe, and receipts to the amount of $1,215,072 from California, since our last. The total customs revenue of the Government, in coin, at this port, since Jan. 1, has been $101,680,560, against $70,481,855 same time last year. The exports of specie from this port, last week, were only $112,500. The total receipts of California gold at this port since Jan. 1, have been $31,612,256, against $13,728,147 same time last year, showing an increase, in 1866, of $17,884,109. The exports of specie from this port, last week, were $112,500, making the total outflow of specie from the port, since Jan. 1, $53,962,450, against $21,830,124 same time last year. Government disbursed last week through the U. S. Sub-Treasury here, on account of the September coin interest, on the public debt, chiefly on the Ten-Forty Loan, $95,400, making the total coin interest disbursements through the Government office, since Jan. 1, 1866, $31,709,565, against $25,586,011 same time last year.

The foreign exchange market has improved decidedly, since our last, under lighter offering of prime bills, and an increased demand for them, chiefly from importers, who are now energetically liquidating the indebtedness resulting from the heavy importations for the fall trade. Bankers' sixty day bills on London are now quoted 108@108¼, and on Paris to 5.25@5.20; sight bills on London to 108¾@109¼; and on Paris to 5.22½@5.17½. There have been rather more produce bills offering, consequent upon a slightly augmented volume of exports. The week's exports of domestic produce and miscellaneous goods have been to the currency value of $3,335,610, against $3,704,475 same week last year. The exports since January 1, have been to the value of $143,286,217, against $114,908,834 same time last year.

Government securities have been in moderate demand, this week, almost exclusively for home investment purposes, and prices have been comparatively steady, the main fluctuations having been in the compound interest notes, which the banks were buying eagerly at advancing prices early in the week, but which have been lightly dealt in for a few days past at easier rates. There have been no large lots of the gold bearing bonds, or the seven-thirties pressing on the market; and this circumstance has been interpreted as an evidence of popular confidence, not only in the permanency of prevailing prices, but in the elasticity of the market, giving promise of an early improvement, on the inevitable renewal of foreign orders for the Five-twenties. U. S. Sixes of 1881 closed 111½; U. S. Five-twenties of 1882 at 111¼@111⅜; U. S. Five-twenties of 1865 at 108⅜108½, U. S. Ten-forties at 98⅞@99, and U. S. Seven-thirties at 105⅞@106. The brokers are buying the compound interest notes at the following rates, and selling at an advance of ¼@½ of 1 per cent. on these figures:

June, 1864	117¼	May, 1865	112¼
July, 1864	116¾	August, 1865	110¾
August, 1864	116¼	September, 1865	110¼
October, 1864	115¼	October, 1865	110
December, 1864	114¼		

Railway and miscellaneous property has been in good request, and buoyant in price, all through the week. Speculation has been active in a few lines, such as Erie, Cleveland and Toledo, New York Central, Hudson River, and Mariposa preferred shares, and higher prices have been realized, the market closing buoyantly, with indications of a further advance, on the passing away of the racing attractions, which withdraw from the street many of the most intrepid operators, especially from the bull "side of the house." The rise in Cleveland and Toledo shares is attributed to an anticipation of a semi-annual dividend of eight per cent.

In produce and merchandise there has been a vigorous movement. Breadstuffs and cotton have been in very brisk demand, largely on speculative account, in view of the unfavorable weather and crop reports, and prices have advanced materially, though closing with rather less buoyancy. The week's exports of cotton have been 4,763 bales from this port, and 12,500 bales from all the shipping ports, leaving an available supply of 96,000 bales here. Provisions have been in fair request, closing more firmly. In foreign merchandise, business has been moderately active, especially in dry goods, which, however, have been offered more freely, and in some instances at lower prices. Domestic cotton goods have been maintained in value by the buoyancy in the raw material. The total imports of foreign dry goods, last week, were $2,462,663, and the total amount marketed $2,625,781. The value of foreign merchandise imported last week, was $3,028,249—making the grand total specie value of last week's imports of dry goods and merchandise, $5,490,912, and since January 1, $231,882,297, against $133,836,829 same time last year. The freight market is less active and heavy with 543 vessels of all classes in port.

The latest quotations at the London Stock Exchange compare as follows with former returns:

	Sept. 11.	Sept. 17.	Sept. 22.
Consols	—@89¼	89¾	89¼
U. S. 5-20's	—@71¾	72½	72½
Erie	—@44½	46½	48
Ill. Central	—@78½	78¾	78½

The New York exports, exclusive of specie, for the week ending Sept. 18, and since the beginning of the year, compare as follows:

	1865.	1866.
For the week	$3,704,475	$3,335,610
Prev. reported	111,204,359	139,950,607
Since January 1	$114,908,834	$143,286,217

The New York imports for the week compare as follows:

	1865.	1866.
Dry goods	$4,020,412	$2,462,663
Gen. merchandise	3,817,968	3,028,249
Total for the week	$7,838,380	$5,490,912
Prev. reported	125,998,449	226,393,385
Since January 1	$133,836,829	$231,884,297

The balance in the Sub-Treasury on Wednesday was $97,432,460 60.

The following quotations of sales of Railway and other securities are in addition to those given elsewhere in our columns:—

Ohio and Mississippi Railroad.

The sale of the Ohio and Mississippi Railroad has been postponed by the Trustees, and the transfer books will not be closed until the 16th of October next. A special meeting of the holders of certificates will be held at the office of the Trustees on the 1st of November, to adopt a plan for the reorganization of the company. The agreement under which the trust was formed, requires that three-fourths in interest of the owners, or their legal representatives, of the preferred and common certificates shall be present and voting in order to act upon the question.

☞ The *Tribune* says that the Hudson River Railroad Company has "put into its up track, south of Manhattanville, several thousand tons of steel rails. The track has been relaid, and five ties put in where four were taken up. The new rail is laid with long chairs extending from tie to tie, and instead of the heads of the rails being pounded by ever passing wheels, a smooth service is presented, which reduces the motion of the cars and the wear and tear of the rolling stock to a degree which will tell seriously upon the cost of repairs."

Ogdensburg and Lake Champlain R. R.

The directors of this road offer to the holders of the first mortgage bonds of the Northern (now Ogdensburg and Lake Champlain) Railroad 5,000 shares of eight per cent. guaranteed preferred stock, free from Government tax, in exchange for $500,000 of bonds, to be exchanged at par, without interest, one share of stock to be given for a hundred dollar bond. The exchange will be made on the 2d of October next. According to the report of this company for the year ending Sept. 30, 1865, an abstract of which we gave in our issue of the 15th inst., the whole amount of first mortgage bonds outstanding is $1,494,900; capital stock (exchanged for 2d mortgage bonds of like amount) $3,077,000.

James River and Kanawha Canal.

The Richmond papers are getting impatient at the delay of the "French Company" to complete the James River and Kanawha Canal, and are asking if some other company or the State cannot be induced to finish this great public improvement. It is believed that this enterprise would accomplish for Virginia what the Erie Canal has for New York. The project is not only of importance to Viiginia, but to the rest of the Union, as more lines of communication with tide water are needed as outlets for the enormous and constantly increasing production of the great and fertile West. Millions of bushels of wheat and corn are lost every year for want of facilities for reaching a market, the present cost of transportation being so excessive that the farmers cannot get a profit on their grain.

New London Northern Railroad.

The extension of this road from Amherst, Mass., to a connection with the Vermont and Massachusetts railroad at Grout's Corner, a distance of about 14 miles has been completed. The formal opening of the road took place on the 18th inst. The road is now about 101 miles in length, and has cost $1,200,000, or $12,000 per mile—the recent extension costing the sum of $300,000. Grout's Corner is 48 miles from Fitchburg and 21 from Brattleboro'.

Memphis and Little Rock Railroad.

The work of constructing the Memphis and Little Rock Railroad is in process of vigorous prosecution. The Memphis (Tenn.) *Post* says it is in the hands of enterprising men, who are offering two dollars and a half per day for laborers, and guaranty that their board shall not cost them more than fifty cents a day. The country through which the road is to run is healthy and the water good.

☞ The total earnings of the Southwestern (Georgia) Railroad for the year ending July 31, were $856,845. Expenses $531,044 13; leaving $343,807 48 as net earnings. To this add $58,000 new construction bonds, making $401,801 47. Amount paid for dividend, taxes, interest on bonds, construction, &c., $370,096 39, leaving a surplus $31,705 08.

☞ J. D. Herkimer, Esq., has been appointed Superintendent of the St. Louis, Alton and Terre Haute Railroad.

☞ The formal opening of the St. Paul and Pacific Railroad to St. Cloud took place on the 13th inst.

Railroad Earnings.--Weekly.

The traffic of the Great Western Railway of Canada, for the week ending Sept. 21st, 1866, were $65,321 99
Corresponding week of 1865 ..... 95,464 92

Decrease $30,142 93

The earnings of the Grand Trunk Railway of Canada for the week ending Sept. 15th, 1866 were $139,218 00
Corresponding week of previous year.. 150,186 00

Decrease $10,968 00

The earnings of the Marietta and Cincinnati Railroad the 2d week in Sept., 1866 .. $26,384 00
Corresponding week previous year..... 27,848 50

Decrease $1,464 50

The earnings of the Western Union Railroad for the week ending Sept. 21, 1866 . .. $21,535 15
Corresponding week previous year..... 18,512 71

Increase. $3,022 44

The earnings of the Michigan Southern and Northern Indiana Road for the 3d week in Sept., 1866, were $107,369 00
Corresponding week of 1865 ..... 108,518 00

Decrease $1,149 00

The earnings of the Detroit and Milwaukee Railroad for the third week in Sept., 1866, were $41,409 00
Corresponding week of 1865..... 45,446 00

Decrease $4,037 00

The earnings of the Chicago and Great Eastern Railway for 2d week in Sept. were $25,373 00
Same period last year..... 24,174 00

Increase in 1866. ..... $1,199 00

The earnings of the Chicago and Rock Island Railroad for the 2d week in Sept., 1866, were..... $89,512 00
Corresponding week of previous year.. 93,921 00

Increase $4,409 00

The earnings of the Chicago and Northwestern Railway for the second week in Sept., 1866 were..... $223,473 00
Corresponding week of previous year,. 223,836 00

Decrease $363 00

The earnings of the Michigan Central Railroad for the 2d week in Sept., 1866, were ... $92,647 91
Corresponding week of previous year.. 109,307 72

Decrease $16,659 81

☞ At the recent annual meeting of the stockholders of the Hartford and New Haven railroad, a vote was passed merging the stock of the New Britain and Middleton Railroad Company with that of this company—the same to be divided *pro rata* among the stockholders—which is a virtual increase of the capital stock $150,000.

☞ The Southbridge branch of the Boston, Hartford and Erie Railroad is completed as far as Gleason & Weld's mills, two and a half miles from Southbridge village. At the present terminus there is iron enough to complete two more miles. Mr. Dewey, who has charge of the work, has now a force of twenty men.

☞ A contract for the completion of the road-bed of the Holly, Wayne and Monroe Railroad, in Michigan, 20 miles north of Monroe, has been taken by two contractors, and work is to begin at once.

Journal of Railroad Law.

NEGLIGENCE AT STREET CROSSING.—KEEPING A FLAGMAN AT CROSSING.

The case of Warner *vs.* The New York Central Railroad Company involves the question of the liability of the company for the negligence of a flagman at a road crossing. The facts are sufficiently stated in the opinion of the Court.

JOHNSON, J.—There was no request by the defendant's counsel to have the plaintiff non-suited, or to have the jury directed to find a verdict for the defendant upon the evidence. On the contrary it was treated as a proper case for the jury, by the counsel on both sides, and the verdict must be deemed conclusive upon the questions of fact in issue, and which were submitted to, and passed upon by the jury. That it was a proper case to be submitted to the jury upon the whole evidence, and in view of all the facts and circumstances disclosed thereby, does not admit of a doubt. The order of the special term, refusing a new trial, must therefore be affirmed, unless there was some error in the charge to the jury, or in refusing to charge as requested. Only one error in relation to the ruling in the admission of evidence is claimed by the defendant's counsel to have been committed. It is claimed that the Court erred in admitting evidence of the habits of the defendant's flagman employed at the crossing where the injury in question happened, for sobriety, for several weeks previous to the occurrence. The ruling, it seems to me, was clearly right. Evidence had already been given tending to show that on the occasion of the collision in question, this flagman was intoxicated, and was absent from his post of duty, and that this was one reason the plaintiff had for supposing that no train could then be due or near due. The defendant had adopted the precaution of keeping a flagman at that crossing years before, and had continued it up to the time in question. This mode of giving notice of the approach of trains had been continued so long and had become so much a custom on the part of the defendant, that the plaintiff and all the traveling public who understood it had a right to regard it, and take it into the calculation of the measure of safety, in crossing at a given time. It is not necessary in order to vindicate the correctness of this ruling, to hold that the absence or presence of the flagman would be a controlling fact. It is only necessary to say that it is one fact or circumstance which a party might properly notice, and take into account, when wishing to cross. This being so, it was clearly proper to show that the flagman had for some weeks before the occurrence been indulging in habits of intemperance, so as to unfit him for the duties of his important situation, as bearing to some extent on the question of the defendant's carelessness, which was one of the material questions in issue. In regard to the charge to the jury, it will be seen, in respect to most of the alleged errors insisted upon in the points of the defendant's counsel, that they are altogether unfounded in point of fact.

In many of the instances, if not all, the Judge, on his attention being called to the matter by the defendant's counsel, charged precisely as requested by him. This of course cured any error the Judge may have previously committed in charging to the contrary, if he had done so. No exception will lie to a charge in such a case on any point thus modified or corrected.

Two or three points of difference between the requests of the defendant's counsel and the charge should, however, be noticed.

The Court was requested to charge that the rights of a citizen to the highway, at a railroad crossing, are subservient to the rights of the corporation. The Judge refused so to charge, and to this refusal there was an exception. In point of law the Judge was clearly right, The corporation, by acquiring the right to construct its road, and acquiring title to the land for its road bed, for that purpose, does not destroy or impair the public easement. The perfect and unqualified right of every citizen to pass over the road at that point remains the same as before. It is not a question of superior or subordinate right, in passing, which arises in a case of this kind, but a question merely of the exercise of suitable caution and prudence, by either party in the exercise of a common and equal right.

This proposition of the defendant's counsel seems to pervade all the requests to charge, and all the exceptions to the charge as made on the subject of the care and prudence required of the defendant in crossing highways, the Court holding that the corporation was bound to exercise a proper degree of care and prudence toward the traveling public, and the defendant's counsel insisting that they were legally exempt from all care in that regard. It is sufficient to say, upon this head, that the Court was altogether right in this respect, and the position of the defendant's counsel altogether wrong and wholly untenable.

The Court also charged that the corporation was under legal obligation to keep a flagman at a road crossing; but further instructed the jury, that if it had been for a long time accustomed to keep a flagman there, and the public were accustomed to see him there, they would have the right to suppose that no trains were coming when he was not out. This latter portion was excepted to. Taking this in connection with what had been charged previously, it was entirely proper. The whole question of the plaintiff's negligence had been fully submitted, and the jury had been expressly instructed, that if the injury resulted from his own negligence, in any respect, he could not recover. There can be no doubt that the proposition was true, that when the defendant had for a series of years kept a flagman at a particular point, for the purpose of giving notice of the approach of trains, and the public had been accustomed to see him there uniformly, giving warning by signals, or otherwise, whenever trains were due and approaching, they might naturally suppose, and indeed would have the right to suppose, that no train was due or approaching, if the flagman was absent from his post. Indeed it appears by the evidence that the plaintiff on the occasion, remarked upon the absence of the flagman as evidence that no train was then due. If this was a place of danger, so much so that the defendant had voluntarily undertaken the duty of keeping a watchman there, and continued it through a series of years till the public had become accustomed to regard his presence or absence, as one of the evidences of the approach of trains, or otherwise, it was undoubtedly a part of such duty to keep a fit person, whose conduct

would not be liable to mislead and deceive the traveling public. An unfaithful, incompetent, or intemperate agent, would obviously be far more dangerous to the traveling public than none at all. Instead of a guiding beacon, it would be holding up a false light, to allure into danger. On the whole, I am of opinion that there was no error, either in the charge, or in the refusal to charge as requested, in any particular. The case exhibits somewhat more than the usual amount of skilful skirmishing by astute counsel for some advantage after the charge to the jury was made; but I do not see that any signal advantage was gained to the prejudice of the merits of the controversy, which the jury determined.

The order refusing a new trial should therefore be affirmed.

Railway Progress in Russia.

For two or three years the work of railway making has been prosecuted with immense activity—not, it must in justice be admitted, with an eye chiefly to military use, but for the sake of commerce, though the military uses must inevitably follow. An official review just published in St. Petersburg enables us to see what lines are now complete or rapidly approaching completion, and what other lines are designed as most necessary, on which the Government will concentrate all its energies during the next few years. It is possible, therefore, to point out with some accuracy what sort of railway system Russia will possess at a not very distant date. In point of mileage a great deal has already been done, or is fast approaching completion, though not so much as to make a network embracing the whole empire in Europe. There is first the trunk line from St. Petersburg to Moscow, 400 miles; small branch lines from St. Petersburg, about 50 miles; the St. Petersburg and Warsaw line, with a branch towards the Prussian frontier, about 800 miles; and the line from Warsaw to the Austrian frontier and branches in Poland, about 446 miles. This is what has been done in the north and west. In the south there is a short length in the interior from Odessa to Balta, with a branch westwardly towards Tiraspol, about 256 miles, entirely disconnected with the northern system. About 90 miles are also being made in the valleys of the Volga and the Don near Grouchevsk. Various lines again radiate from Moscow eastward to Nijni-Novgorod, about 274 miles; north-eastward, to Serguievsk, 44 miles; south-eastward, to Riazan and Koslof, 260 miles. Last of all we have reckoned in this list the line, which is certainly not far advanced, from Dunaburg by Witepsk and Smolensk to Orel, about 630 miles. Altogether these lines extend to about 3,235 miles, of which about 2,570 miles are already open to the public. When these are quite complete Russia will have two great trunk lines from the heart of the empire to the north-west and the Baltic—viz., from Moscow to St. Petersburg and from Orel to Dunaburg and Riga, besides one or two disconnected lines in the south, those which radiate eastward from Moscow, and the great trunk line from St. Petersburg to Warsaw, and towards the Prussian and Austrian frontiers. The great defect is in the south, hardly more than one or two steps having been taken to connect Moscow and Orel, and thereby the Baltic provinces with the south, and the ports of the Black Sea, Sea of Azof, and the Caspian Sea. The defect is great commercially, but even more important in a military point of view, for the principal stations of the Russian army are in the south, as well as the principal coal mines, on which dependence must be placed to keep the railways in operation. It is in the south then we find the principal works of the next few years will be made. First of all Moscow and Orel are to be connected in the course of next year, and in the year following this line will be continued south of Koursk, a distance altogether of about 340 miles. The next on the list is a farther continuation of this line south-westward to Kiev—290 miles, and thence to Balta—280 miles, by means of all which, in connection with the Odessa-Balta line already mentioned, Odessa will be linked with both Orel and Moscow, and the first great trunk communication between north and south accomplished. At the same time, a new connection will be made with the European system by means of a branch towards the Austrian frontier in Galicia from the Kiev-Balta line, about 112 miles in length. The next important project is a line of about 480 miles, to continue the southern line from Moscow to Koursk by way of Kharkof to Taganrog or some other port on the Sea of Azof; and it is likewise proposed to connect Balta and Kharkof by a line of about 400 miles. There are also one or two branches projected, such as a continuation of the south-eastern line from Moscow to Morchansk, of the Odessa-Tiraspol line to Kichinef and the like; and far out of the European system progress is being made with a Trans-Caucasian line from Poti to Tiflis, intended to be prolonged to Baku, by which the Caspian and Black Sea will be connected. Altogether these lines, marked "urgent," will form an addition to the present system of about 2,250 miles, and their completion is expected during the next four, or, at the latest, the next six years. There are other schemes behind these which will also be rapidly pressed forward, of which we may notice the southern trunk line to Sebastopol, leaving the present system at Kharkof, and whose military importance needs no comment; and the eastern line from Orel to Saratov on the Volga, which will be of great value after Orel is connected with Riga. We may take it for granted, then, that four years and more must elapse before Russia could throw her sword into the scale with much effect in a European war. But at the end of that period it is obvious Russia must lean with greater weight on all her neighbors. All the great centres in her European territory by that time will be interconnected. For operating in the west, Russia will have the new trunk line from Orel to Dunaburg to bring up troops, while she will be able to operate in the south by the lines from Kiev southwards towards the Austrian and Turkish frontiers. The only missing link in the system would then be another transverse line from south to north-west—say from Kiev to Warsaw—which would make Russia still more mobile towards both Austria and Prussia. In the meantime, however, the military activity of Russia is perforce adjourned, and for some years to come the empire and other countries are likely to reap undisturbed the benefit of the increased prosperity which railways will bring.

☞ The following gentlemen have been elected directors of the Hartford and New Haven railroad for the ensuing year: Charles F. Pond, Julius Catlin, H. C. Robinson, Cornelius Vanderbilt, John A. Robinson, Ezra C. Read, Chester W. Chapin, A. G. Hazard, Samuel H. Parsons.

☞ Trains have commenced running on the Alexandria, Loudoun and Hampshire railroad to Belmont station, five miles from Leesburg.

☞ Regular trains began to run over the Dighton and Somerset Railroad on Monday.

Canadian Railways.

The following is an official statement of the Traffic Returns of the Canadian Railways for the month ending August 31, 1865 and 1866:

Interest and Dividends.

The Hartford and New Haven Railroad Company have declared a quarterly dividend of three dollars per share, payable free of tax, Oct. 1st.

The Lowell and Lawrence Railroad Company have declared a dividend of $3 per share, payable Oct. 1.

The Ogdensburg and Lake Champlain Railroad Company have declared a semi-annual dividend of four per cent. on the preferred stock, payable Oct. 1.

The Panama Railroad Company have declared a dividend of four per cent. out of the earnings of the road for the three months ending 30th inst., and two per cent out of the earnings of steamers, sailing vessels, etc., payable Oct. 5.

The Danbury and Norwalk Railroad Company have declared a 3 per cent. semi-annual dividend.

The interest coupons of the first mortgage bonds of the Chicago and Great Eastern Railway Company, due Oct. 1st, will be paid on and after that date (less government tax) on presentation at the office of the company, No. 37 William st., N. Y.

Coupon No. 3 of the first mortgage bonds of the Vermont Valley Railroad, due October 1, 1861, will be paid on and after October 1, 1866, at the office of the Treasurer, in Bellows Falls, Vermont. The same coupon will be paid for the space of thirty days from and after said October 1, 1866, at the National Park Bank in the city of New York.

☞ The Massachusetts State Engineer has expressed the opinion that the Greenfield end of the Troy and Greenfield Railroad ought to be built immediately to the tunnel. The road will be put under contract at once.

☞ A new railroad is projected on Staten Island. It will run from Mariner's Harbor to Vanderbilt Landing. Theodore J. Fonda is the President of the company. It will have a capital stock of $300,000. Over $1,000 per mile has already been subscribed, and 10 per cent. paid in.

SHIP FELT, CARPET FELT, BOILER FELT.

THE very superior Felt, manufactured by the Lowell Felting Mills, can now be furnished in quantities to suit purchasers, from the new and extensive mills now completed. Also, pipe, truss, upholstery and all other Felts. Apply to the branch office of the Company.

FIRST MORTGAGE BONDS

OF THE

Central Pacific Railroad Company,

OF CALIFORNIA.

Interest at the rate of Six per Cent. per Annum, payable Semi-Annually.

Principal and Interest payable in U. S. Gold Coin in the City of New York.

Amount of Issue, $7,336,000.

IN COUPON BONDS OF $1,000 EACH.

The Bonds have Thirty Years to run, and are secured by a First Mortgage, constituting an absolute prior lien on that portion of the Road, Equipments, Franchises, and Entire Property of the Central Pacific Railroad Company, located in the State of California, and extending from Sacramento City to the California State Line, forming a part of the GREAT PACIFIC RAILROAD ROUTE, adopted and aided by the UNITED STATES GOVERNMENT.

The amount of these First Mortgage Bonds to be issued per mile is limited by law to the amount of United States Bonds allowed and issued to aid the construction of the Road, and the Mortgage by which they are secured is *declared by Act of Congress to constitute a lien prior and superior to that of the United States Government.*

The aid received from the Government (in amount equal to this First Mortgage) is economically and judiciously applied to the construction and equipment of the Road, together with nearly $7,000,000, received from Stock Subscriptions and other sources. The First Mortgage therefore amounts to but about 35 per cent. of the actual cost and value of the Property which it covers.

The road is now completed, equipped and running from Sacramento City to Alta, a distance of 73 miles, and the earnings for the three months ending August 1st were as follows, viz.:

		IN GOLD.
May, 1866		$65,115 83
June	"	67,429 78
July	"	85,000 00

The earnings are steadily increasing, and are estimated at over $100,000 in Gold for the month of August—the official report for that month not having been received at this date.

The construction of the road is going vigorously forward, and it will probably be in full operation to the California State Line—156 miles from Sacramento City—during the summer of 1867, when its earnings must be very large, as the entire trade of Nevada, and a large proportion of that of Utah, Idaho and Montana must pass over its line. It has been shown by reliable statistics that in 1863 over $13,000,000 in Gold was paid for freighting goods from California to Nevada alone.

This part of the Great Pacific Railroad Route is destined to be one of the most profitable lines of railroad in the world, and its First Mortgage Bonds are among the best secured and most desirable investments ever offered.

Over $1,000,000 has already been expended in grading beyond the point to which the road is now running, and the iron is bought and paid for sufficient to lay the track the entire distance to the State Line.

The Road has been completed and equipped thus far without the sale of a single dollar of its First Mortgage Bonds, and they are now offered to the public for the first time, after the earnings of the Road have reached the sum of $100,000 per month in Gold, only about 25 per cent. of which is required for operating expenses.

The interest is payable on the first days of January and July, at our office in the city of New York.

The Bonds are offered at 95, and accrued interest from July 1st, in Currency. Orders may be forwarded to us direct, or through the principal Banks or Bankers in all parts of the country.

Remittances may be made in drafts on New York, or in Legal Tender Notes, National Bank Notes, or other funds current in this city, and the Bonds will be forwarded to any address by Express, free of charge. Inquiries for further particulars, by mail or otherwise, will receive punctual attention.

FISK & HATCH, Bankers,

No. 5 Nassau St., New York.

N. B.—All kinds of Government Securities received at the full market price in exchange for the above Bonds.

New York, Saturday, October 6, 1866.

Coal and Coal Mines of New Brunswick.

We have received from Professor Bailey a copy of a "Report on the Coal and Coal Mines of New Brunswick," prepared at the request of the Lieut. Governor. Similar reports have been ordered from Nova Scotia and the other coal-producing colonies of Great Britain.

Professor Bailey's remarks are necessarily brief. He points out the fact that more than one-third of the province of New Brunswick, or an area of from 7,000 to 8,000 square miles, is covered by rocks of the carboniferous or coal-bearing series, being a continuation of the same series in the adjacent province of Nova Scotia, the combined extent of the two being as much as 18,000 square miles. While, however, in the latter, coal seams are numerous, and collectively of great thickness, those of New Brunswick are few, small, and for the most part unimportant.

Upper and lower formations, essentially unlike in Nova Scotia (the former having a thickness of 3,000 feet more, with thin seams of coal and limestone, the latter 4,000 feet thick and containing for the most part the workable coals) extend into and occupy a wide area in New Brunswick, but here exhibits a far less thickness, and as yet have not been certainly distinguished from each other.

The area occupied by these formations covers large portions of the counties of Queen's, Sunbury, York, Kent, Northumberland, and Gloucester, a triangular district, of which the two longest sides are about 150 miles each in length, and the shorter as much as 100, besides several small and detached areas near the southern coast. While thus largely developed in superficial extent, the coal measures of New Brunswick are believed, from various geological data, to attain but little thickness, the strata comprising them being for the most part nearly horizontal, and penetrated, even near the centre of the coal-basin, by rocks of older metamorphic series. Much of the district which they occupy is still covered with forest, so that any conclusions as to the productiveness of the formation in unexplored parts must be to a considerable extent conjectural. Where known, however, they have given as yet but little promise of large or valuable beds of coal.

The strata of the coal measure above alluded to are sandstones, conglomerates, and shales, usually grey in color and coarse in texture. The coal seams associated with these rocks are numerous, but thin, the thickness of the largest yet known (that of Grand Lake) not exceeding 22 inches. In all cases the coal is a caking coal, highly bituminous and ready of ignition, but requiring frequent stirring for complete combustion. It is often much contaminated with pyrites, from which, however, it may be freed by careful screening. It will yield about 8,500 feet of gas per ton, but of a very inferior quality, and is not applied to this purpose. It has been principally employed as a house coal and for manufacturing purposes. While not so well adapted for the former use as the foreign imported coals, it has, from its comparative cheapness, attained a local consumption, principally in Fredericton, the capital, of nearly 6,000 chaldrons annually, and for blacksmiths and certain other uses is preferred to any of the imported varieties. The market value of Grand Lake coal in the city of Fredericton was in 1865 *11.10s. 6d.* currency per chaldron, while in St. John (where foreign coals are very cheaply introduced by way of ballast) it was comparatively little used.

The lateral extent of the Grand Lake beds has not yet been ascertained, this portion of the province being largely forest-clad, but the nearly uniform thickness of such beds as have been observed leads to the conclusion that they extend over a considerable tract of country.

☞ The canal between Washington and Alexanderia is to be re-opened. The business of the latter city, it is said, is rapidly increasing.

North Missouri Railroad.

The earnings and expenses of this road for the years ending March 1, 1865 and 1866, have been as follows:

Earnings:	1865.	1866.
From passengers	$441,409 85	$575,910 81
" freight	483.589 03	418.678 52
" mails	25,500 00	25,500 00
	$950,498 88	$1,020,089 33
Expenses, viz:		
Repairs of road	$93.094 54	$153,422 63
" bridges	8,733 09	41,129 70
" buildings	16,427 07	32,564 04
" engines	56,981 03	70.070 13
" cars	65,026 40	58,643 79

West Branch	62,160 83	
	$84,244 78	
Less 50 Main Line bonds	50,000 00	
		34,244 79
Interest on 1st mort. bonds		1,750 00
Pay rolls and vouchers unpaid—less than previous year		250 92
Excess of cash and supplies on hand over previous year		33,414 92
Total, as above		$267,803 81

Compared with the previous year, the gross earnings of 1865–'66, show an increase of $69,590 45; with an increase in expenses of $111,664 50—making the decrease in net earnings, $42,054 05. The Report says:

As we anticipated, there was a small falling off in our net earnings. Every county had been fought over, and a large portion of the population had been driven out of the State. There were no laborers to till the lands, and farms went uncultivated and unoccupied. There were no supplies bought or kept on hand except such as immediate necessity required, and produce was to a great extent consumed at home or by the army, leaving little for shipment to market, or return freight to be carried to the producer. The war closed, but not in time to cultivate farms last year by immigrants, or our returned citizens who had fled from the State to avoid guerrilla warfare. A very different state of things now exists. Capital and population are rapidly coming to the State. Every farm is under cultivation, and our business this fall will certainly be largely increased.

That portion of our road now completed and equipped, with its extension to Iowa, and the West Branch to Leavenworth, constructed, will occupy the best portions of the State of Missouri.

It is well settled, as a general principle, that railroads must mainly rely for profits on their local business, and in this respect no railroad in this country can anticipate a brighter future than that which seems to await the North Missouri Railroad.

It should be borne in mind that the net earnings of this road have been made under the most disadvantageous and discouraging circumstances, and that our business was greatly injured instead of being benefitted by the war.

Our total earnings from the United States for the transportation of troops and freight from April, 1861, to the present time was $321,767 82, whilst that of the Missouri Pacific and Hannibal and St. Joseph Railroads was about two million and a half of dollars for the same period.

Our road was partially destroyed in June and July, 1861, and for one hundred miles on the 20th of December, 1861, every bridge and culvert was burned; our depots, cars and engines injured, ties and fuel on the road burnt, the track torn up and iron bent. This greatly injured our business for a long time; and the constant state of war deprived us of much business. In September and October of 1864, we had two trains of cars and seven depots burned, and engines injured, and our road was so occupied by rebels that we lost a full month's business, and travel was greatly reduced by passengers being deterred from going over our road.

In addition to the drawbacks on our business caused by the war, most onerous, and, as we think, unjust terms have ever been exacted from us on the part of the Hannibal and St. Joseph road, on all through business. Our arrangement under the contract now existing is, that the Hannibal and St. Joseph Railroad Company shall in all things act with entire impartiality in reference to our company, on condition that we are to have of the earnings in the summer, or for nine months, when the rivers are open, a *pro rata* of forty-five per cent.—they fifty-five; whilst in the winter, or three months, we get fifty-three and they forty-seven per cent., we carrying one hundred and seventy miles, they only one hundred and thirty-three miles. When our West Branch shall be completed so that we have another line to St. Joseph, we shall no longer have to submit to the discrimination of forty-five per cent. for our share, against fifty-five per cent. for the Hannibal and St. Joseph share, whilst we carry thirty-seven miles the farthest.

When our road was completed to Macon City, where it connects with the Hannibal and St. Joseph Railroad, its means were exhausted. We had the track down, and that was about all that could be said. A great deal of work on the road bed was needed, and there was no rolling stock worth naming, nor depot buildings, nor water stations, with wholly insufficient depot grounds at many points, and especially in St. Louis and St. Charles. The net earnings have supplied and paid for all these. We feel that we can, with what road we have completed, rely upon our net earnings being annually materially increased by the natural increase in wealth, population and productiveness which would ever be tributary to it; and that when our West Branch is completed so as to enable us to reach Brunswick, Richmond, in Ray County, Lexington, in Lafayette Co., Kansas City, where we will connect on the same gauge with the Pacific Railroad; Parkville and Leavenworth, in Kansas, where we connect with another stem of the Pacific Railroad, of our gauge; Weston, where we connect with the Platte County Railroad, which is to be extended north to the Iowa State line; with the Pacific road coming in at Atchison; and through the Platte County Railroad and the Council Bluffs Railroad, with the Pacific road coming in at Omaha and Council Bluffs; and through the St. Joseph and Council Bluffs road with Sioux City, and through our main line from Macon to Iowa, connecting us with all the railroads of Iowa and Minnesota, and giving us a connection with Dubuque and St. Paul, all of the gauge of our road, that we cannot place a limit on what the receipts of our road will be. We do not think there is a road in the country that has a richer territory, locally, tributuary to it in all its length, nor one that has more favorable railway connections in the prospective for increasing its business.

At the session of the Legislature in 1865, an act was passed releasing the State lien on the North Missouri Railroad, and authorizing the North Missouri Railroad Company to issue its first mortgage bonds for six millions of dollars, to be secured by the one hundred and seventy miles of road already built and equipped, and all that the said six millions would build in addition, together with a bridge over the Missouri River, which was to be built out of five hundred thousand of said six millions. We believe that the road already constructed would, within a few years, be ample security for this sum—that the net earnings from this source alone would, in less than five years, be sufficient to keep down the interest on the six millions of first mortgage bonds. Can any one doubt that with the West Branch of this road built, and with its extension to Iowa, it will be able to keep down the interest on the six millions of bonds? The six millions of bonds are to be applied as follows: Four millions to build the West Branch from Moberly to St. Joseph, or any point south of St. Joseph; one million and a half to extend the main line of the road from Macon to Iowa, and half a million to bridge the river at St. Charles. These sums, from reliable data, we are satisfied will accomplish each object. It is our expectation now to build the West Branch by Leavenworth, to Weston, a distance of one hundred and fifty-six miles; there to connect it with the Platte County road. Our Iowa extension will be sixty-six miles long, so it may be stated that when our roads are completed we shall have: The main line, from St. Louis to Macon, one hundred and seventy miles long; the West Branch, from Moberly to Weston, one hundred and fifty-six miles long; the extension, from Macon to Iowa, sixty-six miles long; in all, three hundred and ninety-two miles of completed railroad, and a bridge over the Missouri River at St. Charles, as security for six millions of dollars. With such security, we regard the first mortgage bonds of the company as the best in the market. They are free from all State, county, or city taxation; and whether held in or out of Missouri, if held as Missouri property, will be exempt from taxation, which makes them, at par, equal to near a ten per cent. loan of money, where taxes have to be paid. They are a far better investment than real estate, where rents are to be collected, insurance looked after, and heavy taxes to be paid.

At the time the passage of the act to release the State lien was proposed, the question as to the power of the State to release the lien was raised, and the Attorney General, and other eminent legal talent in and out of the Legislature, gave their opinions that there was no question as to the State having the power to release her first lien. Subsequent to the passage of the act, the Governor of the State called upon the Supreme Court for their opinion as to the power of the State to release the prior lien of the State, and they gave their opinion unanimously that the State had the power to release the lien of the State, and allow the first mortgage to be given.

In addition to the first mortgage bonds provided for building the West Branch and extension to Iowa, there is $35,000 due from each of the Counties of Schuyler and Adair, for the extension to Iowa. Then for the West Branch we have 25,000 acres of land in Chariton County, besides

Valuable depot lands, in all worth	$150,000
Carroll County subscription	175,000
Ray " "	200,000
Leavenworth County subscription	250,000
Leavenworth City "	250,000
Total	$1,025,000

On the West Branch several miles of the grading is done, and about twelve miles completed on the extension to Iowa. We have had propositions which assure us that even at prices in advance of those ruling now we should be enabled to complete the work provided for in the act granting us the right to issue the six millions of first mortgage bonds.

We submit as part of this report the report, of our Consulting Engineer as to the cost of the bridge over the Missouri River at St. Charles. If built of iron, at present prices, it will exceed somewhat the means applicable to it; if of wood, our means will enable us to accomplish it out of the bonds alone. It is our present intention to make it of iron, believing that our surplus net earnings will enable us to supply any deficiency; and even if this should not be the case, we can unite private capital to accomplish it. At present, the crossing of our freight and passengers at this point costs the company not less than $50,000 per year, whilst annoyances, obstructions, and delays in the winter, cause a loss of at least $50,000 more; so that rather than dispense with the bridge we could afford to guarantee an interest of ten per cent. upon a million of dollars to secure its construction.

Our present crossing is a great improvement over the old mode of unloading cars on each side of the river and wagoning over all freight, whereby great losses were sustained from stealing, breakage and delays. It is the next best thing to a bridge; but in the winter time, when the river is about closing with ice, we cannot cross for days and weeks at a time, which causes us to lose much business, whilst all of our expenses con-

tinue, as we cannot dismiss and employ our corps at will.

We have reason to hope that a similar mode of crossing will be adopted at St. Louis, so as to connect our freight and passenger depots with the roads terminating from the East. The Chicago, Alton and St. Louis Railroad Company have made arrangements with the Upper Ferry Company looking to this end; and we doubt not it will before a great while be put into practical operation.

The people of St. Louis have always desired to have a Union depot for the Pacific, Iron Mountain, and this road. When the Iron Mountain Railroad is completed south so as to connect with Southern Railroads, it will be important for that road and this to connect on the levee, to save the trucking of freight and delays to passengers; but it is not likely that it will be important that the Pacific and this road should occupy the same depot, as our hours of arrival and departure will hardly be the same, and there will be very little exchange of business between us. Each road will bring products for the markets East or South, and not for the roads of each other; and the same in regard to goods brought from the South or East for the sections of the State accommodated by each road. There will be few passengers from one road for the other. It will be entirely different, however, with the roads terminating opposite St. Louis, from the East, and the Iron Mountain road. It will be important for these roads to have a depot in St. Louis in common; but this can only be accomplished, with the roads from the East, by the building of a bridge, or the establishing of a crossing similar to the one this company has in use at St. Charles. So soon as the city shall condemn the wharf north, and remove the present water works, which will very soon be accomplished, the North Missouri and Iron Mountain roads can and should be connected on the levee. Grounds now in possession of the North Missouri Railroad Company, and which may be obtained, will furnish the common depot for this and the Iron Mountain, and the Eastern roads; and as the Pacific road already connects with the Iron Mountain road, it can through it be connected with the common depot for all Eastern business, if found desirable. The levee connection and the suggested connections for the Eastern roads seem to us to furnish the only means of securing a common depot for the roads coming into St. Louis from the different sections of the country. How far a depot in common will benefit different interests we cannot say. The roads of Missouri coming into St. Louis have now the five feet six inch gauge; those from the East, four feet eight and a half inch, except the Ohio and Mississippi, which has the six foot gauge. Our road will change its gauge to four feet eight and a half next year, which will produce a break of gauge with the Iron Mountain road, and the Iron Mountain again breaks gauge where it connects with the Southern Railroads, as their gauge is five feet. It seems to us most likely that the gauge of the Iron Mountain will be changed so as to conform to our gauge or that of the Southern roads, and that if we are to have a break of gauge, it had perhaps better be at St. Louis than at Columbus or Memphis. This company holds itself ready to do in this matter, and in all others, that which circumstances shall develop as best for the interests of Missouri and St. Louis, in connection with a proper management of its own affairs.

The country reached by this road and its connections is largely engaged in the raising of stock, and our business in stock will greatly increase. We have taken steps to provide for the landing of all stock brought by this road at one place, and to require that improvements shall be made to have the stock well cared for. This company has enlisted private enterprise to build pens for the accommodation of stock carried by it, and will use its influence to stimulate proper hotel accommodations, for stock men, in the vicinity of the pens.

We have, during the past year, assisted in the erection of an elegant eating house at Macon City, and another at Montgomery City, to accommodate our passengers. Instead of erecting these buildings at the entire expense of the company, private enterprise has been aided, deeming it advisable to unite this interest, as being better calculated to secure the best accommodation for meals to our patrons.

Our machine shops at St. Charles are of a temporary character, and as soon as the means of the company will admit, grounds should be had at St. Louis, preparatory to their removal from St. Charles to St. Louis, after the construction of the bridge over the river at this point.

This company has given such encouragement as was in its power to the construction of the St. Louis and Cedar Rapids and Iowa Central Railroads, both of which will connect with this road at the Iowa State line. The St. Louis and Cedar Rapids Railroad will give this company the most eastern connection in Iowa, and the best connection with Dubuque. The Iowa Central gives the most direct and best connection with St. Paul. We earnestly desire that both roads may be built, and we are of the opinion that both will secure a basis of means that will result in the construction of both roads. Their importance to this company and St. Louis cannot be over-estimated, and both should receive the encouragement and aid of St. Louis and this company.

This company has contracted with the Columbia and Jefferson City Railroad Company, by which it will acquire the road from Centralia to Columbia, a distance of twenty-one miles. The road will cost about five hundred thousand dollars. Of this sum, Boone County gives two hundred thousand, and this company virtually pays the other three hundred thousand, and equips the road with rolling stock, and operates it. When the three hundred thousand dollars is paid off, the road becomes the absolute property of this company. It is expected that this road will be completed by the first of December next.

The map attached to this report will at a glance exhibit the importance of this road to the State of Missouri and her great city. Without its connections in Iowa, the trade of that State, and north of it, would be drawn off by many roads to Chicago and the East, and be entirely lost to St. Louis and this road. Without the West Branch we could not successfully compete for the trade north and west of Leavenworth. Within three years, through its northern extension, we should reach St. Paul, and through the West Branch we should reach Omaha and Sioux City, and connect with every Pacific Railroad coming into the Missouri River from Kansas City north. On the South we connect with the Iron Mountain road, and through it, within three years, we should connect with the Mobile and Ohio Railroad at Columbus, which will give St. Louis, the year round, free from all obstructions from ice or other causes, railway connections with Mobile, New Orleans, Charleston, Memphis, and every Southern city. A few years later may give us a more direct connection with Memphis. At St. Louis we now connect with all roads coming in from the East, South or North, in Illinois, to our city. It seems to us that, with such connections, as soon as our extension to Iowa and its connections are made in that State, and our West Branch is built, ours will be one of the most profitable roads in the country.

Under the legislation obtained to secure the building of the West Branch and the Iowa extension and bridge over the river at St. Charles, the company had to consent to postpone any dividends on its stock until the six millions of its first mortgage bonds are paid off in full and also the four millions three hundred and fifty thousand of State bonds heretofore loaned the company, so that it will be seen that the time must be remote when the stock will become valuable for dividends. Without the Legislature granting the six millions, the road would have been sold and the stock all lost as well as a part of the State debt. By this legislation both may be saved; and the extension to Iowa and the West Branch built, which would not have been done if the road had been sold.

When our extension to Iowa is made, our West Branch and bridge built, we shall no longer have to submit to any terms that a competing line may see fit to impose upon us, and our prosperity will then begin. It is the interest of St. Louis, and all who have to ship produce or buy supplies or travel on our present or proposed lines, that they should be completed at the earliest possible day, as it will secure to us better terms from competing lines, and to our patrons more consideration. After our lines are completed we shall get our fair proportion of rates, and will be able to control the business without the expense which is now required to get even a portion of it on the onerous terms forced upon us.

Owing to our very limited space we have been obliged to omit a large, and we fear the most valuable and instructive portion of the report. We presume, however, that copies may be obtained by those interested in the road, by addressing any of the officers of the company, at St. Louis, Mo.

The company own 23 locomotives; 19 passenger, 4 baggage, 56 freight, 76 combination, 59 stock, 57 flat, 20 hand, and 61 gravel cars.

The total number of coupon tickets sold in 1865-'66, was 23,406; against 16,503 in 1864-'65—showing an increase of 6,903 passengers.

The number of tons of freight carried was 76,592; against 23,299 in the previous year—showing an increase of 53,293 tons.

New York and Harlem Railroad.

This road is 130.75 miles in length, extending from New York to Chatham Four Corners. It has 45 miles of double track, including sidings, and 2.12 miles of branch line. Weight of rail per yard 56 to 64 lbs. The equipment consists of 43 engines, 60 passenger, 23 baggage, mail and express, 587 freight, and 67 city cars. The amount stated below as cost of road and appurtenances, viz: $7,708,611 22, covers only the cost of road from New York to Dover Plains. The cost of the remaining distance from Dover Plains to Chatham is represented by $2,000,000 Albany Extension Certificates, of which the company hold $1,940,500. The company also own real estate, not included in cost of road and equipment, valued at $1,144,180 72, upon which there are bonds and mortgages to the amount of $97,074 10.

The following is a comparative statement of the receipts and expenditures for the fiscal years ending September 30, 1864 and 1865:

Receipts:	1864.	1865.
From passengers	$785,161 39	$1,053,314 49
" freight	864,558 19	1,093,668 04
" mail service	6,525 00	6,525 00
" expresses	5,334 43	36,764 41
" rents	24,147 01	50,231 19

Floating "	14,260 10	.....
Totals	$12,715,110 10	$12,683,095 00

The number of miles run by passenger trains in 1865, was 368,379; by freight trains, 419,089; by city cars, 804,612; by gravel trains, 33,897—total, 1,625,977, against 1,545,169 in 1864 an increase of 80,808. Number of passengers carried in 1865, was 1,243,545; do., carried one mile, 38,093,353. In 1864 the number carried was 1,177,789, and the mileage of do., 20,942,621—an increase in passengers of 65,756, and in mileage of 17,150,732. The number of passengers carried in the city cars in 1865, was 7,193,476; do., carried one mile, 10,790,214. The number carried in 1864, was 5,795,238, and the mileage of do., 8,692,857—an increase in passengers of 1,398,238, and in mileage of 2,097,357. Tons of freight carried in 1865, was 239,603; and the mileage of do., 17,153,978. In 1864 the tonnage was 236,467, and the mileage of do., 15,571,828—an increase in tonnage in 1865, of 3,136, and in mileage of 1,582,150.

Lynchburg and Danville Railroad.

The sum of eighty thousand dollars has been subscribed in Lynchburg, Va., toward building the railroad which is to connect that city with Danville. By the law the subscription cannot be taken until the company shall have its minimum capital, one hundred thousand dollars subscribed by individuals. It is proposed to raise the remaining twenty thousand dollars in Danville, and the papers of that place declare that this will be readily done.

Pennsylvania Railroad Company.

The aggregate receipts of the company from the operations of its works, including the Philadelphia and Erie Railroad, for the years 1864 and 1865, have been as follows:

	1864.	1865.
Pennsylvania R. R.	$14,759,057 66	$17,459,169 49
Penn. Canals	308,615 23	181,015 38
Phila. & Erie R.R.	1,131,147 98	2,074,140 79
Total gross earn'gs.	$16,198,820 87	$19,714,325 66
Deduct expendit's.	12,133,707 40	15,894,671 33
Net earnings	$4,065,113 47	$3,819,654 33

The following exhibits the earnings and expenditures of the Pennsylvania Railroad and branches for the same years:

Gross earnings	$14,759,057 66	$17,459,169 49
Expenditures for—		
Conducting transp.	$2,624,916 58	$3,490,847 07
New buildings and extensions	406,614 79	245,489 02
Motive power	2,586,666 79	3,268,957 76
New tools and machinery	105,693 56	111,394 61
New locomotives	613,691 97	1,434,561 03
Mainten'nce of road	2,057,547 85	2,625,520 35
New 2d track and sidings	191,220 28	269,575 97
Maintenance of cars	853,929 12	1,330,467 52
New cars added to stock	1,151,063 92	327,157 87
General expenses	152,599 33	166,137 34
Total expenses	$10,693,944 19	$13,270,058 54
Earnings less exp.	$4,065,113 47	$4,189,110 92
Of the expenses the following division is made:		
Ordinary expenses	$8,225,659 67	$10,881,930 04
Extraordinary exp.	2,468,284 52	2,388,128 50
Total	$10,693,944 19	$13,270,058 54

The mileage of track in use on the road and branches, including sidings and second tracks at the commencement of the years respectively, was 942.40 — 989.00
Added during the year 46.60 — 57.50
In use at end of year 989.00 — 1,046.50
—accounted for as follows:
Main Line 807.20 — 828.20
Branches owned 38.60 — 38.70
" leased 123.10 — 158.10
Private sidings 20.10 — 21.50
Total length in miles 989.00 — 1,046.50

Of the main line between Philadelphia and Pittsburg, there remains only 11½ miles to furnish with double track.

The number of locomotives on the road at the commencement of the year was 290 — 321
And at its termination 321 — 352
The condition of these was as follows:
In good order 158 — 171
In running order 86 — 101
In shops for slight repairs 25 — 34
" for general repairs 52 — 29
" for rebuilding .. — 17
Total in all conditions 321 — 352

The mileage of engines in each year was as follows:

Passenger engine mileage	1,370,347	1,622,748
Freight "	4,383,559	4,715,284
Distributing "	257,612	266,268
Total mileage	6,011,518	6,604,300

And the cost of repairs, &c., as follows:

Repairs	$866,748 94	$1,051,735 66
Fuel	552,932 86	737,457 93
Oil and waste	172,452 34	233,982 59
Total cash	$1,592,134 14	$2,023,176 18
—averaging per 100 miles run, for		
Repairs	$14.41	$15.92
Fuel	9.19	11.17
Stores	2.87	3.54
Total cost per 100 miles	$26.47	$30.63

The number of cars on the road at the end of each year was as follows:

Passenger, baggage and express	225	262
Freight and coal	5,381	5,336
Other cars (in maintenance dept.)	548	542
Total	6,154	6,140

The number and mileage of passengers carried were as follows:

Passengers	2,336,213	2,861,836
Miles traveled	146,873,005	204,564,393

The tons of freight and the mile each ton was carried was as follows:

Tons, through, eastward	322,497	302,842
" local "	1,482,647	1,418,638
" through, westward	147,972	160,899
" local "	682,263	673,327
" through, both ways	470,469	463,741
" local, both ways	2,114,910	2,091,965
" of free goods	179,497	.....
Total tons carried	2,764,876	2,555,706
Tons carried one mile	420,627,222	420,060,260

COMPANY'S CANALS.

The earnings of the company's canals were:

	1864.	1865.
Susquehanna Div. 46 m.	$253,787 57	$140,912 38
Juniata Division. 127 m.	29,532 76	22,186 42
Western Division. 73 m.	12,174 72	105 00
Miscellaneous	13,120 18	17,811 58
Total 246 miles	$308,515 23	$181,015 38

The cost of maintaining, enlarging and operating was:

Susquehanna Division	$153,794 93	$183,779 36
Juniata Division	126,560 02	87,268 69
Western Division	30,200 37	8,795 46
Total expenses	$310,555 32	$279,843 51
Loss on operating	$1,940 09	$98,828 13

The total tonnage transported on the canals was as follows:

Coal	629,820	422,805
Lumber	196,940	62,809
Grain	13,171	79,248
Other articles	214,413	
Total tons transported	1,052,344	564,862

PHILADELPHIA AND ERIE RAILROAD.

The earnings of the Philadelphia and Erie Railroad for the years 1864 and 1865, compare as follows:

Earnings from—	1864.	1865.
Passengers	$479,822 44	$828,590 21
Troops	31,389 18	94,451 46
Freights	545,037 45	1,083,925 31
Express matter	16,345 16	26,887 20
Mails	14,390 03	19,085 61
Miscellaneous sources	44,163 72	21,201 00
Total earnings	$1,131,147 98	$2,074,140 79

The operating expenses for the same years were:

Transportation	$217,245 96	$537,517 74
Motive power	234,698 75	562,648 89
Maintenance of way	354,163 22	627,050 09
" cars	32,485 91	18,835 56
Total operating exp.	$838,593 83	$1,746,052 28
Thirty per cent. due on lease to meet interest on bonds, etc.	335,708 95	598,708 00
	$1,174,302 78	$2,344,760 28
Loss on operation	$43,154 80	$270,619 49

GENERAL ACCOUNT.

The General Account showing the financial condition of the company, December 31, 1864 and 1865, presents the following balances:

	1864.	1865.
Capital stock	$19,896,060 00	$20,000,000 00
Funded debt, (bonds,) viz:		
1st mort. 6 per cent. dollar, 1880	4,980,000 00	4,980,000 00
2d mort. 6 per cent. dollar, 1875	2,621,000 00	2,621,000 00
2d mort. 6 per cent. sterling, 1875	2,283,840 00	2,283,840 00
Bonds due State 5 per cent.	6,800,000 00	6,700,000 00
Mortg'ges & ground rents	1,144,184 32	165,284 32
Total capital and funded debt	$36,698,184 32	$36,750,124 32
Accounts payable, includ'g pay rolls for Dec	$1,956,828 91	$3,024,917 99
Bills payable	408,335 71	577,130 08
Dividends due and unpaid	28,296 00	49,339 00
Contingent fund	1,000,000 00	1,000,000 00
Balance	3,428,691 89	4,449,224 74
Total debit side	$43,520,336 33	$45,850,796 13
Cost of road and appurtenances	$16,752,150 96	$16,745,090 89
Columbia R.R. and State Canal	6,800,000 00	6,700,000 06
Equipment	3,385,315 15	3,375,023 85
Real estate	3,769,706 52	3,021,202 51
Telegraph line	45,264 28	45,264 28
Extension of road to Pittsburg and Steubenville R.R	685,249 33	1,153,256 41
Extension of road to Del. River	587,205 14	769,495 66
Total cost of roads and canals	$31,024,891 38	$31,809,333 60
1st mort. bonds of Pitts. and Steub. R. R. Co.	$353,000 00	$438,527 70
2d mort. bonds of Pitts. and Steub. R. R. Co.	.....	137,050 00
Sterling bonds of Phila. and Erie R. R. Co.	1,334,601 11	597,420 31
Seven per ct. bonds of Phila. & Erie R. R. Co.	.....	1,312,000 00
St'ck (8,939) shares of Steub. and Indiana R. R. Co.	130,696 00	130,696 00
Bonds of Steub. & Indiana R. R. Co. 6 per cent	482,651 52	440,651 52
Bonds of Steub. & Indiana R. R. Co. 7 per cent	775,000 00	537,000 00
Other bonds, and stocks of municipal and railroad companies	2,881,862 89	2,650,548 62
Bills and accounts receivable	1,850,976 55	2,441,715 33
Due from other roads	192,054 52	81,487 08
Debit of sinking fund	1,615,754 79	1,840,917 87
Fuel and materials on hand	1,277,380 52	1,462,555 44
Advance to Phila. & Erie R. R. Co.	468,764 09	926,712 17
Balance in hands of agents	762,075 98	530,333 97
Balance in hands of Treasurer	370,626 98	513,846 52
Total credit side	$43,520,336 33	$45,850,796 13

The following summary exhibits the condition of the capital account for the past eleven years embracing the whole period since the completion of the line:

Year end'g Dec. 31.	Share Capital	Bonds and Mortgages.	Total Amount.	Cost of Property.
	$	$	$	$
1855.	12,355,525	7,519 096	19,874.621	18,483,489
1856.	12,646,625	8,516,841	21,163,466	19.048.968
1857.	13,206,625	14.929,940	28,136.565	27,266,981
1858.	13,240,225	16,094,451	29,334.676	27.670 672
1859.	13,349,125	16,469,159	29.818,284	28,484,321
1860.	13,261,960	16,680,804	29,942.764	28,846.442
1861.	13.264,100	16.936,764	30.200.864	29.587,678
1862.	13,274,100	16,696,764	29.970.864	29,888,552
1863.	13.430,250	16.949,124	30.379,374	30.592,298
1864.	19,896,060	16,802,124	36,698,184	31.024.891
1865.	20,000,000	16,750,124	36,150,124	31,809,384

In 1857, and since, the funded debt and cost of property includes the State Works purchased by the company for $7,500,000, which is payable in annual instalments, which diminish the amounts debited and credited to the State and company respectively.

The earnings and expenses of the railroad and dividends for the same years have been as follows:

Year end'g Dec. 31	Gross Earnings.	Operating & Repairs.	Profits on operations.	Dividends.
1855	$4,270,070	$2,340,738	$1,829,277	6
1856	4,720,124	2,814,568	1,905,626	6
1857	4,855,659	3,000,743	1,854,926	3½
1858	5,185,331	3,021,885	2,163,446	5⅛
1859	5,362,355	3,130,738	2,231,617	6
1860	5,932,701	3,636,659	2,296,042	6
1861	7,300,001	3,653,063	3,646,938	6
1862	10.304,291	5,431,073	4,873,218	8
1863	11,891,415	6,780.000	5,111,413	9
1864	14,759,058	10.693.944	4,065,114	10
1865	17,459,169	13,270,058	4,189,111	10
Stock dividend paid in May, 1864				30

The earnings and expenses of the canals, not included in the above have been as follows:

Year ending Dec. 31.	Gross. Earnings.	Operating Expenses.	Profits on operations.	Losses on operations.
1857 (5 mos.)	$92,434	$73,191	$19.243	$.....
1858	179,100	124,058	55.042	.....
1859	197,549	175,452	22,097	.....
1860	209,366	154,761	54.605	.....
1861	176,109	147,872	28,237	.....
1862	251,482	258,092	.....	6,610
1863	287,156	362,374	.....	75,218
1864	308,615	310,555	.....	1,940
1865	181,015	279,843	.....	98,828

The company entered on possession of the Philadelphia and Erie Railroad on the 1st February, 1862, since which date the earnings and expenses thereof have been as follows:

Year ending Dec. 31	Gross Earnings.	Operating and Repairs.	Earn'gs less Exp.	30 per cent. of Gross Earn'gs.*
	$	$	$	$
1862 (11 mos.)	425,687	226 647	199,040	122,697
1863	725,670	336,596	389,074	218,301
1864	1,131,148	838,594	292,554	335,709
1865	2,074,140	1,746,052	328,088	598,708

Savannah, Albany and Gulf Railroad.

The Gulf Railroad in Florida is being pushed forward. Thirty-one and a half miles of iron have already been laid. As the whole distance from the Gulf road to Live Oak on the Pensacola and Georgia road is but 47 miles, there remain but 15½ miles to be laid to complete the connection between the Florida system of roads and those of Georgia. If the iron arrives in time (every rail of which, it is said, has been purchased) the work will be finished early in October.

* This amount (after all drawbacks) is set apart under the lease to pay interest on the bonds of the Philadelphia and Erie Railroad Company.

American Railroad Journal.

Saturday, October 6, 1866.

Stock Exchange and Money Market.

There has been increased activity in the Money Market, growing out of the vigorous speculation in progress at the Stock Boards, which gives temporary employment to large sums, otherwise unused. There is a marked partiality shown by private lenders for these controlable advances to the leading Stock firms. To this circumstance is due much of the prevalent activity in the railway and miscellaneous share property. The increased demand for accommodation has no visible influence on the price of call loans, which continue to be quoted at 3@4 per cent. to the large dealers in Government securities, and 4@5 per cent. to other first class Stock houses. The extraordinary abundance of capital at this centre has prevented any hardening of rates, and no apprehension is entertained of an early adverse change in this respect. So far from this, indeed, are the current views of operations, that an opinion gains ground, fostered by interested parties in the street, that Government will do something to further inflate the currency, either by a fresh issue of legal tender notes, for which it holds in reserve the requisite authority, or by an enlargement of the aggregate circulation of the National Banks. This opinion, however, is utterly destitute of any substantial foundation, and is in direct conflict with the policy of contraction, to which both the Treasury Department and Congress stand fully and explicitly committed. We have the very best reasons for asserting that Secretary McCulloch will give no countenance to any project which aims at inflation; but, on the contrary, that he will most decidedly urge upon the attention of Congress, the need and importance of more rapid contraction than that for which existing laws make provision. Any rumors, or reports, put in circulation hostile to this view of "the situation," are simply of sinister origin, and propagated in the interest of speculators. The regular trade movements in produce and merchandise are on an extensive scale, chiefly on a cash basis. Hence, prime short date mercantile paper is in comparatively moderate supply, and good request at from 5@6 per cent. per annum. The city banks, last week, increased their circulation $443,569, while reducing their loans, $2,969,783, and losing $2,602,168 of their legal tender reserve, $1,057,878 of their net deposits, and $18,651 of their specie reserve. Their deposits are now $223,336,785, or forty millions more than at the same time last year. Their legal tender reserve amounts to $87,826,021, against $57,675,674 same time last year. Their circulation now stands at $29,218,950, against $10,645,697 same time last year. The loans now reach $269,807,383, or forty-eight millions more than at this date last year. The Bank Exchanges at the Clearing House, through the past week, averaged $96,261,995 a day, against a daily average of $100,881,220 the preceding week; and $94,549,868 the week ending with Sept. 15. The current week's exchanges average about $92,000,000 a day. At the annual election of the Clearing House Association, held on Tuesday, it was stated that fifty-eight banks compose the Association, representing an aggregate capital of $81,770,000. The transactions for the past year, ending Oct. 1, 1866, were $29,783,282,020 46. The total transactions for thirteen years were $158,070,344,871 33. The aggregate transactions for the past year were $2,715,132,570 87 in excess of the previous year, and $1,800,366,159 59 greater than the year ending Oct. 1, 1864, and $17,624,024,722 65 more than the average for thirteen years—all of which business has been accomplished without error or loss to the Association. John Q. Jones was chosen Chairman of the Association; R. Bayles, Secretary; W. A. Camp, Manager. The Clearing House Committee for the ensuing year consists of J. D. Vermilye, James M. Morrison, E. D. Brown, S. R. Comstock, C. P. Leverich.

The proportion of legal tender and gold and gold notes held by the city banks in the Clearing House to their liabilities, is as follows:

On deposit line of		$223,336,785
And circulation of		29,213,950
Together		$352,550,735
Legal tender notes	$87,826,021	
Gold and gold notes	7,643,960	
		$95,469,981
Proportion required by law		63,137,684
Excess of legal tender on hand		$32,332,297

Present pro rata 38 per cent.; legal pro rata 25 per cent.

National Bank notes to the amount of $818,-178, were issued last week, making the total issue to 1,661 banks thus far $293,032,903. The United States bonds held by Treasurer Spinner in trust for National Banks as security for circulating notes amount to $332,298,900; and for the public deposits, $39,211,950—making a total of $371,-510,850.

The U. S. Sub-Treasury receipts, week ending with Sept. 29, were $19,223,924, including $2,876,-718 from customs duties; payments, $25,238,193; balance at the close of the week, $87,842,832. against $93,857,100 at the close of the preceding week. The total receipts of the office in September, were $59,028,895; and the total disbursements on drafts, $75,744.847. The business of the Office during the first two days of the current week, was as follows: Monday, receipts, $1,907,-572, and payments, $1,440,906. Tuesday, receipts, $2,027,326, and payments, $879,022. The balance at the close of business on Tuesday stood at $89,-457,801, against $96,312,613, a week ago.

Government revenues from excises, last week, exceeded $8,000,000; from customs at the port of New York, $2,876,718, and at the outports, at least $1,420,000 more, making the grand total income for the week equal to nearly $14,500,000 in currency, against disbursements of only $5,116,-298 on account of the three leading executive departments. The total receipts of the National Treasury, from excises, since July 1, 1866, have been nearly $102,000,000. The total revenue of the Government from Customs at all the ports of entry, during the three months ending on Saturday, Sept. 29, is estimated at $51,092,149, against $47,009,583 same period last year. The total income (partially estimated) of the Government, from all sources—customs, excises, etc.—from July 1, to September 30, in each of the last two fiscal years, compare thus:

	1865.	1866.
Customs in gold.....	$47,009,583	$51,092,149
Taxes in currency	96.618,886	102,000,000
Miscellaneous.....	18,557,731	7,000,000
Grand total income ..	$162,186,200	$160,092,149

The national expenses for the quarter ending with September 30, are estimated at $160,000,000, as follows: War, navy, &c., $44,000,000; interest on public debt, $34,000,000; reduction of principal of debt, $82,000,000.

The next monthly statement of the national indebtedness, which is promised for the 5th inst., it is stated, will show a further liquidation of nearly thirty million dollars. In this way, Secretary McCulloch favors inflation—of the credit of the Government; and is against contraction—of any fresh public burdens.

With a view to the equalization of the coin interest payments of the Treasury Department, Secretary McCulloch has ceased to issue Five-twenty bonds of 1865, of the May and November coupon denomination. Henceforward, the Five-twenties to be issued, exclusively in redemption of Seven-thirties, or other short date obligations of the Treasury, will have the interest made payable on the first days of January and July of each year. The three issues of Five-twenties of 1862, 1864, and 1865, heretofore familiar to the public, and all with May and November coupons, amounted on the 1st of September instant to $776,422,800, a total at present is about $800,000,000 involving the payment of Gold Interest on the 1st of May and 1st of November every year of $24,000,-000 at each period, or $48,000,000 a year. The propriety and convenience, therefore, of dividing the coin interest payments on the future issues of Five-twenties will be readily recognized. The long-interest payments on the six per cents. of 1881 are also provided for at the half yearly dates of January and July 1, as are also those on the old five per cents. of 1871 and 1874. The coin-interest on the Ten-forty years five per cents. falls due on the 1st of March and 1st of September in each year, save in the instance of the $50 and $100, interest on which is paid annually on the 1st of March. A Wall street banking-house has received the following note on the subject of the contemplated issue of Five-twenties:

TREASURY DEPARTMENT,
Washington, Sept. 26, 1866.

Sir:—Yours of the 25th is at hand, and contents noted. The June and July seven-thirties are not at present convertible. Those of August 1864, are convertible on the terms described by you (that is, allowing all accrued interest on the seven-thirties and charging accrued interest on the five-twenties from July 1 to the day of conversion, both in currency), except that the five-twenty bonds to be issued hereafter will bear interest from July 1 and not from May 1, 1866. I am, sir, very respectfully,

W. HARTLEY, Assistant Secretary.

To the courtesy of the U. S. Assistant Treasurer Van Dyck, we are indebted for an early view of the new January and July coupon $1,000 Five-twenty bonds, which are, by all odds, the handsomest ever issued by the Government. The appearance of the bonds is very different from that of the old ones; they are better designed and better engraved, and the guards against counterfeiting are numerous and well devised. The vignette of the new issue is a beautiful picture of the Treasury at Washington. On the left is a sailor, with an anchor, a cotton bale, a bag of grain, etc.; and on the right, a soldier resting on his musket, and standing near a mounted cannon and other paraphernalia of war. The coupons are vastly improved in several respects. The engraving is very fine; the lettering is plain; each coupon is numbered on the back as well as on the face. This effectually prevents alteration by the addition of a figure, since the numbers on the back cover the whole of the paper. There is a fine likeness in medallion of Mr. Johnson. The new series were selling in Wall street on Wednesday at 107¾.

The course of the gold market has been decidedly upward, since our last, influenced by the reduced London quotations for U. S. 5-20s, the more active customs and exchange demand, the anticipated cessation of receipts from Europe, and the apprehension of renewed exports of specie. The extremes of the week have been 145¼ and 149, the latter price having been made on Tuesday. On Wednesday, the opening rate was 148⅛, the lowest figures, 147¼, the highest 148½, and the closing quotation, 148. The customs demand last week, averaged $479,453 a day; thus far, this week, it has been equal to $372,000 a day, or equal to a weekly aggregate of $2,232,000. We have had further arrivals of specie from Europe, and receipts to the amount of $1,137,148 from California, since our last. The total customs revenue of the Government, in coin, at this port, since Jan. 1, has been $104,696,636, against $73,213,610 same time last year. The total receipts of California gold at this port since Jan. 1, have been $32,749,404, against $13,728,147 same time last year, showing an increase, in 1866, of $19,021,-257. The exports of specie from this port, last week, were $38,240, making the total outflow of specie from the port, since Jan. 1, $54,000,790, against $22,688,594 same time last year. Government disbursed last week through the U. S. Sub-Treasury here, on account of the September coin interest, on the public debt, chiefly on the Ten-Forty Loan, $89,279, making the total coin interest disbursements through the Government office, since Jan. 1, 1866, $31,806,589, against $27,181,006 same time last year.

The exports of treasure from San Francisco in August were	$3,906,624 19
Previously this year....	27,703,653 11
Total since Jan. 1, 1866	$31,609,277 30
Corresponding period of 1865	30,447,883 89
Increase this year	$1,161,393 41

Foreign exchanges, which improved a fraction early in the week, on a more active demand, close tamely and heavily, under more liberal offerings of prime bills, and a partial falling off in the inquiry from importers, in view of the sudden rise in gold the permanency of which the importing interest generally put little faith in. Bankers' 60 day bills on London are now quoted 108⅛@ 108⅜, and on Paris to 5.25@5.20; sight bills on London to 108¾@109⅛; and on Paris to 5.20 @5.17½. There has been an increased offering of produce bills. The week's exports of domestic produce and miscellaneous goods have been to the currency value of $2,042,566, against $2,892,-529 same week last year. The exports since January 1, have been to the value of $145,328,783, against $117,801,363 same time last year.

Business in Government securities has been fair in amount, but characterized by no special activity. Prices improved early in the week, especially for the old issues of the gold bearing bonds, on the announcement of a new and slightly different issue of U. S. 5-20s, but this improvement was only feebly maintained, through the rise in gold, as against the lower London quotations for the 5-20s of 1862. U. S. Sixes of 1881 closed 111¾; U. S. Five-twenties of 1882 at 111½@111¾; U. S. Five-twenties of 1865 at 109⅛@108¼, U. S. Ten-forties at 99@99¼, and U. S. Seven-thirties at 106@106⅛. The brokers are buying the compound interest notes at the following rates, and selling at an advance of ¼@½ of 1 per cent. on these figures:

June, 1864.....	116½	May, 1865	111½
July, 1864.....	116	August, 1865....	110
August, 1864....	115½	September, 1865..	109½
October, 1864....	114½	October, 1865....	109
December, 1864..	113½		

There has been an extraordinary speculative movement in railway and miscellaneous share property, resulting in part, from the remarkable ease in money, and the prosperity of the great railway carriers, but, in good measure also, from the engineering efforts of influential operators, who aim to acquire control of the principal New York roads at the pending annual elections, and who consequently made sweeping purchases of the stocks of these roads at rapidly advancing prices. Erie shares have been thus manipulated, chiefly to its good, in the interest of a new but highly re-

sponsible aspirant for the presidency of the road. The price of these shares was worked up to 90⅝ on Wednesday, or about 32 per cent. above the lowest figures made during the last raid on the stock. The astounding rise in Erie shares led to increased orders for far better stocks, on speculative account, and a very general, and marked rally in prices, the market closing on Wednesday buoyantly, but feverishly, after a week of most unusual excitement at the Boards, and on the street. Still higher prices are confidently anticipated for nearly every thing dealt in at the Boards, before the inevitable reaction comes along.

The Produce and Merchandise markets opened briskly and buoyantly, under a decidedly improved demand for nearly all the leading articles, partly on speculative account, at rapidly advancing prices, but closed tamely and in favor of purchasers. There has been a marked rise in cotton, with heavy purchases, largely on speculation, in view of the highly encouraging reports from Liverpool; but current prices here are considerably above the limits of shippers and the market closes heavily. The week's exports of cotton have been 1,737 bales from this port, and 11,500 bales from all the shipping ports, leaving an available supply of 106,000 bales here, and at all the shipping ports, of 255,000 bales. In the dry goods line, the main feature has been the remarkable increase of orders for domestic cotton, chiefly heavy goods, at decidedly heavy prices; stocks of such goods are now much reduced. In foreign goods, there have been less animation and less buoyancy. The total imports of foreign dry goods, last week, were $1,931,364, and the total amount marketed $2,412,910. The value of foreign merchandise imported last week, was $2,644,602—making the grand total specie value of last week's imports of dry goods and merchandise, $4,575,966, and since January 1, $236,460,263, against $138,839,335 same time last year. The freight market is quiet, but firm with 521 vessels of all classes in port.

The latest quotations at the London Stock Exchange compare as follows with former returns:

	Sept. 17.	Sept. 22.	Oct. 2.
Consols	—@89¾	89¼	89½
U. S. 5-20's	—@72½	72½	70¼
Erie	—@46½	48	51½
Ill. Central	—@78¾	78½	78¼

The New York exports, exclusive of specie, for the week ending Oct. 2, and since the beginning of the year, compare as follows:

	1865.	1866.
For the week	$2,892,529	$2,042,566
Prev. reported	114,908,834	143,286,217
Since January 1	$117,801,363	$145,328,783

The New York imports for the week compare as follows:

	1865.	1866.
Dry goods	$1,894,054	$1,921,364
Gen. merchandise	3,108,452	2,644,602
Total for the week	$5,002,506	$4,575,966
Prev. reported	133,836,829	231,884,297
Since January 1	$138,839,335	$236,460,263

The balance in the Sub-Treasury on Wednesday was $89,504,881 63.

The following quotations of sales of Railway and other securities are in addition to those given elsewhere in our columns:—

Decrease $5,315 00

The earnings of the Grand Trunk Railway of Canada for the week ending Sept. 22d, 1866 were $147,833 00
Corresponding week of previous year .. 154,495 00

Decrease $6,662 00

Susquehanna and Delaware Railroad.

This company, incorporated by an act which became a law without the Governor's signature, on the 15th March, 1866, confers authority to construct "a railroad with one or more tracks, by locomotive or other grades [gravity and inclined planes,] from any point within five miles of the borough of Wilkesbarre to any point on the Delaware River above the borough of Easton, with the right to build branches not exceeding ten miles in length; and with the right also to construct a bridge over the River Susquehanna and to construct a bridge over the River Delaware. Provided, that if the said company shall see fit to construct its railroad into Wayne County, it shall be so constructed as to run to Honesdale in said county."

By a supplement passed 13th April, 1866, "it shall be lawful for the said the Susquehanna and Delaware Railroad Company to connect their railroad and railroads and other improvements, with the railroad and railroads and other improvements of any other corporation or corporations, and to make such contracts for the use of the said railroads and other improvements, as to the said company may seem expedient."

Also, "that it shall be lawful for any other corporation or corporations to take and hold stock in the said the Susquehanna and Delaware Railroad Company, in the same manner as individuals might take and hold the same."

This is a close corporation, the act of 15th March, 1866, naming certain persons, and constituting them, their associates and successors a body politic, with the privileges noticed, subject to the provisions of the general law "Regulating Railroads."

The Susquehanna and Delaware Railroad Company have a charter of extraordinary liberality to begin with, and the interest which we are told has absorbed it, the Delaware and Hudson Canal Company, has ample means to develope a railroad plan which shall show that, like the Lehigh Canal Company, the Delaware and Hudson Canal Company is hereafter to take rank as a railroad company, with its water line as an adjunct.—*U. S. R. R. & Mining Register, Sept, 22.*

Journal of Railroad Law.

RIGHT OF COMMON CARRIERS TO LIMIT THEIR LIABILITY BY SPECIAL CONTRACT.

The case of The New York Manufacturing Company *vs.* The Illinois Central Railroad Company, just decided by the United States Supreme Court is an interesting case on the subject of the right of common carriers to limit their liability by a special contract.

The action was for the loss of two hundred and one bales of cotton delivered to the defendant for transportation from Cairo to Chicago.

The defendant set up by way of defence a special contract, alleged to have been made at Memphis for the carriage of the cotton, by which the plaintiff assumed the risk of loss by fire. In proof of this contract, the deposition of one Thomas Trout was offered, to the effect that he made a contract with Harris, Hunt & Co., as agents of the defendant, and signed by that firm as such agents, two copies of which were delivered, one retained by Thomas Trout & Co., and the other sent to the plaintiffs, of which the following is a copy: "Shipped by Thomas Trout & Son, in good order and condition, on board the good steamboat *Adriatic*, whereof —— is master for the present voyage, now lying at Memphis, and bound for Cairo, being marked and numbered as below, and are to be delivered without delay in the like good order and condition at the aforesaid port of Boston, Mass. (fire and the unavoidable dangers of the river only excepted,) unto Samuel Batchelder, receiver, or to his assigns, he or they paying fare at the rate of $4 75 per bale from Memphis to Boston, all rail from Cairo. In witness whereof, the master or clerk of said steamboat hath affirmed to four bills of lading, all of this tenor and date, one of which being accomplished the other stand void. Y. M. C., $1 a 201 (two hundred and one) bales of cotton. (Signed) Harris, Hunt & Co., Illinois Central Railroad."

The court charged the jury in substance, that it is competent for the carrier alone, to limit its liability without the engagement of the owner. The jury were led to infer from the whole charge that the question whether such a contract was made, was not for them to determine, but was to be assumed in their deliberations.

By the Court—Mr. Justice Field delivering the opinion.—This is an action to recover damages for the loss of two hundred and one bales of cotton, received at Memphis, Tenn., by agents of the Illinois Central Railroad Company at that place, for transportation to Boston, Mass. The cotton was shipped on the steamer *Adriatic*, at Memphis, and was delivered to the defendant, at Cairo, in November, 1859, and, while in its possession, was destroyed by fire. The contract for the transportation was in the form of a bill of lading, containing a clause exempting the defendant from responsibility for losses by fire; and it is upon this exemption that the defendant rests its defence.

The right of a common carrier to limit his responsibility by special contract has long been the settled law in England. It was the subject of frequent adjudication in her courts, and had there ceased to be a controverted point before the passage of the Carriers' Act of 1830. In this country it was at one time a subject of much controversy whether any such limitation could be permitted. It was insisted that, exercising a public employment, the carrier owed duties at common law from which public policy demanded that he should not be discharged even by express agreement with the owner of the goods delivered to him for transportation. This was the ground taken by Mr. Justice Cowen, of the Supreme Court of New York, in Cole *vs.* Goodwin, (19 Wend., 252,) and, although what that learned Judge said on this point was mere *obiter*, as the question presented was not upon the effect of a special agreement, but of a general notice, it appears to have been adopted by a majority of the court in the subsequent case of Gould *vs.* Hill, (2 Hill, 623). But from this doctrine that court has since receded; and, in a recent decision, the Court of Appeals of that State has affirmed the right of the carrier to stipulate for a limitation of his responsibility. (Parsons *vs.* Monteath, 13 Barb., 353; Moore *vs.* Evans, 14 Id., 524; Dorr *vs.* The New Jersey Steam Navigation Co., 11 N. Y., 486). The same rule prevails in Pennsylvania; it has been asserted in Ohio and in Illinois, and it is believed, in a majority of the other States; and in The New Jersey Steam Navigation Co. *vs.* the Merchants' Bank it received the sanction of this court. (6 How,, 382; Atwood *vs.* Delaware Transportation Company, 9 Watts, 89; Camden and Amboy Railroad Co. *vs.* Baldauf, 16 Penn. St., 67; Verner *vs.* Sweitzer, 32 Penn. St., 208; Kitzmiller *vs.* Van Rensselaer, 10 Ohio, 64; Illinois Central R. R. Co. *vs.* Morrison, 19 Ill., 136; The Western Trans. Co. *vs.* Newhall, 29 Id., 466.) Nor do perceive any good reason, on principle, why parties should not be permitted to contract for a limited responsibility. The transaction concern them only; it involves, simply, rights of property; and the public can have no interest in requiring the responsibility of insurance to accompany the service of transportation in face of a special agreement for its relinquishment. By the special agreement the carrier becomes, with reference to the particular transaction, an ordinary bailee and private carrier for hire. The law prescribes theduties and responsibilities of the common carrier. He exercises, in one sense, a public employment, and has duties to the public to perform. Though he may limit his services to the carriage of particular kinds of goods, and may prescribe regulations to protect himself against imposition and fraud, and fix a rate of charges proportionate to the magnitude of the risks he may have to encounter he can make no discrimination between persons, or vary his charges from their condition of character. He is bound to accept all goods offered within the course of his employment, and is liable to an action in case of refusal. He is chargeable for all losses except such as may be occasioned by the act of God or the public enemy. He insures against all accidents which result from human agency, although occurring without any fault or neglect on his part; and he cannot, by any mere act of his own, avoid the responsibility which the law thus imposes. He cannot screen himself from liability by any general or special notice, nor can he coerce the owner to yield assent to a limitation of responsibility by making exorbitant charges when such assent is refused. The owner of the goods may rely upon this responsibility imposed by the common law, which can only be restricted and qualified when he expressly stipulates for the restriction and qualification. But when

such stipulation is made, and it does not cover losses from negligence or misconduct, we can perceive no just reason for refusing its recognition and enforcement. We do not understand that the counsel of the plaintiff in error questions that the law is as we have stated it to be. His positions are, the agents of the plaintiff at Memphis, who made the contract with the Illinois Central Railroad Company, were not authorized to stipulate for any limitation of responsibility on the part of that company, and that no consideration was given for the stipulations made. The first of these positions is answered by the fact that it nowhere appears that the agents disclosed their agency when contracting for the transportation of cotton. So far as the defendant could see, they were themselves the owners. The second position is answered by the fact that there is no evidence that a consideration was not given for the stipulation. The company, probably, had rates of charges proportioned to the risks they assumed from the nature of the goods carried, and the exception of losses by fire must necessarily have affected the compensation demanded. Be this as it may, the consideration expressed was sufficient to support the entire contract made. The objection urged to the introduction of the copy of the bill of lading annexed to the deposition of the witness, Trout, was properly overruled. The deposition was taken upon a commission and in such cases the general rule is that all objections of a formal character, and such as might have been obviated if urged on the examination of the witness, must be raised at such examination, or upon motion to suppress the deposition. The rule may be different in some State Courts, but this rule is more likely than any other to prevent surprise and secure the ends of justice. There may be cases where the rule should be relaxed, as where the deposition is returned at so brief a period before the trial as to preclude a proper examination, and prevent a motion to suppress. In this case there was no occasion for any such relaxation of the rule, and had the objection been taken before the trial—either at the examination of the witness oc on a motion to suppress—to the proof of the copy without producing the original, or showing its loss, the opposite party would undoubtedly have secured the production of the original, if in existence, or, if it be lost or destroyed, been prepared to account for its absence.

The judgment must be affirmed, and it is so ordered.

Tonnage of New York.

The number of vessels arriving at and departing from the port of New York, together with the tonnage and seamen employed during each of the first two quarters of the year 1866, is officially stated as follows:

Entered at New York from foreign ports for the first three months of 1866:

	No. of Vessels.	Tonnage.	No. of Seamen.
American vessels	305	218,088	6,996
Foreign vessels	622	377,457	13,515
Total	927	595,545	20,511
Same time in 1865	881	415,855	14,522
Same time in 1864	927	483,256	17,614
Same time in 1863	1,063	522,116	17,255
Same time in 1862	1,246	660,643	20,368
Same time in 1861	965	458,802	15,347
Same time in 1860	808	418,998	14,731

Entered at New York from foreign ports for the three months ending June 30, 1866:

	No. of Vessels.	Tonnage.	Seamen.
American vessels	532	301,886	9,331
Foreign vessels	1,087	560,882	20,101
Total	1,619	862,768	29,432
Same time in 1865	1,316	595,654	21,107
Same time in 1864	1,564	722,273	35,777
Same time in 1863	1,405	685,587	22,462
Same time in 1862	1,297	645,047	17,754
Same time in 1861	1,435	725,676	22,499
Same time in 1860	1,330	605,729	19,827

Cleared at New York for foreign ports, for the first three months of 1866:

	No. of Vessels.	Tonnage.	Seamen.
American vessels	285	179,941	6,083
Foreign vessels	663	384,292	13,974
Total	948	564,233	20,057
Same time in 1865	834	413,629	14,079
Same time in 1864	1,002	527,039	17,360
Same time in 1863	1,147	612,030	18,632
Same time in 1862	1,093	547,859	17,535
Same time in 1861	966	418,553	16,207
Same time in 1860	709	356,398	13,048

Cleared at New York for foreign ports during the three months ending June 30, 1866:

	No. of Vessels.	Tonnage.	Seamen.
American vessels	355	223,853	7,166
Foreign vessels	979	542,684	19,308
Total	1,334	766,539	26,474
Same time in 1865	1,220	567,577	19,531
Same time in 1864	1,215	607,236	19,795
Same time in 1863	1,134	578,821	18,560
Same time in 1862	1,169	576,046	17,898
Same time in 1861	1,127	607,580	19,020
Same time in 1860	1,085	515,851	17,525

The following statement will show the relative arrivals of American and foreign tonnage at this port during the first two quarters in each of the last six years:

First half of	American. Vessels.	Tons.	Foreign. Vessels.	Tons.
1861	1,676	810,619	724	373,860
1862	1,386	724,546	1,157	481,144
1863	1,065	591,405	1,403	616,298
1864	720	421,604	1,771	783,925
1865	650	349,569	1,547	661,940
1866	837	519,974	1,709	938,337

Coastwise record at New York for the first three months of each year since 1860:

	Entered Coastwise.		Cleared Coastwise.	
Year.	No. Vessels.	Tons.	No. Vessels.	Tons.
1860	376	126,659	1,138	429,750
1861	296	104,554	844	338,675
1862	156	48,234	159	152,510
1863	423	178,552	734	215,978
1864	315	149,921	696	227,484
1865	286	136,341	532	224,845
1866	566	295,283	1,103	527,222

Coastwise record at New York for the second quarter of each year, being for the three months ending June 30th:

	Entered Coastwise.		Cleared Coastwise.	
Year.	No. Vessels.	Tons.	No. Vessels.	Tons.
1860	430	133,047	1,587	644,545
1861	355	99,541	1,020	233,229
1862	144	39,110	300	88,867
1863	470	164,391	779	223,320
1864	357	149,740	811	223,822
1865	481	220,832	897	304,227
1866	739	386,098	1,183	482,372

☞ The North Missouri Railroad has been completed from St. Louis to Macon City, a distance of 170 miles, and the State of Missouri has authorized the proprietors to give a lien for $6,000,000 on the portion finished in order to enable them to continue the road to the Iowa State line.

Atlantic and Pacific Railroad.

The Board of Commissioners of the Atlantic and Pacific Railroad Company met at St. Louis on the 1st inst., and organized by electing John C. Fremont President, D. R. Garrison, of St. Louis, Vice-President, Chas. H. Howland, of St. Louis Secretary, and J. P. Robinson, of New York, Treasurer. There was a large attendance, the representatives of twelve States and Territories being present. The meeting was entirely harmonious. The capital of St. Louis and the West was strongly represented, and much zeal was manifested in regard to this great enterprise, which its projectors and friends aver will be the first constructed railway to the Pacific.

St. Louis and Iron Mountain Railroad.

The sale of the St. Louis and Iron Mountain Railroad took place at St. Louis, as advertised in the JOURNAL, on the 27th ult. The first bid was for two millions, then four millions, which was gradually increased, until the amount reached four millions six hundred thousand dollars, at which sum it was purchased by Robert A. Watt, Esq., one of the Commissioners for the State of Missouri. The Commissioners now invite proposals, in writing, for the purchase of said road, its lands, rolling stock and appurtenances. The Commissioners are: Robert A. Watt, Charles S. Rankin, Bernard G. Farrar. Address, St. Louis, Mo.

The Union Pacific Railroad.

PLUM CREEK, Nebraska, Monday, Oct. 1.

The Government Commissioners examined and accepted 35 miles more of the Union Pacific Railroad to-day. This makes 240 miles completed.

☞ We have received Messrs. SATTERLEE & Co's Monthly Circular No. 254. Persons desiring copies can be supplied free of cost by addressing Satterlee & Co., Bankers and Brokers, 70 Broadway and 15 New street, New York.

☞ We invite attention to the Advertisement of Messrs. WILSON, CALLAWAY & Co., 44 Broad street, this city. In addition to the usual business of dealing in stocks, bonds, gold, etc., they make advances on consignments of cotton, tobacco, etc., and allow four per cent. on deposits from merchants, bankers, and others.

☞ Messrs. PERKINS, LIVINGSTON & POST, 54 Exchange Place, N. Y., are the sole agents in the United States for the sale of Cast Steel and Iron Tyres manufactured by the Monkbridge Iron Co., Leeds, England. See their Advertisement in another column.

☞ Mr. EDWARD CLARKE, of the New York Stock Exchange, (late of E. C. Broadhead & Co.) has established his office at No. 26 Broad-street. See advertisement.

☞ "A Bond and Stockholder, and a Constant reader of the JOURNAL," is informed that the statement of earnings of the St. Louis, Alton and Terre Haute Railroad for August, 1866, as published in our last issue, is correct. The following is the official statement:

1st week in August			$46,112 84
2d	"	"	49,477 51
3d	"	"	47,900 21
4th	"	"	79,462 78
Total			$222,953 34

Commerce of New York.

The foreign imports at New York for the month of August, are officially stated as follows:

	1865.	1866.
Entered for consumpt'n.	$15,903,743	$14,560,161
Ent. for warehousing...	7,553,260	8,123,406
Free goods.....	836,533	931,856
Specie and bullion	182,072	269,221
Total entered at port...	$24,475,608	$23,884,644
Withd'n from warehouse	9,661,136	10,530,593

The foreign imports at New York for the eight months from January 1st, were:

	1865.	1866.
Entered for consumpt'n.	$64,204,961	$117,624,326
Do., for warehousing...	53,210,326	85,851,147
Free goods.....	6,746,676	8,868,021
Specie and bullion	1,487,535	3,795,368
Total entered at port ..	$125,649,498	$214,138,862
Withd'n from warehouse	59,900,368	69,608,689

The revenue from customs at New York for eight months has been as follows:

	1865.	1866.
Six months	$36,695,577 07	$67,548,189 78
In July	9,778,276 65	11,507,186 60
In Aug.....	13,113,689 50	12,349,760 82
Total since Jan. 1st.	$59,587,543 22	$91,405,137 20

The exports from New York to foreign ports in August, were:

	1865.	1866.
Domestic produce..	$14,500,860	$12,646,004
Foreign merchandise free	45,045	50,720
Do., dutiable.....	135,172	226,786
Specie and bullion	1,554,398	1,587,851
Total exports..	$16,235,475	$14,511,361
Do., exclusive of specie.	14,681,077	12,923,510

The exports from New York to foreign ports for eight months from January 1st have been:

	1865.	1866.

The Russian Extension Telegraph and Atlantic Cable.

A good deal of feeling has been caused among stockholders of the Western Union Telegraph Company by the recent action of the Board of Directors, looking to the purchase of the Russian Extension Company. It appears that the Russian Extension Company was organized by the managers of the Western Union Company, with a capital of $100,000, the Western Union stockholders having the privilege of subscribing pro rata. The privilege was also reserved to the Western Union Company to consolidate with the Russian Extension in two years after the completion of the latter, upon the basis of the net earnings of the two companies. The Western Union Company, let it be borne in mind, had the option to consolidate. It was not bound to do so. The stock of the Russian line was all subscribed, and twenty-five per cent. paid in—that is, $2,500,000. In consequence of the success of the cable, the Russian Extension enterprise is to be regarded as a failure. Even if it should be completed it could never compete with the cable, for the reason that it would require an average of at least six days to get a message from London to New York over the former, while the latter transmits it ahead of time; and for the further reason that a cable can be laid much cheaper than an overland line can be constructed. How much money has been actually invested in the Russian Extension Company we do not know; but whatever has been spent is as good as sunk, and, in the event of the cable continuing to work, of which, since the finding of the old cable in good order, there is not much doubt, it is not likely the Russian line will ever be completed. In the present state of things it would certainly be folly to spend any more money upon it.—*Cincinnati Gazette.*

Western Union Telegraph.

In view of the success of the Atlantic cable and the complications to which it may give rise, the directors of the Western Union Company, at a recent meeting in the city of New York, adopted a plan permitting such holders of Extension stock as should see fit to avail themselves of it prior to February 1, 1867, to surrender their stock and take the bonds of the company in its stead. The terms on which such exchange may be made are briefly as follows: The payments hitherto made on that stock amount to $25 per share. To this is added $2 for interest, making $27 per share. A call of $5 per share was made, payable on or before December 1, 1866, which would make the aggregate of $32 per share. At that rate the company proposes to receive and retire the stock, issuing the bonds of the company at ninety cents on the dollar in lieu of it. The exchange may be made now, or at any time prior to February 1, on paying the call above referred to—the bonds to draw interest from the date of exchange. It is supposed that the call now made will complete the line; and further, that telegraphic communication with China and Japan will be established by the time the Extension line is completed. Those two countries alone will furnish all the business necessarily to make the Extension enterprise one of most successful ever devised. It will be understood, of course, that it is optional with every stockholder to exchange for bonds or to retain his stock.—*Rochester Union and Adv., Sept. 25.*

Interest and Dividends.

The Hudson River Railroad Company will pay 15th instant, a semi-annual dividend of four per cent., less Government tax.

The Columbus and Indianapolis Central Railway Company will pay, 10th instant, a quarterly dividend of two and a half per cent., free of tax.

The Lehigh Valley Railroad Company has declared a quarterly dividend of two and a half per cent., payable October 10.

Great Falls and Conway Railroad.

This road is 20.09 miles in length, extending from Great Falls, N. H., to Union Village. A survey for the continuation of the road is now being made. Two routes are embraced; one taking Conway village in course, and the other following the shore of Walker's Pond. Many are satisfied that the road would pay much better by being taken further east from Wakefield, skirting the towns of Effingham and Freedom, N. H., and going up the valley from the latter place through Madison to Conway. This would give facilities to a very large agricultural district which any of the two other projects would almost deny.

☞ The Flint and Pere Marquette Railroad Company, of Michigan, now have means to complete 27 miles more of their road west of Saginaw, and have advertised for proposals for clearing, grading and fencing, and also for bridging the Saginaw River. They raised funds by selling $135,000 of stock at par, and also by loaning $275,000. This loan was made on very favorable terms, mainly at New Bedford, among capitalists who own the Flint and Holly Railroad.

☞ The Maryland and Delaware railroad has been completed to Goldsborough, 20 miles from Smyrna, and will be open to Hillsborough, 32 miles, by the 1st of December. Tench F. Tilghman, Esq., is Chief Engineer and Superintendent. Address, Greensborough, Md.

Chicago and Michigan Grand Trunk R. R.

We learn that the officers of the Peninsular, Michigan, Railroad are doing all in their power to further its interests and to benefit the community to be affected by it. The road, when completed, will be a link in a chain of roads from Port Huron to Chicago; the Port Huron and Lake Michigan Company, extending from Port Huron to Lansing; the Peninsular Railway Company, extending from Lansing to Battle Creek; a company about to be organized, from Battle Creek, *via* Cassopolis and Edwardsburg, to the Indiana State line; a company from that point, *via* South Bend and Laporte, to the west line of Indiana, and thence to Chicago. Upon the Port Huron and Lake Michigan road forty miles are now graded, and the whole line from Port Huron to Flint will be graded this fall, over two hundred men being now at work upon it; the line will be completed from Flint to Lansing and put under contract this fall, and from Port Huron west twenty-eight miles of iron will be laid this fall.

Boston, Hartford and Erie Railroad.

At a meeting of the directors of the Boston, Hartford and Erie Railroad, held in Boston on the 25th ult., John S. Eldridge of Canton was elected president, Edward Crane of Dorchester, vice-president, and H. S. Barry of Boston treasurer *pro tem.*

☞ The Detroit and Howell (Michigan) Railroad enterprise is progressing. The line from Howell to Lansing will be organized soon. The lines from Plymouth to Howell and from Lansing to Ionia will be put under contract within a few weeks. The final survey is now nearly completed. The line from Lansing to Ionia will in all probability be extended to Greenville, twenty miles from Ionia, the present autumn. The latter point is about forty miles from Lake Michigan.

☞ At a meeting of the stockholders of the Savannah, Griffin and North Alabama Railroad, held at Griffin, Georgia, on the 14th, ult., a resolution was adopted authorizing the appointment of an agent to visit the financial centres of the North to negotiate the sale or lease of the road on the condition of its being built from Griffin to Newnan in one year, and to Decatur, Alabama, in six years.

☞ The Leeds and Farmington (Me.) Railroad Company has assessed its stockholders 28 per cent. to pay off its mortgages, and leased its road for fifty years to the Androscoggin Railroad Company for $32,000 per year for the first five years, and then an annual increase of $2,000 per year, until the rent reaches $40,000 annually.

☞ The foreign bondholders of the New Orleans, Jackson and Great Northern Railroad Company have accepted the proposition of the company to fund the accrued interest as a second mortgage and to begin at an early day the payment of interest upon the original bonds.

☞ A company has been chartered to construct a railroad connecting with the Covington and Ohio Railroad, and having the eastern terminus at Newport News on Hampton Roads, which is said to be the finest harbor on the Eastern coast.

WANTED—By a Railway Commission House in the City of New York, a thoroughly Competent Salesman. With one having a good trade and acquaintance liberal arrangements will be made. Address P. O. Box 4,955, New York P. O.

New York, Saturday, October 13, 1866.

Railway Statutes of New York.

We have thought that a brief digest of the Railway Statutes of New York, comprising the miscellaneous sections of especial importance to railway companies would be of value to our readers. We give them in the order of their passage by the Legislature.

1. *Railroads, Common Carriers.*—Any railroad company receiving freight for transportation, shall be entitled to the same rights, and be subject to the same liabilities as common carriers. Whenever two or more railroads are connected together, any company owning either of said roads receiving freight to be transported to any place on the line of either of the said roads so connected, shall be liable as common carriers for the delivery of such freight at such place. In case any such company shall become liable to pay any sum by reason of the neglect and misconduct of any other company or companies, the company paying such sum may collect the same of the company or companies by reason of whose neglect or misconduct it became so liable. Sec. 9, [Revised Statutes, page 681, fifth edition, 1858.]

2. *Right to take and carry—Motive Power—Compensation—Regulations.*—Every corporation formed under this act shall have power: To take and convey persons and property on their railroad by the power or force of steam, or of animals, or by any mechanical power, and to receive compensation therefor—to regulate the time and manner in which passengers and property shall be transported, and the compensation to be paid therefor; but such compensation for any passenger and his ordinary baggage, shall not exceed three cents per mile. (Laws of 1850, ch. 140, § 28.)

Sec. 33 provides that the Legislature may reduce or alter the rate of freight, fare, &c., on such railroads; provided, that the same shall not be reduced below a profit of ten per cent. per annum upon the capital actually expended, without the consent of the corporation; nor unless it shall have been ascertained that the net annual income of the corporation exceeds ten per cent. per annum on the capital actually expended. (Laws of 1850, ch. 140, § 33.)

3. *Conductor and others must wear Badge—Refusal to pay fare—Expulsion.*—Every conductor, baggage master, engineer, brakeman, or other servant of any railroad corporation employed on a passenger train or in stations for passengers, shall wear upon his hat or cap a badge, which shall indicate his office, and the initial letters of the style of the corporation by which he is employed. No conductor or collector without such badge shall have authority to meddle or interfere with any passenger, his baggage or property. *Ib.*, Sec. 30.

If any passenger shall refuse to pay his fare, it shall be lawful for the conductor of the train and the servants of the corporation to put him and his baggage out of the cars, using no unnecesary force, at any usual stopping place, or near any dwelling house, as the conductor shall elect on stopping the train. *Ib.*, Sec. 35.

4. *Accommodations—Notice of Trains—Neglect—Damages.*—Every such corporation shall start and run their cars for the transportation of passengers and property, at regular times, to be fixed by public notice; and shall furnish sufficient accommodation for the transportation of all such passengers and property as shall, within a reasonable time previous thereto, be offered for transportation at the place of starting, and the junctions of other railroads, and at usual stopping places established for receiving and discharging way passengers and freights for that train; and shall take, transport and discharge such passengers and property at, from and to such places, on the due payment of freight or fare legally authorized therefor; and shall be liable to the party aggrieved, in an action for damages for any neglect or refusal in the premises. *Ib.*, Sec. 36.

5. *Checking Baggage—Refusal—Penalty—Witness.*—A check shall be affixed to every parcel of baggage when taken for transportation by the agent or servant of such corporation, if there is a handle, loop or fixture, so that the same can be attached upon the parcel so offered for transportation, and a duplicate thereof given to the passenger or person delivering the same on his behalf; and if such check be refused on demand, the corporation shall pay to such passenger the sum of ten dollars, to be recovered in a civil action; and further, no fare or toll shall be collected or received from such passenger, and if such passenger shall have paid his fare, the same shall be refunded by the conductor in charge of the train; and on producing said check if his baggage shall not be delivered to him, he may himself be a witness in any suit brought by him to prove the contents and value of said baggage. *Ib.*, Sec. 37.

6. *Formation of Trains—Violation of act a Misdemeanor.*—In forming a passenger train, baggage, freight, merchandise or lumber cars shall not be placed in rear of the passenger cars; and if they or any of them shall be so placed, the officer or agent who so directed, or knowingly suffered such arrangement shall be deemed guilty of a misdemeanor, and be punished accordingly. *Ib.*, Sec. 38.

7. *Sign Boards at Crossings.*—Every such corporation shall cause to be placed, well supported by posts or otherwise, and constantly maintained across each traveled public road or street where the same is crossed by the railroad on the same level; said boards shall be elevated so as not to obstruct the travel, and to be easily seen by travelers, and on each side of such boards, shall be painted in capital letters of at least the size of nine inches each, the words "Railroad crossing, look out for the cars." But this section shall not apply to streets in cities or villages, unless the

corporation shall be required to put up such boards by the officers having charge of such streets. *Ib.*, Sec. 40.

8. *Intoxication of Engineer or Conductor.*—If any person shall, while in charge of a locomotive engine running upon the railroad of any such corporation, or while acting as the conductor of a car or train of cars, on any such railroad, be intoxicated, he shall be deemed guilty of a misdemeanor. *Ib.*, Sec. 41.

9. *Injury of Railroads, etc.—Penalty.*—If any person or persons shall wilfully do, or cause to be done, any act or acts whatever, whereby any building, construction or work of any railroad corporation, or any engine, machine or structure, or any matter or thing appertaining to the same, shall be stopped, obstructed, impaired, weakened, injured or destroyed, the person or persons so offending shall be guilty of a misdemeanor, and shall forfeit and pay to the said corporation treble the amount of damages sustained by such offence. *Ib.*, Sec. 42.

10. *Fences, Gates and Cattle Guards—Damages—Penalty—Walking on Track.*—Sec. 44 provides that railroads shall construct and maintain fences along the line of road, and gates and cattle guards at necessary places. Corporations shall be liable for damages to cattle, etc., when the injury results from negligence or wilfulness. Any person leading animals along the inclosure formed by such fence without consent of corporation shall be liable to a penalty of ten dollars. It shall not be lawful for persons not employed on such railroad, to walk along the track thereof, unless the same is laid along a public road. *Ib.*, Sec. 44.

11. *Riding on Platform—Injury.*—In case any passenger on any railroad shall be injured, while on the platform of a car, or in any baggage, wood or freight car, in violation of the printed regulations of the company posted up at the time in a conspicuous place, inside of its passenger cars then in the train, such company shall not be liable for the injury; provided said company at the time furnished room inside its passenger cars, sufficient for the proper accommodation of the passengers. *Ib.*, Sec. 46.

12. *Extension of Act to all Railroads.*—All existing railroad corporations within this State, shall respectively have and possess all the powers and privileges contained in this act, and they shall be subject to all the duties, liabilities and provisions, not inconsistent with the provisions of their charter, contained in the foregoing sections, 28, (except subdivision 9,) 30, 33, 35, 36, 37, 38, 40, 41, 42, 44 and 46 of this act. *Ib.*, Sec. 49.

This digest brings the statutes relating to railways down to 1854, from which point we shall continue it to the present year.

Russian-American Telegraph.

The St. Petersburg *Borsen Zeitung* says that all preparations on the mainland, and the soundings in Behring Straits, for the completion of the line of telegraph between Russia and America are nearly finished. In the coure of the present year the telegraph will be constructed over a distance of three thousand five hundred miles beyond Revel, and the lines will be finished from Granlay Haven to the Kwichpak, and along the valley of this river, from the mouth of the Anadyr to Fort Anadyr, from Okhotsk to Gischiga, and perhaps even as far as to be joined with the Anadyr line. The cable between Granlay Haven and Ssenjawin Bay, a distance of about seven hundred miles, and that between Cape Sponberg and Cape Tolstoi, in the Bay of Anadyr, will, as it is said, be laid before the end of this month.

Pacific Railroad of Missouri.

The earnings of this road for the fiscal year ending March 1, 1865 and 1866, have been as follows:

Main Line:	1865.	1866.
From passengers	$453,880 41	$831,245 11
" freight	609,272 14	924,075 86

At the date of the last annual Report, February 28, 1865, the road was completed to Warrensburg, 218 miles from St. Louis; leaving a gap of 65 miles unfinished. On the 28th of May, 1865, trains commenced running to Holden, 232¼ miles; on the 14th of June to Kingsville, 237 miles; on the 26th of July to Pleasant Hill, 248½ miles; and on the 19th of September the last rail was laid and spike driven at Little Blue, 265 miles, where a connection was made with the track which had been laid eastward from Independence, 7.6 miles; the road having been opened and operated from Kansas City to Independence same months previous. On the 20th of September, the President and Vice-President of the company passed over the whole line of road from Kansas City to St. Louis, a distance of 283 miles; and on the 2d of October, the trains commenced their regular trips.

The Report gives a complete history of the enterprise from its inception in 1849 to the date of its completion in 1865—all of which we are obliged to omit for want of space.

The following statement will show the earnings of the road from commencement. It will be recollected that it was only in operation its whole length from October 2, 1865:

Year ending December	31, 1852	$ 108 15
" "	31, 1853	41,323 29
" February	28, 1855	97,176 39
" "	28, 1856	330,222 34
" "	28, 1857	426,285 97
" "	28, 1858	668,346 59
" "	28, 1859	674,248 95
" "	28, 1860	648,600 00
" "	28, 1861	683,644 28
" "	28, 1862	457,183 69
" "	28, 1863	679,956 06
" "	28, 1864	906,745 95
" "	28, 1865	1,097,967 69
" "	28, 1866	1,794,356 22

Since the destruction of the road, bridges, depots, &c., &c., during the invasion of the fall of 1864, we were necessiated to husband every resource to complete the road, and every building that could be dispensed with, and every other outlay that could be postponed, became imperative; so that after rebuilding water tanks and repairing the track and bridges, &c., &c., all the available means were applied to the construction of the road and in adding to the rolling stock, so necessary to operate the same as it progressed; and although strict economy was observed in all departments, yet it will be seen on referring to the accompanying reports that there is a large "floating debt" yet to be provided for; besides large sums of money to pay for engines, coaches and cars now being made, required for its length and business.

The gross earnings for the past year show a large increase over any previous one; but the net earnings do not appear in so favorable a light. This is easily explained, and may not happen again. It is known that there are two great features to obtain in railroading—the one "construction" and the other operating. When the road is completed, its cost is readily learned, and is fixed and stationary, and all repairs, renewals of track, bridges, depots, water tanks, rolling stock, &c., &c., that become necessary thereafter, are charged to the operating expenses of the road; and so great has been the outlay made necessary in order to meet the growing business, that, notwithstanding the large gross receipts, the net earnings seem small.

During the past year the track, buildings, bridges, &c., &c., which have been added and replaced, are as follows: Bridges at Lamine Box creek, Evans creek, Limekiln and Grays creek, Nos. 1, 3 and 4 to replace the original structures. Station houses have been built at South Point,

Gray's Summit, Miller's Landing, Hermann, Osage, California, Syracuse and Otterville. Tank houses at Miller's Landing and McDirk's. Some additions have been made to the machine shops at Jefferson City and St. Louis, an addition at Warrensburg, and an engine house at Knobnoster; a very large extension has been made to the freight house at Seventh street, St. Louis; besides many of the sidings or switches along the road have been lengthened. During the year, 43,437 new cross-ties have been placed in the main line between St. Louis and Gasconade, and 37,046 between Gasconade and Dresden; 6 new freight locomotives, 6 new passenger coaches, 75 box cars, and 8 stock cars have been added. In addition there have been made at the company's machine shop 5 baggage, 5 caboose, 9 box, and 40 stock cars; and 2 passenger coaches will be finished in the ensuing June; 389 tons of iron have been re-rolled, and 520 tons of new iron have been placed in the track. And at Kansas City an engine house for 3 locomotives, and a blacksmith shop have been erected. The cost of nearly all of the foregoing has been charged to operating expenses.

The right of way along the levee has been obtained from the Common Council at Kansas City, and arrangements satisfactorily made with parties westward for the right of way to the State line.

Messrs. Robt. Campbell, David Rankin, Jr., and Hudson E. Bridge have purchased grounds in Kansas City on which a large freight house has already been erected for the joint use of the Union Pacific and this company. It is intended to build on these grounds the machine shop and passenger depot. These gentlemen have paid for the ground, and so soon as the several sums paid by them with interest is refunded, they will convey the title to the company.

The track extends and the road is operated at this time to Locust street, at which point a passenger and freight depot has been built, and work is progressing westwardly to the State line, distant one and three-fourths of a mile, and the track will be laid and trains operated to meet the Union Pacific Railway about the last of this month.

The Missouri River Railroad, connecting our own with Leavenworth, is extending their road along the banks, meeting this road at the State line, being of the same gauge and a feeder.

A lease has been negotiated and executed between that company and our own for a term of twenty years, and it is expected that the road will be finished and operated during the ensuing June.

The contracted cattle yards have been greatly enlarged, and superior accommodations furnished under a contract with parties who give it their personal attention.

The first grand division of the road has been fixed at Jefferson City, and a large donation of ground favorably located has become the property of the company, upon which the machine shop, &c., will be removed and extended.

The regular monthly instalments of interest have been paid the County of St. Louis, and every effort made to sustain the credit of the company. With a completed road and no sufficient equipment to operate, the same would not be unlike a finished house, without furniture; and to avoid the former as much as possible, additional rolling stock has been ordered, to be paid for when delivered. Much of the equipment added the past year has been paid for by the individual credit of the Directors, who are at this time largely in advance.

Twenty locomotives, eleven passenger coaches, and one hundred box cars are contracted for, and will be delivered the succeeding months. Besides, it becomes imperative that some considerable new or re-rolled iron should replace the rail east of Jefferson City. Advices have been received that some of the locomotives and passenger coaches are *in transitu*, and others will immediately follow; and it is probable that an evening express through trains will be inaugurated the ensuing April.

Southwest Branch.

It will be seen on referring to the act of the General Assembly, approved March 3d, 1857, that the road became the property of the State on the 3d of March 1861. Not being so extended to Springfield, and the Chief Executive of the State declining to take possession, the road has been ever since operated by the company, and during the year 26,864 cross-ties have been renewed, and water stations built at Moselle and Sullivan, and the track and road bed is in good condition. By an act of the General Assembly, approved February 19th, 1866, the Governor was required to take possession of the road, and, pursuant to his requisition, the road, rolling stock and appurtenances have been scheduled, and the same is now operated by Commissioners. A temporary arrangement for transportation over the main line has been satisfactorily made.

The earnings of the year are not flattering. From the account stated between the two roads it appears that the branch is debtor to the main line. A sale of all the remaining "free lands" has been effected, and as the residue of lands allotted to the company was the property of the Southwest Branch, that portion attached to the main line having been sold, the Land Department has been discontinued.

The telegraph line was extended soon after the opening of the road to Kansas City, and is in successful operation along the whole line.

The road and rolling stock are in good order, and notwithstanding the greatly increased transportation, no passenger has yet been injured.

The same policy of guarding the road, bridges, &c., is continued, and no material change made in its general management.

The equipment of the road consists of 48 locomotives; 31 passenger, 7 mail, 17 express, 23 caboose, 239 box, 133 stock, 211 flat, 1 magazine, 4 wreck, 1 paymaster's and 9 shanty cars. Number of miles run 831,433. Total cost $348,942 54. Average number of miles run by engines 17,321.

Condensed Balance Sheet, March, 1.

Rerolling 389 tons rails, and hauling to and from Mills	22,700 00
Fish plates and chairs	5,000 00
	$139,660 00

In addition to these items, there have been rebuilt at Machine shops, 5 locomotives, 4 passenger, 3 mail, 2 baggage, and 2 caboose cars, and at least 75 per cent of the material used in their construction was entirely new.

President.—George R. Taylor.

Directors.—George R. Taylor, Robert Campbell, Adolphus Meier, George Patridge, Oliver A. Hart, Robert Barth, Hudson E. Bridge, Henry L. Patterson, Daniel R. Garrison, Samuel B. Wiggins, Benjamin Stickney, Charles H. Peck, and Wm. M. McPherson.

Vice President.—Daniel R. Garrison.

Secretary and Treasurer.—J. C. Porter.

Chief Engineer and Sup't.—T. McKissock.

Dubuque and Sioux City Railroad.

This company have decided to at once commence grading on the northern branch of their road from Waverly to the Minnesota line. The only question to be decided is: "What course shall the road run?" The citizens of the Cedar, the Little Cedar, Floyd Creek and the Shell Rock Valleys are making strenuous efforts to secure the road through their respective localities. Engineers are already in the field surveying the different routes and obtaining all the information they can in regard to the expenses of building and operating the road and the business that will be given to it when finished.

☞ The Iowa Division of the Chicago and Northwestern Railway is now completed to within about 90 miles of Omaha. The rails are to be laid upon this portion of the route by the 1st of April next.

Union Pacific Railway.

WYANDOTTE, Kansas, Saturday, Oct. 6.

Gens. Curtis and Simpson, and Dr. White, Commissioners, have just examined the Fifth Section of the Eastern Division of the Union Pacific Railway, and reported upon the same to the Secretary of the Interior. The road is now running a hundred and thirty-two miles west of Wyandotte.

Oswego and Syracuse Railroad.

This road is 36.29 miles in length, extending from Syracuse to Oswego. At the former place it connects with the New York Central, and Syracuse, Binghamton and New York Railroads; and at the latter with steamboats to ports on Lake Ontario and the St. Lawrence. It has 2.21 miles of sidings, and 0.39 mile of branch road. The weight of rail per yard is 57 lbs. The equipment consists of 5 engines, 7 first class, and 3 second class passenger cars, 4 baggage, mail and express, and 63 freight cars.

The following is a comparative statement of the receipts and expenditures for the fiscal years ending September 30, 1864 and 1865:

Receipts:	1864.	1865.

The number of miles run by passenger trains in 1865, was 44,096; by freight trains, 28,210; by work trains, 14,896—total, 87,202 against 88,498 in 1864, a decrease of 1,296. Number of passengers carried in 1865, was 170,137; do., carried one mile, 3,746,946. In 1864 the number carried was 181,416, and the mileage of do., 3,958,185—a decrease in passengers of 11,279, and in mileage of 211,239. Tons of freight carried in 1865, 72,705; and the mileage of do., 2,236,346. In 1864 the tonnage was 79,834, and the mileage of do., 2,451,432—a decrease in tonnage in 1865, of 7,129, and in mileage of 215,086.

☞ Track laying upon the Union Pacific Railroad is progressing so rapidly that it will reach the crossing of the North Platte River, a distance of 285 miles from Omaha, by the 1st of November next; and will be completed to a point within 40 miles of Julesburg by the 1st of January, 1867.

Syracuse, Binghamton and New York R. R.

This road is 81 miles in length extending from Geddes to Binghamton. At Syracuse it connects with the Oswego and Syracuse, and New York Central Railroads; and at Binghamton with the Erie Railway. It has 8 miles of second track and sidings. The weight of rail per yard is 60 lbs. The equipment consists of 12 engines, 10 passenger, 3 baggage, mail and express and 121 freight cars.

The following is a comparative statement of the receipts and expenditures for the fiscal years ending September 30, 1864 and 1865:

* Loss in operating road. † Also a dividend of 5 per cent. in stock. ‡ Also a dividend of 25 per cent. ◊ Part cash and part stock.

An interesting experiment has just been made by Mr. Eaton, of the Grand Trunk (Ca.) Railway, to try the new peat fuel introduced by Mr. Hodges. The locomotive was specially adapted for the purpose by Mr. Eaton. The peat, which was green, was estimated to contain 30 per cent. of water, instead of the average amount of 10 per cent., which ordinary dried peat holds. The train ran from Montreal to Matilda, a distance of 102 miles, six minutes in advance of the ordinary running time, and carrying the full amount of steam the entire way. This section of the Grand Trunk contains the heaviest gradients between Montreal and Toronto, which renders the work performed remarkable.

The result, so far, establishes the fact that a ton of green peat will perform an equal if not greater amount of work than a cord of seasoned wood. It is a well known fact that ordinary wood in a green condition is quite unfitted for raising steam in a locomotive, which renders the comparison still more striking. From the enormous deposits of peat scattered over the Province, the Grand Trunk Railway and other companies will find a cheap substitute for wood, now every day becoming more expensive.

Upper Mississippi States.

The following table is given to show the increase of the States named at intervals of five years:

Census.	Iowa.	Wisconsin.	Minnesota.
1850	.....	305,391	6,077
1855	192,214	552,451	.....
1860	509,414	775,881	172,023
1865	674,913	868,987	248,848
	754,732		

The increase per centum was as follows:

Periods.	Iowa.	Wisconsin.	Minnesota.
1850–'55	165.03	80.90	
1855–'60	32.49	40.45	10 years 2,730.72
1860–'65	11.82	11.99	44.69
	292.67	184.52	399.49

Taking the three States together they have increased in the past fifteen years from 503,682, to 1,872,517, or 1,368,835—271.76 per centum.

☞ The Shepaug Valley (Ct.) Railroad Company, which is to build a road from Bethlehem to the Housatonic road, has been organized. This road is intended to run from Bethlehem to Litchfield, through Morris, and then to follow the Bantam and Shepaug Rivers through Bantam Falls, Davis Hollow, Snecky Hollow, Factory Hollow, Pork Hollow, Moosehorn, Judea, Green, Steep Rock and Mine Hill, to the confluence of the Shepaug and Housatonic.

☞ The Wheeling (Va.) *Register* says that "the city railway movement is about to be brought before the people of that city at an early day in a prominent manner. The Committee appointed by the Chamber of Commerce and the Corporators of the proposed railway have already received considerable encouragement."

☞ The Farmers' Railroad is now completed from Oil City to Petroleum Centre, and trains commenced running through from Corry to Oil City on the 6th inst.

☞ The old project of a railroad from Amesbury, Mass., to Exeter, N. H., has been revived. The road will be about 10 miles long, and will not be a very expensive one to build.

American Railroad Journal.

Saturday, October 13, 1866.

Stock Exchange and Money Market.

Money has been in more active speculative demand, since our last. The extraordinary activity in Stocks has given temporary employment to enormous sums. Capitalists have been well prepared to meet the increased requirements of operators. Hence, there has been no marked changes in prices. Strictly first class houses have been promptly supplied at 4 per cent, and other leading firms at 5 per cent, on call. The rates to the large dealers in Government Securities have ranged from 3@4 per cent, with very liberal offerings at these figures. There has been rather less movement in the discount line, chiefly because of the comparative scarcity of prime to good short-date commercial paper, rates on which have been stationary at from 5@6½ per cent. per annum. Lenders have been more ready to respond to discount applications and have evinced less disposition to discriminate against four and six months' notes, to which they were decidedly averse earlier in the season. The banks have been quite generous in granting aid to the current speculations. Last week, they increased their loans $4,406,778, and their circulation, $88,408; while losing $2,486,342 of their legal tender reserve, and $1,440,262 of their specie. They gained $5,147,585 in the deposit line. Their deposits are now $228,484,370, or about forty millions more than at the same time last year. Their legal tender reserve amounts to $85,339,679, against $58,511,752 same time last year. Their circulation now stands at $29,302,358, against $10,970,397 same time last year. The loans now reach the unprecedented sum of $274,210,161, or forty-six millions more than at this date last year. The Bank Exchanges at the Clearing House, through the past week, averaged $138,180,293 a day, against a daily average of $96,261,995 the preceding week; and $100,881,220 the week ending with Sept. 22. The current week's exchanges average about $134,301,439 a day. The loss of legal tender, during the week, is mainly accounted for by remittances to the interior, where currency has been less abundant, and more urgently sought after. Reports from Chicago speak of a rather stringent and excited market, caused by the enlarged volume of business in produce, chiefly on speculative account, which interest the country banks have been seemingly decidedly eager to foster.

Mr. Camp, the superintendent of the City Bank Clearing House, has prepared the following interest exhibit of the annual clearances and balances of the city banks, for a period of thirteen years, ending with Oct. 1, comprising the whole period of the existence of the Clearing House, which was organized in 1853:

	Exchanges.	Balances.
1854	$5,750,455,087 06	$207,411,493 69
1855	5,362,912,098 38	289,694,137 14
1856	6,906,213,328 47	324,714,489 33
1857	8,333,226,718 06	365,313,901 69
1858	4,756,665,386 09	314,328,910 60
1859	6,448,005,956 01	363,984,682 56
1860	7,231,143,056 69	381,693,438 37
1861	5,915,742,758 05	353,383,944 41
1862	6,871,443,591 20	415,530,331 46
1863	14,867,597,848 60	677,626,482 61
1864	24,097,196,655 92	885,719,204 93
1865	26,032,384,341 89	1,035,765,107 68
1866	28,717,146,914 09	1,066,135,106 35
Total for 13 years	$151,590,133,640 51	$6,780,211,230 52
Balances	6,780,211,230 82	
Tot'l trans.	$158,070,344,871 33	

National Bank notes to the amount of $495,700, were issued last week, making the total issue to 1,661 banks thus far $293,528,603, against $194,182,630 same time last year. The United States bonds held by Treasurer Spinner in trust for National Banks as security for circulating notes amount to $332,903,300; and for the public deposits, $39,171,950—making a total of $372,075,250.

The U. S. Sub-Treasury receipts, week ending with Oct. 6, were $10,212,269, including $2,266,335 from customs duties; payments, $7,766,590; balance at the close of the week, $90,288,601, against $87,842,832 at the close of the preceding week. The business of the Office during the first two days of the current week, was as follows: Monday, receipts, $4,810,139, and payments, $2,348,066. Tuesday, receipts, $3,415,062, and payments, $1,973,738. The balance at the close of business on Tuesday stood at $92,058,007, against $89,457,801, a week ago.

Government revenues were moderate last week. Excises, yielded about $6,500,000; customs at

the port of New York, $2,266,335, and at the outports, at least $1,150,000 more, making the grand total income for the week equal to about $11,624,000 in currency, against disbursements of only $834,934 on account of the three leading executive departments. The total receipts of the National Treasury, from excises, since July 1, 1866, have been about $108,000,000.

An extremely favorable representation has been given to the last public debt statement, to Oct. 1, the details of which we print elsewhere in this paper. These details show a net liquidation of $22,346,226 54 during the month of September; and of $184,352,629 75 since August 31, 1865, when the debt was largest. The net indebtedness of the country August 31, 1865, was $2,757,689,571 43; October 1, 1866, it was $2,573,336,941 68—net liquidation in 13 months, $184,352,629 75. Thus it appears that the debt has been cancelled at the monthly rate of over thirteen millions since August 1, 1865. The aggregate legal-tender circulation shows a slight contraction, being now $554,677,432, against $555,115,732 on 1st ult. The plain greenback circulation on June 1 was $402,128,318; August 1, $400,361,728; Sept. 1, $399,603,592, and Oct. 1, $399,165,292. It is confidently expected that the interest-bearing Public Debt, amounting to $2,240,996,132 will be further reduced, perhaps by the 1st January, and certainly by the 1st July, 1867, to two thousand millions, and the entire Interest charge to about $120,000,000 per annum. Already $22,500,000 of the principal has been notified for payment on the 25th inst., and the gradual and judicious application of only a portion of the gold balances in the Treasury to the purchase of the 6s of 1867-8, and other gold-bearing Stocks, would not only make a further reduction of say $50,000,000, but greatly hasten, by the very influence of these purchases, the conversion of the 7.30 per cent. notes into the Consolidated 5-20 Stock of 1865, and still leave, at the close of the present quarter, (Dec. 31,) full sixty millions of Gold in the ownership of the Treasury, after paying out $24,000,000 in November for Gold Interest. We should not be surprised to find Government anticipate the purchase or prepayment of a large portion of the $155,000,000 Compound Notes out of the surplus currency revenues of the quarter.

We have been rather authoritatively informed that Government negotiated successfully last week for the purchase of over a million of the gold bearing six per cent. bonds of 1867. The price agreed upon was about 93½ per cent. in coin, according to our advices, which, with gold, at 150, is equal to about 140 in currency. This would leave a small profit to the parties of whom the Government is represented as having made the purchase.

Gold has been as low as 148 regular way, and as high as 152 cash, since our last. The latter figures were realized on a few exceptional transactions on Monday, when the *bulls* in the Gold Room sharply cornered the speculative and mercantile *short* interest. Cash gold on that day was extremely scarce, and as much as 1½@2 per cent. a day was paid for the use of coin for immediate delivery. On Tuesday, there was a decided reaction. The opening price 149, followed by a decline to 148, and a final rally to 149⅜. On Wednesday, the opening figures were 149⅛, and the highest rate 151¼, the closing quotation having been 150⅜. The speculative and mercantile demand was more urgent, and the *bulls* availed themselves of this circumstance to give the market a fresh twist. In the street it was stated that the parties, of whom the purchase of 1867 bonds was made by Government, as mentioned above, were represented in the Gold Room on the *bull* side, which if true, would seem as if they were disposed to increase the profit of the Stock turn, by inflating the premium on the specie equivalent. This is pretty sharp practice, even for Wall street. The customs demand last week, averaged $391,466 a day; thus far, this week, it has been equal to $491,500 a day, or equal to a weekly aggregate of $2,949,000. The arrivals of specie from Europe, Havana and other foreign ports, last week, reached $755,788, but there were no receipts from California. The total customs revenue of the Government, in coin, at this port, since Jan. 1, has been $106,949,636, against $76,903,526 same time last year. The total receipts of California gold at this port since Jan. 1, have been $32,749,404, against $13,728,147 same time last year, showing an increase, in 1866, of $18,521,258. The exports of specie from this port, last week, were $296,700, making the total outflow of specie from the port, since Jan. 1, $54,167,929, against $23,029,538 same time last year. Government disbursed last week through the U. S. Sub-Treasury here, on account of the September coin interest, on the public debt, chiefly on the Ten-Forty Loan, $46,000, making the total coin interest disbursements through the Government office, since Jan. 1, 1866, $31,852,589, against $28,565,043 same time last year. Outside of the speculative and mercantile demand for coin, the main reliance of the *bulls* is on the Customs drain. The Customs revenue of the Government at this port keeps up to a handsome average, leading to a steady accumulation of coin in the National Treasury. Of the Treasury coin balance on the 1st inst., which stood at $86,259,909, the sum of $75,202,269 was absolutely the property of the department, as against $60,858,698 on the 1st of September, showing a gain during the month of $14,343,571; while the sum of only $11,057,640 belonged to depositors holding gold certificates, as against $15,480,220 standing to the credit of the same parties on the 1st ult., indicating a reduction of $1,422,580 in this form of the National obligations.

According to the official records of the Treasury Department demand notes, to the amount of $250,374 75 are at present outstanding. These notes are receivable for customs duties, but cannot by law be redeemed at the Treasury for more than par in greenbacks. $59,779,625 have been redeemed since the original issue of $60,030,000.

By the *Teutonia* on Wednesday, equal to $42,300 in coin was received at this port from Hamburg.

Foreign exchanges have been seriously disturbed and depressed, this week, mainly by the *clique* operations in gold, though in part by the increased offering of bills, resulting from fresh speculative purchases of U. S. 5-20s, on foreign account. Bankers' 60 day bills on London have been quoted down to 106½@107½, and on Paris to 5.32½@5.25; sight bills on London to 107⅜@108⅛; and on Paris to 5.25@5.22½. There has been a limited offering of produce bills. The week's exports of domestic produce and miscellaneous goods have been to the currency value of $2,930,151, against $2,418,527 same week last year. The exports since January 1, have been to the value of $148,258,934, against $120,219,890 same time last year.

A marked increase in business in Government securities has been noticeable this week. There have been extensive investment, and some considerable speculative purchases. The favorable debt statement of the 1st inst., stimulated the demand, very decidedly. The purchases have been quite evenly distributed through the whole list, though the 5-20s of all four issues have been the most freely dealt in. U. S. sixes of 1867 closed 138½; U. S. sixes of 1868, at 135½; U. S. sixes of 1881 closed 112¾@113; U. S. Five-twenties of 1882 at 113@113¼; U. S. Five-twenties of 1865 at 108⅜; U. S. Five-twenties of 1866, 108¼@108⅜; U. S. Ten-forties at 99⅝, and U. S. Seven-thirties at 106⅛@106⅝. The brokers are buying the compound interest notes at the following rates, and selling at an advance of ¼@½ of 1 per cent. on these figures:

June, 1864.....117	May, 1865 .....112¼
July, 1864.....116½	August, 1865....110¾
August, 1864....116	September, 1865..110¼
October, 1864....115	October, 1865....109¾
December, 1864..114	

In the railway and miscellaneous share line, last week, closed very briskly and buoyantly, after the most extensive six days' business on record. The Erie speculation, however, suddenly broke down on Monday, leaving the market decidedly feverish. Tuesday, the annual election took place, resulting practically in the restoration of the old board of directors to office for another year, the only important change having been the substitution of Mr. Lane for Mr. Vanderbilt. The street talk is that the big fellows in the old board bought up their opponents, thus silenced opposition, and depriving the street operators of much of their antcipated profits on the inflation of the stock. Since Monday, there has been a less excited, but more stable and promising market for all really paying property. The tendency on Wednesday was toward higher figures for the better class of stocks.

There has been less doing in produce and merchandise, during the week, and prices of breadstuffs, cotton, and provisions have favored buyers. There has been comparatively little inquiry for produce for export, because of the current rates in this market being above the views of shippers. Speculation in produce at the West is less rampant, in consequence of the contracted volume of currency available at the various centres, and the breadstuff market closes decidedly heavy. Cotton has receded 5@6 cents per lb., but closes with rather more buoyancy. The week's exports of cotton have been 1,813 bales from this port, and 2,100 bales from all the shipping ports, leaving an available supply of 110,000 bales here, and at all the shipping ports, of 260,000 bales. According to the official annual exhibit of the Cotton trade of the United States, for the year ending Sept. 1, 1866, the total receipts at all the shipping ports of the United States, were 2,151,043 bales, against 3,656,086 bales in 1860-'61; total exports, 1,554,664 bales, against 3,127,565 bales in 1860-'61; total taken for home consumption, &c.,

667,292 bales, against 843,740 bales in 1860-'61. The total receipts at all the shipping ports from May 1, 1865, to Sept. 1, 1866, were 2,571,043 bales. In dry goods, the business has been principally in domestic cottons, heavy woolens, and fancy dress fabrics, at, however, less buoyant prices. The total imports of foreign dry goods, last week, were $1,867,576, and the total amount marketed $1,838,907. The value of foreign merchandise imported last week, was $2,539,429—making the grand total specie value of last week's imports of dry goods and merchandise, $4,406,006, and since January 1, $238,979,377, against $151,-265,588 same time last year. The freight market is quiet, but firm with 521 vessels of all classes in port.

The latest quotations at the London Stock Exchange compare as follows with former returns:

	Sept. 22.	Oct. 2.	Oct. 6.
Consols	@89¼	89½	89¼
U. S. 5-20's	@72½	70¼	70¼
Erie	@48	51½	51½
Ill. Central	@78½	78¼	78½

The New York exports, exclusive of specie, for the week ending Oct. 9, and since the beginning of the year, compare as follows:

	1865.	1866.
For the week	$2,418,527	$2,939,151
Prev. reported	117,801,363	145,328,783
Since January 1	$120,219,890	$148,258,934

The New York imports for the week compare as follows:

	1865.	1866.
Dry goods	$3,129,787	$1,867,576
Gen. merchandise	2,715,999	2,539,429
Total for the week	$5,845,786	$4,407,005
Prev. reported	138,839,335	236,460,263
Since January 1	$144,685,121	$249,867,268

The balance in the Sub-Treasury on Wednesday was $92,858,315 41.

The following quotations of sales of Railway and other securities are in addition to those given elsewhere in our columns:—

New York.—North Carolina 6s, issued to Wilmington, Charlotte and Rutherford R. ☞ Messrs. Fowle & Co., 70 Broadway, N.Y., are sole agents in the United States for Owen's Patent Wheel, Tire and Axle Co., Rotherham, Eng., Manufacturers of Owen's Patent Axles, and solid, weldless cast steel and wrought iron tires—warranted equal to any imported. See their advertisement in another column.

Railroad Earnings.--Weekly.

The traffic of the Great Western Railway of Canada, for the week ending Oct. 5th, 1866, were $75,191 90
Corresponding week of 1865 ..... 92,082 76

Decrease $16,890 86

The earnings of the Grand Trunk Railway of Canada for the week ending Sept. 29th, 1866 were $167,053 00
Corresponding week of previous year.. 169,642 00

Decrease $2,589 00

The earnings of the Marietta and Cincinnati Railroad the 4th week in Sept., 1866.. $33,577 00
Corresponding week previous year.... 35,581 21

Decrease $2,004 21

The earnings of the Western Union Railroad for the week ending Sept. 30, 1866 . .. $24,401 07
Corresponding week previous year.... 23,680 34

Increase..... $720 73

The earnings of the Chicago and Rock Island Railroad for the 4th week in Sept., 1866 were..... $104,781 00
Corresponding week of previous year.. 86,406 00

Increase..... $18,375 00

The earnings of the Chicago and Northwestern Railway for the fourth week in Sept., 1866 were..... $315,850 00
Corresponding week of previous year,. 330,490 00

Decrease..... $14,640 00

The earnings of the Detroit and Milwaukee Railroad for the fourth week in Sept., 1866, were $41,356 00
Corresponding week of 1865..... 43,389 00

Decrease..... $2,033 00

The earnings of the Virginia and Tennessee Railroad for the fourth week of Sept., were $17,460, an increase of $8,913 on the same week last year.

Illinois Central Railroad.

The statement of this Company for the month ending September 30, 1866, is as follows:

LAND DEPARTMENT.

Acres Construction Lands Sold	19,255.07 for	$193,044 16
Acres Int. Fund Lands sold	920.00 for	13,198 40
Acres Free Lands sold..	2,047.80 for	28,378 70
Total sales during month of Sept., 1866..	22,222.87 for	$234,621 26
To which add Town Lot Sales		1,285 00
Total of all		$235,906 26
Cash collected in Sept		$224,947 46

TRAFFIC DEPARTMENT.

Receipts from	Passengers	$160,152 98
do.	Freight	330,510 00
do.	Mails	6,358 33
do.	Rent of Road	4,000 00
do.	Other Sources	50,000 00
Total Receipts in Sept., 1866..		$551,021 31
Total Receipts in Sept., 1865..		$686,381 63

☞ The New York, Alexandria, Washington and Georgetown Steamship Company has organized and appointed the following officers: Abraham H. Covert, president; John R. Elvans, vice-president; Richard Riker, treasurer; Geo. W. Brown, secretary. Three fine steamers have been purchased.

Tide-Water Receipts.

The quantity of flour, wheat, corn and barley, left at tide water from the commencement of navigation to the 30th Sept., inclusive, during the years 1865 and 1866, was as follows:

	Flour, bbls.	Wheat, bu.	Corn, bu.	Barley, bu.
1865..	490,600	5,733,700	10,493,900	573,100
1866..	120,100	2,261,300	19,180,900	342,600
Dec.	370,500	3,472,400	*8,687,000	230,500

* Increase.

By reducing the wheat to flour, the quantity of the latter left at tide-water this year, compared with the corresponding period last year, shows a deficiency of 1,064,980 bbls. flour.

The following comparative table shows the quantity of some of the principal articles of produce left at tide-water from the commencement of navigation to and including the 30th of Sept., in the years indicated:

	1864.	1865.	1866.
Canal opened—	April 30.	May 1.	May 1.
Flour, bbls.....	670,400	490,600	120,100
Wheat, bush....	11,572,400	5,733,700	2,261,300
Corn, bush.....	7,435,600	10,493,900	19,180,900
Barley, bush....	220,500	573,100	342,600
Oats, bush.....	5,759,200	6,413,800	6,643,800
Rye, bush.....	135,300	501,800	679,800
Malt, bush.....	.....	421,200	333,100
Beef, bbls	5,600	7,190	100
Pork, bbls.....	54,700	14,850	11
Bacon, lbs.....	559,300	1,273,100	.....
Butter, lbs.....	147,200	107,600	47,300
Lard, lbs.....	1,760,500	1,964,100	58,900
Cheese, lbs.....	438,100	6,557,100	1,432,900
Wool.....	658,500	426,400	403,200

St. Louis and Iron Mountain Railroad.

The St. Louis *Republican*, in noticing the sale of this road on the 27th ult., says:

The sale was one to foreclose the mortgage held by the State on this road, which now amounts to about $4,700,000, consisting of the principal of the bonds issued by the State to the road, $3,501,000, and interest in arrears.

This road, which as it is well known, connects St. Louis and the great iron region at Pilot Knob, is eighty six and a half miles long. The company which built it was chartered with a capital of six million dollars. The paid up subscriptions to capital were $1,971,447, to which St. Louis city and county contributed $1,500,000 in bonds. Other corporations subscribed, chiefly in bonds, $255,000. The balance, $282,500 was made up by individual subscriptions.

The cash cost of the road and equipment, including Potosi Branch, rolling stock, &c., was, per last report, November, 1865, $4,356,819. The discount and interest paid in State, county and city bonds was $1,448,114, making a total of $5,804,933. The gross earnings for the year ending October 1, 1865, were $524,713. The expenses were $484,244. These expenses include for operating expenses $167,674, repairs of rolling stock $101,684, and repairs of road and bridges $214,885. This last item was unusually heavy, owing to circumstances of an extraordinary character.

This road will now be put into the hands of the Commissioners and will be offered for sale on terms prescribed by an act passed at the last session of the Legislature.

☞ The President has appointed the following gentlemen United States Government Directors of the Union Pacific Railroad Company until the first Wednesday of October, 1867, viz: Timothy J. Carter, of Illinois, Charles T. Sherman, of Ohio, George Ashmun, of Massachusetts, Springer Harbaugh, of Pennsylvania, and Jesse L. Williams, of Indiana.

☞ The Columbia and Port Deposit Railroad Company broke ground at Port Deposit about two weeks ago, and have since been pushing their work forward. The road will connect with the Philadelphia and Baltimore Central, which is nearly completed to the Susquehanna River, and with the branch of the Philadelphia, Wilmington and Baltimore road from Perryville to Port Deposit, which is also being pushed rapidly to completion.

Imports of Dry Goods.

The imports of foreign dry goods at New York for the month of September, were:

Western Maryland Railroad.

The President of this company, Robert Irwin, Esq., corrects a statement made in the Baltimore *American*, that "several routes have been surveyed—one near Emmittsburg, another near Mechanicstown, and a route midway between the two; the latter, called the tunnel route, seems to be the most favorable, and will probably be selected." The facts are: that the engineer of the company has been instructed to examine three lines from the tunnel at Royers' Summit, on South Mountain—one *via* Mechanicstown; the second *via* Emmittsburg, and the third *via* the middle route, which is midway between Emmittsburg and Mechanicstown. It is expected that the engineer will be able to report on these several lines in a short time, when the route selected will be submitted to the Mayor, Register and Comptroller for their examination and acceptance, under a section of the ordinance of the Mayor and City Council of Baltimore authorizing a subscription of two hundred thousand dollars to the stock of the Western Maryland Railroad Company. Until this is done, no one is authorized to say what line is the most favorable one, and the one most likely to be adopted. It may be proper to say, in this connection, that the bid of Messrs. Dougherty, Barry & Co., has no reference to either of these routes, but they are willing to build the road on the line selected by the company's engineer.

St. Louis and Iron Mountain and Cairo and Fulton Railroads.

As stated in our last issue, the sale of the St. Louis and Iron Mountain Railroad took place at St. Louis, as advertised, on the 27th ult., and was purchased for the State of Missouri by Robert A. Watt, Esq., President of the Board of Commissioners of that road, for the sum of Four Millions, Six Hundred Thousand Dollars. On the 1st inst., the Cairo and Fulton Railroad of Missouri was also sold to satisfy the claims of the State, and was purchased by Charles S. Rankin, Esq., President of the Board of Commissioners of that road, as a representative of the State, for the sum of Nine Hundred and Fifty-Seven Thousand Five Hundred Dollars. The Commissioners now invite proposals in writing for the purchase of said roads, which will be received until the 8th proximo, and shall each state the price bid for the respective roads, and that they are based upon the following terms and conditions, viz:

First. The price or consideration bid shall be payable as follows: One-fourth on closing the contract, and the balance in five equal annual instalments; the first payable in one year, the second in two, the third in three, the fourth in four, and the fifth in five years thereafter, with six per cent. interest on deferred payments, payable annually: *Provided*, that all sums bid may be paid at any time prior to maturity, in either cash or the bonds or other liabilities of the State of Missouri.

Second. The roads and all rolling stock belonging thereto shall be kept in good serviceable condition during the progress of said roads (respectively) to completion.

Third. Bidders for the St. Louis and Iron Mountain Railroad must agree to finish that road to a point south of Pilot Knob, to connect with the Cairo and Fulton Railroad of Missouri, in three years, and to the Mississippi River, opposite to or below Columbus, Kentucky, in five years from the date of the sale; and they must also agree to expend in each and every year, in case they become the purchasers, the sum of five hundred thousand dollars in the work of gradation, masonry, or superstructure on said extension.

Bidders for the Cairo and Fulton Railroad of Missouri must agree to complete said road from the Mississippi River, opposite the town of Cairo, Illinois, or Columbus, Kentucky, to the intersection of the St. Louis and Iron Mountain Railroad line, within three years after the date of sale thereof.

Bids for the roads must be separate. Those for the St. Louis and Iron Mountain Railroad should be addressed to Robert A. Watt, President Board of Commissioners of that road; and those for the Cairo and Fulton Railroad of Missouri to Charles S. Rankin, President Board of Commissioners Cairo and Fulton Railroad of Missouri, St. Louis, Mo.

The National Debt.

The following is a comparative statement of the Public Debt of the United States:

	Sept. 1, 1866.	Oct. 1, 1866.
Debt bearing int. in coin.	$1,288,322,541 80	$1,310,065,941 80
Debt bearing interest in currency..	978,771,040 00	930,930,190 00
Matured debt not presented	19,653,443 82	23,302,372 14
Debt bearing no interest.	441,567,810 33	437,252,205 33
Total...	$2,728,314,835 95	$2,701,550,709 27
Coin in Treasury.....	$76,333,918 27	$86,259,909 35
Currency....	56,297,749 46	41,953,858 24
	$132,631,667 73	$128,213,767 59
Debt less cash in the Treasury.....	$2,595,683,168 22	$2,573,336,941 68

The total debt shows a decrease since the 1st of September of $26,764,125 68. The balance in the Treasury shows a decrease, as compared with September 1st, of $4,417,900 14. Deducting the amount on hand from the aggregate debt, both on the 1st of September and the 1st of October, the decrease of debt would be $22,346,226 54. The total debt on the 31st of August, 1865, stood at $2,845,907,626 56. The balance in the Treasury at that date amounted to $88,218,055 13. Deducting the cash in the Treasury from the aggregate debt both on the 31st of August, 1865, and 1st of October, 1866, and the actual decrease in the Public Debt since that period has been $184,352,629 75.

Atlantic and Pacific Railroad.

We last week announced the organization of this company, at St. Louis, by the election of John C. Fremont as President, Daniel R. Garrison Vice-President, Charles H. Howland Secretary, and J. P. Robinson Treasurer. General Fremont, on taking the chair, delivered an address, enlarging upon the advantages of the proposed route. 'By a recent act of Congress," he said, "the line of the road is laid in Southwestern Missouri and the valley of the Canadian, and generally along the thirty-fifth parallel to the head of navigation on the Colorado, and thence to the Pacific coast. To aid in its construction, the act grants over twenty-five thousand acres of land to the mile, making for the entire route about forty-six millions of acres. Its really central position makes the line national. It is believed that it will prove to be the shortest, and it certainly presents fewer natural obstacles, and is the most practicable of any among all the proposed routes to the Pacific. From Springfield to San Francisco its estimated length is one thousand eight hundred miles, making for the distance from St. Louis about two thousand miles, and from New York about three thousand two hundred miles to San Francisco. From New York, by way of Memphis, to San Francisco, the distance is three thousand seven hundred, making a difference of five hundred miles in favor of this route."

☞ Messrs. Bradford & Renick, 71 Broadway, N. Y., are prepared to furnish spruce, hemlock, cedar and hackmatack sleepers; also, Georgia pine, white pine, spruce and oak timber and lumber of every description. Address Bradford & Renick, 71 Broadway, N. Y.

☞ A Railroad Commission House in this city is in want of a thoroughly competent salesman, one having a good trade and acquaintance may address Box 4,955, N. Y. Post Office.

A West Side Railroad.

Another railroad, designed to connect Albany with New York, to be located on the west side of the Hudson River, is spoken of in the Newburgh papers. The company has been organized, and articles of association filed. The directors are: Geo. Talbot Olyphant, John Jacob Astor, Jr., John McB. Davidson, Daniel Butterfield, Homer Ramsdell, Thos. Cornell, John H. Hasbrouck, Thos. W. Olcott, Erastus Corning, Jr., Robert H. Pruyn, Samuel Schuyler, and Jos. H. Ramsey.

Union Pacific Railroad Company.

The completion of this road from Omaha, Nebraska Territory, westward to the 100th meridian of longitude is to be celebrated by an excursion and appropriate ceremonies. Invited guests will leave New York on the 15th inst., reaching Omaha the 22d. Tickets over the intermediate roads will be provided by the company—but will be good only in the hands of invited guests.

☞ The annual meeting of the Concord and Portsmouth Railroad Company was held at Manchester, N. H., on the 3d inst. The annual report was presented, and the following gentlemen elected directors for the ensuing year: Stephen Kenrick, S. Plumer Dow, Benjamin F. Martin, Joseph B. Walker, and Samuel N. Bell. At a meeting of the directors held subsequently, Hon. Stephen Kenrick was re-elected President, and William H. Hackett, Clerk.

☞ The railway from the Truro terminus of the Nova Scotia Railway to Pictou, is rapidly approaching completion. It is said that a very satisfactory offer has been made by a reliable English firm for the construction of the road from the Windsor terminus of the branch of the same road to Annapolis, and that it will probably be accepted.

☞ The Milwaukee *News* of 5th inst., says: "Our city experienced a pleasant surprise yesterday, in the arrival here of about forty ladies and gentlemen from Rock Island, an excursion party who came on the first train from that place to Savannah, on the new railway link just completed connecting those two points."

☞ The Union Pacific Railroad, Eastern Divisian, is now completed to Fort Riley, and will reach Junction City, 2½ miles west of Riley on the 15th inst.

New York and Oswego Midland Railroad.

The object of this road is to establish a direct connection between New York and Oswego. It is intended to find its way into New York through the northern junction of Sussex Co., N. J. We learn that engineers have been for some time surveying routes on the western side of the mountains from the vicinity of Port Jervis to near Beemersville, New Jersey, where it is said they will be obliged to tunnel the Blue Mountain; after which they intend crossing the valley by Deckertown, Hamburg and Snufftown, and thence through Passaic and Morris counties towards the Hudson river. It is intended to start from Oswego, running thence to Syracuse, and from that city southeast through Onondaga, Madison, Chenango, Otsego, Delaware, Sullivan and Orange counties, entering Sussex county, New Jersey, near Port Jervis.

Interest and Dividends.

A semi-annual dividend of eight per cent., free from United States Government tax, upon the capital stock of the Cleveland and Toledo Railroad Company, has been declared payable on the 25th day of October inst., at the office of Messrs. Wells, Fargo & Co., No. 84 Broadway, New York, and until the 15th day of November next, and after the latter date at the company's office in Cleveland.

The Central Railroad Company of New Jersey will pay, 20th instant, a quarterly dividend of two and a half per cent., free of tax.

The Chesapeake and Delaware Canal Company have declared a dividend of 25 per cent., free of tax, delivered after the 20th instant, in shares of the company, and in scrip for fractional parts of a share.

The Baltimore, Catonsville and Ellicott's Mills Passenger Railway Company has declared a dividend of 4 per cent. on the capital stock, payable on and after 31st instant, clear of United States tax.

Southern Pacific Railroad.

The New Orleans *Picayune* says that the Southern Pacific Railroad from Shreveport, La., to Marshall, Texas—about forty-five miles—is in excellent order, and daily trips are profitably made, with continually accumulating business, and that traffic is bound to increase constantly, as the road progresses, and as the vast and fertile regions from Marshall to El Paso are opened to a market, the best on the continent—New Orleans. The *Picayune* adds that a company of foreign capitalists has made propositions to build the road its entire length, and that the terms proffered are considered by many to be highly liberal. The propositions are now under consideration.

☞ The stockholders of the Washington, Alexandria and Georgetown Railroad Company have elected a new Board of Directors and the following officers: R. W. Latham, of New York, President; Joseph B. Stewart, of Washington, Secretary, and Wm. Keyser, of Baltimore, Treasurer.

☞ A fast freight line from the terminus of the Union Pacific Railroad to Denver and Salt Lake City has been organized. Relays of horses for the line will be stationed at proper intervals, and no efforts will be spared in forwarding freights by this line to their destinations.

Troy and Greenfield Railroad.

The following is a copy of an order adopted by the Governor and Council for the completion of the Troy and Greenfield Railroad from Greenfield to the tunnel:

"*Ordered*, That the Commissioners on the Troy and Greenfield Railroad and Hoosac Tunnel be, and they are hereby authorized to lease to the Fitchburg and Vermont and Massachusetts Railroad Corporations the railroad from Greenfield to the Tunnel, upon the terms and conditions contained in the proposal of said corporations of July 24, 1866; provided it shall first be ascertained by said Commissioners that the total cost of the completion of said railroad, substantially on its present location, will not exceed the sum of six hundred thousand dollars."

Chicago, Rock Island and Pacific Railroad.

The extension of this road from Kellogg Station, its present terminus, to Des Moines, Iowa, has been let to a Pennsylvania firm, and the prospect is that the work will be commenced at once. The Chief Engineer of the road has been directed to survey and locate the route west of Des Moines, and get 80 miles ready for letting immediately. We understand that the road is to be pushed through to Council Bluffs as rapidly as possible, and to a connection with the Union Pacific Railroad at Omaha.

St. Croix and Superior Railroad.

The immediate building of the St. Croix and Superior Railroad is now a fixed fact. We have been handed a note from A. L. Livingston Land Commissioner of the Company, stating that the Company's bonds have been endorsed and guaranteed by the Farmer's Loan and Trust Company, of New York, for $1,000,000 which will build and equip 40 miles of road. He has also just received a letter from J. C. Campbell, Chief Engineer, stating that iron for 20 miles, will be here next month, and Mr. Campbell will also be here to take charge of the work. Anthony W. Morse, of New York, Managing Director, will be here next week to push forward the enterprise.—*Hudson (Wis.) Star.*

☞ A meeting of stockholders of the Tennessee and Alabama, and Tennessee and Alabama Central, and the Southern Central Railroads was held at Decatur, Ala., on the 26th ult., and a combination of the companies effected under the title of the Nashville and Decatur Railroad. It is understood that the new company propose pushing forward the line to Montgomery, Alabama, whence there is direct communication with the Gulf.

☞ The Chief Engineer of the Truro and Moncton railway has been instructed by telegraph from England to push forward the work vigorously. Truro is the western terminus of the Nova Scotia railway, and Moncton a point on the European and North American. When this road is built there will be a through route by rail from St. John, N. B., to Halifax, N. S.

☞ Railroad Companies in want of a Purchasing agent of character and experience, one thoroughly acquainted with the business and markets, and having unexceptionable references, will please address "H." Box 5,314, N. Y. Post Office.

☞ The board of directors of the Kent County (Md.) railroad is composed of the following gentlemen: Geo. Vickers, president; D. C. Blackiston, Thos. J. Shallcross, Isaac Parsons, Chas. Beaston, Thos. W. Eliason, W. B. Wilson and Wm. T. Spry. Treasurer, Richard Hynson.

☞ At a meeting of the stockholders of the Louisville and Nashville Railroad Company, held in Louisville on the 1st inst., the following gentlemen were elected directors for the ensuing year: James Guthrie, James B. Wilder, William B. Hamilton, H. D. Newcomb, R. A. Robinson, W. H. Smith, Jo. C. Gould. The stockholders voted in favor of the extension of the Lebanon Branch Road to the State line.

☞ The Nashville and Northwestern Railroad, connecting Nashville directly with St. Louis, is stated to be making rapid progress in its connection with the Mississippi River. The bridge at Johnsonville is in course of construction, and west of Johnsonville to Hickman, Kentucky, the grade is ready for the iron. It is thought that by January next passengers and freight will be put through.

☞ The following gentlemen have been chosen directors of the Dover and Winnepissiogee Railroad for the ensuing year: William Hill, William Hale, George W. Woodman, George M. Herring, John McDuffie, Samuel A. Walker and Amos Paul. The road is in a prosperous condition, the travel having increased about 30 per cent. over the previous year.

☞ The Philadelphia, Wilmington and Baltimore Railroad Company are now landing crossties and rails at Port Deposit, preparatory to laying the track of the branch road, connecting that town with Perryville. It is understood that the company intend laying the track forthwith.

☞ The Revenue of the Province of Canada for the month of September was $1,170,893 74; and the expenditure, $716,931 71.

New York, Saturday, October 20, 1866.

Virginia and Tennessee Railroad.

The annual meeting of this company was held in Lynchburg, Va., on the 11th inst. From the Report of the Directors which was presented, it appears that during the year ending 30th June last, the gross earnings of the road were $556,022 07; and its expenses of operating, building bridges, &c., $787,829 77. The road was not opened till July 24th, 1865, and all of its most important connections were not in running order till two-thirds of the fiscal year had ended. In addition to the several mortgage bonds of the road, which amount to $1,839,500, there is now due for coupons outstanding and not presented during the war and since, $362,160, making an aggregate funded debt of $2,550,782 55. For the payment of the bonds and coupons past due, the Legislature have authorized the issue of $600,000 bonds due in 34 years, and bearing 8 per cent. interest; these bonds will be issued in lieu of past due bonds and coupons. After the issue of this amount ($600,000) for past due bonds and coupons, and the sale of $400,000 of bonds authorized to be sold, the whole debt will be: Funded debt, $2,201,660; floating debt, $349,122 55; eight per cents to be issued $1,000,000—total, $3,550,782 55.

The company adopted a resolution in favor of consolidating the management of the railroads from Bristol, Tenn., to Norfolk, Va.

Debt and Resources of Virginia.

The credit of the State of Virginia has been somewhat damaged by the ill-advised and incorrect statements of her financial condition, which have appeared from time to time in different newspapers. In order, therefore, to correct, as far as possible, false impressions, and to place before the people of Virginia facts which they are entitled to know, we have investigated the subject for the purpose, giving them a reliable statement of our State finances:

In April, 1861, the public debt of Virginia amounted, in round numbers, to	$34,969,381 38
Interest on the same to July 1, 1865	5,071,337 29
Total debt of the Commonwealth, including interest, July 1, 1865.	$40,040,718 67

As no provision had been made up to this time by law for the payment of any portion of the interest on the State debt, and as the Legislature found upon assembling that all the State revenue that could be collected would not be more than sufficient to defray the ordinary expenses of the Government for the current year, no interest could be paid upon it. An act was therefore passed authorizing the funding of the interest due upon the State debt up to Jan. 1, 1867. Under this act not two millions has yet been funded. It is not probable that very much more will be funded until the act expires by limitation on Jan. 1, 1867. Then on the first day of January, 1867, the State debt will stand thus:

Public debt due April 1, 1861	$34,969,381 38
Interest on same to July 1, 1865	5,071,337 29
Interest on same from July 1, 1865, to Jan. 1, 1866	1,039,216 95
Interest from Jan. 1, 1866, to Jan. 1, 1867	2,078,433 90
Total amount of debt and interest due on Jan. 1, 1867	$43,158,369 52

The property of the State available as a set-off against this debt consists principally in the stocks and bonds of her various internal improvement companies. In all the railroads and canals lying in the State, Virginia owns a large and, in most cases, a controlling influence.

The State's interest in the capital stock of the several railroads is as follows:

The Alexandria, Loudoun and Hampshire, three-fifths; Fredericksburg and Gordonsville, three-fifths; Manassas Gap, three-fifths; Norfolk and Petersburg, five-sevenths; Orange and Alexandria, three-fifths; Richmond and York River, five-sevenths; Richmond and Petersburg, two-fifths; Richmond, Fredericksburg and Potomac, two-fifths; Richmond and Danville, three-fifths; Southside, three-fifths; Virginia and Tennessee, three-fifths; Virginia Central, three-fifths; Virginia and Kentucky, three-fifths.

In some of the less important roads her interest is greater. In the Blue Ridge and in the Covington and Ohio she owns the whole of the stock. She has already expended $3,000,000 on the construction of the Covington and Ohio Railroad.

The great problem is how to make these assets serve to extinguish their value of the State debt. We have heard that North Carolina has taken measures to exchange her railroad stocks for State stocks, but with the exact method by which this is to be accomplished we are not informed. Insurmountable difficulties seem to stand in the way of its accomplishment, however much it may be desired. If the State should throw her railroad stocks and bonds on the market, and attempt to sell them, they would depreciate enormously in value—and they are already low enough—while the calling in her own bonds with the proceeds of the sale, would increase their value, and Virginia would lose greatly by both the selling and the buying.

The value of the State stock is now about 43 cents on the dollar. Since the surrender of Gen. Lee they have been at different times as low as 35, and as high as 46. There are but two railroads in the State whose stock is as high as this, as will be seen by the following:

Orange and Alexandria	18
Richmond and Petersburg	40
Richmond, Fredericksburg and Potomac	60
Richmond and Danville	45
Virginia and Tennessee	20
Virginia Central	25
James River and Kanawha Canal	9

That it is a desirable thing to use these stocks—now no source of revenue—for the purpose of canceling a part of the State debt on which we pay a heavy interest, seems to be beyond question—but the method of doing it will be one of the most troublesome questions before the next session of the Legislature.

There is a strip of timber land belonging to the State lying principally along the Atlantic coast below Cape Henry, that was surveyed last Spring, and will be sold this Fall. It contains a little over forty thousand acres. It is very poor land, bordering on the sea and the desert, and is chiefly valuable for the fine timber growing on part of it, and for its valuable fisheries. It will probably

bring something under two hundred thousand dollars.

The State of Virginia will require for the expenses of the year beginning Jan. 1, 1867, including the interest of the State debt, $3,409,483 48.

As things stand now, the whole of this debt rests upon us, and none upon the State of West Virginia. At the last session of the Legislature, Commissioners were appointed to confer with other Commissioners to be appointed by the State of West Virginia, which were to constitute a body empowered to apportion the debt justly between the two States. West Virginia, however, failed to appoint Commissioners to confer with ours, and nothing, therefore, has been done. Some action will probably be taken at the next session of the Legislature of West Virginia.—*Richmond Times, Oct.* 10.

Receipts and Expenditures of the United States.

The Receipts and Expenditures of the United States Government for the fiscal year ending June 30, 1866, have been as follows:

Receipts:		
From Customs		$179,046,630 64
" Public Lands		665,031 03
" Direct Tax		1,974,754 12
" Internal Revenue		309,226,812 81
" Miscellaneous		65,125,966 46
Total		$556,039,195 06
Expenditures, viz:		
Civil, Foreign and Miscellaneous	$41,049,965 96	
Pensions and Indians	16,253,300 44	
War	284,449,701 82	
Navy	43,519,632 21	
		385,272,600 43
Balance applicable to payment of interest on Public Debt		$170,766,594 63
Interest		133,074,737 27
Excess of receipts		$37,691,857 36

But this excess of receipts does not show the capacity of the country to pay off its debts, for it all occurred in the last few months of the year. By the annexed statement it will be seen that the expenditures of the War Department, which in the first quarter of the fiscal year, (July 1 to September 30, 1865) were $165,369,237 32, dwindled down in the last quarter (April 1 to June 30, 1866) to $12,744,022 69; and those of the Navy from $16,520,669 81 in the first quarter to $9,218,474 in the fourth. The expenditures of the War Department during the current year would be over $240,000,000 less than those of the past, were it not for the equalization bounties bill. As compared with the fiscal year ending June 30, 1865, we find in the past year an increase of receipts from internal revenue of $100,000,000, and of customs of $95,000,000; while there has been a diminution of expenses for war of over $75,000,000 and for the navy of $80,000,000. The year ending December 31, 1865, showed a deficiency of $619,000,000; six months after that time, the year ending June 30, 1866, showed an excess of receipts over expenditures of $37,691,857 30. The cash on hand June 30, 1866, amounted to $130,669,815 19; on the 30th of June, 1865, it was $858,309 15—showing an increase of $129,811,506 04. If the gold in the National vaults, estimated in the foregoing figures at par, were expressed in currency figures, it would show a balance on hand at the end of the year of over $160,000,000.

The following is a statement in detail of the Receipts and Expenditures for the fiscal year ending June 30, 1866:

RECEIPTS.		
From Customs:		
Quarter ending Sept. 30		$47,009,583 03
Quarter ending Dec. 31		39,216,338 39
Quarter ending March 31		46,645,597 88
Quarter ending June 30		46,175,151 39
Total		$179,046,630 64
From Public Lands:		
First quarter		132,890 63
Second quarter		175,245 56
Third quarter		180,175 21
Fourth quarter		176,719 63
Total		$665,031 03
From Direct Tax:		
First quarter		31,111 30
Second quarter		368,843 31
Third quarter		1,086,163 44
Fourth quarter		488,636 07
Total		$1,974,754 12
Internal Revenue:		
First quarter		96,618,885 65
Second quarter		82,597,156 93
Third quarter		66,153,031 31
Fourth quarter		63,857,738 93
Total		$309,226,812 81
Miscellaneous:		
First quarter		18,393,729 94
Second quarter		17,515,705 56
Third quarter		10,874,024 30
Fourth quarter		18,342,516 66
Total		$65,125,966 46
EXPENDITURES.		
Civil, foreign, and miscellaneous:		
First quarter		10,571,460 99
Second quarter		9,377,132 25
Third quarter		9,248,033 17
Fourth quarter		11,853,339 55
Total		$41,049,965 96
Pensions and Indians:		
First quarter		6,024,241 86
Second quarter		1,437,629 52
Third quarter		5,808,127 04
Fourth quarter		2,983,302 02
Total		$16,253,300 44
War:		
First quarter		165,369,237 32
Second quarter		68,122,541 65
Third quarter		38,213,900 16
Fourth quarter		12,744,022 69
Total		$284,449,701 82
Navy:		
First quarter		16,520,669 81
Second quarter		10,341,555 68
Third quarter		7,438,932 28
Fourth quarter		9,218,474 44
Total		$43,519,632 21
Interest:		
First quarter		36,173,481 50
Second quarter		39,721,527 37
Third quarter		30,024,447 51
Fourth quarter		36,155,280 89
Total		$133,074,737 27

The total disbursements of the War, Navy and Interior Departments for the 1st quarter of the present fiscal year (July 1 to September 30, 1866,) have been $14,261,244 99—an average per month of $4,753,748. In 1865–'66, the same expenditures averaged during the entire year $32,106,050 per month; in 1864–'65, $101,076,333; in 1863–'64, $67,629,083; in 1862–'63 $57,498,333.

Dubuque and Sioux City Railroad.

The earnings of the first division of this road (100 miles) for the year ending December 31st, 1865, were:

From passengers		$173,476 32
" freight		431,199 98
" express		6,992 80
" mail		6,242 00
" miscellaneous		293 94
		$618,205 04
Expenses, viz:		
Repairs of road	$159,898 32	
" buildings	15,655 83	
" engines	30,113 53	
" cars	30,007 23	
" fences	5,666 11	
Agents and clerks	48,200 09	
Stores for stations and stationery	9,106 85	
Train hands	12,845 22	
Locomotive running	69,647 50	
Loss and damage	3,978 31	
Elevation of grain	21,852 61	
Telegraph supplies and repairs	3,446 00	
Interest and exchange	12,033 10	
New engines	6,843 33	
Insurance	2,315 70	
Miscellaneous	5,633 49	
		437,243 22
Earnings less expenses		$180,961 82

Of the above expenses, $408,838 25 are classed as ordinary, and $32,404 97 as extraordinary expenses and renewals. Deducting from the above the amount paid for State and Federal Taxes, $20,796 09, and the sum remaining applicable to the payment of interest and dividends is $160,165 73.

The following table shows the gross earnings of the 1st division of the road for each year since it was opened:

	Length of road.	Earnings.	Increase over previous year.
1858	37 miles	$62,519 68	$
1859	37 "	58,620 19	
1860	80 "	121,025 95	62,405 76
1861	100 "	199,410 11	78,384 16
1862	100 "	228,559 53	29,149 42
1863	100 "	276,197 40	47,637 87
1864	100 "	412,155 71	135,958 31
1865	100 "	618,205 04	206,049 33

The gross earnings of the 2d division, (an average of 12 miles) in 1865, were:

From passengers	$7,805 90
" freight	9,906 94
" express	551 82
	$17,764 16
Operating expenses and taxes	13,337 41
Leaving a balance of	$4,426 75

The total earnings of both divisions (average length 112 miles) in 1865, were $635,969 20. The average earnings per mile in 1865, were $5,878 29, against an average of $4,121 55 in 1864. Number of passengers carried in 1864, 67,241; do., in 1865, 98,934. Tons of freight carried in 1864, 80,036; do., in 1865, 115,112. The Report says:

The cost of operating the traffic of the second division, and of the Cedar Falls and Minnesota

Railroad, have not yet been charged to their several accounts, but will be as soon as the terms for doing such service are agreed on, which, when added to the earnings of the 1st division, will increase them.

The great freshet in June last injured, more or less, nearly every bridge and culvert on the line, and stopped our through traffic for one month, in consequence of which our earnings were much lessened, and our expenses largely increased.

The second division was opened for traffic to New Hartford on 1st June last; to Parkersburg on 26th same month; to Aplington on 2d August, and to Ackley on 19th October, which last station is the terminus of the road this winter. The length of road now in operation is 132 miles.

It is expected the contractor will have the iron laid to Iowa Falls in March, and it is hoped that about 1st May, the road will be open for traffic to that station, which will make 144 miles of road from Dubuque.

From 1st January, it will take about $60,000 to pay the contractor for completion of his contract, and for building depot and temporary engine house at Iowa Falls.

When we reach this point, our earnings may be expected to increase considerably, as we then can compete for the business from Fort Dodge and Sioux City, and the territory tributary to those places.

Traffic on this road is heaviest from July to December. Last fall we could scarcely do more than half the freight business offered, because of the limited equipment of the road, and persons anxious to find another exit to market, attempted to project other railroads.

The prospects of this road are very bright, as it runs through a prairie country, remarkable for its fertility and the healthiness of its climate; and the success of this enterprise is without a shadow of a doubt, if a proper expenditure is made in increasing its equipment, and furnishing other facilities much needed for doing a fast increasing business.

Every succeeding year must show an increase of traffic, if the road can only give the accommodation required.

We received in August last two new locomotives, and built at the company's shop two passenger cars, one baggage car, and two way cars, making our present equipment as follows, viz: 13 locomotives, 9 passenger, 3 baggage, 2 mail and express, 81 box freight, 20 stock, 38 platform, and 7 way cars.

Our passenger traffic has increased very much, and we should have two more passenger cars, and one mail and express car to accommodate this business during the next year.

Mileage of locomotives for the year, 282,384 miles.

Four new locomotives and fifty freight cars have been ordered to be delivered in the Spring, which will assist very much in adding to our earnings.

We are in great need of an increase to our shops and machinery for repairing locomotives and cars. What we have at present was only intended to keep six locomotives in repair. Now we have 13 locomotives, and we cannot keep them in good working order for want of means to do so. When we get the four which are ordered, we will have 17 locomotives, and it will be impossible to keep them in repair without the increase of both shops and tools. If our car shops were enlarged, we could build much cheaper and better cars than we can buy.

We also very much need an enlargement of the depot grounds and tracks in Dubuque, they being totally inadequate to our business.

A large proportion of the track is in excellent condition, but there are portions of it which need new iron, new ties, ditching and ballasting. The iron on the first 30 miles is nine years in use, and is much battered and worn, and has arrived at that state when deterioration goes on rapidly. Six hundred tons guaranteed new rails will require to be purchased early in the season to put this part of the track in order for next winter.

The damage done by the freshet caused large additional expenses; and we have renewed and repaired many bridges during the past season.

Several bridges and trestle works will require to be renewed, and others to be repaired and protected in 1866.

The track on the second division will require some expenditure to put it in fit condition for the regular running of trains. Portions of it will require to be ballasted and ditched.

Depots have been built at New Hartford, Parkersburg and Ackley. One is in an advanced state of construction at Iowa Falls, and will be ready as soon as required.

The markets for produce became very dull in December. Some predict a continuation of low prices in 1866, and consequently a falling off in railroad receipts generally; but I am confidently of opinion that if we receive the locomotives and cars ordered, that the earnings of 1866 will show a healthy increase over last year.

As our traffic increases, we will need additional room for elevation of grain. I would strongly recommend that arrangements be made for the building of another elevator. It should be about 500 feet distant from the present one, as security against fire.

A road has been projected from Ackley, on our line, to the coal mines at Eldora, in Hardin county, a distance of sixteen miles. When this road will be built, it will add largely to our traffic by hauling coal to Dubuque and other stations.

The Cedar Falls and Minnesota Railroad Company have now 14 miles of their road built. It connects with this road about 98 miles from Dubuque, and has proved during the past year a valuable feeder. If arrangements can be made with that company, for its immediate extension to the State line, and for lease on favorable terms, I would strongly recommend that such be done.

The second division of the road was completed to Iowa Falls, a distance of 44 miles, in April last, and regular trains commenced running to that point about the 1st of May. The depot at Iowa Falls was also completed and ready for occupation about the middle of April. By the extension of the road to Iowa Falls, the company became entitled to 153,600 acres of land, as provided by the Land Grant Act.

INCOME ACCOUNT.

Balance January 1, 1865	$102,314 68
Earnings for 1865, as above	618,205 04
	$720,519 72
Expenses—ordinary	$408.838 25
" extraordinary	32,404 97
State tax for 1864	3,982 38
United States taxes	16,813 71
Coupons 1st mortgage bonds	22,225 00
One half of coupons' Construction bonds, due Jan. 1, 1866	11.550 00
Dividends for 1864	75,482 54
Balance	153,222 87
	$720,519 72

The income for the year 1865, as above, was $618,205 04; expenses, taxes and coupons, $491,-814 31—leaving a balance subject to dividend of $126,390 73.

Net earnings, 2d division	4,426 75
Income account, balance	153,222 87
	$5,243,316 26

The officers chosen in February, 1866, are as follows:

President.—M. K. JESUP.

Directors.—Charles L. Frost, James Robb, H. L. Stout, Fred. Schuchardt, Isaac H. Knox, Platt Smith, M. K. Jesup, L. P. Morton and D. Willis James.

Vice President.—PLATT SMITH.

Secretary and Treasurer.—LOUIS BOISOT.

Gen'l Manager.—THOMAS WARNOCK.

Superintendent.—J. P. FARLEY.

Interest and Dividends.

The Baltimore and Ohio Railroad Company has declared a dividend of 4 per cent. on the stock of the Main Stem, payable on and after the 23d instant; also a dividend of 5 per cent. on the stock of the Washington Branch for the half year ending 30th ult., payable on and after 16th instant. United States tax paid by the company.

The Cinninnati, Hamilton and Dayton Railroad Company have declared a dividend of five per cent., in stock, free of tax, payable on or after the 25th inst., provided that all fractional parts be paid in cash, at the rate of four per cent.

Ohio and Mississippi Railroad.

An arrangement has been concluded between the Indianapolis and Cincinnati and Ohio and Mississippi Railroad Companies, under which a third rail is being laid between North Bend and Lawrenceburg, at the expense of the latter company, who are to have the use of the track between those points for general transportation purposes, until they shall have renewed their bridge across the Miami River, which will require several months to complete. The track will be ready for use next week. As a part of the consideration for this, the Ohio and Mississippi Railroad Company withdraw their suit against the Indianapolis and Cincinnati Railroad Company and cancel the contract on which that suit was based, releasing the latter company from all claims under it.

☞ The contract for the construction of so much of the Newark and New York Railroad as lies between the Hackensack and Hudson Rivers, was awarded on the 12th inst., to Messrs. Lee & Huston at present contractors on the Morris and Essex extension.

Manassas Gap Railroad.

We are informed that the Baltimore and Ohio Railroad Company offer to take the Manassas Gap railroad and put it in running order, but that the Manassas company refuse (through Mr. Marshal, its president,) to allow them to touch it until they are paid about $850,000 in advance of the cost of building the road to its present condition. The Legislature should compel the Manassas company either to make such an exhibit of its financial condition as will show conclusively their ability to put the road in running order up to Harrisonburg by the following September, and to commence the work at once, and in earnest, or else accede to the fair proposition of the Baltimore and Ohio Railroad Company as will be equitable

between the two corporations. The road is already graded up to this point, and the rails are laid from Strasburg to Timberville, in the lower end of Rockingham county, leaving a distance of about eighteen miles to lay the ties and put the iron upon them; then, with the building of some bridges we will have a road from here to Strasburg, and by the time it is completed from here to the latter place, the Baltimore and Ohio Company will have a branch road from Strasburg to Winchester finished.—*Harrisonburg Commonwealth.*

Troy and Boston Railroad.

This road is 34.91 miles in length, extending from Troy to the Vermont State Line. The length of double track, including sidings, is 7.48 miles. The weight of rail per yard, 58 to 65 lbs. The equipment consists of 13 locomotives, 10 first class and 1 second class passenger, 6 baggage mail and express, and 185 freight cars. The following statements embrace also the operations of the Troy and Bennington, Western Vermont, Southern Vermont, and Troy and Greenfield railroads—the total length of line operated being 112 miles. The four last named roads are leased and operated by the Troy and Boston Railroad Company.

The following is a comparative statement of the receipts and expenditures for the fiscal years ending September 30, 1864 and 1865:

Receipts:	1864.	1865.
From passengers	$235,489 93	$321,976 99
" freight	319,543 25	313,677 68
" mail	10,862 50	10,862 50
" express	7,400 00	12,000 00
" newsman	150 00	200 00
Totals	$573,445 68	$658,717 17
Payments, other than for construction:		
Transportation exp,	$311,518 56	$378,657 23
Interest	132,385 73	127,389 58
Rents	74,500 00	71,400 00
Internal revenue	6,773 03	21,123 97
Hire of cars	9,936 35	6,994 97
Totals	$535,063 67	$605,565 75

The earnings of the road in the years named were as follows:

The number of miles run by passenger trains in 1865, was 175,452; by freight trains, 221,374—total, 396,826, against 372,270 in 1864—an increase of 24,556. Number of passengers carried in 1865, 258,742; do., carried one mile, 8,177,790. In 1864, the number carried was 246,111, and the mileage of do., 5,432,227—showing an increase in passengers of 12,631, and in mileage of 2,745,563. The number of tons of freight carried in 1865, was 150,711; and the mileage of do., 6,616,997. In 1864 the tonnage was 188,828; and the mileage, of do., 8,223,598, showing a decrease in tonnage of 38,117, and in mileage of 1,606,592.

Utica and Black River Railroad.

This road is 34.94 miles in length, extending from Utica to Boonville. It has 2.59 miles of second track and sidings. Weight of rail per yard, 58 to 61 lbs. The equipment consists of 5 engines, 7 passenger, 2 baggage, mail and express, and 54 freight cars. The length of main line of road from Utica to Philadelphia, N. Y., is 86.25 miles, of which only 34.94 miles is laid.

The following is a comparative statement of the receipts and expenditures for the fiscal years ending September 30, 1864 and 1865:

Receipts:	1864.	1865.
From passengers	$59,810 91	$71,076 74
" freight	47,514 39	58,448 23

The number of miles run by passenger and freight trains in 1865, was 33,568, against 33,822 in 1864, showing a decrease of 260. Number of passengers carried in 1865, 86,245; do., carried one mile, 1,904,671. In 1864 the number carried was 76,076, and the mileage of do., 1,646,044—an increase in passengers of 10,169, and in mileage of 258,627. The number of tons of freight carried in 1865, was 20,543, and the mileage, of do., 546,538. In 1864 the tonnage was 28,614, and the mileage, 640,542—a decrease of 3,071 in tonnage, and in mileage of 94,004.

☞ The proposition to build a railroad from Mansfield to Framingham, Mass., on the Boston and Worcester Railroad, is receiving considerable attention. Surveys have been made, and a meeting of parties interested has been held. The road will be 20 miles long, and will probably pass through Foxboro', South Walpole, Medfield and Sherburne Centre. Estimated cost $471,000.

Improved Suspension Car Truck.

Cases have been known where a train of cars has been lifted bodily from the track by a tornado, and accidents have occurred which were attributed to the top-heaviness of cars, owing to their elevation from the track and the narrowness of their bases in the spread of the wheels. This improved

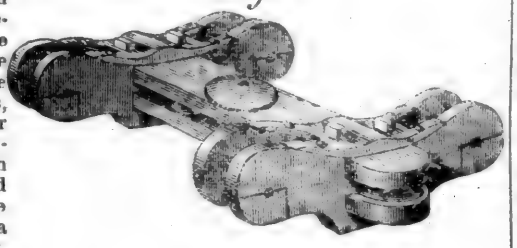
Fig. 1

STRAIT'S SUSPENSION CAR TRUCK.

truck is intended to bring the weight of the car nearer the track than is possible in the ordinary truck, to facilitate the ingress and egress of passengers, the loading and unloading of freight, to admit of the use of wheels larger than those commonly employed, and to allow independent action of the wheels on either side of the car.

Fig. 1 is a perspective view of a single truck. It will be seen that the body of the truck is suspended beneath the centre of the axle, thus bringing the car bottom so much nearer the rails. The wheels run in brackets, A, which are connected by double cross-ties, B. Between the upper and lower portions of the cross-ties, springs of rubber, or other suitable material, are interposed, and the whole frame is braced and made solid by longitudinal ties, C. The rubbers, D, are intended to run near the rail for the purpose of clearing obstructions from the track, and securing the cars on the track if by any means the wheels should be lifted from their places. To further secure this object, the wheels can be made with a light outer lip, as shown in the engraving. This is practicable in this truck, as the wheels move independently of one another on short axes.

Fig. 2



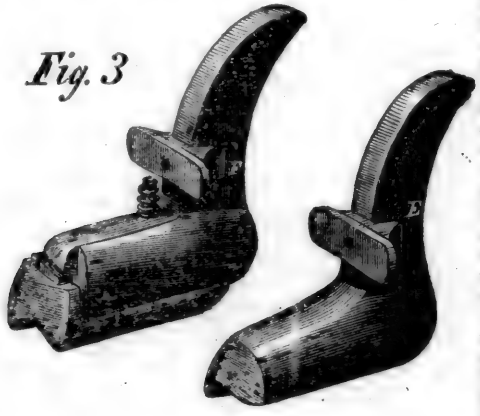


Fig. 2 shows a double truck intended for four wheels. Its plan of construction will be readily understood by the engraving without reference to its parts. Fig. 3 represents rubbers or guides to be attached to the double truck, projecting in front and in rear of the wheels. E is a fixed rubber at the rear of the wheel, and F an adjustable rubber, which can be raised or lowered at will by means of a bolt and spring.

Fig. 3

With these trucks the cars can fall but a short distance in case of collision, or running off the track. Larger car wheels may be used with greater speed and safety than with the ordinary truck, as the weight is suspended so near the rails. The truck may be attached to the car in the usual way or so that the wheels may work in wheel houses inside the car or in recesses outside, so that the car may be made wider, or consist of two stories. It is claimed that the wheels, being on independent axles, are subjected to much less wear and tear in rounding curves than where both of a pair of wheels are secured to the same axle. Patented May 1, 1866, by H. STRAIT, 66 East Pearl Street, Cincinnati, Ohio, whom address for further information.

☞ The Union Pacific railway, Eastern Division, was opened on the 15th inst., to Fort Riley, a prominent government post on the Plains, 418 miles west of St. Louis, and 135 miles west of the Missouri river at Kansas City.

☞ The first train passed over the section of the Nova Scotia Railway between New Glasgow and Fisher's Grant, or Pictou Harbor, a distance of eight or nine miles, on Saturday last. S. Fleming is the contractor.

Portland and Rochester Railroad.

The annual meeting of this company was held in Portland on the 3d inst. The following officers were elected :—N. L. Woodbury, President ; Chas. Q. Clapp, Wm. Kimball, John Lynch, A. K. Shurtleff, H. P. Deane, Portland ; Levi Morrill, Westbrook ; Frederick Robie, Gorham ; John M Duffie, Rochester, N. H., Directors. The report of the directors shows a large increase of business during the past year. The present company received possession of the road Nov. 15, 1865, from which time to Sept 1st. the receipts have been $36,562 41, and the expenses $32,602 32. During the same months in 1851 and 1852, when the road was new, the earnings were $9,982 14, and running expenses, $7,955 09.

This road is 26 miles in length, extending from a point on the Portland, Saco and Portsmouth Railroad, 41 miles from Portland, and running *via* South Berwick, Salmon Falls, Great Falls, Rochester, etc., to Union Village. The capital has been fixed at $370,000, including bonds to the amount of $200,000. The road is operated by the Eastern Railroad Company.

Michigan Southern and Northern Indiana Railroad.

It is stated that the suit brought by guaranteed stockholders, has been settled at the request of the plaintiffs, who preferred the very reasonable terms offered to all guaranteed stockholders to litigation. The injunction against a dividend upon the common shares of course falls with the suit, and as the $800,000 of bonds held by the company for dividend purposes have been sold, there is now no apparent obstacle against the resumption of dividends in the opinion of parties dealing in the stock.

Union Pacific Railroad.

We learn from Washington that it has been decided that, as the Union Pacific Railroad Company has completed the seventh section of its railroad, thirty-five miles in length, and has complied with all the requirements of law, it is entitled to $560,000 United States bonds, being $160,000 per mile for the said thirty-five miles. The bonds bear date October 13, 1866. This section reaches from the two hundred and fifth to the two hundred and fortieth mile-post.

☞ The Philadelphia *Ledger*, of 16th inst., says the November dividend of the Pennsylvania railroad will "be announced towards the close of the present month, and an impression prevails that it will be 4 instead 5 per cent., as heretofore. The company has done, and is doing, a very large business, but the profits, from various causes, are less. A 5 per cent. dividend on the capital of the company is a million of dollars, consequently 4 per cent. will be two hundred thousand less."

☞ Work on the tunnel under the Chicago River has been commenced, and it is expected to be opened for travel in a year from next March.

☞ The Horse Railway has proved so great a success in Halifax that the proprietor intends extending it to sections of the City through which it does not now pass.

☞ The Florida railroad, extending from Amelia Island to Cedar Keys, one hundred and fifty-four miles, its franchise, workshops and equipments, is to be sold on the 1st of November next to the highest bidder.
